PROCEEDINGS AND DEBATES OF THE 98th CONGRESS, FIRST SESSION

SENATE—*Thursday, July 28, 1983*

(Legislative day of Monday, July 25, 1983)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious God, our Heavenly Father, Thou hast lavishly endowed our land and our people. We have so much for which to be thankful. Forgive us for so easily accepting manifold blessings such as health, family love, friendships. We so often take these gifts for granted until we lose them, and then we so often complain. Teach us gratitude, Lord—gratitude for our land, rich in mineral wealth, beautiful mountains and valleys, rivers, lakes, and streams, forests and plains and deserts.

Teach us gratitude for each other. We so commonly withhold appreciation until a friend is gone, and then we eulogize over a casket. May we take seriously the Biblical exhortation, "Render, therefore, to all their due: tribute to whom tribute is due; custom to whom custom, honor to whom honor. Owe no man anything but to love one another * * *". (Romans 13: 7,8). In the name of Him who is incarnate love. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

SENATE SCHEDULE

Mr. BAKER. Mr. President, this morning, there will be a period for the transaction of routine morning business after the execution of the two special orders. The Senate will then resume consideration of the motion to proceed to the consideration of H.R. 2733, the agriculture target price bill.

Senators should note that I intend to pursue that bill, and that we will perhaps let a good part of this day be devoted to that motion, if necessary. The yeas and nays have been ordered on the motion. Rollcall votes may occur early today. No one should assume that this is a half-hearted effort.

Mr. President, there are other matters we need to take up. I have indicated on other occasions that I would like to pursue my conversations and colloquy with the minority leader on how we might reach some of them. There is Radio Marti, for example, and the supplemental conference report, which I understand will probably not reach us until tomorrow. Senators should be on notice that we will be in tomorrow and that it is the intention of the leadership on this side to take up the supplemental conference report as soon as it is received.

I fully expect votes on Friday. As of now, I do not foresee the likelihood of a Saturday session, but I do expect Friday to be a regular and full day of legislative action.

Mr. President, we will take up other matters as we free them up, including conference reports. There will be at least one additional conference report available either tomorrow or Monday. And, we have an appropriation bill that I would like to free from its bondage—the Interior appropriations bill.

I urge Senators who are concerned about certain aspects of that bill to try once more to work out their differences or at least to agree on a time limitation for debate on that measure. I will consult with the minority leader on this throughout the day as well.

Mr. President, unless we hit a snag, or unless there is some urgent emergency, and I do not see that as a prospect at this time, I fully expect the Senate to be able to adjourn on August 5. It is the regular every-other-year August recess provided for by statute.

Mr. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. Yes, I am happy to yield.

Mr. BYRD. Mr. President, I have not discussed this with the majority leader. I have not had the opportunity to do that, though I have intended to do it. It is a question that we should deal with. It pertains to the recess.

Heretofore, when we have had the August recess, we have put some language into the adjournment resolution which provides a way whereby the Congress may call itself back if there is a national emergency that would justify such action. In some instances, it is the Speaker of the House and the President pro tempore of the Senate, or the majority leaders of both Houses. There have been various phrases used over the years.

My question is, Would it be the intention of the majority leader to have such language? May I say, I called the Speaker last evening and suggested to him that there be such language in view of the situation in Central America. I have a feeling that if the adjournment resolution is initiated on the other side, it will have some such language. If it is originated over here, would it be the intention of the majority leader to have some such langauge?

Mr. BAKER. Mr. President, in all candor, I will say to the minority leader I have not thought about that, but I will. It is a good point that he and I should discuss, but it is not one I have focused on thus far.

Let me reserve any further response until I have had an opportunity to think about it and consult with the minority leader.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. Mr. President, I reserve 1 minute of my time remaining under the standing order. I yield the floor.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

CENTRAL AMERICA—THE NEED FOR INFORMATION

Mr. BYRD. Mr. President, the President in his televised news conference this week, said this with reference to the so-called military exercises which are underway in Central America and the area thereof:

> First of all, these maneuvers . . . are not going to put Americans in any reasonable proximity to the border.

In today's Washington Post, I will quote from the story on page 22, carried over under the headline "Exercises Described As Way To Protect Honduras From War" the following:

> Today more than 87 additional U.S. advisers arrived here in the capital to start planning the massive joint maneuvers scheduled here in coming months. The first of these operations, according to U.S. military officials, will take place in the province of Choluteca which borders on Nicaragua.

Mr. President, we have a dichotomy with respect to whether or not Americans are going to be placed in a dangerous position when the President says first of all "those maneuvers are not going to put Americans in any reasonable proximity to the border," and then in the Washington Post it says,

> The first of these operations, according to U.S. military officials, will take place in the Province of Choluteca, which borders on Nicaragua.

There seem to be some divergent viewpoints expressed first by the President and then as reported by the Post. Whom are we to believe?

Are we to believe the President? Does he feel that this particular province is not in close proximity to the border? The contrary is reported in the press.

Mr. President, I think we ought to be kept advised as to precisely what is going on, if the President is going to have support for his policy, if there is going to be a consensus, if the American people are to support his policy. I believe there was something in his speech which indicated that the American people, those who were informed of what is going on, are supportive of his policy. I cannot understand how the American people can be informed except for the news media. That is precisely where I have gotten my information thus far—from the news media.

The President, in his remarks during the press conference, also implied that Congress is being kept apprised of the actions of the administration. I quote his words:

> Well, I think it would be a very, very grave mistake if the legislature interfered with what we're trying to do and we're trying to keep them apprised of our actions.

Mr. President, Mr. Reagan may believe that. I do not say that the President was not sincere in thinking that Congress is being kept apprised, but, indeed, Congress is not, except through the news media.

The majority leader was able to arrange a little briefing on the fourth floor on this side of the Capitol yesterday. I compliment the majority leader, and I thank him for arranging the meeting. He did the best he could. It was only a 30-minute briefing, but it was better to have that than none at all. In that briefing, I quoted what the President had said in his news conference to the effect that Congress is being kept apprised. I said, "If anybody in this room is being kept apprised, either Republican or Democrat, hold up your hand." Not one person held up his hand. It was also reported during that conference that the Speaker and the leadership of the House are not being kept apprised.

So it was the suggestion of the Senate majority leader to Judge Clark, who reportedly has access at any time to the Oval Office, that Senators have briefings on a regular basis. The majority leader referred to the briefings, which used to occur in my office, given by Mr. Warren Christopher anent happenings in Iran with respect to Americans who were being held hostage there. They were regular briefings that were held for the benefit of the joint leadership, Republicans and Democrats. The majority leader suggested that this administration follow the same course. I think it was a good suggestion.

But I say again, as I said yesterday or the day before, Mr. President, that if there is to be support for the President's policies, the American people are going to have to have more information than they have now. They are entitled to that information, and Congress is entitled to it. If we hope to make any sensible judgments, we are going to have to have information that is accurate and adequate upon which to base them.

Mr. President, I am not concerned about the argument as to "who lost" this or "who lost" that or who lost El Salvador. I think to put the question in that context is being politically crass. It may be that we ought to do this or we ought to do that, but whatever we do, it ought to be in the best interests of the United States. Whatever, is in the best interests of the United States, I want to support. But I want adequate information, I want to be assured that I have adequate information and accurate information, before I take a position that might later lead to bloodshed on the part of Americans who could be sent to that region of the world.

So, Mr. President, I hope we shall be given appropriate information through proper consultation.

It came as a surprise to me to find that the President's own party on Capitol Hill is not being kept apprised. I was amazed when I heard the President indicate that Congress is being kept advised. Perhaps he thought he was stating the facts. He may be unaware that Congress is not being kept apprised. But if he is unaware, that is almost as bad as knowing that we are not being kept apprised and saying just the opposite, because I should think he would see to it that Congress is being kept apprised. It does not have to be I, but somebody on this Hill ought to be kept apprised. I told President Carter once:

> It does not have to be I, but there are people up on that Hill who can keep secrets just as well as anybody here in the White House or anybody in the Pentagon.

I once said to President Carter, "Mr. President, your wife Rosalynn will tell this before I do." He had taken me into his confidence with respect to the Iranian hostage situation. I was not informed that the operation was at that moment going forward.

So there are people in Congress who can keep secrets. There are people in both parties, I am sure, who are just as patriotic and who have at heart the interests of the United States as much as anybody in this administration or any other administration. And until Congress is consulted, I am going to continue to raise the question and I am sure the majority leader, based on my observations of his work and my familiarity with his nature and position on matters, is not going to be satisfied until there is proper consultation with somebody on his side. If consultation is to be with the ranking members and the chairmen of the Foreign Relations Committee, the Armed Services Committee, and the Intelligence Committee, that is all right with me.

But I happen to think that the leadership of both parties is expected by our colleagues on both sides of the aisle to be likewise apprised.

So having said that, I will save for another occasion any further remarks on this subject.

If I have any time left, Mr. President, I yield it to the majority leader.

Mr. BAKER. I thank the minority leader.

Mr. BAKER addressed the Chair.

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

Mr. President, I listened with great care and interest to the remarks of the minority leader. It will come as no surprise to Members of the Senate when I say that he and I have discussed this before. I understand his views and, indeed, I am sympathetic to many of them.

I do not mean to be unduly philosophical about it, but I have always thought one of the great values, one of the great virtues of the Constitution was that it was intentionally left fuzzy on some points.

Nobody ever quite explained to the country what it meant when it said

that the Senate had a special role to play in foreign policy or that the President was the chief officer of foreign policy.

Those are not the words of the Constitution, but that is what it meant. But we have overlapping jurisdiction, just as the Court has overlapping jurisdiction in that it can strike down legislation that we pass or the Congress or the President can disapprove. It is a magnificent hodgepodge, and it was built that way. We have to live with it. And we continue to establish precedents in those fields that are not clearly defined.

One of those imprecisions is, what is the role of the Senate in foreign policy. As in so many cases, I can tell you what it is not. It is not our role to dispatch troops to a foreign country or to order a battleship into hostile waters. But it certainly is something short of being totally oblivious and unconcerned in those things, and someplace in between those two priorities is what the Founding Fathers meant, I am sure, and it is up to us to sort of determine from time to time under the circumstances.

I listened with great interest to the remarks made by the minority leader, I assume, about the situation in Iran. I would trust the minority leader with the information whether I was President, Senator, or private citizen. I have absolute confidence in him, and President Carter was not disserviced in that, but I would remark he did not tell me and I was the minority leader.

Mr. BYRD. Will the Senator yield? I said to the President, "If at some point there is a decision to undertake a rescue operation, I would suggest that you get HOWARD BAKER down here, tell him how critical this matter is and the information, and I am confident he will keep it in trust."

Mr. BAKER. I have no doubt of that.

Mr. BYRD. "And furthermore, he would be the one to advise as to any others on that side of the aisle who should be taken into confidence."

Mr. BAKER. I have no doubt of that. And the point I was reaching for and about to reach did not relate really to that episode but, rather, to say we are playing this game from incident to incident, how Presidents confide in the leadership of one or the other of the two sides of the aisle or the chairman of the Armed Services Committee or Foreign Relations. I know of instances that represent every one of those things I have just said, where Presidents have confided in a particular Member, but I also, unfortunately, know of cases where Presidents of both parties have not confided in anybody as far as I could tell. So once again, we are sort of defining what the role is.

Let me say briefly what I think the role should be. The role should be that the Senate does have a constitutional responsibility in the field of foreign policy and national defense. One that should be before the fact and not after the fact. It does not mean the President should share with us every piece of intelligence he has or every plan he considers or every operation that he may initiate. But, it does mean that those situations that do have profound implications, should be investigated by the Senate before the fact.

It also means, Mr. President, that there should be an opportunity not just to hear and understand but also to suggest and propose. The President, of course, is free to reject if he wishes.

It means, Mr. President, that there needs to be some sort of formal arrangement, if not in the Constitution—at least by practice and tradition.

So I made the suggestion that the minority leader speaks of as much in an effort to regularize this messy business as it was to meet the exigencies of this particular situation.

I intend to pursue that suggestion with the President and the Secretary of State and with the President's national security adviser.

To summarize, that suggestion is that there be some sort of weekly or at least periodic briefing for the leadership of the Senate on national defense and foreign policy issues. They may be routine and last a minute or they may be extensive and last a long time. It may be just the two leaders or it may be an aggregation of Senators, but that is a Senate decision.

I am the President's spear carrier in the Senate. I am his friend, and surely I do not need to prove that anymore. I believe I have earned that badge. But I owe my first obligation to the Senate. I am majority leader of the Senate, and that is my first duty and responsibility. So I intend to serve my President, but I also intend to remain loyal to the Senate. And that loyalty must insist that the Senate have an opportunity to exercise that imprecise and ill-defined role in foreign policy determination.

Now, Mr. President, there is one other piece of information I should supply for the record on consultation on this particular issue. I did not mention it earlier but only because I forgot it. I did not think of it in this context.

On Monday of this week, at the President's request, Congressman MICHEL, the Republican leader in the House, and I lunched with the President at the White House, and the President reviewed the overall general situation.

The luncheon was not for the purpose, as I understand it, of telling us about the carrier task force in the Pacific or the battleship *New Jersey* or troops in Honduras. I did not understand that was the reason for the meeting. But I would like the record to show that the President did discuss these matters.

I would also point out it was after the fact, but he did explain his reason and rationale for doing these things to Congressman MICHEL and to me. I want that to be clearly understood so no one thinks that I am trying to diminish the President's effort to keep me apprised or Congressman MICHEL. And maybe that is what the President had in mind in his press conference when he said he was trying to keep the Congress apprised.

But in any event, Mr. President, I am saying now that we need do more than that. I will pursue that. I pledge to Members of the Senate on both sides of the aisle that I will discharge my responsibility and obligation to the Senate to be best of my ability to see that we have an opportunity to exercise our constitutional responsibility in this field.

I thank the minority leader for bringing the matter up.

Mr. BYRD. I thank the majority leader for his assurance. I feel much better after having heard the majority leader say what he has said. He did not have to say it publicly because I knew it, but I am glad he has said it here again.

Mr. BAKER. I thank the Senator.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I believe there is an order in favor of the distinguished Senator from Wisconsin for 15 minutes, to be followed by an order in favor of the distinguished Senator from Nebraska for 15 minutes. They are both on the floor, and I assume they are ready to proceed.

The PRESIDENT pro tempore. The majority leader is correct.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDENT pro tempore. The Senator from Wisconsin (Mr. PROXMIRE) is recognized.

WHY WE SHOULD NOT PURSUE A MILITARY SOLUTION IN CENTRAL AMERICA

Mr. PROXMIRE. Mr. President, should this country accept the argument of President Ronald Reagan that this country has a genuine national security interest in the Marxist, Communist makeup of the Nicaraguan Government or the Marxist Communist challenge of thousands of rebels to the democratically elected Government of El Salvador? Certainly, these countries are near us. Yes, indeed, Marxism could spread to other Central American countries. Conceivably, we could be bedeviled by a half dozen Fidel Castro-type Communist bases on the front porch of this country, threaten-

ing the Panama Canal and serving as a possible military base for the Soviet Union. In such a series of catastrophic events, would this country face a serious military threat? The answer is absolutely, unequivocally, and emphatically: "No."

Even if, somehow, all the Central American countries should come together in a unanimous Communist cabal, they would constitute no genuine military threat to the United States. I am sure the people in those countries are brave and strong people. In fighting for their countries—in defending their homeland, in that kind of guerrilla warfare, as we have discovered—a relatively weak military force without any modern weapons of war can win surprising victories against a far bigger, stronger, better equipped military force. Vietnam and Afghanistan should remind us of the grim fact. But as an invading force? Can we expect the Nicaraguans to be in El Paso? And then striking out to Houston?

Consider what we face as a military threat in Central America. The first big fact about Central America is that one country, Mexico, dominates the area overwhelmingly. The population of the nine Central American countries including Cuba and Mexico is just over 100 million, compared to our 230 million, 70 percent of this population is Mexican.

For any country to mount a war effort, especially any kind of aggressive war effort, outside its borders, and particularly against the United States, requires an economy capable of supporting such a war effort. Consider the Central American economies—in aggregate. The total gross national product of these nine nations is $212 billion, and 80 percent of this GNP belongs to Mexico. That compares with a $3,000 billion, or $3 trillion, economy for this country. We are about 15 times more productive economically. So the potential for military power for these Central American countries is pathetically small.

Now, how about actual military expenditures? Here we find that the expenditures of all nine of these countries together total about $3 billion, more than half of which is Mexico's. Think of that: $3 billion for all the Central American countries. More than half of that is Mexico's. That compares to our U.S. military expenditures of $214 billion, or more than 70 times the total military expenditures of all these Central American countries combined.

Compare military personnel. The total military personnel of all nine of these countries amounts to 563,000, and two-thirds of these are Mexican troops. Incidentally, most of the Mexican troops are part-time conscripts. This compares with 2,100,000 full-time, regular American military personnel, not including National Guard and Reserve components.

Now look at the real muscle of modern war. In combat aircraft, all nine Central American countries have 265 combat aircraft, compared to over 5,000 American combat aircraft, about a 20-to-1 ratio in our advantage. In major naval vessels, the nine Central American countries, in aggregate, have 14, 10 of which are Mexican, compared to 285, or literally 14 times as many, for the United States. In army personnel the nine countries have 509,000, of which about 70 percent are Mexican. And, again, 250,000 of the Mexican troops are part-time conscripts compared to 780,000 regular U.S. Army personnel.

Mr. President, the Capitol Police, by themselves, on a good day, could handle any threat from most of these Central American countries. They do not amount to any kind of threat at all.

Of course, none of this includes the fact that this country has an immense arsenal of strategic nuclear weapons, on land, at sea, and in the air. And how many do the nine Central American countries have? Absolutely none.

The most striking facts about these comparisons are:

First, Mexico absolutely dominates Central America in military potential and actual force.

Second, the single significant military force in Central America outside of Mexico is Cuba. And the Central American countries other than Mexico add virtually nothing to the Cuban military power, even in the unlikely event that all of them should become Marxist Communist states and aline themselves firmly with Cuba. In considering this group of Central American nations together—excluding Mexico—Cuba makes 75 percent of the military expenditures, has 63 percent of the military personnel, 70 percent of the combat aircraft, 60 percent of the army personnel, and literally 100 percent of the major naval vessels. No one can argue that, annoying as Castro and Cuba may be, they in any way really threaten this country militarily.

Third, in aggregate, on any assumptions, all the Central American countries together pose no significant military threat—none to our national security.

Furthermore, there is every reason to believe that Mexico will remain, as she has for many years, our firm ally and friend, a wise and pacifying force in Central America.

What genuine, realistic national security interest does this country have in Central America? For many reasons we should do everything we can—without using military power—to keep communism out of Central America. Grinding poverty and cruel exploitation, either by Communist bureaucrats or rightwing plutocrats, is the bane of this area. We should aline ourselves with neither. We should press for human rights and land reform in all regimes. How should we do it? The best way to do that is with the kind of good neighbor policy enunciated by Franklin Roosevelt and with Peace Corps-type assistance as initiated by President Kennedy. The one way we can provoke Central America into a hostile and perhaps largely Communist alinement is if we continue to follow the kind of ham-handed, arrogant militarism that our Honduran military exercises and our covert and overt military operations in Nicaragua and El Salvador demonstrate and that the administration seems so intent on pursuing.

Mr. President our overwhelming military advantage overall of Central America combined should remind us of the imperative necessity that we use this massive military power with restraint and care. Here is why: The overpowering U.S. military advantage is matched by a very real psychological advantage that accrues to any little country we try to push around militarily—either by muscle-flexing maneuvers next to the little country's border or by an actual shooting invasion. All of us dislike bullies. In any kind of a confrontation, almost every human being favors the little guy, the underdog, the little, embattled few who do not seem to have a chance.

This is true of most of our fellow Americans, even when our country itself has become involved as the big, tough guy. The overwhelming majority of Americans love this country. We are very proud of it. Some still react the way Stephen Decatur put it: "My country, in her intercourse with other nations may she always be right. But right or wrong: My country!" But many Americans—patriotic as they may be—will not support this Nation when they think our actions are wrong. And without thinking very much about it, many Americans will assume that when we flex our mighty air and sea power on the very coastline of these small, weak, impoverished countries, good as our intentions may be, and wrong as those who rule the little country may be, we become the oppressor. Certainly, other nations throughout the world must have a far more intense revulsion against this kind of pushing the little kids in the neighborhood around.

Of course, what makes this kind of policy especially bad is that we cannot win. No policy we can pursue will more certainly assure the hostility of Central Americans, and possibly even the alienation of Mexico—and what a tragedy that would be. Mexico is indeed crucial to us in Central America. This big, tough, bully-on-the-block attitude, could cost us dearly.

Mr. President, I ask unanimous consent that a table I have compiled, showing the economic and military data about Central American countries compared to this country, be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ECONOMIC AND MILITARY STATISTICS—CENTRAL AMERICA AND THE UNITED STATES

	Population (in millions)	GNP/GDP (in billions)	Military expenditures (in millions)	Military personnel	Combat aircraft	Major naval vessels [1]	Army personnel
Costa Rica	2.4	4.8	[2] 13.9	[2] 7,000			
El Salvador	4.6	3.5	134.0	16,000	27		14,900
Guatemala	7.5	7.8	79.0	18,550	16		17,000
Honduras	4.1	2.5	50.0	11,700	25		11,500
Nicaragua	2.6	1.8	[4] 54.0	[5] 21,500	8		[5] 20,000
Panama	2.0	3.0	42.0	[3] 9,000			
Subtotals	23.2	23.4	372.9	83,750	76	0	63,400
Cuba	9.9	18.4	1,112.0	127,500	189	4	100,000
Subtotal	33.1	41.8	1,484.9	211,250	265	4	163,400
Mexico	71.3	170.0	1,656.0	119,500 [6](250,000)	25	10	95,000 [6](250,000)
Total	104.4	211.8	3,140.9	330,750	290	14	258,400
United States	233.9	3,073.0	214,300.0	2,127,000	5,090	285	780,000

[1] Frigates or larger including submarines. Most countries also have small patrol boats, some with surface-to-surface missiles.
[2] Ministry of Public Security and Civil Guard.
[3] Paramilitary forces/National Guard.
[4] This figure is dated (1979) and suspect given aid from Cuba and the USSR.
[5] Plus 80,000 militias and Reserves $125 million in military equipment from USSR. 2,135 foreign security advisers.
[6] Part-time conscripts.

GOLDEN FLEECE TO COAST GUARD

Mr. PROXMIRE. Mr. President, I am giving my Golden Fleece of the Month Award for July to the U.S. Coast Guard for spending $1.1 million to build a boat repair station at Cape Hatteras, N.C., which sat empty and unused for about a year. Why?—now get this—because the Coast Guard forgot, they right plumb forgot to assign anyone to work there, that is why.

The Coast Guard should consider changing its motto from "Always Ready" to "Never Remember." The taxpayer can be forgiven for having a sinking feeling about this boat repair station.

The case of the forgotten repair station started back in 1975. The district office decided they needed a building in which to repair boats during bad weather. They estimated such a building would cost $500,000.

The Commandant of the Coast Guard disapproved this proposal in 1977. He was not convinced that the new building was needed.

The district office would not take "no" for an answer and prepared an analysis showing that the Coast Guard would save money by repairing the boats itself instead of having private companies do the work. The analysis assumed that staff would be transferred from other Coast Guard stations, that no additional salary costs would be incurred.

The Commandant then approved the proposal in 1979 and in 1980 Congress appropriated $1.1 million for the new building. By December of 1981, the building was ready for use.

There it sat, unused, day in and day out. Months passed, the seasons changed, and still no one appeared to work in the building.

Finally, after about a year, the Coast Guard assigned a skeleton staff to the building. Listen to their explanation of this incident:

> We accurately and correctly demonstrated the benefits which would result from a [new building], but we totally overlooked the fact that if you increase activity at a unit, you can expect additional staffing will be needed to do the work.

Think about that for a moment before you take your next boat ride. The Government agency charged with search and rescue on the high seas "totally overlooked the fact" that additional people would be needed to work in a new $1.1 million building.

Now comes the insult. To move boats from the water to the repair building, the Coast Guard purchased a $45,750 boat hoist. They successfully tested it by moving the largest boat available—one 44 feet long and weighing 20 tons. Because the repair building was 20x40 feet in size moving this boat should have been a reasonable test for anybody.

But not for the Coast Guard. They decided the hoist should have to lift a 30-ton load. A boat this size would scarcely fit into the new building. But the Coast Guard—always ready?—built a 30-ton test weight—at a cost of over $1,400. what happened when they used this weight, which was shaped more like a brick than a boat? The hoist broke and repairs will cost around $12,000.

The Coast Guard hoisted the taxpayer on its petard once again.

This new building is within sight of the area where Blackbeard the pirate was killed. He used a sword to commit piracy. Now the Coast Guard has shown that when it comes to modern-day buccaneering, the pen, applied to a Government check, is truly mightier than the sword.

WHAT ARE THE PROSPECTS FOR A MUTUAL, VERIFIABLE NUCLEAR FREEZE?

Mr. PROXMIRE. Mr. President, I have been rising on the floor of the Senate virtually every day since April of last year—that is 15 months—to plead with this body to support a nuclear freeze or to exercise restraint in authorizing and appropriating funds that advance the nuclear arms race. I am sure that no one in the Senate

favors unilateral disarmament. I am also sure that even those Senators who have most consistently voted for more and more nuclear weapons recognize what a cataclysmic disaster a nuclear war would bring.

And I am sure the President is equally sincere in desiring peace. But somehow this sincere peaceful sentiment has had pathetically little effect. This Congress—the House of Representatives and the Senate—moves relentlessly, month after month, year after year ahead with this insane nuclear arms race.

We even seem to be unable to resist the most inefficient weapons. We have gone along with the B-1B bomber, designed to carry nuclear weapons, in spite of the strong likelihood that it will be obsolete before we can build it.

We will come on in a few years with the new technology, or Stealth bomber, that will fulfill exactly the same mission as the B-1B except that it will foil the Soviet radar system that will certainly trap the B-1B and make each flight over the Soviet Union a suicide mission. Of course, the B-1B will cost tens of billions, and the Stealth will also cost additional tens of billions of dollars.

We also are hell-bent now on building 100 MX missiles with 10 warheads each and for a fat $20 billion, although 2 weeks of debate failed to produce a single Senator who could answer the repeated charge that the missile will be vulnerable, literally a sitting duck for the Russian hard-target kill missiles to knock out. In addition, we are racing ahead putting our technical and scientific laboratories hard to work to develop more efficient nuclear weapons, such as the D-5 hard target missile that we will fire from our submarines.

Also, we will construct thousands of cruise missiles in the next few years. We will build at least an additional 20 Trident submarines to carry our newest and most devastating hard-target kill weapons within 5 or 6 minutes of their Russian targets. And the President is bent on converting our space program to a very largely military mission, designed to give us a series of antimissile devices that will kill Russian satellites and in effect poke out the eyes of Russia's warning system and shoot down any Russian missiles that might be launched, thus destroying their deterrent and giving the Russians an incentive to attack before we develop an antimissile system that could literally disarm their nuclear capability.

The success of the antisatellite program could literally kill any prospect of a verifiable nuclear freeze of any kind and I mean any verifiable arms control program. Satellites are the quintessential heart of an effective verification. Now how can 535 peace-loving Members of the House of Representatives and Senate permit such a foolish race to national suicide?

Sometimes, Mr. President, Congress and our whole National Government seem like lemmings rushing to the sea, determined to drown en masse. Does this mean that we have become so absorbed with building nuclear military power that we have forgotten that the whole purpose, the only justification of military spending, is not war but peace?

Last year the House voted on August 5 by an almost precisely even split—204 to 202—against a nuclear freeze. On May 4 of this year the House reversed that vote and voted 278 to 149—nearly 2 to 1—for a nuclear freeze. What happened? Simple. On November 2, 1982, we had an election and in the fall of 1982 there were a series of nine referendums on the nuclear freeze in nine different States. Eight of those States supported the freeze, in most cases by big margins.

Every public opinion poll has shown the same result with freeze support running about 3 to 1 in favor. The people of this country are demanding an end to this arms race. We better get the message. If and when the Senate has a shot at the nuclear freeze, I am convinced we will follow the House of Representatives and also pass a nuclear freeze resolution.

Now, let us be clear about it. The freeze does not call for unilateral disarmament. No, indeed. It calls for the negotiation of a mutual, verifiable agreement between the United States and the Soviet Union to stop the testing, production, and deployment of nuclear weapons. Because it sets no time limit and because negotiations are under the firm control of whoever happens to be President of the United States, the freeze resolution simply states a policy and an intention. It is the beginning, but only the beginning, of our best hope for survival.

THE PLASTICITY OF HUMAN NATURE

Mr. PROXMIRE. Mr. President, the act of genocide—systematically murdering a racial, ethnic, national, or religious group—is hard for U.S. citizens to comprehend. This may be why the Genocide Convention, which makes mass slaughter punishable under international law, has gone unratified for 34 years.

It is understandable to us that one crazy man, like Adolf Hitler, could believe that the "final solution" lay in eliminating the Jewish people. But the notion that an entire society could go insane—much less a highly civilized nation like Germany—is far more incomprehensible, and disturbing.

The fact is, Adolf Hitler was necessary, but not sufficient, for the Holocaust. If the German intelligentsia, the German elite, and the German people had refused to go along with the notion that Jews were the source of all evil, then Adolf Hitler might today be an obscure figure in German history.

In some ways, it is hard to blame those who did not stand up. Movie critic Stanley Kauffman has a point when he says, "I'm never less sure of my physical courage than when I'm asked, by a film or a play or book, to condemn the anti-Nazi Germans who lived under the Nazi regime and did not rebel."

But a new German movie, "The White Rose," tells the story of the small number of German men and women who would not comply with the Nazi regime's slaughter of the Jewish people. The leaders of the anti-Nazi, pro-German movement—students Hans and Sophie Scholl and their philosophy professor, Kurt Huber—kept their honor, but lost their lives. All were guillotined.

"The White Rose," Mr. President, tells us that some people will face incredible danger in a stand for decency. What the movie also tells us, however, is that this courage is rare. Professor Huber and his pupils tried to stop genocide while it was happening. A few years later, the world set out to prevent genocide. The United Nations passed the Genocide Convention with the idea that outlawing genocide might in some way deter future Hitlers.

Despite this, the U.S. Senate has failed to act. I urge my colleagues to ratify the Genocide Convention.

Mr. President, I thank the Chair.

RECOGNITION OF SENATOR ZORINSKY

The PRESIDING OFFICER (Mr. HATFIELD). Under the previous order, the Senator from Nebraska (Mr. ZORINSKY) is recognized for not to exceed 5 minutes.

THE NATIONAL COMMISSION ON TEACHER EDUCATION ACT

Mr. ZORINSKY. Mr. President, since the report of the Commission on Excellence in Education was published, national attention has been focused on the crisis in our schools. Many suggestions have been made on ways to improve our educational system. However, one problem area noted in the report which has received little attention is weakness in teacher training.

The Commission report found that teacher preparation programs need substantial improvement and that the teacher preparation curriculum is weighted heavily with courses in educational methods at the expense of courses in subjects to be taught. As a result, many teachers have not mas-

tered the basic skills in reading, writing, math, and other subjects that they are required to teach.

Reaction to the report so far has dealt mainly with better pay for teachers, stricter curriculum requirements, competency testing, etc. I agree that these areas need attention. However, if teachers are not trained in their subject of instruction, all these changes will make little difference.

I have been looking into this matter since the Commission's report was issued, and the facts are surprising. Significant findings have been published in recent years—and earlier—about the poor quality of teacher education. Although some States have taken action, there has been no national response.

Numerous studies have found that the colleges of education now attract the least capable students, and those who go on to teaching jobs are among the lower-scoring graduates. Many students consider an education major as the easiest way to get a degree. They can earn 3 hours of college credit for taking courses such as materials for rhythmical activities, administering leisure delivery systems, or motorcycle safety and rider education. Ph. D. dissertations have been written on such topics as service in the high school cafeteria, student posture, and public school plumbing. As a result, talented students are discouraged from entering the teaching profession.

One of the most severe critics of teacher training has been Gene Lyons, staff writer for the Texas Monthly, who authored an article in 1979 about his investigation of teacher training institutions. He described as nonsense many of the classes he visited. The play-acting and other antics cause him to wonder if he had not wandered into classes for stand-up comedians. He said, "Everyone was having a grand time and why not? Everybody was getting an A or at worst a B." He called teacher education "a massive fraud, which drives out dedicated people, rewards incompetence and wastes millions of dollars."

Around the mid-1960's a faction of educators urged wholesale rejection of traditional educational methods. As a result, many teacher training programs shifted their emphasis from training teachers in academic subjects to emphasis on behavioral science techniques. They began to concern themselves with the children's emotional development, social adjustment, and so forth, at the expense of cognitive learning.

These theories have been criticized by other educators. Diane Ravitch of Columbia Teachers College in New York City stated.

It is really putting things backwards to say that if children feel good about themselves, they will achieve. Instead, if children are learning and achieving, then they feel good about themselves.

The distinction between teaching techniques and behavioral science techniques is not clear, since many of the psychological strategies which became popular in the 1960's and 1970's were meant to be interspersed in the classroom in all subjects. However, it is clear that for many teachers the subject to be taught is secondary to the student's inner life—their self-concepts, feelings, and values.

In 1981, J. W. Anderson, a member of the editorial page staff of the Washington Post, wrote about a paradox at George Mason University in Fairfax, Va. Its English Department was leading a statewide campaign to instruct teachers at every level on how to teach writing. At the same time, its education department was using a textbook which directed its future teachers not to require written reports but instead to have students sign up for oral reports. This would save the student the trouble of writing or typing a report, and you the trouble of reading a report; it will also give you the opportunity to interact with each of your students on a person-to-person basis and to probe more deeply into interpretations. Obviously the emphasis was on interaction and probing rather than on proficiency in writing. Mr. Anderson found the suggestion that writing was mere trouble for both the student and teacher insidious. Yet, this situation at George Mason is far from unique.

In the February 1981 issue of the Phi Delta Kappan, Arthur W. Combs of the University of Northern Colorado authored an article in support of humanistic education. He stated that "our society can get along very well with a bad reader; a bigot is a danger to everyone." While I do not care for bigots any more than Professor Combs does, I am disturbed that a distinguished professor in foundations of education could have such a cavalier attitude toward literacy.

Illiteracy in the United States has become so widespread that we have come to accept it as the norm. Over 22 percent of adults in this country are functionally illiterate, and another 32 percent are only marginally literate. Billions of our tax dollars are spent every year on remedial reading. Not only are remedial reading classes taught in colleges, but government agencies, the Armed Forces, and industry are forced to offer courses in basic reading skills.

This problem affects all segments of our society and our economy in that it contributes to increased welfare, unemployment, crime, and other social ills, all of which must be addressed with additional tax dollars. A 1975 Office of Education study found that while the situation is dismal for all American schoolchildren, it is even worse for minorities who are disproportionately represented in these illiteracy rates—more than twice that of the population as a whole.

Dr. Rudolf Flesch, in his 1981 book, "Why Johnny Still Can't Read," stated that because of current methods of instruction, the U.S. literacy rate has already dropped to the level of Burma and Albania and is approaching that of Zambia.

The whole-word system of reading being taught in our schools is described by Samuel Blumenfeld in the February, 1983 issue of American Education as imbecilic. He claims it is needlessly complicated, difficult, illogical, and ineffective. He wondered how educators can be "insane enough to think that you could successfully teach children to read English as if it were Chinese?"

Mr. Blumenfeld asks how the professors get away with this blatant educational malpractice in a free country where parents and elected representatives are supposed to have ultimate control over the public schools.

In a 1979 research article entitled "Teaching Reading to Learning-Disabled and Other Hard-to-Teach Children," Dr. Barbara Bateman stated,

Near failure-proof methods for teaching all children to read are already available. Continued failure of schools to employ these programs is at best negligent, and at worst malicious.

It has been suggested that the greatest obstacle to literacy in America is our own educational establishment, which has a vested interest in maintaining the status quo. According to the 1969 report of the National Academy of Education's blue-ribbon Committee on Reading, "an effective national reading effort should bypass the existing education macrostructure." The intimation is that there is power and money for educators in illiteracy.

The International Reading Association has gone from 7,000 members in 1965 to 65,000 in 1982. According to Mr. Blumenfeld, "it has become the impregnable citadel of the whole-word method." He claims that proven methods of teaching reading are kept out of our schools as effectively as if we had a "dictatorship with an all-powerful Ministry of Education." Strong words? Yes; but is it not our responsibility to find out the extent of the truth behind them? Why has remedial reading become institutionalized? Why are not teachers trained to teach it right in the first place?

In the New York Times Magazine of June 5, 1983, Leon Botstein as one of his "Nine Proposals to Improve Our Schools," stated that separate schools of education and departments of education should be disbanded. He suggested that education department faculty should be distributed throughout the academic departments. In this

way, the substantive training of teachers would be in their subject matter. Although this proposal sounds radical, we need to look at what prompted it.

School time is precious time. It should not be misspent because of teachers who have not been educated properly. Our children have only one opportunity for an education.

I find it significant that parents are willing to pay for private schools which, in most States, are not required to have certified teachers.

Mr. President, I am a strong supporter of our public schools. I am dismayed to find our that although our per capita public expenditures on education are higher than anywhere in the world, our students fall far behind those of other countries in test scores. Although we rank first on measures of resource allocation, we are not first on any measure of intellectual achievement.

While we obviously have many good schools of education and countless able and dedicated teachers, the facts cannot be ignored. Our education system is in trouble, and we must look for root causes. I believe that our system of teacher education is one of them. Students cannot learn from teachers who have not been educated and trained properly.

I am therefore introducing legislation to establish a Commission to investigate teacher training in this country. I do not suggest for one moment that we should create national policy on teacher education, but rather that we look into its problems. This is not meant to supplant any efforts that the States are already making, but to supplement them. The Commission could be a useful tool in working with the States, identifying common problems, and sharing solutions that have been found to be effective.

I believe it is a proper role of the Federal Government to focus on this national problem. The colleges of education and departments of education are not as subject to scrutiny as are our public schools. Therefore, a national Commission would be the most effective way to look into this matter. I also believe that we should not put this investigation into the hands of the education community alone. Representatives of business and industry as well as parents should be included in any study because they are also directly affected and can provide a fresh perspective.

The cost of this Commission is minute compared to the cost of doing nothing. I urge my colleagues to support this effort.

Mr. President, I ask unanimous consent that the text of the legislation be printed in the RECORD immediately following my floor statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S.J. RES. 138

Whereas the National Commission on Excellence in Education found that teacher preparation curriculum is weighted heavily with courses in "educational methods" at the expense of courses in subjects to be taught and found that teacher preparation programs need substantial improvement;

Whereas significant findings have been published about the poor quality of teacher education, but there has been no national response;

Whereas colleges of education are not accountable to the public as are local schools;

Whereas numerous studies have found that the colleges of education now attract the least capable students, and those who go on to teaching jobs are among the least talented graduates;

Whereas many teachers have not mastered the basic skills in reading, writing, math, and other subjects that such teachers are employed to teach;

Whereas it is important that competent persons be attracted to the field of teaching;

Whereas many teacher training programs have shifted emphasis from training teachers to develop expertise in academic subjects in which such teachers are to be certified, to emphasis on classroom psychological techniques not related to the development of student academic competencies;

Whereas recently, there has been a marked decline in student achievement test scores;

Whereas one out of five adults has been determined to be functionally illiterate; and

Whereas it is not possible to expect students to be taught properly by teachers who have not been trained properly: Now, therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That this joint resolution may be cited as the "National Commission on Teacher Education Act".

ESTABLISHMENT OF COMMISSION

SEC. 2. (a) There is established a commission to be known as the Commission on Teaching Education (hereafter in this Act referred to as the "Commission").

(b) The Commission shall be composed of sixteen members as follows:

(1) Eight members shall be appointed by the President of the United States.

(2) Four members shall be appointed by the President pro tempore of the Senate, two upon recommendation of the Majority Leader of the Senate and two upon recommendation of the Minority Leader of the Senate.

(3) Four members shall be appointed by the Speaker of the House of Representatives, two upon recommendation of the Majority Leader of the House of Representatives and two upon recommendation of the Minority Leader of the House of Representatives.

(c)(1) Of the members specified in paragraph (1) of subsection (b), not more than four members shall be from the same political party. Of the members specified in paragraphs (2) and (3) of subsection (b), not more than two members specified in each such paragraph shall be from the same political party.

(2) Of the members specified in paragraph (1) of subsection (b), two shall be parents, two shall be representatives of business and industry, and two shall be members of local school boards. Of the members specified in paragraph (2) of subsection (b), one shall be a parent, one shall be a representative of business and industry, and one shall be a member of a local school board. Of the members specified in paragraph (3) of subsection (b), one shall be a parent, one shall be a representative of business and industry, and one shall be a member of a local school board. The members of the Commission shall be individuals who possess demonstrated capacities to discharge the duties imposed on the Commission.

(d) Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner in which the original appointment was made.

(e) The Commission shall elect a Chairman and a Vice Chairman from among its members.

(f) Nine members of the Commission shall constitute a quorum for the transaction of business, but the Commission may establish a lesser number as a quorum for the purpose of holding hearings, taking testimony, and receiving evidence.

FUNCTIONS

SEC. 3. (a) The Commission shall conduct a full and complete investigation of teacher training in the United States. Such investigation shall include, but not be limited to, the consideration of—

(1) the proper balance between courses in instructional methods and subject matter, and the degree to which imbalances may exist;

(2) the extent of training in the use of psychological techniques unrelated to academic content in colleges of education, and the use of such techniques in the classroom and the effect on students;

(3) the methods used to train teachers in all academic subject areas and grade levels to teach reading and reading comprehension, how reading is currently being taught in the classroom, and the effectiveness of these methods; and

(4) the role the Federal Government has played in the areas described in this subsection.

(b) In carrying out its functions under this section, the Commission shall—

(1) assess the factors which contribute to excellence in teacher education and the degree to which teacher education programs are or are not meeting these standards;

(2) assess the degree to which teacher education inadequacies have contributed to illiteracy;

(3) review teacher in-service training programs at the local, State, and university levels to determine the characteristics that promote effective classroom teaching performance and the degree to which these programs are or are not achieving these standards;

(4) recommend policies to attract competent persons to the field of teaching;

(5) recommend programs and policies to upgrade teacher education, with particular emphasis on teaching skills in the areas of reading and reading comprehension;

(6) recommend the appropriate local, State, and Federal role in addressing the problems of upgrading teacher education in this country; and

(7) assemble, analyze and publicize its findings.

(c) The Commission shall submit to the President and to the Congress such interim reports as it deems advisable. The Commission shall submit to the President and to the Congress not later than twenty-four months after the first meeting of the Commission, a final report of the study and investigation, together with such recommendations as the Commission deems advisable.

ADMINISTRATIVE PROVISIONS

SEC. 4. (a) Subject to such rules and regulations as may be adopted by the Commission, the Chairman is authorized to—

(1) appoint, terminate, and fix the compensation without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, or of any other provision of law, relating to the number, classification, and General Schedule rates—

(A) of such personnel as it deems advisable to assist in the performance of its duties, at rates not to exceed a rate equal to the maximum rate for GS-18 of the General Schedule under section 5332 of such title; and

(B) of an Executive Director for the Commission contingent upon confirmation by the Commission members at an annual rate of compensation not to exceed a rate equal to the rate provided for level V of the Executive Schedule under section 5316 of title 5, United States Code; and

(2) procure, as authorized by section 3109 of title 5, United States Code, temporary and intermittent services to the same extent as is authorized by law for agencies in the executive branch but at rates not to exceed the daily equivalent of the maximum annual rate of basic pay in effect for grade GS-18 of the General Schedule.

(b) Service as a member of the Commission or as an employee of the Commission shall not be considered service in an appointive or elective position in the Government for purposes of section 8344 of title 5, United States Code, or comparable provisions of Federal law.

(c) The Commission may adopt such rules and regulations as may be necessary to establish its procedures and to govern the manner of its operations, organization, and personnel.

COMPENSATION OF MEMBERS

SEC. 5. (a) The members of the Commission who are otherwise employed by the Federal Government shall serve on the Commission without additional compensation. The members of the Commission not otherwise employed by the Federal Government shall each be paid at a rate equal to the daily rate of pay for level IV of the Executive Schedule for each day such member is engaged in the actual performance of duties as a member of the Commission.

(b) All members of the Commission shall be reimbursed for travel as authorized by section 5703 of title 5, United States Code, subsistence, and other necessary expenses incurred in the performance of the duties of the Commission.

POWERS OF THE COMMISSION

SEC. 6. (a) The Commission or, on the authorization of the Commission, any subcommittee thereof or any member authorized by the Commission may, for the purpose of carrying out this joint resolution, hold such hearings and sit and act at such times and places, take such testimony, have such printing and binding done, enter into such contracts and other arrangements (with or without consideration or bond, to such extent or in such amounts as are provided in appropriation Acts, and without regard to section 3709 of the Revised Statutes (41 U.S.C. 5)), make such expenditures, and take such other actions as the Commission or such member may deem advisable. Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member.

(b) The Commission is authorized to secure directly from any officer, department, agency, establishment, or instrumentality of the Government such information, suggestions, estimates, and statistics as the Commission may require for the purpose of this joint resolution, and each such officer, department, agency, establishment, or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the Chairman or Vice Chairman.

(c) Upon request of the Commission, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Commission or to detail any of the personnel of such agency to the Commission, on a reimbursable basis, to assist the Commission in carrying out its duties under this joint resolution, unless the head of such agency determines that urgent, overriding reasons will not permit the agency to make such facilities, services, or personnel available to the Commission and so notifies the Chairman in writing.

(d) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) No officer or agency of the United States shall require the Commission to submit any report, recommendation, or other matter to any such officer or agency for approval, comment, or review before submitting such report, recommendation, or other matter to the Congress.

TERMINATION OF THE COMMISSION

SEC. 7. Ninety days after the submission to the Congress of its final report the Commission shall cease to exist.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. There are authorized to be appropriated such sums, but not to exceed $2,000,000, as may be necessary to carry out the provisions of this joint resolution.

Mr. ZORINSKY. I thank the Chair. I yield back the remainder of my time, and I suggest the absence of a quorum.

The PRESIDING OFFICER. Will the Senator withhold?

Mr. ZORINSKY. I withhold my request.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order there will now be a period for the transaction of routine morning business for not to exceed 15 minutes with statements limited to 3 minutes each. We are now in morning business.

Mr. ZORINSKY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DENTON). Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, under the order previously entered, I believe the Senate will resume the consideration of the motion to proceed to the consideration of H.R. 2733. The order provides that Senator MELCHER will be recognized. Is that correct?

The PRESIDING OFFICER. The majority leader is correct.

Mr. BAKER. I yield the floor, Mr. President.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

CRITICAL AGRICULTURAL MATERIALS ACT

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of the motion to proceed to consideration of H.R. 2733.

The Senator from Montana (Mr. MELCHER) is recognized.

Mr. MELCHER. To help stabilize the price of agricultural commodities we have had numerous farm programs. Our goal is to help keep family-size farms viable. We have not been successful enough. Mr. President, this morning's Washington Post carried a front-page article dealing with some agricultural payments under the payment-in-kind program. The author of the article is Ward Sinclair, who is a long-time Post reporter with both experience and good insight on matters dealing with agriculture. The article dealt with the payment in kind to some cotton producers in California. The payment-in-kind program (PIK) is the program that is used under the authority of the Secretary of Agriculture, to attempt to bring down production of commodities that are in surplus.

Payment in kind means just this: For those producers who agree not to grow a particular commodity covered under the program offered by the Secretary of Agriculture, they will receive, under his authority and under terms that the Secretary sets, payment for not producing. Payment is made in the commodity at an amount set by the Secretary of Agriculture based on the crop production of a particular operator in a particular commodity. In the case of these cotton producers in California, the article describes large amounts of payment in kind for those particular cotton producers.

The producer receiving the commodity as a payment in kind has the option of selling it or holding it under any conditions that that particular operator chooses. Most operators sell a portion or all of that particular pay-

ment, transferring the commodity itself into cash.

These are large cotton operators. In fact, the payments in kind are, for some of them, equates to a quarter of a million dollars or a half a million dollars, and I think in one or more instances described in the article "a million dollars worth of cotton." Well, that authority exists with the Secretary of Agriculture under existing law.

It may come as quite a surprise to many readers of the article that the payments are that large. If you read the article and are not necessarily experienced with the program or the operations of corporation farmers such as those that are described, I think there are three points that are quickly ascertained. One is that the payment-in-kind payments of the commodity translates itself into rather large amounts of cash when the commodity is sold.

Now, a person reading the article might jump to the conclusion that that is the case in all instances. Well, let me hasten to say that the payment in kind, under the PIK program whether it is in cotton or wheat or corn or rice, might be a very small payment depending on what size the farm is and depending upon what agreement the operator of that farm is willing to enter into with the Secretary of Agriculture. It could be for a very small amount and it in many cases is.

But the second point that will be quickly ascertained, even by those who have no direct knowledge of the program or the size of the operation, is that these are extremely large farm operations, not of family-farm size, and in many instances they are owned by large companies.

The third point that will be quickly ascertained by a reader is that these are large irrigation operations and that the water comes to them and is used by them and made available to them from Federal dams; that is, dams that have been constructed when all or a portion of the cost of the dam construction was from the Federal Treasury.

Given those three points, it will probably be a shock to a lot of the readers of Ward Sinclair's article in this morning's Post, and I would like to discuss three points in regard to that.

The first one is this: I would like to discuss why these particular operators are large operators. Why is a large company, a company that you will recognize by name, not necessarily from farm operations but more likely from those names as conglomerates that are in energy development, operating farms in California? Consider this: For almost 30 years agricultural prices have been under extreme downward pressure, and because of that the costs of production had to go down in order to allow the operator to survive. Not all farm operators during the past 30 years have survived. Indeed, a rather large percentage of operators who were in business 30 years ago did not survive. The trend has been downward in the number of family farm operators in the United States. It has gone down simply because reducing the cost of production in order to survive economically, selling the commodities that were produced at rather low market prices, meant that unless they could improve their efficiency—that is, raise the same amount of corps on the same acreage at less cost—they could not survive, could not hold the place together and continue to farm.

I suppose we have about half of the units of agriculture in operation today as we did 30 years ago. We believe we have about 2.1 or 2.2 million farm and ranch operators in the United States—about half of what we had 30 years ago. The reason is because of economic pressures, because of low prices as compared to the cost of producing wheat, cotton, corn and feed grains, rice, or for that matter sugar beets and cane. For these and other agriculture products there has been a trend toward fewer and fewer family farm operations and family ranch operations.

Now, what happened? What did they do? They sold out. They had to. They sold out and went into some other type of livelihood to earn their living. Most of them did not want to sell out. For the most part they wished to stay in business as farm and ranch producers, but it was not economically possible. Their loans were getting too large—resulting sometimes in forced liquidation, sometimes just an agreed liquidation because there was no way of surviving economically.

When they sell out, that means that the land is still there and the water to irrigate the land, if it is irrigated land, is still there, and it also means that somebody bought it. That made larger and larger sized farms and ranches in this country. The production continues. That does not change, because somebody else is operating where these family-sized farm operators or these family-sized ranch operators were. So the trend has been for 30 years toward bigger and bigger farms and bigger and bigger ranches, and in some instances it has been attractive for business, and rather large business, to buy the land and to continue the farm or ranch operation.

The public—consumers—have been served because the production is still there. The cost of production has continued to climb, however. In many instances the investment by a large company in land purchases has been an attractive investment. One of the reasons for that is because land values have continued to climb and so with an investment in land, a sound investment, if the corporate operators did not break even on the operation during that particular year or even a series of years, perhaps the increase in land values would make the investment still very attractive.

That type of situation lends itself to where the corporation or conglomerate which has some capital available and wishes to diversify part of their operations can put it in something like land that looks like a safe long-term investment.

It is likely that the value of the land will not go down and has a chance of increasing. It is an attractive investment. Meanwhile the farm or ranch operation continues under their management and the PIK program is available to them.

Those farms in California which are mentioned in the article this morning were not always large, huge farms owned by conglomerates. If you check back on them, you will probably find that 30 years ago there were a number of family-size operations on their large landholding. I have not checked back on them, so I cannot say for sure. But the likelihood is that they were all family-size operations 30 years ago operated by a number of individual owners.

There is no secret that for 30 years, farmers and their organizations, local and national, have said that with prices the way they are, it is not possible in many instances to hold a family-size operation together as economically sound.

This bill to hold down target prices for wheat feed grains, cotton, and rice would do further harm to them.

There have been times when agricultural prices spurted up. That happens in these particular commodities from time to time; that is, in the case of wheat, cotton, and feed grains. There are times when the prices have been high and above the cost of production in the past 30 years.

But the market prices have been tough for these producers and the overall pictures has been one of haveing a desperate time holding together a small unit and passing it on from one generation of the family, to the next, keeping the farm or ranch intact. In many instances, the family farms and family ranches of today are double or triple the size they were 30 years ago. They have absorbed the farms or ranches from another family or two and have increased their operation just to keep one family operation going.

Yes, family-size farm operations have been efficient. But the family-size farm or ranch operations generally are not financed well enough to finance 4 or 5 years of adverse market conditions.

Believe me, in the past 30 years there have been several cycles—wheth-

er in cattle, wheat, hogs, sheep, cotton, corn, feedgrains, or dairy—when there have been 2-, 3-, 4-, or 5-year period when the prices received for the production from these family farms and ranches have not paid the operating costs. They had the option then of either securing more capital in order to keep financing their operation, extending their credit, or perhaps mortagaging their land. The over result of this has been squeezing out those whose credit became hopeless resulting in fewer operators.

While the country has been well served, in term of food and fiber available and there have been attractive consumer prices, it has been a trend that damages severely individual families and the social fabric of rural America.

I greatly lament the loss of the family operators from our farms and ranches, and I have lamented for two reasons. First, it has disrupted those family-size operations from gaining their livelihood in the field they have chosen as their No. 1 choice. Second, in the long run, the most efficient production will come from family-size farms and ranch operations. We produce food and fiber in this country that is cheaper per unit, and we produce livestock cheaper in this country per unit than any other nation on Earth. Yet, we lose a lot of our producers.

While they have been making that production, our people, our consumers and that is all of us in this country who have had available to us food products that are wholesome, that are nutritious, that are convenient, that are fresh, and that are available throughout the country—cheaper than any other country on Earth. It is not just cheaper in terms of relative value, whether you measure it in hours worked, pay you received, or measure it in comparison to the costs of other consumer goods. U.S. food is cheaper and better than in any other country on Earth, during the whole history of the world. Agriculture has succeeded so well in America that it is the marvel of the world.

During that time, we have seen the nutritional advancements in this country. We have seen the opportunity not only for people to eat what they want but also wholesome food that is adequate nutritionally. That excellent nutrition is available for children from the time they are infants through their early years and their school years and their college years, on into adulthood, which has made them healthier and made it easier for them to learn.

Nutrition has a lot to do with the vigor and vitality of schoolchildren and collage age youngsters. It has a lot to do with how much they comprehend and how quickly they learn. Nutritional advances are extremely important to all of us in this country, for a variety of reasons. The success of good nutrition as the basis for sound health has been one of the great advantages we have had in making gains in controlling and preventing diseases, preventing ill health, and extending the years of elderly in a state of good health that also means comfort and enjoyment in our later years.

What we have done in this country, we are interested in seeing done abroad. When we talk about the opportunities for American agriculture, for a decent price, and for the economy of this country improving, we realize the need for broadening American agricultural trade.

What we are seeing done now throughout the world, in many countries, is almost a revolution in the advancement of nutritional goals. Advancement of nutritional goals can be made available to other countries from the abundance we have in our country and the abundance of other export countries, but principally from the agricultural abundance of the United States. We have developed some sales to Russia over the past dozen years which have been advantageous for our trade balance, and they have been advantageous for the agricultural producers of this country. Todays announcement of a 9 million metric ton sale of American grain and soybeans to the Soviet Union is a welcome revival of our trade with them, and it is for cash.

I point out that the Soviet Union purchasing our products is very advantageous to the general nutritional level of the people of the Soviet Union and Iron Curtain countries. When they eat more high protein foods, such as dairy products, poultry products, red meats, principally from hogs and cattle, they not only are satisfying what is a normal human appetite for these high protein foods, but also, they are satisfying the need to advance the nutritional level for all their people.

We have also developed broader markets for American products in Asia.

I stress that when a population of a country is improving its nutritional levels that generally means that the nutrition available to them, the foodstuffs available to them will be more and more the higher protein foods that I have mentioned. When a country that does not have sufficient grain supply to feed more chickens in order to have more poultry available or more eggs available or does not have the grain supply available, for instance, for dairy cows in order to produce more milk, or grain available to feed hogs or cattle, importation of American grain for those purposes means a greatly expanded market for American feed grains.

Why? If you take a pound of corn and make corn meal out of it simply by grinding it up, you can get yourself very full, one human being on one pound of corn per day. But if you want to use the corn in order to have more milk available or more eggs from chickens available or to fatten some hogs, you are probably going to use anywhere from 4 to 10 pounds of grain for 1 pound of that product. For chickens or hogs we are talking about converting 4 to 5 pounds of grain to make 1 pound of poultry. For 1 pound of pork it takes about 8 or 9 pounds of grain for a pig to gain that pound of weight.

That revolution of upgrading the nutritional opportunities is not only occurring in the Soviet Union and in Iron Curtain countries that are having more high protein food available for their people, it is also occuring in Asian countries.

Korea has been a long-term purchaser of American grain. Japan has been a long-time purchaser of American grain. So too are the Philippines. And China only recently has become a purchaser of quantities of American grains that are substantial and we want to see that broadened out.

I point out in particular one of the countries that we have had a long association with of several generations. It is the Philippines. They are net importers of grain, most of it from the United States.

Their Agricultural Minister is Arturo R. Tanco, Jr. He has been the Minister of Agriculture for 13 years in the Philippines. You might assume that a minster of agriculture who has been on the job for 13 years first of all must be well into his sixties or perhaps even into his seventies. That is not true. He is a much younger man.

You might also assume that he is a person who comes from an agricultural background. That is not true either. He comes from a business background.

I had the pleasure of meeting him a few weeks ago when he was here in the United States for a World Food Organization meeting. He, after all, was President of the World Food Council of the United Nations from 1977 to 1981. In fact, he is the only President of the World Food Council who ever served more than one term. He served two terms. He is an outstanding individual in terms of agriculture production and food distribution in global terms. He is familiar with the United States, received much of his education here and graduated from the Harvard School of Business. That is his background. But he brings to the Philippines an understanding of what agriculture should accomplish in an underdeveloped country. He is developing the agriculture capability in his own country that is truly remarkable.

I have some data to stress these points. In 1977 the Philippines imported 146,300 metric tons of yellow corn.

As of the third quarter of 1981 corn imports reached 234,096 metric tons. You might say what are you talking about? Is that agricultural improvement? It is improvement in what they are doing with that corn. They want it for chickens and hogs. They want to upgrade the nutritional levels of the people of the Philippines. So far traditional breeds of dairy cattle do not produce very well in that very hot humid country.

There is an emphasis on better nutrition for their people because of their importation of corn and they are also raising their own corn. They have more than doubled the production of their own corn in the past 5 years.

Agriculture Minister Tanco told me that so far hybrid varieties of corn have not been successful. They have a mold, a mildew problem that will require different types of hybrid seed corn than has been successful in the United States. But he feels fairly soon, perhaps in the next year or 2—because they are now trying some new varieties that have been developed to be resistant to both mildew and mold—perhaps they will see their corn production double within the next few years.

Does that mean that eventually they are not going to be much of an importer of agricultural products from the United States? No; I think they will continue to increase their agricultural importation because their agricultural production has been of a nature of increasing the capability for better nutritional levels for all of their people.

Because they are improving the nutritional level of the people throughout the Philippines, they are going to continue to need more and more feedgrains and other agricultural products.

Corn for human consumption in the Philippines is used as cornmeal principally. Corn in the form of cornmeal is one of the basic foods for some of the people in the Philippines. There are over 7,000 islands in the Philippines, the minister told me, many of which are not inhabited. But it is a large country. Some of the islands are very large. They have a rather large population. But for about 20 percent of the people in the Philippines the basic food is corn rather than rice.

The country is self-sufficient in white corn for human consumption. However, the production of yellow corn for animal feeds is what they import. The increasing demand for feed corn triggered by the rapid expansion in commercial production of pork and poultry is the reason for the importation of yellow corn and using it for feed purposes principally for hogs and poultry.

Minister of Agriculture Tanco has launched a vast program to increase the productivity of corn but until they have conquered this phase of moving into hybrid seed varieties—they think they are going to be able to within the next few years—their own production of corn has reached sort of a plateau.

But there are other reasons they have reached a plateau in increasing corn production and that is lack of credit, low prices and the high cost of marketing. You know, they are running into the same problem that we have here in the United States, lack of credit. That is the reason why we have lost so many family farm operations. The bottom line when we have lost them is because they could not extend their credit. To extend it any more than they had was totally unreasonable and many times impossible, so the family farm operator would have to sell out.

When the Philippines farmers mention the high cost of marketing it reminds me of the problem we have in Montana. What is the high cost of marketing in Montana? Let me tell you the high cost of marketing wheat in Montana is the cost of shipping a bushel of wheat either to the head of the lakes near Duluth where it gets on lake ship transportation or for the most part the cost of shipping a bushel of wheat from a Montana farm to the west coast where it is going to be exported and that is where most of our wheat goes.

So you produce a bushel of wheat in Montana and you are paid $3.50 for it, which is close to the price currently. The reason you are only getting that $3.50 is because it is going to take another dollar to get it out to the west coast where it will get on a ship and be transported to whatever foreign country is is bound for. More than two-thirds of the American wheat goes abroad, so it has to get to a point of ocean transportation, and be loaded on a ship.

You might say what has that got to do with $3.50. It has got a lot to do with the $3.50. Transportation costs are why it is that low. Is $3.50 high enough for a bushel of wheat? Consider this, the average cost of production, and we are the best producers of wheat in the world, U.S. wheat farmers produce wheat more cheaply, less cost of production than any other wheat producers on Earth, so we are pretty good, we admit that. We are not bragging either. But the cost of production is about $4.50 to $5 per bushel, somewhere between $4.50 and $5, and so when you sell it for $3.50, you know you have a loss.

What the producers in the Philippines are finding out in the production of yellow corn is just the same as we found out in our country. Minister of Agriculture Tanco believes that within a matter of 2, 3, 4 years, they will have hybrid varieties that will double their crop per acre, greater efficiency by far, and they can stay in production, stay in business.

But the Minister also told me one important thing. It is what we recognized in this country over 100 years ago, in fact Jefferson recognized it well over 200 years ago. In order to improve the economy of this country, we produced agricultural products and we sold them abroad and in doing so we created the capital that could be spent on all types of other products produced in this country. We made a purchaser out of farmers. We had the agricultural resource to develop the original wealth. We sold the product and much of it, as Jefferson recognized, would be sold abroad. It is about 50-50 now of some of our products; in the case of wheat more than two-thirds are sold abroad, in the case of cotton it is less than that, and in the case of corn it is less than that, but in many agricultural commodities produced in the United States half of the production is grown to be sold abroad in order to find a market. But in doing so it makes buyers for other goods out of those farm producers.

What we are lacking right now, Mr. President, is a balance for these agricultural producers that is having a decent price to cover the costs of production and provide a profit.

Minister Tanco recognizes that and is moving ahead with agricultural production in their country so they can make purchasers of other goods to support other industries and other businesses in the Philippines. That is the way agriculture works, that is the way you use agriculture and that is why agriculture is a basic business good for other businesses. It is not to be construed just as a way of life. Those of us in agriculture like that way of life, but it is much more than that; it is a livelihood, it is a business, and it is the country's most basic industry. As we develop it and use it and treat it properly so does this country prosper.

In the case of the Philippines, yes, they will be importers of agricultural products and other goods from the United States for years and for generations to come if their agriculture succeeds and their economy grows and their people prosper.

Mr. President, we will have an opportunity to discuss the problems of agriculture, or a great number of the problems of agriculture during the remainder of this day, into tomorrow and perhaps into next week, and I believe it is time we do. I believe it is time we do because we have got the best agriculture on Earth, let us make it work and let us make it successful.

I started out by talking about the payment-in-kind program and I want to make it clear that while the payment-in-kind program has transferred a great amount of money into the

hands of farm producers of the various commodities that are covered under the PIK program, it is not my choice, it is not my favorite farm program. Farmers and ranchers would rather produce than have a PIK payment. But because of the situation they are in, the payment-in-kind program was accepted by a great number of agricultural producers in this country, for cotton, wheat, feed grain, and rice. They would like to have it the other way, have the marketplace be strong enough and the demand for their product strong enough that they could be producing and selling their crops. That is the way I would like to have it too and that is one of the reasons why we have to be so diligent in improving the agricultural program for the United States at this time.

Mr. President, I yield the floor.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER (Mr. EAST). The Senator from Montana.

Mr. BAUCUS. Mr. President, I first want to commend my senior colleague, the Senator from Montana (Mr. MELCHER), for the remarks he has made today and the last several days concerning this bill. I think he has aptly, correctly, succinctly, and cogently stated the reasons why the target freeze should not proceed and I want to remind my colleagues of his leadership in the effort he has taken in that regard.

Mr. President, the Senate is facing the question of proceeding to the consideration of the bill that freezes target prices for wheat, feed grains, cotton, and rice for the next 2 years at 1983 levels.

Proponents of this legislation claim that farmers will continue to receive income protection for these commodities in a less costly manner, which expanded exports should strengthen farm prices in the marketplace. This sounds like the same empty promise that I heard less than 2 years ago during the debate over the 1981 farm bill.

It is ironic that I am standing here today defending a farm program that I voted against in 1981. I did so because the price-support levels it contained were totally out of line with the costs of production.

Despite my opposition, and the opposition of other Senators, this body adopted a 4-year farm bill in 1981. That bill was touted as a market-oriented bill which emphasized increased agricultural exports as the path toward improved farm prices. Exports, the argument went, would increase farm prices for Montana and the American farmers.

I told the Senate in 1981 that, in my opinion, we were putting the cart before the horse by assuming our export levels would increase and pull farm prices upward with them. There was no assurance then. There is no assurance now.

We should not have to rely on farm programs to improve prices. I would prefer to see the marketplace help achieve that goal. The marketplace resulting from increased exports. Farmers would prefer to receive a reasonable price for their product in the marketplace.

But look at what has happened to U.S. farm exports over the past 2 years. The value of farm exports increased from approximately $7 billion in 1970 to about $43.8 billion in fiscal year 1981.

The value of U.S. agricultural exports in fiscal year 1982 was $39.1 billion—a decline of almost $5 billion from the 1981 level. This is the first year-to-year decline in the value of farm exports in more than a decade. The Department of Agriculture is projecting agricultural exports to decline further this year to $35 billion.

Farmers are not the only ones who should be alarmed by these falling levels of agricultural exports.

In 1981, the U.S. agricultural trade surplus contributed about $20 billion to our balance of trade. This year the President's Council of Economic Advisers predict at least a $60 billion U.S. trade deficit.

Other economists predict the figure to climb closer to $100 billion. Even the administration predicts a $100 billion deficit next year.

How does this affect the U.S. economy? There is general agreement that for every additional $1 billion in our trade deficit we lose 25,000 to 30,000 U.S. jobs.

Obviously, that means that with the $100 billion trade deficit we lose in the United States between 2.5 million jobs and 3 million jobs for Americans.

Every American has an interest in seeing U.S. agricultural exports grow. But the question we are facing today is whether to lower the price a U.S. farmer receives for his product.

I cannot help being skeptical over the promise of improved farm prices through expanded exports given these figures of the last 2 years. Farmers cannot pay their bills with promises from Congress or the Department of Agriculture.

I have become even less convinced over the past 2 years that lowering the price a farmer receives will increase the U.S. competitive position in the international marketplace. Yet the central argument for freezing target prices seems to be that farm prices must be reduced to stimulate U.S. exports.

Why can we not put the horse back in front of the cart—why can we not expand U.S. agricultural exports, stabilize farm prices, and then talk about freezing target prices?

An additional point in the committee report puzzles me. The report says:

> The target price adjustment is expected to help rectify the current domestic surplus supply situation by providing farmers with the correct economic signal to cut back on overproduction.

Well, Mr. President, I hope you will excuse me if I cannot figure out how a wheatgrower who realizes he will receive less for a bushel of wheat will cut back on his production.

Farmers do not operate on large enough margin to simply absorb a price decease. In fact, the reason farmers have been able to survive through the past decade of stagnant farm prices is their own tremendous gains in productivity.

How we can ask farmers to cut back on their production and expect lower market prices is beyond me.

Let me make another point regarding the consistency of our farm programs. I said before that I opposed the 1981 farm bill. But the farm policy set in that legislation was meant to span 4 years.

There is good reason to adopt a 4-year farm bill. Farmers, even more so than other businessmen, need to plan their operations well in advance.

Farmers need to plan what crops they will plant, how many acres they will summer fallow how many acres of each crop they will plant, and what the production costs of their farm plans will be. They need to line up financing for their operations based on these farm plans.

Yet the nature of farming is uncertain. Drought, hail, and uncooperative weather can severely change a farmer's expected yield. There are no guarantees that they will be able to harvest the crops they plant.

For this reason, I constantly join with other farm State Senators who plead with the U.S. Department of Agriculture to announce the details of the annual farm programs early.

Farmers need to know early what the details of the annual farm programs will be under the overall context of 4-year farm policy. It is essential—let me repeat—essential that the Federal farm program remain consistent for the 4-year duration of a farm bill.

Let me share some excerpts of former Secretary of Agriculture Bob Bergland's foreward from the structure study of 1981 regarding farm policy:

> I remember those years now as one crisis after another, a seemingly endless debate on agricultural bills, with little or no discussion of agricultural policy.
>
> As a farmer who had no choice but to roll with the punches—because that was our home, our land, and I wanted to keep it—I had always felt there had to be a better way to make farm policy and make the farm programs conform to that policy.
>
> As a farm-program administrator, I still felt there had to be a better way.
>
> After six years in Congress, I was absolutely convinced.

I was always troubled during those hours of testimony and negotiation that we never seemed to get off the same familiary, circular tracks: the levels of price and income supports, the levels of exports, the constraints of the budget.

We didn't know who exactly was being helped or who was being hurt by the measure before us. The problems were seldom clearly defined. If they were, they were cast as narrow but immediate crises that needed patches quickly. Other than a dime a bushel here or a few pennies more a pound there, the remedies presented were either politically unacceptable or simply made no sense.

We thought—we hoped—that if we helped the major commercial farmers, who provided most of our food and fiber (and exerted most of the political pressure), the benefits would filter down to the intermediate-sized and then the smallest producers.

I was never convinced we were anywhere near the right track. We had symbols, slogans, and superficialities. We seldom had substance.

Soon after I was appointed Secretary, some thoughtful commentary in newspapers and magazines addressed the growing problems in agriculture in what was projected to become a "bust" year for many farmers. Reading these articles made me want to use my time as Secretary to try to move agricultural policy closer to that right track, wherever that was.

But this also raises questions about Federal farm policy. Where should we be directing our programs—credit, research, conservation, and technical assistance, not just income and price supports? Should we simply concentrate on overall production and export volume? Should we continue to ignore the role of off-farm income? How do we relieve the pressure on land prices, so out of proportion to the current income the land can return that new farmers find it almost impossible to bid on it? If we can find a way, should we?

As Secretary, I wanted to take up these central concerns. But, first, we had a farmer-owned grain reserve to put into place, as a start toward halting the plummeting grain prices and stabilizing markets, and there was a new farm bill to be developed.

The 1977 farm act was nine months in the making. It was and still is the most comprehensive assembly of elements for a national food and agricultural policy ever enacted in a single piece of legislation. The reserve program was endorsed; income-supplement levels were geared more closely to the costs of producing the commodity; benefits rigidly allocated by outdated acreage allotments were replaced by a system basing them on what was actually planted. All were features designed to provide producers with more latitude in decision-making, along with rewards for responsible risk management.

A new organizational structure was established to help redirect research and education, and the food stamp program was totally revamped, with eligibility for those benefits narrowed but access to them eased, a relief to millions of the rural poor.

And, during the final steps of the legislative process, a provision was added reaffirming what was called a "historical policy" of encouraging the family farm system, for the social well-being of the Nation and a competitive environment in food and fiber production. A "family farm" was not defined, and, the Congress stated, programs should not be exclusively administered for the benefit of family farms.

As good for farming as the 1977 farm act was, it still basically approached agriculture as if all farmers were alike, had the same problems, received the same benefits from the programs, and should be assisted on the basis of farm-unit production rather than per-person need. By and large, it failed to recognize any special problems of farms of different sizes or organization or experience, bought under different economic circumstances in different places.

At its heart, the directions in American agriculture with which the 1977 act was concerned were the direction of unit prices of supported commodities and the magnitude of budget expenditures. Averages and the dictates of the legislative calendar were still the principal guideposts.

There had to be a better way.

Mr. President, we must strive for consistency in our agricultural policy. We simply cannot afford to continue taking a band-aid approach to farm policy.

We are 1 week away from the August recess. I cannot support a motion to proceed to a major agricultural bill with plans for a new crop year approaching—and without any idea of what the 1984 farm program will be.

Freezing target prices and reducing the loan rate for agricultural commodities will have a widespread impact on farm prices and the farm economy. I am not prepared to take such drastic action simply to pacify David Stockman.

Over the past year I have encouraged the Senate to take action to curb the sodbusting of our fragile rangelands. I have encouraged the Senate to take action on farm credit legislation aimed at getting farmers through the extended depression in the farm economy. None of these bills have reached the Senate floor. In fact, over the past 2 years, the only agricultural bills we seem to address are those aimed at reducing the Government's commitment toward assuring farmers reasonable prices for food and fiber.

I am not prepared to let this trend continue without the opportunity to bring these important agricultural measures before the Senate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

GRAIN TRADE AND TEXTILE ISSUES

Mr. President, as the distinguished occupant of the chair is aware, there has been considerable discussion recently about what I consider to be a nonissue, certainly a nonissue in terms of substance. There was a report in some of the newspapers, for example, suggesting that there was a question about whether Red China would purchase more grain and perhaps other agricultural commodities from the United States if the Communist Chinese had greater access to U.S. textile and apparel markets.

That is a convoluted way to look at it, Mr. President. The Red Chinese are flooding the U.S. textile and apparel markets. Indeed, Communist China is now the fourth-largest supplier of textile and apparel imports to the United States. Suffice it to say that the information thus far made available to the public by the media has been one-sided, to say the least.

First, I do not think anybody can say with certainty what the Red Chinese would do about grain purchases from the United States if we were to permit the entry of even more of their textiles. Certainly, this Senator has no information in that regard. I am incapable of reading the mind of anyone, least of all a Communist's mind. But I do contend that the Red Chinese can now purchase whatever grain they want or need at substantially lower prices from other countries. In fact, Mr. President, the Red Chinese are doing just that. That is because virtually every other grain exporting country in the world uses massive export subsidies to dump their surpluses onto the world market.

Mr. President, in that connection, I ask unanimous consent that a table depicting recent price quotations on high-quality milling wheat for export from the principal exporting nations be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Export prices for wheat—June 1983

[Dollars per metric ton]

United States	149
Argentina [1]	128
France [2]	136
Australia [1]	160
Canada [1]	186

[1] This is the price quoted by the government grain board that does all trading in these countries. Actual trades would be made at a lower price—probably as low as it took to get the business.

[2] Effective price to buyer, after the EEC export subsidy is paid. (Export subsidies for high-quality milling wheat for export at Rouen, France, on June 29, 1983, were $61 per ton. These prices and subsidies are highly variable. France guarantees its farmers $197 per ton, and the subsidies are the difference between that price and whatever it takes to make the sale.)

Mr. HELMS. As those who will be reading the RECORD will note, I have just inserted a comparison of the metric ton cost of wheat purchased from the United States, from Argentina, from France, from Australia, and from Canada.

There is a footnote in the cases of Argentina, France, Australia, and Canada. The first footnote relates to Argentina:

This is the price quoted by the Government Grain Board that does all the trading

in these countries. Actual trades would be made at a lower price—probably as low as it took to get the business.

In other words, Mr. President, it is sort of like the sticker on a car in a used carlot. If you believe that sticker, you will believe anything. You negotiate with the salesman and the price is always much lower.

But in any case, the footnotes have been included in the unanimous-consent request that I just made, and those who read the RECORD tomorrow or subsequently will be able to see the point I am making.

Now, Mr. President, the Senator from North Carolina yields to no one in my commitment to ending the predatory agricultural subsidies practiced and employed by various foreign countries. As a matter of fact, the so-called blended credit program which has been so successfully used by our Government to restore some small measure of equity to agricultural trade, is a result of the Helms amendment to the 1982 Budget Reconciliation Act.

Moreover, Mr. President, the Senate Commmittee on Agriculture, Nutrition, and Forestry has reported a bipartisan version of legislation that I introduced bearing the title Agricultural Export Equity Market and Expansions Act of 1983. This bill bears the number S. 822. It is now on the Senate Calendar. It provides a number of mechanisms to combat the unfair practices of exporting competitor nations and is designed to induce those nations using unfair subsidies to the bargaining table. Chances of passage of S. 822 later on this session seem quite good.

On top of all that, Mr. President, I have written a number of articles and have delivered a number of speeches on this subject, and I hope that I have to some extent helped draw the attention of our Nation's highest policymakers to the problem of these predatory export subsidies on the part of foreign countires. As a consequence, the administration is now engaged in serious discussions with our trading partners, and the President has taken a number of decisive actions to induce the kind of reforms needed in this area.

In addition, the Senate has adopted provisions that I authored and offered to the International Monetary Fund bill that require the U.S. Executive Director to the IMF to submit a proposal that would bring an end to predatory subsidies by IMF member nations.

I note with interest that the House of Representatives now has IMF legislation under consideration, and if the IMF bill survives there—and I fervently hope that it will not—there seems to be no question that the kind of language that I have proposed will become law.

All of this is to say that this Senator from North Carolina is concerned about encouraging as much U.S. agricultural exports as can possibly be accomplished. And my actions, I think, demonstrate that.

Now back to the textile situation with Red China. Senators should be aware that textile and apparel imports from Red China have increased dramatically in recent years—as a matter of fact, ever since the Carter administration granted what is known as most-favored-nation status to Communist China. I vigorously opposed that action by the previous administration. I believed it to be a tragic mistake then, and I am even more persuaded today that it was a tragic mistake. Look at the facts.

The total compound annual growth in the importation of textiles and apparel from Red China from 1977 to 1982 is 55.1 percent, and if you will add all that up, the total increase for the period has been 621 percent. We have a second Hong Kong on our hands in terms of this deluge of textile and apparel products.

Mr. President, I have a table depicting the growth of U.S. exports of textiles and apparel from the so-called People's Republic of China, and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

U.S. TEXTILE IMPORTS FROM COMMUNIST CHINA

[Millions of square yard equivalents (SYE)]

Year	Cotton	Wool	Man-made	Total
1975	139.3	0.1	1.0	140.4
1976	148.4	0.7	3.4	152.5
1977	81.9	0.6	5.8	88.3
1978	186.1	1.2	13.7	201.0
1979	190.3	1.0	39.9	231.2
Most Favored Nation Status Extended to Communist China				
1980	261.4	10.7	52.7	324.8
1981	442.8	9.1	109.9	561.8
1982	438.2	11.4	221.1	670.0
1983 [1]	456.3	12.3	239.6	708.1

[1] Note: 12-month period ending May 1983.

Mr. HELMS. In the 12-month period ended June 1982, the U.S. imports of Red Chinese cotton apparel alone amounted to 145 million square yard equivalents (SYE). That was 31 percent higher than for the calendar year 1980. In the same 12-month period, imports of man-made fiber apparel surpassed cotton apparel and reached a level of 146 million SYE, 206 percent over calendar 1980. This increase reflects dramatically the effective utilization by Red China of its newly installed fiber-making capacity.

What do we have, Mr. President? We have the so-called People's Republic of China complaining about what it calls "limited access" to the U.S. market. Before anybody buys that line, consider Red China's exports of basic textile materials to other Far Eastern countries which export large quantities of apparel to the United States.

The total value of textiles and apparel exported directly to the United States by Red China in 1982 was $796 million, up from $427 million in 1980. The total value of exports of textiles—yarns, fabric, miscellaneous textiles—by Red China to countries which export apparel to the United States in 1980 was as follows: Hong Kong, $964 million; Japan, $210 million.

The U.S. bilateral agreement with the so-called People's Republic of China was originally effective January 1, 1980. Imports from Red China rose from 231.1 million square yard equivalents in 1979, the last year before controls, to 547.4 million square yard equivalents in the 12 months ending November 1981—the first month in which a call on Red China was made on print cloth.

It may seem a little involved, but I have tried to relate this to the Senate and to make it part of the record. It is essential that all of us back off and consider this in terms of the hundreds of thousands of textile and apparel jobs that have been lost in the United States.

This Senator is growing a little weary of hearing all the protests, not only from Peking but also from some in the United States, that we need to let Red China have even more of the U.S. textile market than it now has. What those voices are saying is this: "Forget about our textile and apparel workers, the hundreds of thousands who have lost and are losing their jobs throughout this country. We want to court and appease a nation that uses slave labor, a nation that, by the records of the U.S. Government itself, has slaughtered more than 60 million of its own innocent citizens."

So I may be forgiven, I hope, if I wait a while before I shed too many tears about what the rulers of Peking are complaining about. Mainly, I wanted the RECORD to show, for Senators and others to see, a bit of both sides of this proposition which, up to now, in the major news media of this country, has been given short shrift.

THE FUTURE OF FARMERS

Mr. President, this week the State presidents of the Future Farmers of America are visiting Washington for their annual conference. This group includes outstanding young leaders of agriculture from all 50 States.

The Future Farmers of America is an organization of students of vocational agriculture who are preparing for careers in agriculture and agribusiness. Last November, I had the opportunity to address the national convention of this fine organization, and I can attest to the good work which they are doing.

The creed of the FFA organization begins with the words: "I believe in the future of farming." Thus, it is particularly appropriate that these FFA

leaders are in Washington this week, because the legislation we are considering is vital to the future of agriculture.

I urge my colleagues to think about the long-term best interest of agriculture. While it may be difficult in the short term to consider adjustments in target prices, that is outweighed by the fact that American agriculture will be better off in the long run if we make these legislative changes.

I ask my colleagues to think about the agricultural economy in future years. Will these young FFA members find themselves in a farm economy characterized by costly, Government-induced surpluses, or will they be part of a market-oriented agriculture?

If we continue to allow our farm-support mechanisms, such as target prices, to escalate, the consequences will be twofold: We will encourage additional surplus production in the United States and we will lose markets for our farm products overseas.

Escalating target prices will require large, costly Federal outlays for deficiency payments. The potential cost of these payments may also force the United States into massive production-control efforts which are complicated and difficult to administer, which reduce the economic base of agribusinesses and local communities, and which allow other exporting nations to take a larger share of world export markets.

The result of this policy is that surplus production is induced, U.S. farmers lose their competitiveness in world markets, costs to the consumer and taxpayer are increased, and resources are used inefficiently. In the face of such surpluses, our young farmers will have no opportunity for profitable market prices. We will do these young farmers a disservice in the long run if we send them a price signal that is incorrect.

If we maintain high price supports and massive production controls, that policy will ultimately result in our agricultural products—and those of future generations—being shut out of world markets. We do so at great cost to ourselves and our posterity.

Today, more than a quarter of U.S. farm income is derived from agricultural exports, nearly twice that of a decade ago. About a third of harvested acres are devoted to exports. We export more than three-fifths of our wheat, half of our soybeans and rice, and more than a third of our corn and cotton.

If we surrender our export markets, what happens to these commodities? Do they all become a huge surplus, further depressing prices in the United States? If so, how many farmers—young and old—will go out of business?

There will be calls for more stringent limits on production—perhaps mandatory controls—if we withdraw from export markets. Yet recent history shows that while the United States cuts production, other exporting countries are expanding production of the same crops. The net result is that prices remain low, and the United States gradually reduces its market share and our opportunity for profit.

And what about the impact on the general economy? More than 1 million people in the United States work in jobs related to farm exports, over half of these in nonfarm industries. In fiscal year 1982, our 39.1 billion dollars' worth of farm exports created about 30 billion dollars' worth of additional business in the nonfarm community, and contributed a net $23.7 billion surplus to our balance of trade.

Like it or not, our farm economy is geared to agricultual exports. If we withdraw from world markets, either directly through massive production controls or indirectly through Government programs that are inflexible and nonmarket oriented, we will slowly reduce our agricultural production base in the United States. That is a fancy way or saying that massive numbers of farmers will cease to exist, and young farmers will have no opportunity at all. I believe our farmers deserve better.

We simply must adjust our Government farm programs to make them more cost effective and market sensitive. At the same time, we can continue to provide income protection and we must increase our efforts to counter unfair foreign trade practices.

There is another reason why this legislation is important to the future of agriculture. Much attention is now being focused on the cost of Federal farm programs. The public and the press are noticing that farm program costs have increased fivefold since 1981, faster than any Government agency including defense. Farm program outlays for this year are estimated at an all-time high $21.1 billion.

If we do not make responsible adjustments to control the costs of our programs, we may provoke a consumer and taxpayer backlash which could endanger all farm programs. As one farm organization representative said: "Either we take the initiative to get our house in order or someone will come along and wipe out these programs altogether."

Our farm programs have worked well over the years to provide a degree of predictability and support in an inherently unstable business. We should explain to the public that these programs have become costly for several reasons, but we should also make necessary adjustments to preserve and extend these programs. If we do not, we may endanger these programs for future generations of farmers. The pending legislation is a good step toward adjusting these programs for their continued use.

Mr. President, this legislation also contains $600 million in farm export assistance for fiscal years 1984 and 1985. In addition, the legislation will provide financing for the agricultural export credit revolving fund, which can serve as an ongoing source of financing for U.S. agricultural exports.

These are investments in the future of agriculture. Money that is loaned out from the fund as export credits will be repaid to the fund with interest. Then these repayments will be loaned out again. This revolving fund would be made permanent by the legislation we are considering.

Future generations of farmers will benefit from the investment we can make today in building long-term demand for farm products. That is what our young farmers need: more customers for our commodities, so that farmers can make profits in the marketplace.

Mr. President, I salute the Future Farmers of America. In their spirit, I urge the Senate to put aside short-term, political gain and to enact this legislation which will put us back on track toward a market-oriented agriculture in the future.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JEPSEN). Without objection, it is so ordered.

Mr. BAKER. Mr. President, could I inquire, is the conference report on H.R. 2973 at the desk?

The PRESIDING OFFICER. It is.

Mr. BAKER. I thank the Chair.

Mr. President, that is the conference report on the repeal of the withholding of tax from dividends and interest. I think it is important that we proceed with that as soon as possible.

REPEAL OF WITHHOLDING TAX FROM INTEREST AND DIVIDENDS—CONFERENCE REPORT

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate the conference report on H.R. 2973.

The PRESIDING OFFICER. The clerk will report.

The acting assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2973) to repeal the withholding of tax from interest and dividends, having met, after full and free conference, have agreed to recommend and do recommend to their respec-

tive Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the conference report?

There being no objection, the Senate proceeded to consider the conference report.

(The conference report is printed in the House proceedings of the RECORD of July 27, 1983, on page H5763.)

The PRESIDING OFFICER. The Chair recognizes the Senator from Kansas.

Mr. DOLE. Mr. President, I am pleased to ask the Senate to consider and approve the conference report to H.R. 2973.

I understand that Senator KASTEN would like to speak briefly and Senator DANFORTH and maybe others. I might say to those who are listening in their offices, there are requests for a rollcall vote. We hope to move rather quickly.

The conference report and the statement of the managers were filed on July 27, 1983, after a conference lasting more than a full week. I believe the final product represents a good agreement for the Senate, and a good package of legislation for the Nation.

I believe the President would not have signed any bill repealing withholding on interest and dividends unless it contained meaningful alternative compliance measures. I believe that the Senate's success in adding such provisions to the House bill, and its success in adding the President's Caribbean Basin Initiative, will persuade the President to sign this legislation. Although all of the Senate provisions were not accepted, we can feel proud of the Senate's role in formulating this legislation.

As I said before on the floor, I do not think the President would have signed this modification of withholding without something in exchange. We believe the compliance provisions will satisfy the President, maybe not as well as withholding would have satisfied the President. In addition to that, the adoption of what he considers to be and what is a very important policy matter for the administration—in fact to many Members of Congress on both sides of the aisle—to the Caribbean Basin—the Caribbean Basin Initiative. So it is my belief and hope—and I have been so assured—that the President will sign this legislation.

I think—notwithstanding the bitter fight at times we have had over the withholding issue—that the issue has been properly resolved. There has been give and take on both sides; obviously not as far as some would like to go. Some probably still will oppose the conference report for that reason.

REPEAL OF MANDATORY WITHHOLDING AND SUBSTITUTION OF COMPLIANCE IMPROVEMENT MEASURES

Mr. President, the conference agreed to most of the substance of the Senate compliance improvement package. I want to review the compliance package and to explain the changes to the package that were insisted upon by the House conferees.

First, however, let me remind my colleagues of why we must improve compliance in this area, what the substance of backup withholding is, and why it is responsive to the criticisms that were made against mandatory withholding.

CHEATING ON INTEREST AND DIVIDEND INCOME

Approximately $25 billion in interest and dividend income goes unreported, according to the Treasury Department. That translates, again according to the Treasury Department, into a revenue loss of about $8 billion every year. If we could only collect all of the tax that is owed on such income, we would be one third of the way toward meeting the 1984 budget reconciliation instruction. All of this underreporting, whether intentional or inadvertent, occurs, despite the fact that the United States has had a comprehensive information reporting system since 1962.

PROBLEMS WITH INFORMATION REPORTING

Study of the information reporting system shows two major problems. First, the system is not working well in the identification of taxpayers who fail to comply. Second, the system is not working well in following up tax noncompliance. Both of these problems are dealt with by the conference agreement.

HOW BACKUP WITHHOLDING RESPONDS TO CRITICISMS OF MANDATORY WITHHOLDING

Mandatory withholding, which also sought to deal with these two problems, was criticized on three principal grounds. First, mandatory withholding was criticized as overly broad. It affected all taxpayers, conscientious as well as unconscientious. Backup withholding, by contrast, is targeted to cheaters and to those who fail to comply with the requirements of the information reporting system.

Mandatory withholding was also criticized because it shifted part of the IRS's job to the banks. While some of us believe that such "privatization" might have been much more efficient and therefore desirable, the judgment of the Congress has been that the job of tax enforcement should be left in the hands of the IRS. Backup withholding does just that, requiring the IRS to identify tax cheats. The banks' only role is to withhold at a 20-percent rate against identified tax cheats on notice from the IRS. This task is substantially like that performed by banks today in the case of IRS levies on bank accounts, a matter that was raised in the conference by the distinguished Senator from Louisiana, Senator LONG.

I would like to emphasize, however, that relying solely on IRS efforts to improve compliance carries a price. In order to obtain the level of compliance anticipated by this legislation, $15 million of additional IRS appropriations will be necessary for fiscal year 1984. This Senator appreciates the efforts of the Appropriations Committee, and especially Senators HATFIELD and ABDNOR, who have included the necessary funds in the Treasury appropriations bill for fiscal year 1984.

This $15 million is critical if the compliance provisions of this conference agreement are, in fact, going to be effective in this coming year. In addition, further appropriations will be necessary in succeeding years. These appropriations, I am convinced, will be cost effective in increased compliance. However, absent these appropriations, my colleagues should be acutely aware that increased compliance will not be achieved.

Third, and finally, mandatory withholding was criticized as creating too much paperwork. Under backup withholding, a taxpayer must only give his social security number to his bank, certify that it is correct and indicate whether he is subject to backup withholding. No exemption certificates will be required or necessary.

AN OVERVIEW OF THE COMPLIANCE PACKAGE

The core of the compliance package for interest and dividend income in the Senate bill was backup withholding and increased penalties on banks and other payors who fail to comply with the information reporting system. Both backup withholding and such increased penalties were retained in the conference agreement. Moreover, despite initial opposition from the House conferees, these penalties will be self-assesssed. Thus, Members of the Senate should rest assured that we have a tough compliance package, much like that with which we went to conference.

With that summary of the differences between mandatory withholding and backup withholding and the overview of the compliance package, I want to highlight the principal changes made by the conference.

ATTACHMENT OF 1099'S TO TAX RETURNS

The most important single change that the House conferees insisted upon was the deletion of the requirement that the taxpayer attach his 1099 information returns to his tax return.

That requirement was supported by a number of Senators, principally by the distinguished Senator from Alaska, Senator MURKOWSKI. It was included in many of the earlier withholding compromise bills, and there were a number of bills. And, as I said in the conference, there were a

number of Senators and a number of House Members from both parties who were going to suggest that since we do not require attaching the information return, the 1099, that somehow we are not seeking strong compliance. But the House conferees were convinced, and I think many of the Senate conferees were convinced, that perhaps that was unnecessary paperwork, it did not add anything, and that what we did do in the conference would be more effective.

Perhaps the strongest statement of the need for the attachment of 1099's to tax returns came from the Senator from Alaska (Mr. MURKOWSKI). Senator MURKOWSKI argued very persuasively in this Senator's judgment that a requirement on payees to attach their 1099 information reports to their tax return would do more to cause taxpayers to be more careful about maintaining accurate records of the interest and dividend income they receive than any further grant of authority to the Internal Revenue Service.

This Senator argued in the conference, as did Senator BENTSEN, that the attachment requirement should be retained. The House conferees, however, argued that because the IRS would not process the paper information documents, the attachment was an unnecessary paperwork burden.

The House never really had the opportunity—I will use the word opportunity—to debate withholding as we did in this body. Perhaps many of the House conferees never truly understood the feeling of a lot of Members on attaching the 1099. But if, in fact, attachment would have put another burden on the IRS and created an additional cost to the taxpayer, but does not provide additional information which could not be made in a more efficient way, then information reports should not have been required to be attached.

As I suggested in the conference committee, if for some reason this plan does not work, I will bet there will be a number of my colleagues in both parties and on both sides of the Capitol that will feel they should have attached the 1099's.

I hope the IRS is listening and we can make back-up withholding work.

The House conferees did agree, however, to retain the requirement that the 1099 information report be required to be in official form, and added a requirement of a separate mailing of such documents. Moreover, the House conferees agreed that the form 1099 should contain a stern warning of the consequence of noncompliance.

This requirement was insisted upon by Senator DANFORTH and others. Now, rather than to match the 1099, there will be a separate mailing to the taxpayer. That will be a separate special form indicating the income is taxable and, "If you do not pay your taxes, you are subject to penalty." Perhaps in the long run that will be the best way to go.

EFFECTIVE DATES

The conference agreement significantly delays the effective date of the new provisions, implementing the new safeguards generally only on January 1, 1984, rather than 30 days after the date of enactment. Frankly, I do not think that this delay seriously impairs the package. In the long run, both rules substantially improve compliance, and that should be our principal concern.

CORE PRESERVED

This Senator will say, despite the deletion in the conference at the insistence of the House conferees of some new penalties and special rules, that he is satisifed that the core of the compliance package was preserved intact. No significant revenue raising element of the package was deleted, according to the revenue estimating staffs of the Treasury and the Congress. That fact should provide substantial assurance to all those of my colleagues who have serious concern that we must improve taxpayer compliance.

NEW PENALTY ON INTEREST AND DIVIDEND WITHHOLDING

Mr. President, I should call my colleagues' attention to two additions that were made by the House conferees, on the specific recommendation of the Treasury Department, that this Senator and the rest of his colleagues had previously affirmatively rejected. The first is a new 5-percent penalty on underreporting of interest and dividend income subject to information reporting. It is arguably a tougher standard that what the House conferees and the Treasury Department were willing to impose on large financial institutions that fail to file information returns with correct identification numbers. And it may be a rare taxpayer who can show by clear and convincing evidence that he was not negligent. Thus, the 5-percent negligence penalty could fall on a broader class of taxpayers, many with nominal amounts of underreporting. However, the threshold of underreporting anticipated by this legislation and the cost of collecting this penalty for small tax deficiencies should go a long way toward assuring that this penalty will not be abused by the IRS.

This penalty was insisted upon by the Treasury Department and the House conferees, and in the interest of concluding the conference, the Senate conferees receded, despite some reservations.

TERM WITHHOLDING

A second major change in the conference was the conversion of the Senate's backup withholding system into a term withholding system. Thus, for an underreporter subject to backup withholding, correction of the problem or establishment that there is a bona fide dispute with the IRS will not terminate backup withholding before the end of the calendar year. If the correction occurs after October 15, withholding will continue through the end of the following year.

These are rigorous rules, Mr. President. To mitigate their harshness, the Senate conferees insisted on making the hardship exemption of the Senate bill available. Thus, the hardship exemption will override the requirement of term withholding. This Senator believes that we have a workable compromise on term withholding.

We were reminded of the fact that in the case of some elderly person or someone who, inadvertently, failed to comply, that individual should not have term withholding, so we provided this escape hatch which we think will take care of most of those cases.

CONCLUSION

Mr. President, having described the substance of the conference agreement, let me conclude by reminding my colleagues of all of the careful thought and hard work that went into this compromise.

Let me begin by highlighting the work of the Senator from Wisconsin. Many Americans know him as the leader of the drive to repeal interest and dividend withholding. That he was. But more importantly, in the long run, I believe, the junior Senator from Wisconsin was one of the leading advocates of an alternative to mandatory withholding. In forging backup withholding and the increased penalties for payors who do not comply with the information reporting requirements, the Senator from Wisconsin sent a clear signal that he would not tolerate tax cheating. For that role, the Senator deserves the warm support of all honest taxpayers, and the sincere appreciation of his colleagues. Let me add, too, that although the Senator and I differed on the merits of mandatory withholding, I have enjoyed very much working with the Senator to reach an accommodation on this problem. Our success demonstrates indeed that we will hear more from the Senator from Wisconsin in this Chamber.

I would be remiss, however, if I failed to note the strong role played by many other Members of the Senate in forging this compromise. I previously noted the important role of the junior Senator from Alaska (Mr. MURKOWSKI). Sentor STEVENS and Senator BOSCHWITZ also made important contributions to this compromise, as did Senator COHEN.

I particularly thank the distinguished Senator from Texas, the distinguished Senator from Hawaii, and the distinguished Senator from Louisiana for helping us to conclude the con-

ference. There will be mortgage revenue bonds that will not end at the end of this year. We will work out a satisfactory compromise, in my view. The Senator from Texas indicated a willingness to reach a compromise. He understands we ought to tighten up the program to some extent.

Senator LONG and I have a bill introduced which we think properly addresses at least a part of that problem. It is my hope that we can work with all Senators who have an interest in mortgage revenue bonds and have a bill on the floor or an amendment on the floor that will receive the substantial support in the next 60 to 90 days.

The result is a compliance package that deserves the support of all of us. With the repeal of mandatory withholding and enactment of these tough new compliance measures, the Senate can put this difficult issue behind us. I urge my colleagues to support this compromise.

CARIBBEAN BASIN INTIATIVE

Mr. President, I am particularly pleased that the conferees agreed to accept, almost without change, President Reagan's Caribbean Basin Initiative (CBI). This important program will authorize the President to proclaim, for a 12-year period, duty-free treatment for most imports from Caribbean Basin countries. The legislation further would extend North American convention tax status to beneficiary countries that agree to exchange information necessary for the enforcement of our tax laws. There are safeguards in the bill and existing law to protect U.S. firms and workers from injurious surges of imports made duty free pursuant to these new authorities. Finally, several provisions of the bill specially benefit Puerto Rico and the Virgin Islands.

The negligible differences between the House- and Senate-passed versions by this legislation principally related to criteria-conditioning eligibility for benefits; scope of duty-free treatment; and several studies.

With regard to eligibility for benefits, the Senate amendment contained three provisions not in the House bill. They were: First, the Senate deleted Cuba from the list of countries eligible for benefits; second, the Senate included a criterion that a beneficiary country must cooperate with U.S. efforts to interdict unlawful narcotics imports; and third, the Senate included among the criteria that the President may waive in the national interest a provision regarding the unauthorized broadcast of U.S.-copyrighted material. The House bill included, among the provisions the President must consider with regard to eligibility, the consideration whether a country affords adequate and effective means for foreign nations to secure, to exercise, and to enforce exclusive rights in intellectual property.

The House conferees agreed to the additional Senate provisions, and we agreed to the House provision. These additional criteria represent important U.S. interests that are fairly made a part of the conditions determining whether a country is entitled to the substantial benefits the CBI offers. While the House amendment had no Senate counterpart, in the opinion of the Senate conferees, it too reflects an important facet of U.S. trade interests that should be fostered. It is particularly important to the U.S. publishing industry, which engages in much business in the region, and I believe it will be supported by all Members.

The CBI extends duty-free treatment to most products, if all conditions for that treatment are satisfied. Certain products are excluded from such treatment, however, including leather products, footwear, canned tuna, and textiles. The Senate amendment added to this list two additional exclusions. They were: First, bulk rum valued at below $3 per proof gallon, except that the first 200,000 gallons of such rum could enter duty free and that volume could be increased annually by 10 percent unless Virgin Islands shipments fell below 95 percent of the 1982 level; and second, watches or watch parts of whatever type containing any material that is the product of certain Communist countries. The House agreed to accept the latter exclusion, but refused to agree to the rum provision.

Mr. President, the Senate approved this exclusion for certain low-priced rum when it agreed to the Senate amendment on June 13. As an amendment I had worked out with Senator WEICKER during that debate, I felt an especial responsibility to seek House agreement to it. Unfortunately, the overall best interests of the Virgin Islands dictated otherwise for the following reason:

The Senate amendment also included another provision concerning Virgin Islands rum which was not in the House bill. It would provide a limited and conditional exemption for certain nontoxic rum stillage discharges from applicable provisions of the Federal Water Pollution Control Act (FWPCA). This provision was strongly supported by the Virgin Islands Government as essential to maintaining their remaining rum industry. Because Federal excise taxes on rum are transferred back to the Virgin Islands government, that industry indirectly provides a substantial share of the Government's revenues.

The dilemma for the conferees simply was that the House conferees refused to consider accepting both provisions benefiting the Virgin Islands industry. The House members on the one hand argued that rum was perhaps the single most important export product potentially benefiting from the CBI; on the other hand, representatives of the Virgin Islands Government conceded that the FWPCA exemption was the more important of the two provisions affecting their industry. In these circumstances, the Senate conferees reluctantly agreed to recede from our insistence on the product exclusion, but only on the condition that the House conferees agree to accept the FWPCA exemption. They did so agree.

Mr. President, while I am disappointed that we did not achieve all of what we sought, I note that the bill nevertheless contains a number of safeguards and benefits for the Virgin Islands, including some specifically applicable to the rum industry. Further, I will ask the Finance Committee to request the International Trade Commission to establish a monitoring system that will keep the Congress and the President currently informed of the effects of increased rum imports on the Virgin Islands and Puerto Rican industries. I am confident that these measures will provide substantially the same safeguards as having the product exclusion now deleted from the Senate bill.

The remaining differences reconciled by the conferees were principally technical in nature. These included: First, House agreement to include citrus concentrate among the agricultural products eligible for emergency import relief; second, Senate agreement to three studies sought by the House; third, House agreement to a Senate provision authorizing the President to waive, for civil tax law enforcement purposes only, the requirement that a country agree to exchange tax information as a condition of attaining North American convention tax status; and fourth, House agreement to a Senate provision embodying a sense of the Congress resolution that there should be no imports of sugar from Communist countries. A very few other technical changes, involving minor differences in the two bills' language, also were agreed to by the conferees.

In sum, the conferees were able to achieve agreement on a bill substantially reflecting the work of the Senate and the proposal of the President. It represents the conclusion of 18 months of bipartisan effort to implement a bold idea offering hope for our neighbors to the south that they can rely on the United States to provide a means of economic growth and political stability. I consider the conference agreement to represent a final consensus statement of support for the program, which I am pleased that we can finally launch.

We have also been promised by the distinguished chairman of the committee and by the distinguished ranking Democratic member of that commit-

tee, Congressman GIBBONS, that they will not only work on reciprocity, which was initiated in this Chamber by the distinguished Senator from Missouri (Mr. DANFORTH) and the distinguished Senator from Texas (Mr. BENTSEN), that they will not only have hearings, but will actually markup that legislation, perhaps as early as September.

ENTERPRISE ZONES

Mr. President, the House conferees refused to accept the provisions of the Senate amendment that would have authorized the designation of up to 75 enterprise zones over the next 3 years. These zones would be eligible for substantial Federal tax and regulatory relief in an effort to spur development of distressed areas by removing barriers to private initiative. I regret that we could not make more progress with the House on this proposal, because it has been approved twice by the Finance Committee, and was the subject of extensive Senate hearings over the past 3 years.

However, it is important to note for the record that we did not leave conference emptyhanded on this important issue. Chairman ROSTENKOWSKI made a firm commitment during the conferees' discussion of enterprise zones to hold a hearing on the administration proposal this fall in the Ways and Means Committee. That will mark the first time enterprise zones have received a formal examination in the House, and we hope it will pave the way for final action in the near future. Certainly President Reagan, Senator BOSCHWITZ, Senator CHAFEE, and others who are vitally interested in this legislation will continue to work for a final package that can be signed into law. So we have made progress, even if the result is less than we had hoped for.

MORTGAGE SUBSIDY BONDS AND MORTGAGE INDEBTEDNESS

Mr. President, by the second full day of conference, the conferees had reached agreement on all but the Senate's provision repealing the sunset of mortgage subsidy bonds. The House conferees were adamant in their refusal to accept the Senate provision, but the Senate conferees insisted on our provision, and held steadfast for 7 more days. The Senate finally receded, but only after receiving assurances from Chairman ROSTENKOWSKI that the House Ways and Means Committee would consider the mortgage subsidy bond issue in the fall.

In the final analysis, I believe the Senate conferees acted responsibly in receding on this issue. Although there are 5 months left before the scheduled sunset of mortgage subsidy bonds, the Congress had less than 10 days to act on the withholding bill when the Senate finally receded. I am confident there will be ample opportunities to enact mortgage bond legislation before the end of the year.

The Senate also receded on its amendment modifying the tax treatment of the discharge of mortgage indebtedness on an individual's principal residence. This Senate provision, added as a floor amendment, would have cost $400 million over the next 2 years. I believe the high cost of this provision led the House conferees to resist taking it on this bill.

Senators DECONCINI and DANFORTH both have concerns in this area and have sought legislative relief from the current IRS rule in this area. I hope the Senate Finance Committee will have an opportunity to consider this problem again in the near future.

CONCLUSION

In summary, Mr. President, the conferees' report reflects an agreement on several important tax and trade proposals that the Senate can be proud of. The conference report was approved today by the House by a vote of 392 to 18 with 6 voting present. I urge the Senate to approve the report and send the important legislation to the President.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, I am pleased to have participated in this conference and to have signed the conference report. I want to congratulate the chairman of the committee (Mr. DOLE) on the fine way he conducted the conference as chairman of the conferees on the two sides. I am happy he was able to provide the leadership that brought us together on what I believe is a fair compromise on the differences between the Senate and the House bills. This conference report will make it possible to act on the repeal of withholding on dividends and interest.

Mr. President, Senators all know that I strongly opposed the backup withholding provisions that were contained in the Senate amendment. I felt we should simply repeal the withholding provisions enacted last year.

However, the conference agreement on tax compliance eliminates most of the new tax penalties in the Senate amendment, reduces the paperwork required by that amendment and limits the use of so-called backup withholding. The conference agreement would rely primarily on improvement of IRS document matching capabilities to improve tax compliance. Document matching—that is, comparing interest and dividends reported on Forms 1099 with the taxpayer's income tax return—would be improved through additional IRS funding and through provisions designed to encourage banks and stockholders to obtain correct taxpayer identification numbers from their customers.

The Senate amendment's requirement of filing forms 1099 on magnetic media, by payors filing 50 or more such forms, would be delayed until 1984 reports are filed in 1985, and the IRS would have the authority to grant hardship exemptions from this requirement. Backup withholding would apply beginning in 1984, as already provided under the 1982 tax bill, to accounts where document matching cannot work because of missing or inaccurate taxpayer identification numbers. Backup withholding could otherwise be applied only in cases where the IRS felt that it would be helpful in its collection efforts, and then only after an individual had failed to respond to a series of at least four IRS letters requesting tax payments on his unreported interest or dividends.

Although I would have preferred that backup withholding be eliminated completely, I do feel that the conference agreement is a vast improvement compared with the additional paperwork and complexity that would have been required under the Senate compliance provisions. Because of this improvement, I signed the conference report and support the conference agreement.

I am particularly pleased, Mr. President, that, as a part of this measure, we were able to bring back to the Senate an agreement on the Caribbean Basin Initiative. This is something the chairman of the committee has supported in the past, and all of us have favored it in one respect or another. It was a matter of getting together on the details. This Senator has feared that this matter might impede the repeal of withholding on interest and dividends. I am pleased to say it did not. This matter, I am happy to say, will become law and has been worked out in a fashion which I believe will meet the approval of both Houses.

Mr. President, I urge that all Senators vote for the conference report. Again, let me congratulate the distinguished Senator from Kansas for the fine work he has done in connection with this matter.

Mr. KASTEN. Mr. President, I want to congratulate and thank the Senator from Kansas, the chairman of the Committee on Finance (Mr. DOLE), the Senator from Louisiana (Mr. LONG), and all the other members of the Finance Committee who have worked for this compromise.

I echo the words of the Senators from Kansas and Louisiana in saying that the Caribbean Basin Initiative is important to the administration and Congress. And I am glad to see that the CBI will be signed into law.

Mr. President, no one knows better than I that this has been a long battle. It has been a long crusade—a year, in fact—to repeal withholding on interest and dividends. But we now have reached a point where we have a bill

that will be adopted by both Houses, and a repeal measure that will be signed into law by the President. So we have met all our goals.

With regard to the compliance measures: I agree with the Senators from Kansas and Louisiana. The compliance measures that we have been able to work out are most important. They make sense. They are tough, and put the emphasis where it really belongs. That is with the IRS. These measures will force them to use the information they already have to find the 10 percent of Americans who are not now in compliance with the law. It was wrong to penalize the 90 percent of all honest American taxpayers with mandatory withholding on interest and dividends. The best procedure is to identify the people who are not complying with the law, and focus our emphasis on them. The compliance measures in this bill will do so in a way that I think will be workable.

Originally I felt that the single best compliance measure was to require that the 1099 information reporting forms be attached to the tax returns when filed. Now that we have given more consideration to the interest problem and dividend compliance and have found out that the IRS would throw away the forms if they got them, it is clear that we do not need to require this attachment. I think the compromise the conference committee has worked out is a good one.

So, Mr. President, I urge adoption of the conference report. I do so with a great deal of respect and regard for the work of the conference committee, the Finance Committee, and particularly the Senator from Kansas.

I think that, by including compliance as part of this compromise, the Treasury or the IRS will never again come to Congress to propose the idea of withholding on interest and dividends. Their reason for proposing withholding was that they believed it was the best way to find people who are not in compliance. This bill provides a better way, a more workable way to do this. Their reason for proposing withholding has been eliminated. The idea, I believe, will never be proposed again.

So, not only have we defeated withholding on interest and dividends that was scheduled to take place in July 1983, we have also defeated this idea forever. We now have a way that will find the people who are not in compliance, put the emphasis on them, while not penalizing the honest taxpayers across America with the burdensome problems and complications of mandatory withholding.

I urge the adoption of this conference report and, once again, express my gratitude to the Senator from Kansas. It has been a great privilege and pleasure for me to be working along with him as we have developed a workable, meaningful compromise on this issue.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH. Mr. President, as the clerk reported, this conference report was signed by all members of the conference committee, including the Senator from Missouri. I stand now on the floor not so much as a member of the conference committee but as a Senator from Missouri. When a Member of the Senate belongs to a conference committee, he serves in that function as a representative of the U.S. Senate. I signed the conference report because I believed, as a representative of the Senate, that it did approximate the will of the majority of the Members of this body. But, Mr. President, I now stand here as an individual Senator and, as an individual Senator, I shall vote against the conference report.

I shall vote against it because, while I do believe that it represents the will of an overwhelming majority of the Members of the Senate, I am also confident in my own mind that it is contrary to the best interests of the United States.

Mr. President, every day's newspaper brings reports of deficits in the Federal budget somewhere in the neighborhood of $150 billion to $200 billion a year forever. This year, the Federal debt reached $1.3 trillion. By 1986, it will reach $2 trillion; by 1988, it will double from what it is now to $2.6 trillion. The majority of the people of this country say in public opinion polls that they are concerned about the size of the deficit, that they believe that the deficit is bad for America, that it weakens our country. They are correct in that view. Deficits are responsible for high inflation rates; deficits are responsible for high interest rates, deficits are responsible for high unemployment rates. We as a country cannot maintain deficits of this size without borrowing from our own future, borrowing from generations to come, and crippling any economic recovery which we are now experiencing.

One of the concerns I have about statements now coming from the President and from the Secretary of the Treasury is that they have so emphasized the economic recovery that they have adopted a very rose-colored-glasses view of where we stand as far as the economic outlook is concerned. I do not believe that we can have deficits of this size without having immense problems for the American people in the future.

Most of us in Congress also talk from time to time about the problem of the deficit, but I think that what we are really saying is this: We are willing to work on the deficit, to talk about it, and to make speeches about it, provided any action on our part is not unpopular with any of our constituents. We realize that what many of our constituents do not want is any control of entitlement programs or any increase in taxation. So we engage ourselves in a make-believe exercise, telling ourselves that we can get at the enormous deficit by plugging a tax loophole here, cutting a ridiculous program there, or zeroing in on a little waste in one program or another.

But, Mr. President, when we have deficits of $150 billion to $200 billion a year, there is no way to reduce them to a manageable level with a laundry list approach to specific spending cuts or specific tax increases. We in the Congress, if we are going to get our economy and the Federal budget under control, are going to have to start doing some things which are politically unpopular. We are going to have to start taking some steps that public opinion polls tell us are suicidal politically.

What this withholding repeal demonstrates is that as of now we are not prepared to do anything in the least bit unpopular to reduce the size of the deficit. If we cannot even agree to collect taxes that people owe and do not want to pay, what will we agree to do? I think that is really the issue behind the repeal of withholding on interest and dividends. Will we be willing to take at least some thought-to-be unpopular steps in order to help our country?

I believe, Mr. President, that if we who have a public forum in the Congress of the United States or in the White House went to the American people and said to them, "Your country is in trouble and we as a people are going to have to make some sacrifices for our country," most people in America would say, "Right on; count me in."

But we do not do that. We instead move from interest group to interest group, bankers, savings and loans, you name it, and say, "Oh, we don't want to do anything that is unpopular with you."

So, Mr. President, I think we are reading the economy wrong; I think we are reading tax policy wrong; I think that we are reading the will of the American people wrong, despite all the mail that was drummed up by the banks and the savings and loans. I do not think most people are as selfish as the interest groups would have us believe. I do think they want to have a stake in the future of this country. It is because of that deeply held feeling, and the similar feeling that by repealing withholding on interest and dividends we are caving in to interest groups against the best interests of this country, that I am going to vote against this conference report.

Mr. President, when this bill was finally passed in the Senate not long ago, I, after voting against it consistently, finally voted for the bill. I did so because the reciprocity bill, the extension of mortgage revenue bonds, the urban enterprise zone bill, and the Caribbean Basin Initiative bill were all attached. In addition, the bill included significant measures for toughening compliance provisions on interest and dividends. Unfortunately, the bill was substantially changed by the conference committee from what it was when it left the Senate.

Just to review the figures: When we first started withholding on interest and dividends, the projections by the Treasury Department were that the American people right now are not paying 8 billion dollars' worth of taxes each year that are due and owing on interest and dividends. It was further projected that about $3 billion of the $8 billion would be collected by withholding. When the repeal bill passed the Senate, the compliance provisions of the repeal would have collected about $1 billion of unpaid taxes on interest and dividends instead of the $3 billion that would have been collected by repeal. The stripped down compliance provisions in the conference committee version would produce a meager half a billion dollars out of what was originally $3 billion.

In addition to that, we stripped the bill of the reciprocity bill, although I must say that the members of the House and Ways and Means Committee did agree to take that bill to the floor of the House of Representatives. We stripped the bill of extension of the mortgage revenue bond exemption. We stripped the bill of the urban enterprise zone bill, and we left only repeal of withholding with a very meager effort to increase the compliance provisions and the Caribbean Basin Initiative.

Mr. President, while the Caribbean Basin Initiative bill is fine and while it at least indicates to our neighbors to the south of us that we are interested in the improvement of their economy, I believe that we have oversold that to them because 87 percent of the products imported into America from the Caribbean Basin countries come in duty free already, and this will increase that from 87 percent to 97 percent.

The only other thing the bill does is to extend the tax deduction for conventions which are held in the Caribbean Basin countries. This is all of some benefit, yes, but I think that it is overselling the point to say that this is going to be some great turnaround for the Caribbean Basin countries.

So, Mr. President, while I think that the CBI provision is laudable, but probably not terribly important, it is really eclipsed by the main point, and that is that we are today repealing withholding on interest and dividends. By doing so, we are caving in to special interests. By doing that we are blowing yet a bigger hole in the Federal budget. This is not in the best interests of the American people, and I will vote against it.

Mr. President, I am pleased that we are finally going to see the Caribbean Basin Initiative become law. The Caribbean Basin, a diverse conglomeration of Central American and Caribbean countries, poses a troubling situation to policymakers in the United States. While civil strife saps the strength of El Salvador, Cuba and Cuban-backed Nicaragua seek to extend their influence in the area. Our goal in the region must be political stability, but political stability cannot be achieved by victory on the battlefield. Any fireman will tell you that the best way to fight a fire is through prevention.

With this in mind, the President's Caribbean Basin Initiative (CBI) is important for three reasons. First, the deteriorating economic and political situation in the countries of the Caribbean Basin demands our attention. It is something we cannot afford to ignore and hope will go away. Second, the best way to achieve political stability in the region is through economic stability and growth. Trade rather than aid is the long-term program that will strike at the root of the problem in this poverty-stricken region. Third, the stronger economies created by the Caribbean Basin Initiative will lead to increased U.S. exports, providing more job opportunities for workers in the United States.

I. DETERIORATING SITUATION DEMANDS OUR ATTENTION

The countries of the Caribbean Basin are at a historic crossroads. They may enter a new period of political pluralism, justice, improved human rights, and economic development, or they may be forced into the false promise of Marxism. The historically close relationship between the United States and the countries of Central America and the Caribbean demands that we address this deteriorating situation.

Many of the countries in the Caribbean Basin have been hurt by the worldwide economic recession. In 1981, Barbados experienced a 3.1-percent decline in its gross domestic product and a 14.6-percent rise in its Consumer Price Index. This stagnant situation exists in many other countries—Haiti, Honduras, and Jamaica, to name a few. Political instability is also a contributing factor to economic turmoil. In El Salvador, for example, the per capita income has dropped 33 percent in the past 5 years to a dismal $612. This economic situation cannot be expected to improve unless political stability is restored.

The spread of guerrilla activity in Central America is of obvious concern to the United States. The Caribbean Basin is our own backyard. That our country has an interest in the affairs of this hemisphere has been recognized since the Monroe Doctrine. Nearly half our trade, three-quarters of our imported oil, and over half our strategic minerals pass through the Panama Canal or the Gulf of Mexico. We import 90 percent of our industrial requirements of bauxite and alumina from the Basin countries and rely on them to a significant degree for nickel.

Our relationship with the Caribbean Basin extends even further: When our exports to the area dropped by $155 million last year, thousands of U.S. jobs were lost. Likewise, the recession in the United States last year caused a steep drop in revenue from tourism for the Caribbean Basin countries.

The relationship with the Caribbean is more clearly seen by the fact that poor economic conditions continue to cause increases in immigration to the United States. In 1980, the per capita GNP of Haiti was $260. That year, from the poorest country in the Americas, 20,000 undocumented Haitian immigrants came to the United States.

The Caribbean Basin Initiative will cost $70 million per year, whereas the United States has already spent over $1 billion on operations and services related to the 135,000 Cuban and Haitian refugees that arrived in this country in recent years. The CBI is a program that will hedge this massive immigration into the United States through the promotion of economic development.

The United States cannot do it alone. Several other countries have taken note of the deteriorating situation in the Caribbean Basin. Canada has begun a 5-year program for the area, valued at over $500 million. They also provide duty-free treatment or preferential access for 98 percent of their imports from the Caribbean Basin. Mexico and Venezuela are involved in a program which provides long-term concessional credits for government development projects. This program is valued at over $700 million per year. The European Community and Colombia have also pitched in, providing preferential access to their markets. This bill is part of the total package of assistance that includes the $350 million in aid that passed the Congress last year. It is a small part in our shared responsibility to the countries of the Caribbean Basin.

We must make a concerted effort to stabilize the situation in the Caribbean Basin. Since we have been involved in El Salvador, political violence has diminished somewhat. The number of civilian deaths has dropped. The land reform program has been actively resumed. And at the end of this year, El Salvador is committed to holding a Presidential election.

The 83 percent of the Salvadorans that voted last March proves that, when given a chance, people chose democracy over political instability. If we fail to fulfill our responsibility to this region, other nations will not have that choice. Inaction on our part will give our neighbors but one path to follow, the path of Nicaragua, that has not held the promised elections, is increasingly oppressing the Indians and suppressing the church, labor unions, business, and media.

II. ECONOMIES VITAL TO POLITICAL STABILITY

Once we have decided to act, the question is how do we best achieve political stability. Economic development is the best way to insure political stability in the long run. Aid is necessary for immediate relief to these countries, but increased trade is the only way to achieve enduring stability in the region. Putting an emphasis on the economies of the region, we must continue to emphasize economic rather than military aid.

From 1946 to 1982, we provided $2.3 billion in economic aid and only $296 million in military assistance to the region. In 1982, only 18.7 percent of the total aid to the Caribbean Basin was military assistance. Excluding the aid to El Salvador, that figure drops to 11.3 percent of the total aid to the region. Still today, we are providing approximately three times as much economic as military aid. The proportion of economic aid and potential trade benefits accruing from the President's Caribbean Basin Initiative will far outweigh the proportion of military aid being supplied to El Salvador.

An emphasis on economic reform should serve to broaden the base support for the moderates in El Salvador. The guerrillas in El Salvador do not seek head-on confrontations with the army, but they try to defeat the Salvadoran economy and the people's livelihood through the destruction of electric transmission lines, through dropping bridges, and through burning buses. The guerrillas know that destruction of the Salvadoran economy is the only way they will be able to seize power. Army Chief of Staff, General Edward C. Meyer, said recently that more economic aid to El Salvador is equally or more important than military aid. "Economic assistance", he said "is very critical because guerrilla war is based on the legitimate concerns of the people."

In looking at the situation in El Salvador, we should be reminded of Venezuela, who 20 years ago never managed to defeat its insurgents on the battlefield. Instead, they rendered the insurgents irrelevant as fighters when the government succeeded in a combination of military action, civic action in the countryside, and the creation of a democratic system. There can be no military solution to El Salvador's problems. But with programs such as the Caribbean Basin Initiative, the Government of El Salvador, as well as the other governments in the Caribbean Basin, can achieve political stability through revitalized economic strength.

III. STRONGER ECONOMIES MEAN JOBS FOR UNITED STATES

These stronger economies in the Caribbean Basin translate into more jobs for U.S. workers. I am convinced of this, based on the role of exports in our economy, and the safeguards that have been added to protect U.S. industries.

Exports are an integral part of our economy. Between 1977 and 1980, four out of five of all new manufacturing jobs created in the United States were related to exports. One out of six U.S. jobs are dependent upon exports. The Department of Commerce projects that 2,500 jobs result per $100 million in U.S. exports of manufacturers.

The developing countries have been the fastest growing market for U.S. exports, and in the first 3 months of 1983 bought 36 percent of all U.S. exports. CBI countries import more from the United States than from any other country. We export to this region more machinery and capital goods per capita than any other developing region in the world. The United States enjoys a trade surplus with all but four of the 27 potential beneficiary countries, excluding petroleum imports. The key to this relationship is that trade is not a zero-sum game. Both sides will benefit from increased trade.

The impact of increased imports to the United States is not likely to have a noticeable impact on our economy. Of the $8 billion imported from the Caribbean Basin countries in 1982, $4.9 billion would be excluded from free trade eligibility, $1.9 billion are duty free for all MFN countries, and $0.6 billion are duty free under the GSP program. The remaining $600 million that would be affected constitute only 8 percent of the total amount imported from the Caribbean Basin and 0.4 percent of the total U.S. imports. Considering this small addition of products that would be granted duty-free access, it is doubtful that there will be any substantial negative impact on the U.S. economy.

Even so, several safeguards have been added to make sure that the program will not hurt domestic industry. Several classes of products are statutorily exempt, such as petroleum and petroleum products, textiles, footwear, and leather products. A rule of origin clause assures that an article must be the growth, product, or manufacture of a beneficiary country, or a new or different article of commerce produced in it. Special provisions protect Puerto Rico and the Virgin Islands, as well. Finally, if any domestic industry is found to have been hurt as a result of increased imports, import relief provisions are available for them to use.

Compared with the lavish and expensive beginnings of the "Alliance for Progress" in the 1960's, the CBI does not look like much. But 12 years of duty-free access means a lot to a country like Haiti, whose trade with the United States accounts for 78 percent of its exports and 89 percent of its imports. For the entire region, exports to the United States accounted for 68 percent of its total exports to industrial countries. The business expense deduction for conventions should be of great help to countries whose natural resources constitute potential for a thriving tourist industry, once given a chance.

By stressing self-help and real economic growth, the Caribbean Basin Initiative offers a great deal. This program is vital to the long-term political stability of our neighbors in the Caribbean Basin.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, I do not know whether there are any other requests for time.

I appreciate the comments made by all Senators, and I appreciate the comments just made by the distinguished Senator from Missouri. I do not know that I disagree with him. I favored withholding and still do, but the facts were we did not have the votes, and we still do not have the votes. We were down to about 25 to 28 votes to sustain a veto. It seemed at that point the best course to follow was to try to salvage what we could. Now, much will depend on how much this Congress authorizes to add additional primarily clerical assistants to the IRS, not agents to harass people but clerical assistants so they can match up the numbers and do other things to make certain that people are reporting their interest and dividend income, a point I made in my earlier remarks.

The record will reflect that when Congress suggests, as it did overwhelmingly, that we should not have the banks do this, that it should be done by the IRS, they were telling us, in effect, that we have to beef up certain areas of IRS so that they can do the work. Fifteen million dollars of additional money has been appropriated by the Appropriations Committee for fiscal year 1984.

I hope that the Senate and the House in succeeding years will help us make certain that we can have this improved compliance. That is, the best way to keep this withholding issue behind us is to give the IRS the money it needs to do its job. Many of the banks, savings and loans, and credit unions suggested that withholding would not be necessary if the IRS did the job they should do.

On a related matter, I want to call attention to an important development in another major area of noncompliance.

I have received the figures on the impact of the new tip reporting law, and the news is overwhelmingly good. The new law has virtually doubled the reporting level of tips. Twice as many tips were reported in the first quarter of 1983 over the same period in 1982.

According to the Treasury Department's figures released today, despite the fact that wages have not increased, total tips reported in the hospitality industry increased $167.3 million in the first quarter of 1983, an increase of 87 percent over the first quarter of 1982. In bars and other beverage establishments alone, the increase was 133 percent. That improvement occurred with only the first phase of the new law. Individualized reporting begins only after April 1. Thus, the results for the second quarter of 1983 should be even more substantial.

At a time when various Washington special interests are seeking the effective repeal of the new law, these results prove that the new rules are working. Tip reporting rates are beginning to come much closer to compliance levels for ordinary wage earners. Statistical proof that the new rules are improving compliance demonstrate that we cannot afford so-called technical amendments which will effectively eliminate proven new rules.

While the new law is working well, the Internal Revenue Service should do everything it can to minimize the burden of these new information reporting requirements. I hope that the Internal Revenue Service will move promptly to finalize the new reporting rules. When those regulations are issued, I hope that the Internal Revenue Service recognizes, in particular, the right of employers to make the estimated unreported tip allocation on an annual basis.

These compliance measures are working. People are reporting income, and they will be paying taxes on income that they should have been paying for some time. It is not an effort to harass anyone. It is an effort to make the tax system fair. We are going to continue those efforts on the compliance side. In my view, there are a number of other areas that can be addressed.

Mr. BAUCUS. Mr. President, I rise to support the conference report on H.R. 2973, which finally kills interest and dividend withholding.

The withholding requirement, adopted in 1982 over my opposition, was a bad idea.

Everyone agrees that we should catch tax cheats. The question simply is whether withholding is a fair and efficient way to do so. The evidence indicates that it is not. The vast majority of taxpayers already pay taxes on the interest they earn. To catch the relatively few cheats who do not, the IRS should put its own house in order by improving and expanding information matching. Withholding, in contrast, would transfer administrative costs from the Federal Government to taxpayers and transfer substantial investment resources from taxpayers to the Federal Government. That would be a good deal for the Federal Government, but a bad one for taxpayers.

That is why I voted against withholding last year and cosponsored legislation to repeal it this year, and that is why I support today's conference report.

Let me explain a little more about the conference report bill. The bill utterly repeals withholding. At the same time, it directs the IRS to take several steps to improve the tax compliance rate for interest and dividend income. These steps include a system of so-called backup withholding for taxpayers caught underreporting, and a requirement that financial institutions that file 50 or more 1099 forms must do so on magnetic tape. These steps should increase compliance, and thereby reduce the Federal budget deficit, significantly.

Mr. President, some work remains. I and many of my colleagues will carefully monitor the implementation of these new compliance steps, especially backup withholding, to make sure that they are efficient and effective. We also will work to see that legislation reestablishing the mortgage revenue bond program, which was dropped from the conference report, is quickly considered again.

But, overall, I am happy that we have finally cut through all the legislative redtape and killed withholding. This is an important victory for the thousands and thousands of Montanans who have written me, called me, and talked to me back home, to decry withholding and demand its repeal.

Now, I urge the President to listen to these Montanans, reevaluate his support of withholding, and sign this bill into law.

Mr. D'AMATO. Mr. President, I am pleased that the House-Senate conferees have reached an agreement on repeal of the 10 percent withholding of dividends and interest which was to be effective August 1, 1983. I have long been an advocate of repeal with as few cumbersome reporting provisions as possible. In fact, I was an original cosponsor of S. 222 which would have mandated straight repeal with a minimum of reporting requirements.

The House-Senate conferees have agreed to add the following provisions to the repeal bill:

First, certification of taxpayer identification numbers on all new accounts opened after 1983.

Second, corporations and financial institutions will have to supply taxpayer 1099 forms to the IRS. However, individual taxpayers would not be required to attach 1099 tax forms to their tax returns.

Third, magnetic tapes must be supplied to the IRS for all interest and dividend returns after 1983.

Fourth, the IRS will be authorized to hire thousands of additional employees to review taxpayer returns and insure compliance.

Fifth, 20 percent backup withholding could be required for chronic noncompliance. In addition, a $50 fine may be levied for noncompliance at the discretion of the IRS.

I am happy with this part of the House-Senate compromise package. The small commercial banks and savings institutions in New York State will not have to incur the terrific costs connected with withholding of dividends and interest. I believe that the compromise will enhance taxpayer compliance. For this the conferees should be applauded.

I am very concerned, however, about a deal engineered in the conference by Congressman PICKLE of Texas. It is my understanding that, at a later date, he will attach to the mortgage revenue bond legislation that was unjustifiably deleted in the conference an anti-IDB bill. Both mortgage revenue bonds and IDB's play important roles in economic development. Mortgage revenue bonds provide reasonably priced financing to individuals and families who could not otherwise afford a home. It is disgraceful to complicate the extension of mortgage revenue bond legislation by attaching other bills.

Congressman PICKLE's IDB legislation, H.R. 1635, would destroy a program that provides thousands of jobs and expands the tax base. He may not be aware that in his home State of Texas, over $527 million of net new taxes were generated in the last 3 years by IDB's. This figure takes into account any loss to the Federal Treasury from tax exempt interest payments. I have difficulty understanding why anyone would attempt to kill a program that has been so beneficial to his State.

The jobs creation effectiveness of IDB's is well documented. In my home State of New York, over 130,000 new jobs have been created through IDB's. Similar results have been documented in many States throughout the Nation.

Congressman PICKLE seems determined to create an antimunicipal finance package. He intends to reduce the Federal deficit on the backs of our cities and States. In the end, local taxes will rise and essential services will be cut. Savings at the Federal level that shift costs onto the backs of

local government are imaginary savings. I intend to fight any efforts to further limit IDB's, mortgage revenue bonds, or other legitimate avenues of municipal finance.

Mr. President, I would once again like to congratulate the conferees on a job well done. I am pleased that withholding of dividends and interest income will not become a reality, but I am deeply saddened that the conferees failed to accept the Senate amendment extending mortgage revenue bonds beyond December 31, 1983—especially given my understanding of the reason why this extension was dropped. Mortgage revenue bonds are an excellent financial mechanism. They, like IDB's, must be preserved.

Mr. MELCHER. Mr. President, I am pleased to be here today when this conference is passed. It contains provisions for the repeal of the withholding of taxes on interest and dividends. There have been many times over the past 13 months when I wondered if we were ever going to be able to correct the mistake we made in enacting this provision as part of the 1982 tax bill.

In opposing the withholding provisions at that time, I was sure that the additional costs and redtape created by this provision more than outweighed the gains that were promised by the proponents of withholding. It did not take long for the taxpayers in Montana to come to the same conclusion. I received better than 25,000 pieces of mail in my office alone calling for the repeal of this bad tax law.

Some of the proponents of withholding of taxes and interest and dividends said that the outpouring in support of repeal was generated and orchestrated by the Nation's financial institutions. The banks, savings and loans, and credit unions in Montana may have taken the lead in getting out the word on withholding, but let me assure you that they simply did not have the physical capability of generating that kind of outpouring of mail. The bottom line was the commonsense of the average taxpayer told him that this was only one more instance where the IRS chose to place an additional burden on the 98 percent of all taxpayers who accurately and legitimately file their taxes rather than to make the additional effort needed to catch those who were cheating. They felt that that was an unnecessary burden on the ordinary taxpayer, and I agree with them.

Further, it became increasingly obvious as time went on that the proposed gain in revenues from withholding were vastly overstated, and that whatever gain was to be achieved by the Government was to result from a one-time early collection of taxes in 1983. All of this, the unfairness of the withholding provisions, the increased paperwork and redtape that it caused, and the fact that the Government was really not collecting additional revenue, lay at the base of the tremendous outpouring against the withholding provision.

The irony of this situation is that, even following this tremendous outpouring against withholding, it took not one but three separate major efforts to finally end up with language repealing this poor tax law. I, myself, took the floor in April of this year to offer a provision that would have delayed the implementation of withholding until the end of 1983. I did this because there seemed to be a very cynical attitude on the part of some of the proponents of withholding that, if they could just get past the July 1 implementation date, those who supported repeal would give up and fade away. Well, that was never the case and we would have only looked so much more foolish had withholding been implemented the first of July, only to be repealed 60 to 90 days later. I am pleased that we did not have to go through that exercise.

Once the pending conference report has been approved by both the House and the Senate, which I am hopeful will happen very quickly, there is only one step that remains in the process. That is, getting it signed by the President prior to the date now set for implementation on August 5. I am hopeful that the President has heard the public outcry on withholding and will quickly sign this provision into law.

I truly feel that we have taken up a great deal of Congress time to repeal a provision that never had the support of the majority of either the American people or the Members of Congress. I hope we do not have to repeat this kind of exercise in the future and that we pay attention to the American taxpayer and work harder to close up the many actual loopholes that now exist in the Federal Tax Code, such as giveaways like the foreign tax credit and foreign tax deferral, rather than trying to devise ways to get the taxman's hands into the pocket of the ordinary taxpayer. I believe this has been a good lesson, and I hope we in Congress have learned it.

Mr. BOREN. Mr. President, I am pleased to cast my vote in favor of repealing interest and dividend withholding. I would have preferred that the Caribbean Basin Initiative not be included with the repeal measure, but I will not oppose the conference report because it is included.

Since its inception, the withholding of taxes on interest and dividends was an ill-conceived idea. Had it been allowed to go into effect it would have acted as a disincentive to savings and investment, lowering the real rate of return on some investments by denying investors the use of their withheld funds. Further, this law would have had a serious impact on our financial institutions by forcing them to design and implement withholding systems the cost of which would undoubtedly have been passed on to depositors in the form of lower rates of interest, reduced dividends, and extra service charges. Finally, this law would have had a devastating impact on the elderly and lower income families since the burden was placed on the individual to exempt himself from withholding.

In addition, the conference report includes less onerous compliance measures than did the Senate version of the backup withholding provisions. I had concern with the Senate bill because I felt that it allowed the IRS to gain too much access to a citizens' private business matters. It is my understanding that the conference report requires compliance with the law without undue interference.

It is for these reasons that I join with my many other colleagues in voting for repeal.

Mr. STEVENS. Mr. President, I rise to thank my good friend from Kansas for putting forth a tremendous effort in solving the problem that Congress faced with respect to the interest and dividend withholding issue.

The conference report on H.R. 2973 represents the final product of many months worth of negotiation on the part of both opponents and supporters of withholding.

I do not believe anyone has won or lost this issue. Senator DOLE has done a good job of preserving the framework of the fallback withholding concept that he worked out with Senator KASTEN and myself, and which the Senate approved. The compliance provisions agreed to by the conferees will recoup part of the revenues we originally envisioned from withholding.

The underground economy produces a tax loss to the U.S. Treasury of about $100 billion a year. We need $73 billion dollars of new revenue from 1984 to 1987 to meet the budget resolutions mandate. I believe we can meet that mandate Mr. President without having to resort to tax increases. Again, I commend Senator DOLE, Senator KASTEN and their staffs, for providing a responsible legislative resolution to this matter.

Mr. JEPSEN. Mr. President, I would like to express my support for the conference report on the repeal of withholding on interest and dividend income, as well as the Caribbean Basin Initiative. Finally we are going to repeal this obnoxious threat to honest savers, investors, and financial institutions. As one who opposed interest and dividend withholding legislation from the very beginning, this repeal will not come a moment too soon.

The considerable delay in resolving this issue has already generated much confusion and unnecessary expense. The conference report will lay the matter to rest once and for all. It will

be a very long time before anyone tries to impose interest and dividend withholding again.

The conference report includes another good provision; that establishing the Caribbean Basin Initiative (CBI). Given the many serious economic and social problems of the Caribbean, the CBI will undoubtedly prove mutually beneficial. The lowering of U.S. trade barriers is one good way to promote more economic and social stability in this strategic region.

The inclusion of backup withholding and the CBI make a Presidential veto very unlikely. I am glad President Reagan has demonstrated flexibility and reasonableness on this legislation. We should quickly pass this conference report and sent it to the President for his signature. Once again, time is running out.

I urge my colleagues to join me in voting for the repeal of withholding on interest and dividend income.

Mr. DOLE. Mr. President, if there are no other requests for time, I ask for the yeas and nays on the conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) and the Senator from Colorado (Mr. HART), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 90, nays 7, as follows:

[Rollcall Vote No. 234 Leg.]

YEAS—90

Abdnor	East	Levin
Andrews	Exon	Long

Dodd	Mathias	

NOT VOTING—3

Domenici	Glenn	Hart

So the conference report was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNANIMOUS-CONSENT REQUEST

Mr. BAKER. Mr. President, I indicated earlier, much earlier, over the last several days, that at some point I wanted to try to get to the Radio Marti bill. I think that time to make the effort has probably arrived.

Let me describe the situation at this moment. The motion to proceed to the consideration of the agriculture target price bill is now the pending measure before us, is it not?

The PRESIDING OFFICER. It is.

Mr. BAKER. Mr. President, perhaps most Senators already know, and if they do not I would like to advise them, that negotiations have been conducted this morning with the Secretary of Agriculture and principals with respect to this bill and these measures on both sides of the issue and on both sides of the aisle.

I am advised that it would be the better part of discretion, and perhaps the best investment of the Senate's time, to not pursue this matter until Monday. That is not to say that it is likely that we are going to get an agreement; maybe we will not get an agreement at all. But it sounds like there is at least a possibility that something might be worked out that would let us pass a target price bill that did not create great controversy. I do not know anything about the bill, Mr. President, except that which I hear in debates, so I cannot testify to that personally. But I am persuaded that it is probably worth a gamble to lay this aside temporarily and go to something else and then get back on it after another conference is held between the parties on Monday.

Now what I would like to do at this point, then, Mr. President, and I do now ask unanimous consent that the pending motion be temporarily laid aside, that a call for the regular order will not bring it back, and that the Senate now proceed to the consideration of the budget waiver to accompany the Radio Marti bill. That budget waiver is Calendar Order No. 259, Senate Resolution 160.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Reserving the right to object, will the majority leader yield for a question?

Mr. BAKER. Yes; I yield.

Mr. MELCHER. I take it from what the majority leader has just stated, if this unanimous consent is agreed to, that he would not call up the H.R. 2733 motion to proceed again until sometime on Monday?

Mr. BAKER. That is my intention.

Mr. MELCHER. I thank the Senator.

Mr. BYRD. Mr. President, reserving the right to object, I must say to the majority leader I will need to do a little bit of further checking on this. Would he withhold his motion or withdraw it for the moment?

Mr. BAKER. Yes, Mr. President, let me leave the request pending. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I think I may have overcomplicated the issue by including one step too many in my unanimous-consent request. The request I put was that we temporarily lay aside the motion to proceed on the target price bill, that the call for regular order would not bring it back, and that the Chair lay before the Senate the budget waiver. I strike that third provision on the budget waiver and renew my request now that we temporarily lay aside the motion and that a call for regular order will not bring it back.

The PRESIDING OFFICER. Is there any objection? Without objection, it is so ordered.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I advised the minority leader that I intended to proceed in this way.

Mr. President, I now move that the Senate proceed to the consideration of Senate Resolution 160, Calendar Order No. 259, which is the resolution waiving section 402(a) of the Congressional Budget Act with respect to the Radio Marti bill.

The PRESIDING OFFICER. The motion is not debatable.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. BAKER. Mr. President, let me explain once more to the Senator from Connecticut the situation. And it is

the situation I described to him just a moment ago. What has happened now is we have temporarily laid aside the motion to proceed to the target price bill. I have just moved that the Senate proceed to the consideration of the budget waiver to accompany Radio Marti. That motion, under the act, is not debatable. If the motion carries—and I hope it will—then, under the Budget Act, there will be 1 hour of debate on the budget waiver. If the budget waiver is adopted, then I will make a motion to proceed to the Radio Marti bill itself. Of course, the motion to proceed is debatable without limitation as to time.

Mr. WEICKER. Mr. President, I say to my good friend, the majority leader, I did discuss the matter with him. I have no objection to the unanimous-consent request laying aside the pending business and moving on to the budget waiver. It is my understanding now that the motion we have, the motion to proceed, is nondebatable and could require a rollcall vote if requested. It seems to me there is enough business to do here without inconveniencing the Members at this juncture.

I fully expect, however, to use the 1 hour's time, and there might be a motion made during the course of that. So, with that understanding, I am prepared to proceed at this time.

Mr. BAKER. I thank the Senator.

Mr. WEICKER. Have there been persons designated on this budget waiver? Who controls the time?

Mr. BAKER. The time would be under the control of the majority and minority leaders or their designees. As far as I am concerned, I will designate the chairman of the Foreign Relations Committee on this side. I wonder if the minority leader—we need some way or other to divide the other half of the time, I believe, to be controlled by the Senator from Connecticut.

Mr. WEICKER. Or Senator ZORINSKY.

Mr. BAKER. Or Senator ZORINSKY.

Mr. BYRD. I designate Mr. LEAHY on this side to control the time.

The PRESIDING OFFICER. The question is on agreeing to the motion to proceed.

The motion was agreed to.

Mr. BAKER. Mr. President, the matter before the Senate now is the budget waiver, is that right?

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A resolution (S. Res. 160) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 602.

The Senate proceeded to consider the resolution.

Mr. BAKER. Mr. President, I have designated the distinguished Senator from Illinois to manage the time on behalf of the majority leader.

Mr. PERCY. Mr. President, the budget waiver is necessary because of an amendment that was offered by the distinguished Senator from Florida, Senator HAWKINS, to provide up to $5 million for compensation for damages that may be incurred by radio stations whose broadcasts may be interferred with because of Radio Marti.

At this time, if no one else would like to speak, I could give, on that particular budget waiver and the technicalities of it, a little background on the Radio Broadcasting to Cuba Act. Not seeing anyone who desires to speak immediately on the waiver itself, I will proceed to do that.

RADIO MARTI

Mr. President, the Senate is about to consider S. 602, the Radio Broadcasting to Cuba Act. The purpose of this legislation is to provide for the communication of accurate information and ideas to the people of Cuba. In introducing this legislation this year, Senator HAWKINS noted that—

When this legislation is enacted, the Cuban people will finally hear the truth. Access to accurate news reports and varied opinions is something that we in the United States take for granted. We forget sometimes that the truth is a precious and rare commodity in countries where the government censors every broadcast and news report. For decades, the United States has provided the people of Eastern Europe and the Soviet Union an alternative to government propaganda, and now, at long last, we can provide the same to the people of Cuba.

I support that interpretation fully. I support the notion that the Cuban people have a right to know the truth. Radio Free Europe and Radio Liberty have played important roles in bringing accurate information and the truth to the people of Eastern Europe and the Soviet Union. We know in times of crisis, Eastern European listenership increases tremendously. Eastern Europeans know that their own governments simply do not tell them the truth.

They cannot find out what is going on in their own country. In the Soviet Union itself, while the war was raging in Afghanistan, when an invasion had been made of a Third World country, when there were deaths occurring on all sides, it was as if nothing was happening. All the world knew about it, except the people of the Soviet Union who knew nothing of what was going on. Only Radio Free Europe and Radio Liberty carried the voice of truth and fact into the Soviet Union and into Eastern European countries as to what was actually going on.

Similarly, we are not sure that Cubans are even aware—and the same kind of condition exists in Cuba as exists in other countries in Eastern Europe and the Soviet Union—we are not sure that our own neighbors, very close to us, off the Florida coast, are even aware that their Government does not tell them the full story about what the Government of Cuba is doing.

We are not sure that Cubans are aware that their Government does not tell them the full story. We do know, from interviews with Cubans who have come to this country, who came during the massive Mariel exodus, that the Cuban people are painfully unaware of what is happening in the world or what their Government is doing around the world or of how their own lives compare with the quality of living elsewhere in Latin America. Radio Marti will make this information available to the Cuban people.

Mr. President, it is time for us to pass this bill. It has been before us for a long time. The radio broadcasting to Cuba bill was dealt with at length in the last Congress. The House Foreign Affairs Committee and the House Committee on Energy and Commerce held extensive hearings on Radio Marti. The full House voted favorably on the bill by a margin of 250 to 134 on August 19, 1982. In July and August of last year, the Foreign Relations Committee held 3 days of hearings on Radio Marti. After detailed discussion of the various issues involved, the committee adopted several amendments to the House-passed bill and reported it favorably by a vote of 11 to 5. In spite of heroic efforts, it was ultimately not possible to hold the vote on the bill in the final days of the last Congress.

This year the Foreign Relations Committee again held hearings on Radio Marti. In the interim months, the administration worked with members of the broadcasting community and with Congressmen and Senators and perfected its own proposal. The Radio Marti bill we have before us today is a streamlined version that has taken into account a number of the issues and concerns raised by Members of Congress. The Foreign Relations Committee made minimal changes in the bill and reported it favorably on June 8, 1983, by a vote of 13 to 4.

The bill that we are considering today establishes additional functions under the Board for International Broadcasting so that it may undertake to provide for radio broadcasting to Cuba. Radio broadcasting to Cuba is to be undertaken in the same spirit and with the same high standards as Radio Free Europe/Radio Liberty. Thus, such broadcasting is to be a consistently reliable and authoritative source of accurate, objective, and comprehensive news about Cuba itself.

The bill provides that any broadcasting to Cuba on the AM frequency, other than that provided through leasing of commercial or noncommercial educational radio broadcasting stations, shall be limited to the 1,180 kilo-

hertz frequency used by the Voice of America at Marathon, Fla., and provides that the VOA Marathon facility may be used for the purposes of Radio Marti broadcasting.

The bill also provides funds for compensating U.S. radio broadcasting licensees for equipment and engineering costs that result from interference from Cuba that can be attributed to Radio Marti Broadcasting.

This bill deals with the major issues that were of concern to broadcasters last year. It provides for a specific frequency for Radio Marti—one that is already used for broadcasting to Cuba and which has not received noticeable interference in recent years—and it provides for compensation of stations that may have to undertake some equipment and engineering expenses if Cuba chooses to increase its interference in U.S. broadcasting as a result of Radio Marti programing.

Mr. President, at an appropriate time, I will offer an amendment to this bill to authorize expenditure of funds by the Board for International Broadcasting to implement radio broadcasting to Cuba. Such funds were intended to be authorized under S. 1342, the State Department/BIB authorization bill. As that bill has not yet come to the floor, we will need to provide for funding of Radio Marti in this bill. Other Senators may have amendments that we can entertain, too. However, I believe that the bill before us requires very little perfecting.

In conclusion, Mr. President, let me say that Radio Marti is designed to respond to a basic human need—the need to have access to information on events and policies that affect the lives of individuals. Freedom of information is recognized by every responsible individual and government in the world. This right has been denied to the Cuban people since Castro came to power in 1959. Radio Marti will help restore it. I ask my colleagues to support the passage of S. 602 as reported by the Foreign Relations Committee.

Mr. President, the budget waiver deals specifically with section 6 of our bill.

At this time, I would like to insert into the RECORD and I will read, for the benefit of our colleagues who are here and those who might be listening, section 6 of the committee report on this bill. This section is entitled "Facility Compensation."

SECTION 6—FACILITY COMPENSATION

This section states, in subsection (a), that it is the intent of Congress that the Secretary of State seek prompt and full settlement of U.S. claims against Cuba that may arise from Cuban interference with broadcasting in the United States, and that pending settlement of such claims, there should be interim assistance to broadcasters adversely affected by Cuban radio interference.

Subsection (b) provides that the Board for International Broadcasting make payments to U.S. radio broadcasting station licensees that apply for expenses incurred or to be incurred in mitigating the effects of Cuban Government activites caused by radio broadcasting to Cuba undertaken to implement the authorities established in the bill that result in direct interference with U.S. broadcasting. The expenses covered under the section shall be limited to costs of equipment (replaced less depreciation) and associated technical and engineering costs.

Subsection (c) provides that not later than 180 days after enactment of the Act, the Board for International Broadcasting shall issue regulations and establish procedures for carrying out the intent of the section.

Subsection (d) authorizes an appropriation to the Board of International Broadcasting of $5 million for use in compensating U.S. radio broadcasting licensees as provided in subsections (a) and (b). The amount appropriated is to be available until expended.

Subsections (e) and (f) state that authorities for facility compensation established in the bill shall enter into effect beginning in fiscal year 1984 and funds shall be available for a period of no more than 4 years following the initial broadcast of radio broadcasting to Cuba programs.

Mr. PERCY. Mr. President, seeing no request for time on the other side, I am happy to recognize my distinguished colleague from Florida, Senator PAULA HAWKINS, who has worked so closely with the Senate Foreign Relations Committee in drafting this legislation. She introduced the original bill and we were pleased indeed to offer her original bill as the bill on which we would vote in the Foreign Relations Committee. I commend her for her tenacity and her desire to see that the people of Cuba have the right to know the truth of what is going on in their country and what their country is carrying on as activities of intervention and disruption around the world at their cost and expense.

The PRESIDING OFFICER. The Senator from Florida.

Mrs. HAWKINS. Mr. President, I thank the esteemed chairman of the Committee on Foreign Relations. He has been a steady source of guidance, support, assistance, and great sympathy for this cause we are involved in at this time.

I would like to concur in his remarks on the budget waiver, which is what we are discussing at this point. I intend to hold off on my remarks pertaining to the merits of Radio Marti until the proper time, when we are on the bill itself.

As far as my amendment goes, Mr. President, which requires the budget waiver, we have had interference in Florida for over 15 years. It is nothing new. This is an amendment that would merely set aside a small pot of $5 million for stations that sought and received permission from the FCC to alter their facilities to overcome the effect of Cuban interference.

Mr. President, it is a logical amendment. It gives some redress to the problems that we have experienced throughout our entire State of Florida. There are other stations throughout the United States that have the same problem, so it is not restricted to Florida. The amendment was an important addition to the bill, and I believe that the budget waiver was both appropriate and reasonable.

I yield back my time to the chairman.

The PRESIDING OFFICER. Who seeks recognition?

The Senator from Connecticut.

Mr. WEICKER. Mr. President, will the Senator from Vermont yield me 5 minutes?

Mr. LEAHY. Yes, I yield 5 minutes to the Senator from Connecticut.

Mr. WEICKER. Mr. President, I oppose the legislation now before the Senate. I shall not address my remarks specifically to the budget waiver; we may as well get into the substance of this matter. I inquire as to whether or not the expenditure of moneys involved here is worth it insofar as the interests of the American people are concerned.

First, to my good friend from Illinois, I say let us get one point clear. He says the Cuban people have the right to finally hear the truth. Several months ago, I happened to spend a week in Cuba. Every evening, I would turn on my transistor radio and, lo and behold, guess what I was hearing? Miami radio stations, New Orleans radio stations, New York radio stations. Certainly, my good friend from Illinois does not mean to imply that American radio stations, privately owned in the free sector, are doing anything but broadcasting the truth. And believe me, all those radio stations are heard in Cuba, to a greater or lesser degree, as is the Voice of America. So, in terms of what is being heard in Cuba, I can assure my colleagues that what is being heard is, in good measure, the voice of this country, either through the Voice of America or through the private sector, various stations broadcasting from various American cities.

Mr. PERCY. Will the Senator yield for a question?

Mr. WEICKER. I certainly do yield.

Mr. PERCY. I would be very interested in knowing what it was that the distinguished Senator from Connecticut heard on these radio stations from Florida. As to VOA, we know what you hear there. You hear what is happening in the United States of America. VOA, by charter, does not get into those areas that Radio Liberty or Radio Free Europe get into. They have an entirely different mission. It is a window on the United States. They can, and that is why Radio Marathon beams 5 hours a day to give the truth about what is going on inside the United States. But the mission of Radio Liberty, Radio Free Europe, and

Radio Marti would be an entirely different mission, to carefully research and find out what is going on in Cuba, what Cubans are carrying on around the world. That is an entirely different mission which the Board for International Broadcasting is uniquely qualified to carry out.

I repeat my original question—was it rock and roll music, was it baseball games? That is not really the intent and purpose of the legislation before us. What was it the distinguished Senator heard on the Florida radio stations?

Mr. WEICKER. What the Senator from Connecticut heard was exactly what the Senator from Illinois hears when he turns his radio on in his automobile or his home—the news broadcast by American broadcasters, rock and roll, sports; indeed, the picture of life in this country and around the world that we all get when we turn on our radio stations. That is what the Senator from Connecticut heard. Indeed, when I left this country for a week, I would have preferred to hear some other culture than our own for a week. I did not. I heard our own culture.

I heard those broadcasts emanating from our news media, which I do not think are tainted or biased. It was quite an experience.

I am not saying that the reception was all that the Senator or I would want all the time. But I think it terribly important to differentiate between the situation in Cuba and that in Eastern Europe.

First of all, we are talking about an island 90 miles off our shore. Obviously——

Mrs. HAWKINS. Will the Senator yield just for a question?

Mr. WEICKER. Of course I yield.

Mrs. HAWKINS. Were the broadcasts he heard in English or Spanish?

Mr. WEICKER. I heard both, English and Spanish.

To my good friend from Florida let me say this: I, as much as she, feel that there ought to be an accurate picture of life within the United States and throughout the world broadcast to the Cuban people. Indeed, I think the time has come for the United States of America to fill a vacuum created by the lack of the presence of the United States of America in Cuba, because only if that happens can we get the Soviet Union out of our hemisphere. The way to do that is to start talking and start being there.

I ask my good friend from Florida and my good friend from Illinois, Why do we not go to Cuba? Why do you not go to Cuba? Why do you not start talking?

I ask my good friend from Florida, she has the largest Cuban constituency in the United States. I think it is high time the Cuban people had a chance to talk to the Senator from Florida on Cuban soil and the other Senator from Florida and the chairman of our Foreign Relations Committee.

I know of no substitute for the human presence insofar as getting our point of view across. But certainly, I do not accept as a substitute for this Senator or for the views of the American people radio broadcasts from a Government agency.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. WEICKER. I ask for 1 more minute, then I shall yield to my good friend, Senator ZORINSKY.

Mr. LEAHY. I yield 1 more minute to the Senator.

Mr. WEICKER. Mr. President, let us understand at the outset of this debate that some of us feel very passionately that there should be an activist role for the United States of America in Cuba, in the Caribbean, in Central America, and in South America.

It is not a propagandist role. It is a people-to-people, face-to-face role. We think that in the course of our foreign policy we have done an excellent job in placing the Cuban Government and people into a vacuum; that we have isolated them.

Well, what we have succeeded in doing is to isolate ourselves. Everybody is in Cuba, not just the Soviet Union. Walk the streets of Havana. The Spanish are there, the Italians are there, the French are there, the Canadians are there, the British are there, the Japanese are there—everybody is there except the United States of America. The manifestation of our presence is some name calling across the Florida Straits, hardly a foreign policy and hardly designed to get the Soviet Union out of our hemisphere.

The PRESIDING OFFICER. The 1 minute yielded the Senator has expired.

Mr. WEICKER. I yield at this time. I suspect there will be plenty of time to get further views across during the course of this rather lengthy debate.

I thank my distinguished friend, the Senator from Vermont, for the time that he gave to me, and I now yield.

Mrs. HAWKINS. May I ask if I could take 1 minute out of our time to go back to the radio stations that the Senator from Connecticut said were heard. I do not want to discuss foreign policy right now. I would just like to discuss the radio stations he heard, since we are discussing the budget waiver for radio stations that are involved.

He said they were English and Spanish, and then prior to that I think I heard the Senator say that the broadcasts predominately reflected our culture. Was this our culture on the Spanish stations and did the Senator learn where the Spanish stations orginate?

Mr. WEICKER. No; our culture of truth. In other words, you can turn on the radio and hear everything and anything. I do not need to spend $5 million and entrust it to some Government agency to start propaganda. I am talking about no difference than if the Senator turned on her radio driving from Jacksonville to Miami at night. She is going to get everything from all over the United States of America.

Mrs. HAWKINS. All on commercial stations.

Mr. WEICKER. I believe you get commercial stations. Where you get all of them, I do not know, but you get a broad spectrum of commercial stations. And the last thing you need is to start another station. You need that as much as we need another team in the U.S. Football League down there.

The PRESIDING OFFICER (Mr. HECHT). Who yields time?

Mr. LEAHY. Mr. President, I yield myself such time as I may require.

Mr. President, I rise to join with my colleagues on both sides of the aisle to question this waiver of the budget resolution.

There is a reason why we have to go through this exercise—to waive the budget resolution provisions. This procedure forces us to remember the budget process itself, the restrictions, the provisions, the discipline of the budget process.

The purpose of the budget process that the Congress has designed for itself is to make us look very carefully at each and every bill that costs the American taxpayer additional tax dollars.

It is the discipline of the budget process that makes us take another look, to ask the hard questions. Is this new program, this new agency, this new benefit worth the impact it will have on our record high budget deficits?

After all, we are not dealing with balanced budgets these days. Things have gotten out of control in Federal spending. One statistic alone puts our current situation in perspective:

> If the present deficit projections continue under a second Reagan Administration, the deficit for the eight year period will be more than the combined deficits from the era of President Washington to President Carter.

So here we are today, discussing yet another budget waiver, considering another bill which will add to the deficit. Although this bill does not have a billion dollar price tag, we all know that every million adds up.

I would hope that we take the budget process seriously today. I would hope that all Senators take a careful look at S. 602. Is this a cost effective approach? Are there better, and less costly ways, to achieve the goals of S. 602? I think there is.

The most basic question is, Do we want to add to the deficit with a new

program? A new program, I might add, that may have unlimited costs. There is a certain vagueness about the costs involved in Radio Marti. Is it wise for us to waive these provisions of the budget act when we are unsure about the cost?

This Democrat is concerned about the deficit. I have agreed to cuts in programs I care deeply about, I have even offered amendments myself to hold the line on spending. Recently I offered an amendment to cut foreign aid, although I have been a long-time supporter of our foreign assistance programs. But I felt that, to be fair, all federally funded programs, all agencies, should share the burden of reducing the deficit. No agency, not even the State Department, should be immune from budget discipline.

Thus, Mr. President, I rise today to express a bipartisan concern about this budget waiver and the underlying bill on Radio Marti.

Mr. President, I will make a few points in amplication of my statement.

I find myself constantly called upon in the Senate to vote to cut programs that I happen to like, programs that I have long supported, programs of necessity to my own State of Vermont as well as in some instances the States of the other 99 Members of this body.

I do that because of the horrendous deficits this Nation is facing, deficits which under the President's budget have doubled in the course of his term in office. If you take all of the deficits from George Washington's time straight through President Carter's time and put them all together, they are double. And to continue to vote for things that add to that deficit is unwise.

Radio Marti is just another one of those examples. We could expand the Voice of America, if we are really serious about this. It has had a credible life. At least until of late it has been seen as an aboveboard, nonpartisan, factual news-reporting organization. But instead, we want to go to Radio Marti, which almost begs the Cubans to come out with something like Radio Lincoln to blast back at us. Because of the controversy it has created, it will be labeled as purely a propaganda tool. That will hurt its own credibility in Cuba, a country that already listens to American radio stations, which are, after all, only about 90 miles away, in the same way those of us who are from rural areas are used to listening to the radio stations of other areas.

The Senator from Connecticut made a very good statement—that we ought to expose them to our own views. We could do that. Spending more time talking to them does not mean we agree with them. We must tell them where we disagree. We must make it very clear, very open to the people of Cuba that we do disagree with their government, but we should not do it in this way, in a way that almost walks into the arms of the Castro government. It gives them a propaganda tool of their own. They will be able not only to block Radio Marti if they want, but in those times when the signal is able to get through they could label it for what it is, an extraordinarily expensive propaganda tool that will not be effective.

The other problem about it, of course, is that not only will they not be hearing Radio Marti, but people in the United States who happen to have a local radio station on the same frequency being used by Radio Marti will probably hear nothing when they turn on their radio station except static or extraneous noises, because Fidel Castro will have absolutely no compunction whatsoever about setting up jamming stations. They will jam not only the frequency used by Radio Marti but just about every other radio station in the United States using the same frequency.

So we are talking about $5 million to assist broadcasters in making technical adjustments to cover that kind of jamming operation. And that is only the tip of the iceberg. There is an awful lot more to it. The waiver does not consider the cost of operating Radio Marti. The administration requested $9,697,000 for fiscal year 1984 alone, and that is more than twice the cost of simply expanding the Voice of America program, something with some credibility.

The State Department recently declassified a document which said that in their judgment, if the decision is made to establish this radio system:

> We believe Cuba will retaliate by increasing its current level of interference with U.S. AM broadcasting operations. Potentially, about 20 percent or 1,200 U.S stations could be adversely affected. The economic loss generated by Cuban retaliation affecting 1,200 stations could itself run several hundred million dollars a year.

And who is going to pay for the several hundred million dollars a year in losses to our commercially owned radio stations, to our own free enterprise system? It is not going to be Fidel Castro. It is going to be, once again, the U.S. taxpayers. It will be the owners of those stations. It will be the people that they work for. It will ultimately be the taxpayers of the United States. And out of it we get nothing.

We have many boondoggles that come to the floor of the Senate. We have those who seem to work overtime to figure out useless ways to spend the taxpayers' money, but whoever dreamed up this idea ought to be given some compensatory time off. I cannot think of anything that would not only guarantee that we will spend far more money than we say we are going to but can guarantee that we will waste the money at the same time. It is not always that we get that perfect combination in our spending fever. Many times we spend the money but waste it. Other times we end up spending twice what we said we would. This time we do both. To that extent, this is the one respect in which Radio Marti is perfect. Other than that, it fails.

I notice my good friend from Nebraska is in the Chamber. Unless somebody on the other side is looking for time, I yield to my friend from Nebraska.

Mr. ZORINSKY. I thank the Senator from Vermont. I appreciate his yielding the floor to me.

Mr. President, I oppose the proposed waiver of the Budget Act for Radio Marti.

The waiver applies to $5 million authorized in the bill to assist broadcasters in making technical adjustments to overcome the Cuban interference expected as retaliation for Radio Marti. This $5 million, however, is the mere tip of the iceberg of the cost associated with this particular piece of legislation. The failure of the waiver resolution to include the total costs is deceptive in extreme.

The proposed waiver does not consider the costs of operating Radio Marti itself, for which the administration has requested $9,697,000 for fiscal year 1984. The outyear costs will be only slightly less.

I should point out that the $9,697,000 for Radio Marti is more than twice the cost of the alternative route for broadcasting to Cuba—and is, the expanded Voice of America programming.

I know the age-old argument, that that is not VOA's mission, that type of program. I have talked to a lot of people back home over several recesses, especially a few months ago, when VOA first reared its head on the floor of the Senate, and they said, "Well, don't we own Voice of America?"

I said, "Who owns Voice of America?"

They said, "The United States Government."

I said, "Yes."

They said, "Well, then, what are all these arguments that VOC can't broadcast that type of programming to Cuba?"

The last time I looked at my salary check, it bore the same words as the salary checks of the opponents to this bill. The words "United States Government, Department of the Treasury," are on their checks as well as on my check.

The missions can be changed by the Senate, by Congress, for one valid reason, and that is to save the money of some poor taxpayers who are having one terrible time in meeting their tax obligation to this Government, only because this Government

has forgotten how not to stop spending money foolishly.

We are looking at a $180 billion to $200 billion deficit in the 1984 budget. We have been spending, for many years, money we do not have. So what is a few more dollars to spend? Then we can turn around and say we need a separate radio station because that is not the primary mission of VOA, for which we already spent the money of these poor taxpayers. So let us reinvent the wheel, let us reinvent the radio station, let us spend more and more money, let us hire more people, and let us pay more Government pensions when those people in Radio Marti retire, and let us have the taypayers pay us more money.

I think the taxpayers are sick and tired of our inventing more ways for them to get rid of their money. I think what the people of America want today is reduced Federal spending, and we can accomplish this mission. If we ever get to that point, I have an amendment which proposes to do just that.

As my colleagues on the Foreign Relations Committee are fully aware, the amendment I proposed failed by one vote in committee. We lost that amendment by a vote of 9 to 8, which I think is just as close as you can lose that type of amendment in committee.

I believe that amendment may have a great deal of merit. When it comes time for that amendment, if the time does arrive on the floor of the Senate for me to offer that amendment, I will go into a great deal of depth with respect to that amendment, to fully explain to my colleagues how you can get the same results by spending half the money. I am sure you would get a God bless you from the taxpayers of this country for taking the opportunity to relieve them of a double tax burden.

The proposed waiver we are considering does not consider the cost of operating Radio Marti itself. I want to reemphasize that. The Cuban retaliation to Radio Marti is certain to do a gerat deal of damage to the U.S. AM broadcasters.

The National Association of Broadcasters has done a study of the effects of potential Cuban interference on just 17 stations and found that the lost advertising revenue alone could range from $50,000 per year for one station to $10 million per year for another station, depending on the density of the listener market.

Mr. LEAHY. Mr. President, will the Senator yield for a question?

Mr. ZORINSKY. I am happy to yield.

Mr. LEAHY. The figures that the Senator from Nebraska has just cited—that is above and beyond the amount he has already said the taxpayers would be saddled with on the operation, costs, salaries, maintenance, and everything else on Radio Marti, is it not?

Mr. ZORINSKY. Most certainly. This is the additional exposure and liability in the event there is retaliation with respect to Radio Marti.

Mr. LEAHY. And these are private owners whose livelihood, in effect, is being taken from them by actions over which they have no control. Is that correct?

Mr. ZORINSKY. This is due to the intervention of the good old U.S. Government, once again interfering in a marketplace where people who are in the broadcasting business have saved all their lives, amortized transmission equipment, hired people, paid them salaries, created American taxpayers to pay taxes to this Government. They have gone out, in fact, and signed long-term contracts for advertising and for broadcasting baseball games, football games, hockey games, any other type of sports and athletic events, and numerous other things that the broadcasting industry does.

All of a sudden, the Federal Government steps in and says, "Well, it's time for us to get the truth into Cuba, and we're going to expose you, as a taxpayer and businessman, to going out of business; and you will have to refund your advertising if it is not heard by the subscribers and the listeners of this station."

Mr. LEAHY. I thank the Senator.

Mr. ZORINSKY. A recently declassified State Department document reveals the Department's judgment that:

If the decision is made to establish a Radio Free Cuba (RFC), we believe Cuba will retaliate by increasing its current level of interference with U.S. AM broadcasting operations. Potentially about 20 percent, or 1200, U.S. stations could be adversely affected.

This is a judgment that was declassified by the U.S. State Department.

The economic loss generated by Cuban retaliation affecting 1,200 stations could run several hundred million dollars a year. In the end these costs almost surely will be borne by the taxpayers. Indeed it would be grossly unfair to ask private businessmen to absorb the costs of this foreign policy exercise.

Mr. President, the total costs of Radio Marti will run into the hundreds of millions of dollars. We should consider carefully whether we want to vote for this extravagance, especially at a time of record budget deficits and continued high unemployment. We should also consider whether we want to buy this gold-plated radio station when there is, in the VOA option, a much less costly means to accomplish the same objective.

It is outrageous, however, that the budget waiver does not consider the full compensation expenses likely to be borne by the taxpayer, or even the cost of setting up and operating the station. I urge this budget waiver be defeated so that the Foreign Relations and Budget Committees have the opportunity to study the issue and come forward with a waiver that accurately reflects the real costs of Radio Marti.

I do not think anyone on the opposition side to Radio Marti wants in any way to impair the truth from being heard in Cuba. I think we would like to have the truth heard throughout the world because that is what our society is all about.

I might point out with respect to the comments made by my colleague from Connecticut, Senator WEICKER, when he indicated that he had visited Cuba and heard on his transistor radio both in Spanish and in English the transmissions of numerous radio stations emanating from the U.S. geographical boundaries the fact that during the testimony of Radio Marti in the Foreign Relations Committee it was brought out that the mission of Radio Marti will be to expose to the Cuban people the true events taking place in Cuba. In deference to that my colleague from Illinois, the chairman of our Foreign Relations Committee, pointed out that the mission of VOA is different in that it transmits the happenings in the United States of America.

I simply wish to point out that in testimony in committee it was stated that the mission of Radio Marti would be to transmit such news, for instance, as the fact that Cuban soldiers are involved in Angola, which they intimated was being kept back from the Cuban people, and that there were Cuban soldiers being killed in Angola, and it was intimated in committee hearings that the Cuban people were not aware of this; therefore, we needed Radio Marti to tell them about that.

One of the places I quickly heard about involvement of Cuban troops in Angola was on the news on an American radio station, in addition, of course, to reading the printed news media and, as was stated in testimony in the committee, the fact that a member of the National Association of Broadcasters did the same thing LOWELL WEICKER did, went down, visited Cuba, in fact I entered that as testimony into the record in the Foreign Relations Committee, giving even the station call numbers and what cities they were from, so that whole log is in the record if any of my colleagues would take the time to look at it. They were hearing the normal, regular news, including the fact that Cuban troops were in Angola fighting and dying. The same thing for free for the American taxpayer was done by a private station as what we are attempting to reinvest by re-creating Radio Marti.

Mr. President, I yield the floor to the distinguished Senator from Vermont.

Mr. LEAHY. Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. Mr. President, if our intention is to move forward to a vote on the budget waiver, we could continue to fill up the time, but I just would be prepared to yield back the remainder of our time if the opposition would be willing to yield back the remainder of their time and just go to a vote.

Mr. ZORINSKY. Mr. President, how much time do we have remaining on our side?

The PRESIDING OFFICER. The Senator from Vermont has 3 minutes and 3 seconds remaining.

Mr. LEAHY. Mr. President, if I might hold just for a moment on that, I shall quote from the writings of Jose Marti:

". . . Even in the United States today there may be a prevalence of this most human and virile (although always egotistical and victorious) element of the rebellious colonist, . . . which consumed the native race, fomented and lived off the slavery of another race and reduced or robbed the neighboring countries—has been sharpened rather than softened by the continuous grafting of the European hordes, a tyrannical breeding of political and religious despotism whose only common quality is the appetite amassed by exercising over the rest the authority that was exercised over themselves. They believe in need, in the law of the jungle, as the the only law: "This will be ours because we need it." They believe in the invincible superiority of 'the Anglo-Saxon race over the Latin.' They believe in the inferiority of the Negroes, whom they enslaved yesterday and are criticizing today, and of the Indians, whom they are exterminating. They believe that the Spanish American peoples consist mainly of Indians and Negroes."

"The tyranny of the political sphere".

The Americans' "narrow, egotistical concept of life".

"The North (USA) had been dreaming about these dominions from the cradle, with Webster's 'great light of the North'; with Sewall's statement on everyone's lips, 'the entire continent is yours, without limits'; and with Douglas' 'trade alliance'. And when a thoroughly rapacious nation reared in the hope and certainty of possessing a continent reaches this state of mind spurred on by its jealousy of Europe, by universal ambition, by a need for the false production it believes must by maintained (and even increased) in order to keep its influence and high standard of living—then it is urgent to put as many restraints on it as can be concocted. . . ."

"The North has been grasping and unfair, . . . obdurate and full of hate".

"Brutal and turbulent North".

"I have lived in the monster and I know its entrails".

Mr. President, I state also that if we reach a point where we are voting on Radio Marti, at that time I will seek adoption of an amendment which says:

Nothing in the act will be construed as an endorsement by the United States Government or the American people of the anti-American statements, writings, or philosophies of Jose Marti.

I found his reference to us as a racist nation to be extremely objectionable and I do not wish to have those statements made without challenge.

Mr. WEICKER and Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. PERCY. Mr. President, if the Senator will yield for a moment, I did indicate before that I was prepared to yield back the remainder of my time, but the Senator from Florida (Mr. CHILES) has indicated a desire to speak. Before the distinguished Senator from Connecticut makes his motion would he permit the Senator from Florida to be heard?

Mr. WEICKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WEICKER. Mr. President, what is the situation timewise?

The PRESIDING OFFICER. The Senator from Illinois has 14 minutes and the Senator from Vermont has 2 minutes and 35 seconds remaining.

Mr. WEICKER. I have no objection.

Mr. CHILES. Mr. President, I say to my distinguished chairman of the Foreign Relations Committee if we are about ready to go to a vote on this I do not mind. I know there will be other opportunities for me to speak in this area.

Mr. PERCY. I am afraid there will be.

Mr. CHILES. I do not need to prolong this vote, I do not think.

I would just say that this is on the budget waiver. I think this is perhaps not the place to fully debate the merits of this bill, although we have already sort of embarked into that. But I think there is every reason why the budget waiver should be adopted in this instance and that we should go forward and debate this bill on its merits.

Mrs. HAWKINS addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. Mr. President, I think if the Senator from Connecticut wishes to make his motion he may do so now.

Mr. WEICKER. Mr. President, I move to recommit the pending resolution to the Committee on Foreign Relations and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Under the Budget Act there are 20 minutes of debate on the motion.

Who yields time?

Mr. PERCY. Mr. President, I shall be very brief. The motion to recommit the bill is absolutely unnecessary. I think it is the duty of Senators to face an issue up or down. This matter has been debated fully. As I have indicated previously we have had 3 days of hearings.

Every amendment that could be offered has been offered. Some have been accepted, some have been rejected, some accepted by substantial margins, some rejected by narrow margins such as the amendment offered by our distinguished colleague and member of the committee, the Senator from Nebraska. But we have had votes up or down. The bill still has been sent to the floor and it is now up to the Senate to make a decision yes or no. Do we go ahead with this program or not? The Foreign Relations Committee has done its work. It does not intend to hold any further hearings. There is nothing to be said that has not been already said and if there is something new to be said, it can be said here on the floor. The majority leader has now made available time for the Senate to do that.

I might say that he has done so because of the urgency he feels in this matter. But we have many other things to be done in the Senate. We have the State Department authorization bill, we have our whole military security assistance program, our foreign aid bill. That authorization must be acted on in order for the authorization process to work, and we certainly need to proceed to the work of the Senate, so that I would hope we would get to this measure, vote it up or down one way or the other. Let the die be cast. But to take the time of the Senate now to vote on a motion to recommit the bill to the committee when the committee does not want it back, when the committee has spent its time, its energy, its effort, has come to its decison and has made its recommendation to the Senate.

Now it is time for the Senate to operate. That is the way the committee process works. We are subverting that process with what I consider to be an unnecessary vote, and I shall certainly vote against recommittal, and I urge my colleagues if you believe in the committee system and you want to see the work of the Senate proceed that we vote against this motion to recommit the bill.

Mr. WEICKER. Mr. President, if I might, I yield myself such time as I may use.

To my distinguished friend from Illinois I will tell you why this motion was made. I do not believe in frivolous type amendments here on the floor. I

suggested this might be recommitted to his committee for the following reason: I note in the report of the Foreign Relations Committee on page 12—and you might want to avail yourself of a copy of your report on page 12—I wonder if I might get the attention of the chairman of the Foreign Relations Committee.

Mr. PERCY. The chairman is listening intently.

Mr. WEICKER. Page 12, the estimated costs to the Federal Government, you have in there fiscal year 1984, $5 million. In the bill which you have here before the Senate, "This act shall enter into effect on October 1, 1984," that would mean in other words, we are talking about fiscal year 1985. I was wondering, in other words, are we talking about an expenditure of funds in fiscal 1984 as called for by the report or an expenditure of $5 million in fiscal year 1985 as is in the legislation before the Senate? That is obviously a very serious discrepancy.

Mr. PERCY. Yes. It depends obviously on when the radio broadcast actually gets under way. It depends also on actions possibly taken by Cuba which may or may not be taken. We just simply do not know. Then it depends upon an analysis which is to be made by broadcasters as to what equipment they need to protect themselves against the interference signals being sent by Cuba. The figure $5 million was provided as the best estimate and reasonable judgment that could be derived by the distinguished Senator from Florida, concurred in by the committee by majority vote, the $5 million was an adequate sum to provide in the fiscal year beginning October 1, 1983.

Mr. WEICKER. But to my good friend from Illinois the report is supposed to jibe with the bill before the Senate maybe some staff errors occurred. Would the distinguished Senator from Illinois care to amend his legislation in order to have it properly set forth as to what we are talking about, fiscal year 1984 or fiscal year 1985?

Mr. PERCY. I would only repeat what I did indicate in my previous statements that I intend to offer an amendment to provide authorizing legislation for Radio Marti beginning in 1983.

Mr. WEICKER. So, in other words the Senate is discussing fiscal year 1984.

Mr. PERCY. For the operation of Radio Marti, that is correct.

Mr. WEICKER. Yet the bill calls for fiscal year 1985, so there is a mistake and that is why I am trying to be of assistance to my good friend from Illinois suggesting this bill be recommitted, obviously drawn up in haste for whatever reason, to accommodate the administration, to accommodate members of the committee, but obviously drawn up in haste and in error, and this will afford the committee an opportunity to square out the report with the bill before the Senate.

Mr. ZORINSKY. Will my colleague yield?

Mr. WEICKER. I yield to the distinguished Senator from Nebraska.

Mr. ZORINSKY. I agree, not so much with drawn up in haste but I think there is a lot of sloppy work done here inasmuch as the chairman—I would like to ask the chairman of our Foreign Relations Committee why was not also put in here the cost of operation of Radio Marti. You have the cost of the exposure in the event there is a jamming of the stations, but why was not the cost of operation put in here as in all well-prepared budget presentations?

Mr. PERCY. That provision can be taken care of and an amendment will be offered.

Mr. ZORINSKY. Well, everything can be taken care of after the—the point I make is this was either hastily drawn up or sloppily drawn up to the extent that is was not included and now can be taken care of which raises the question in my mind of how many other items will we have to rectify because the proper work was not done initially, so I think the recommittal effort is one that makes sense not only from the point of proper legislation but one in refinement that I think is very necessary because I am sure my colleagues in the Foreign Relations Committee did not intend for this type of sloppy work to appear on the Senate floor.

Mrs. HAWKINS addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. I yield such time as the Senator may require.

Mrs. HAWKINS. I feel the conversation before us is rather frivolous and dilatory and I move the Senator from Connecticut's motion be tabled and I ask for the yeas and nays.

The PRESIDING OFFICER. A motion to table is not in order while time remains on the motion to recommit.

Mr. LEAHY. Parliamentary inquiry. Did I understand the chairman to say that the motion to table is not in order at this point?

The PRESIDING OFFICER. The motion to table is premature as time remains.

Mr. LEAHY. Would also the call for the yeas and nays be premature at this time?

The PRESIDING OFFICER. The Senator is correct.

Mr. LEAHY. I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. ZORINSKY. Will the Senator from Vermont yield me 30 seconds?

Mr. LEAHY. Yes.

Mr. WEICKER. I yield 1 minute.

Mr ZORINSKY. I would like to point out in all good faith there is no intent on my part to add any dilatory tactics at this point inasmuch as there is a time limit and we can consume, am I correct in asking the Chair, we do have 20 minutes to debate this subject?

The PRESIDING OFFICER. There are 20 minutes to the opposition.

Mr. ZORINSKY. So therefore it is not an open-ended debate and for us to be accused of open-ended dilatory tactics I think is not in keeping either with our intent at the present time under the rules of the Senate.

Mr. CHILES. Will the Senator yield?

Mr. ZORINSKY. Yes.

Mr. CHILES. I think dilatory was not the 20 minutes but I think dilatory was sending this bill back to the committee is where the dilatory was. I do not think it was the 20 minutes' debate. I think the Senator, both Senators, from Florida would be very happy to give 20 minutes of debate, make that 2 hours or make it 20 hours. I think our concern is whether or not we should have just a delay by sending this bill back to committee.

The PRESIDING OFFICER. The 1 minute has expired.

Mr. CHILES. As an attempt to keep the majority from working its will on the floor of the Senate.

The PRESIDING OFFICER. Who yields time?

Mr. WEICKER. I might add in explanation what is transpiring on the floor. So far the only dilatory tactic has been a motion made by the Senator from Florida that was clearly out of order to start with, so that we consumed all this time on something that should never have come to pass in the first instance.

Mr. CHILES. Well, the Senator from Connecticut would have to agree I think there has been no motion made.

Mr. WEICKER. Right.

I yield to my colleague from Nebraska.

Mr. ZORINSKY. I would just like to reply there has been quite obviously an omission in what has been presented to the Senate floor and I think that is why it makes good sense for recommittal to have the Foreign Relations Committee rectify what it has ommitted. There is no reason at all why the cost of this bill should not be in this budget, no reason at all. We discussed it for months and months, and it is either sloppy work or bad work or something that has not been presented to the U.S. Senate, and I think we are entitled to have something on the floor to debate or pass or turn down and, as you say, let the Senate work its will, but in its entirety instead of having to patchwork it here on the Senate floor.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 1 minute remaining.

Mr. WEICKER. Mr President, the Senator from Connecticut is not implying any omission of commonsense on the part of the Foreign Relations Committee. He is not implying any omission of fact or any omission of logic or any omission of sensible foreign policy. I am not implying any of these things.

The Senator from Connecticut is being very specific when he says there is an error between the report and the bill. The Senator from Nebraska is being very specific when he says there are certain costs that are not enumerated in the report. That is what we are talking about.

Mr. LEVIN. Mr. President, I am voting in favor of the motion to waive the Budget Act so that we will be able to consider the legislation to establish Radio Marti. I believe that the debate on this legislation should begin, and in order to be in a position to do that the Senate must waive the Budget Act.

I begin with the inclination to vote against this legislation. But I believe that both sides have the right to present their best case, and that we should have the benefit of hearing both sides.

The PRESIDING OFFICER. Who yields time?

Mr. CHILES. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Illinois has 6 minutes and the Senator from Connecticut has 30 seconds remaining.

Who yields time?

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator has insufficient time to suggest the absence of a quorum, unless he asks unanimous consent to do so.

Mr. WEICKER. If no other Senator desires to speak, I have nothing further to say. I am really trying to protect the Senator from Illinois.

Mr. PERCY. Mr. President, if the other side has used up all of its time, I am prepared to yield back my time so we can go right to a vote.

The PRESIDING OFFICER. Does the Senator yield back his time?

Mr. PERCY. Has the other side used up all of its time?

The PRESIDING OFFICER. All time has been used up.

Mr. PERCY. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the motion to recommit. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), is necessarily absent.

Mr. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from New York (Mr. MOYNIHAN), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 33, nays 61, as follows:

[Rollcall Vote No. 235 Leg.]

YEAS—33

Andrews	Durenberger	Mitchell
Baucus	Eagleton	Pell
Biden	Exon	Proxmire
Bingaman	Ford	Pryor
Boren	Grassley	Randolph
Bumpers	Inouye	Riegle
Burdick	Jepsen	Sasser
Byrd	Lautenberg	Stafford
Cochran	Leahy	Tsongas
Danforth	Mathias	Weicker
Dixon	Melcher	Zorinsky

NAYS—61

Abdnor	Hecht	Nunn
Armstrong	Heflin	Packwood
Baker	Heinz	Percy
Bentsen	Helms	Pressler
Boschwitz	Huddleston	Quayle
Bradley	Humphrey	Roth
Chafee	Jackson	Rudman
Chiles	Johnston	Sarbanes
Cohen	Kassebaum	Simpson
D'Amato	Kasten	Specter
DeConcini	Kennedy	Stennis
Denton	Laxalt	Stevens
Dodd	Levin	Symms
Dole	Long	Thurmond

Goldwater	Mattingly	Wallop
Gorton	McClure	Warner
Hatch	Metzenbaum	Wilson
Hatfield	Murkowski	
Hawkins	Nickles	

NOT VOTING—6

Cranston	Glenn	Hollings
Domenici	Hart	Moynihan

So the motion to recommit Senate Resolution 160 was rejected.

Mr. ZORINSKY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. ZORINSKY. I yield to the Senator from Connecticut.

Mr. WEICKER. Mr. President, I move to recommit the pending resolution to the Budget Committee with instructions to consider the full budgetary impact of the committee amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. ZORINSKY. Mr. President, I yield 2 minutes to the Senator from Connecticut.

The PRESIDING OFFICER. The Senator from Connecticut, having made the motion, controls the time.

Mr. WEICKER. Mr. President, I am sorry; I cannot hear the Chair.

The PRESIDING OFFICER. There will be order in the Senate.

The Senator from Connecticut as a proponent of the motion controls the time, which is 10 minutes.

Mr. WEICKER. Mr. President, I yield to myself 3 minutes.

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. WEICKER. Mr. President, I wonder if we might have order.

The PRESIDING OFFICER. The Senate will be in order.

Mr. WEICKER. Mr. President, I believe section 6 of S. 602 is in violation of the Budget Act, section 303(a)(4). This section of the Budget Act states that the "First Concurrent Resolution on the Budget must be adopted before legislation providing new budget authority, new spending authority or changes in revenues or public debt limit is considered." Section 303(a)(4) reads:

It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution (or amendment thereto) which provides (4) new spending authority described in section 401(c)(2)(c) to become effective during a fiscal year; until the First Concurrent Resolution on the Budget for such year has been agreed to pursuant to section 301.

Mr. President, I do not think the Senate is in order.

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats.

Mr. WEICKER. I repeat, Mr. President, I do not think the Senate is in order.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Connecticut is recognized.

Mr. WEICKER. I thank the Chair.

In essence, section 401(c)(2)(c) describes an entitlement. I asked the American Law Division of the Congressional Research Service to analyze section 6 of S. 602 to verify my suspicions that this does, indeed, create a new entitlement.

This is an entitlement. Therefore, it is a violation of section 303(a)(4) because section 6(f) states, "this section shall enter into effect on October 1, 1984." This, of course, is fiscal year 1985, and we obviously have not agreed to the first concurrent resolution for fiscal year 1985.

Let me read the section, if I might, Mr. President, which we are discussing.

"(b) Accordingly, the Board for International Broadcasting shall make payments to the United States radio broadcasting station licensees upon their application for expenses which they have incurred or will incur in mitigating, pursuant to special temporary authority from the Federal Communications Commission, the effects of activities by the Government of Cuba which di-

rectly interfere with the transmission or reception of broadcasts by these licensees. Such expenses shall be limited to the costs of equipment (replaced less depreciation) and associated technical and engineering costs.

Mr. President, that in effect creates an entitlement, so let us understand that for all the talk as to how carefully prepared this was by the Foreign Relations Committee, we pointed out prior to the last vote that the report refers to fiscal year 1984, while the bill has in it language which authorizes the moneys in fiscal year 1985. By the same token, there was no estimate of the costs involved in the operation as was pointed out by the Senator from Nebraska (Mr. ZORINSKY).

Again, I have to repeat that in this particular instance obviously the substance of the Foreign Relations Committee report is not involved. It is the motion to recommit to the Budget Committee. But this is far more serious in terms of it creating an entitlement. This is something that is within the province of the Budget Committee's work, and I suggest has not properly been taken into account in the course of the preparation of the report or the bill itself.

Mr. President, I believe I yielded myself 3 minutes. Is that 3 minutes up?

The PRESIDING OFFICER. The Senator has used 3 minutes.

Mr. WEICKER. Does the Senator from Iowa care for time at this juncture?

Mr. GRASSLEY. In about 5 minutes.

Mr. WEICKER. Mr. President, I am greatly disturbed that this body is apparently quite prepared to take so lightly the creation of a new entitlement. I do not know, short of using the word "entitlement," that section 6(b) could be more clear or definite in creating an entitlement. Subsection (b) states:

Accordingly, the Board for International Broadcasting shall make payments to the United States radio broadcasting station licensees upon their application for expenses which they have incurred or will incur in mitigating, pursuant to special temporary authority from the Federal Communications Commission, the effects of activities by the Government of Cuba which directly interfere with the transmission or reception of broadcasts by these licensees. Such expenses shall be limited to the costs of equipment (replaced less depreciation) and associated technical and engineering costs.

This says "shall make payments." It does not say "may make payments." It says "shall."

In no way do subsections (c) and (b) take away from the strength of this entitlement. Subsection (c) merely points out that "the Board for International Broadcasting shall issue regulations and establish procedures for carrying out this section * * *." This does not suggest that the Board has any discretion whether or not to make payments, only that it shall decide how to carry out this mandate. Subsection (d) only sets out how much shall be available to carry out this obligation of the United States during fiscal year 1985. It does not in any way erode the force of subsection (b) which establishes an entitlement for broadcasters harmed by interference.

Therefore, I urge my colleague to send this resolution back to the Budget Committee so that they can reconsider this apparent violation of the Budget Act.

The PRESIDING OFFICER. Who yields time?

Mrs. HAWKINS. I yield to the Senator from Idaho.

Mr. SYMMS. Mr. President, the Senate has just spoken on this issue. We voted on a very similar motion just preceding this, and the vote was more than 2 to 1. In order to expedite things—it is obvious that we are in a delaying procedure, which is fine; my colleagues certainly are entitled to use the rules of the Senate—I will suggest that we vote on this issue immediately and get on with the procedural matter so we can get this very important matter before the Senate. Then we can actually have a full-scale debate on the issue. Unless the distinguished Senator from Florida wishes to say anything, my recommendation would be we bring this to a vote.

Mrs. HAWKINS. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Florida has 9 minutes remaining. The Senator from Connecticut has 5 minutes remaining.

Mr. SYMMS. I yield the floor.

The PRESIDING OFFICER. Who yields time?

If neither side yields time, time will run equally against both sides.

Mr. WEICKER. I yield myself 1 minute.

Mr. President, I want to point out to my colleagues that at any time during the course of this debate the proponents of this measure want to carry out this activity through the means of the Voice of America, I am sure that those of us who stand in opposition at this time could accommodate them. There is absolutely no necessity to set up a new entity, at enormous cost to the taxpayers, when we have that vehicle in the Voice of America.

Indeed, the House committee the other day insisted that the activities to be carried out will be carried out either through shortwave or the Voice of America. So it is not that there is not an alternative. There is, through an established medium.

The fact is that this narrow piece of legislation, which is rather broad in its expense, obviously has certain political ramifications. I do not think the people of the State of Connecticut or the other States of the Union should pay for the political aspirations of national and local candidates.

There is no necessity to create another vehicle to accomplish the ends desired by the majority of the Foreign Relations Committee.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. WEICKER. I yield myself 30 seconds.

So I repeat to my colleagues: At such time as anyone wants to arrive at an accommodation to achieve a particular purpose, to have it achieved through the Voice of America, speaking for this Senator, at least, I will be glad to accommodate that point of view.

The PRESIDING OFFICER. Who yields time?

Mr. GRASSLEY. Mr. President, will the Senator from Connecticut yield?

Mr. WEICKER. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 3 minutes remaining.

Mr. WEICKER. I yield 2 minutes to the distinguished Senator from Iowa.

Mr. GRASSLEY. I am not going to use my time. Mr. President.

The PRESIDING OFFICER. Who yields time?

Mrs. HAWKINS. Mr. President, I feel that any further statements made, even in answer to many of the arguments that have been made by the opposition which have been left unanswered, unnecessarily delay the Senate at this time.

I yield back my time.

The PRESIDING OFFICER (Mr. ABDNOR). The Senator from Connecticut has 2 minutes remaining.

Mr. WEICKER. Mr. President, in response to the comments made by the distinguished Senator from Idaho (Mr. SYMMS), this is in no wise the same subject discussed with respect to the last vote. The Senator from Idaho was not on the floor at the time of the debate and specifically referred to the fact that the Foreign Relations Committee had made an error—that is, in the report they stated the cost to be $5 million, which was to paid over in fiscal year 1984; whereas, in the bill before the Senator from Idaho, it says that the money should be paid in 1985. There is a difference between 1984 and 1985.

By the same token, as the Senator from Nebraska pointed out, there is a total omission of operating costs that were contained in the report. That is why we recommended that it be sent to the Foreign Relations Committee, a recommittal.

Now we are talking about a new entitlement, and it is an entitlement in here. It is clearly in the purview of the Budget Committee.

Mr. SYMMS. Mr. President, I make the point that the debate on this is going to take place when we finally get the measure before the full

Senate. There was a 2-to-1 vote on the last vote, and we think we have the votes to either table this motion or vote it down. What we are seeing now is a delaying tactic, and that is fine, if that is what the Senator wishes to do. Once we get it before the Senate, we will debate it.

The PRESIDING OFFICER. All time has expired.

The question is on agreeing to the motion to recommit the resolution.

Mr. SYMMS. Mr. President, I move to lay that motion on the table.

The question is on agreeing to the motion to table.

Mr. WEICKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the motion to recommit. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mexico (Mr. DOMENICI) is necessarily absent.

Mr. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), and the Senator from South Carolina (Mr. HOLLINGS), are necessarily absent.

The PRESIDING OFFICER. Are there any Senators in the Chamber desiring to vote?

The result was announced—yeas 62, nays 33, as follows:

[Rollcall Vote No. 236 Leg.]

YEAS—62

Abdnor	Hawkins	Nickles
Armstrong	Hecht	Nunn
Baker	Heflin	Packwood
Bentsen	Heinz	Percy
Biden	Helms	Pressler
Boschwitz	Huddleston	Quayle
Bradley	Humphrey	Roth
Chafee	Jackson	Rudman
Chiles	Johnston	Sarbanes
Cohen	Kassebaum	Simpson
D'Amato	Kasten	Specter
DeConcini	Kennedy	Stafford
Denton	Lautenberg	Stevens
Dodd	Laxalt	Symms
Dole	Levin	Thurmond
East	Lugar	Tower
Garn	Matsunaga	Trible
Goldwater	Mattingly	Wallop
Gorton	McClure	Warner
Hatch	Metzenbaum	Wilson
Hatfield	Murkowski	

NAYS—33

Andrews	Eagleton	Moynihan
Baucus	Exon	Pell
Bingaman	Ford	Proxmire
Boren	Grassley	Pryor
Bumpers	Inouye	Randolph
Burdick	Jepsen	Riegle
Byrd	Leahy	Sasser
Cochran	Long	Stennis
Danforth	Mathias	Tsongas
Dixon	Melcher	Weicker
Durenberger	Mitchell	Zorinsky

NOT VOTING—5

Cranston	Glenn	Hollings
Domenici	Hart	

So the motion to lay on the table was agreed to.

Mrs. HAWKINS. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. SYMMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. WEICKER. I move to recommit the pending resolution to the Appropriations Committee with instructions to consider the impact of section 12, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, I am going to suggest the absence of a quorum because it is my understanding that the majority leader wishes to confer on this matter. I would prefer not to pursue it to its ultimate at this juncture, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, have the yeas and nays been requested on the budget resolution?

The PRESIDING OFFICER. The yeas and nays have not been requested on the budget resolution.

Mr. WEICKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I ask unanimous consent that the yeas and nays be vitiated on my motion to recommit the pending resolution to the Appropriations Committee.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. WEICKER. I am prepared to yield back the remainder of my time.

Mr. BAKER. Mr. President, does the Senator wish a voice vote on the motion or does he wish to withdraw the motion?

Mr. WEICKER. I am prepared to withdraw the motion and do so withdraw it. If unanimous consent is necessary, I request that.

The PRESIDING OFFICER. The Senator has the right to withdraw the motion.

Mr. WEICKER. I so request.

The PRESIDING OFFICER. The motion is withdrawn.

Mr. BAKER. Mr. President, under this circumstance, the vote will occur on the budget waiver as soon as the time for debate has expired. If the parties are willing to yield back the time, we can get on this right away.

Mr. WEICKER. Mr. President, have the yeas and nays been ordered on the budget waiver?

The PRESIDING OFFICER. The yeas and nays have been ordered on the budget waiver.

Mr. ZORINSKY. Mr. President, I yield back the remainder of our time.

Mrs. HAWKINS. I yield back the remainder of our time.

The PRESIDING OFFICER. All time having been yielded back, the question is agreeing to the Budget Act waiver resolution. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI) is necessarily absent.

Mr. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), and the Senator from South Carolina (Mr. HOLLINGS), are necessarily absent.

The PRESIDING OFFICER (Mr. JEPSEN). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 64, nays 30, as follows:

[Rollcall Vote No. 237 Leg.]

YEAS—64

Abdnor	Heflin	Packwood
Armstrong	Heinz	Percy
Baker	Helms	Pressler
Bentsen	Huddleston	Quayle
Biden	Humphrey	Randolph
Boschwitz	Jackson	Roth
Bradley	Johnston	Rudman
Chafee	Kassebaum	Sarbanes
Chiles	Kasten	Simpson
Cohen	Kennedy	Specter
D'Amato	Lautenberg	Stafford
DeConcini	Laxalt	Stennis

Durenberger	Melcher	Weicker
Eagleton	Mitchell	Zorinsky

NOT VOTING—6

Cranston	Domenici	Hart
Dodd	Glenn	Hollings

So the resolution (S. Res. 160) was agreed to.

RADIO MARTI

The PRESIDING OFFICER. The question recurs on the motion to proceed to H.R. 2733.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. I ask unanimous consent that that measure be temporarily laid aside, that regular order not bring it back.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object——

Mr. BAKER. Mr. President, the request I made was that we once again temporarily lay aside the pending motion, and that no call for regular order bring it back.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Now, Mr. President, I move that the Senate proceed to the consideration of S. 602, the Radio Marti bill.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I feel certain that someone will wish to debate that, so I would not wish the Chair to put the question. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The acting assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I see the distinguished junior Senator from Iowa on the floor, and I believe he will seek recognition in just a momemt.

Before I yield the floor, I also see the minority leader on the floor, and I rather expect he may have a question to put at this point. If he wishes, I will yield at this point.

Mr. BYRD. I first was going to ask whether or not the Chair has acted on the majority leader's request.

The PRESIDING OFFICER. The unanimous-consent request was granted.

PROGRAM

Mr. BYRD. Mr. President, I ask the majority leader if he can indicate at this point what the program is for the rest of today and tomorrow?

Mr. BAKER. Yes. Mr. President, I thank the minority leader.

First, Mr. President, I expect the Senate will continue in session this evening until approximately 6 p.m. I believe there is not an order for the Senate to convene yet on tomorrow. Is that correct?

The PRESIDING OFFICER. There is not an order.

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objections, it is so ordered.

Mr. BAKER. Mr. President, when we finish our business around 6 p.m., we will go out on recess until 10 a.m. in the morning. I believe there are a couple of special order requests which I will put a little later. That means we will probably be back on the pending motion, which I anticipate will be the motion to proceed to the consideration of S. 602, the Radio Marti bill, sometime around 10:30 a.m. tomorrow or a little later. Debate will continue on that bill as long as necessary.

I would like to get it up, but from the signs and the temper of the times I am not optimistic that we will finish it in short order. But we will continue on that bill. It is entirely possible that a cloture motion may be filed on the motion to proceed if necessary on tomorrow.

Mr. President, during the day tomorrow I anticipate that we will receive—perhaps even this evening—from the House of Representatives the conference report on the supplemental appropriations bill. It is privileged, and it would be my intention, after first conferring with the minority leader, to ask the Senate to proceed to the consideration of this conference report when it is available to the Senate.

I expect tomorrow to be a full day, and we will continue on the matters at hand. I do not expect the day to be a very late day, but it will be a full day.

I do not anticipate the need for the Senate to be in session on Saturday. I anticipate, based on circumstances as they may develop tomorrow, that we will come in Monday, as we usually do, around 11 or 12 o'clock.

That is the best I can see at the moment.

Mr. BYRD. And on which measure is the cloture motion likely to be filed with respect to the motion to proceed?

Mr. BAKER. Mr. President, it would be on the motion to proceed on the Radio Marti measure.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. Mr. President, I now believe the Senator from Iowa wishes to be recognized. I would first say that I do not anticipate any further rollcall vote this evening. That, of course, always excludes the possibility of a rollcall vote to require the attendance of absent Senators, but I do not anticipate that either. So I do not foresee any rollcall vote before the hour of recess which I estimate at 6 p.m. I now yield the floor.

RADIO MARTI

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, yesterday I received from the State Department their talking points on this issue now before the Senate, whether or not we ought to establish Radio Marti.

Implicit throughout their talking points is the message that the proponents of Radio Marti have taken great strides and made tremendous sacrifices in meeting the requests of our Nation's broadcasters. One of those broadcasters is WHO, located in Des Moines, Iowa, the same station at which President Reagan had his start in radio broadcasting. The prosperity of broadcasting in central Iowa has a great deal to do with the economy in my State and hence my interest. But my interest goes beyond that of WHO radio to certain property rights of broadcasters generally in our country, not out of respect for just the property rights of broadcasters but out of my respect for the constitutional protection of property generally.

These talking points from the State Department further implied that broadcasters had been unreasonable, that they keep shifting their position from one point to another. This is a clever tactic on the part of the State Department. But let me tell my colleagues in this body, Mr. President, about the shifting that the State Department did last year as we tried to reach a compromise on this issue.

And remember, Mr. President, that my position has always been that a compromise was possible. In fact, I think that my remarks will indicate to you that if the position of the State Department right now had been what it was last December, we would probably have a bill already passed and Radio Marti operating.

But last year, I helped negotiate and eventually agreed to a compromise amendment to Radio Marti which was later accepted by the Senate Foreign Relations Committee. Subsequent actions by the administration, its officials, and others in the Senate raised serious questions about the administration's intention to fully honor the

foundation and spirit of the agreement embodied in that compromise. That agreement was embodied in the frequency selection process which was developed by the House of Representatives a year ago.

These actions left me little choice but to join a filibuster last fall on the subject of Radio Marti. I feel that now we should go over the history of that evolution of events last fall, to clarify any misunderstandings created by misrepresentations of this controversy.

Initially, I recommended four alternatives to Radio Marti that I had hoped could be studied to find common grounds to resolve the concerns of broadcasters as well as to improve the viability of the Radio Marti effort. Several Senators on the committee were responsive to these ideas. Others, including the administration, adamantly opposed these suggestions upon the dubious grounds that they would undermine the purpose of Radio Marti, and they refused to offer any serious consideration of any other alternatives within the aspects of Radio Marti and the bill as introduced in 1982.

Although I viewed those alternatives superior to those contained in the bill, I recognized that this dogmatic opposition could eventually foil passage and enactment of my proposals. Therefore, I agreed to listen to administration suggestions.

Ultimately I negotiated a compromise amendment—or, more accurately, I should clarify that I helped negotiate a compromise amendment—that adds a fifth criterion to the frequency selection process established by the House of Representatives Commerce Committee and the full House of Representatives. That process involved a rulemaking by the National Telecommunications and Information Administration to select a frequency for Radio Marti.

Since the House Commerce Committee report language fully detailed the nature of this process and how it would be conducted, our negotiations were obviously based entirely upon the foundation that had already been constructed by the House of Representatives. The administration indicated no dissatisfaction with the frequency selection process for which it had bargained during the House deliberations. No one stated any desire to change the House Radio Marti legislation nor the House Committee report language.

Let me emphasize at this point that we are using as a point of departure during the summer of 1982 a position that the administration agreed to, which was adopted in the committee report of the House Commerce Committee. So I was starting there. I use that as a basis for any amendment compromise that I agreed to last year.

The fifth criterion we are talking about here, and which was negotiated, was a simple extension of the legislative work of the House of Representatives. So, again, we were following a pattern previously agreed to, and it was nothing more and certainly nothing less. It would be absurd to suggest anything to the contrary.

After securing written assurances of the administration's support of this amendment, I endorsed the compromise in lieu of my original proposals that were suggested in my testimony before the Senate Foreign Relations Committee in the summer of 1982. The Senate Foreign Relations Committee voted to approve that fifth criterion.

The chairman of the committee graciously offered me the opportunity to provide committee report language that explains the compromise amendment and the frequency selection process. This was an altogether reasonable offer, since I had been involved in these negotiations more closely than most others on the committee.

Furthermore, the subject of the amendment related to technical communications matters, as opposed to foreign policy concerns. We are talking about technical matters here and not matters of public policy.

My office had been working extensively with the attorney for radio station WHO, Mr. Kenneth D. Salomon, who had been involved in the negotiations for this frequency selection process in both the House and Senate.

It is worth noting that Mr. Salomon had formerly served as deputy chief counsel at the NTIA. His assistance assured an important continuum in the work of the House and the Senate on Radio Marti, and therefore he was instrumental in drafting appropriate, accurate, and consistent report language that I ultimately submitted to the committee.

Again, one should remember the relationship already pointed out between what the administration had already agreed to in 1982, in the House of Representatives and the House Commerce Committee language. Since this had been developed by the House Commerce Committee, naturally, we turned to that document as a guide.

The language offered to the Senate Foreign Relations Committee for its report—and this invitation had been given to me by the chairman of the committee—was virtually identical to that of the House.

I was surprised and I was dismayed when I learned that the administration—I am talking about the administration, not the staff of the Senate Foreign Relations Committee, not the chairman of the Foreign Relations Committee; I am talking about the administration—strongly objected to this language. I could not understand why, if the language was acceptable for the House Commerce Committee report, it was not now acceptable for the Senate.

I should have been informed that the administration no longer supported the frequency selection process as developed by the House, before we sat down to negotiate. Instead of coming to me to discuss their problems, certain administration officials attempted to convince others that this was not part of the agreement, that the junior Senator from Iowa was reneging on some sort of agreement. They even went so far as to manipulate others not as closely involved in these negotiations to agree that this was not part of the bargain before staff had an opportunity to fully explain the nuances of this complex, carefully constructed frequency selection process.

I hope I can again emphasize that we are talking about technical matters here that we were putting in the committee report. We are not talking about policy decisions as to whether or not we should have a Radio Marti, or even some of the more specific, corollary aspects of that initial and basic policy.

I, however, did fully understand the complexities of the frequency selection process and consequently recognized this action by the administration and others as an undeniable effort to undermine the strength and protections that this legislation and the committee report language provided broadcasting interests.

We all know that the administration prevailed at this report-writing level, and my report language was not adopted. Instead, it was included in the report only as "my understanding"—meaning the understanding of the junior Senator from Iowa. This action was disturbing and unacceptable. I did not bargain for meaningless words.

The only conclusion I can draw is that the report language that the administration accepted in the House Commerce Committee must at one time have been satisfactory to the administration, or they were Machiavellian in their approach to it and somehow felt that they did not have to go with that now. But that was the basis of my understanding as I worked with the administration in the summer and early fall of last year.

However, absent the foundation of the administration's previous agreement to the language in the House Commerce Committee report, what we agreed to as the fifth criterion had no substance, or at least much less substance.

In short, what the administration now found objectionable—or what they failed, for some reason, to mention during House deliberations, during our negotiations, and during the Senate Foreign Relations Committee markup, when this amendment

was explained—centered upon the report language reaffirming that this new frequency selection process would operate under the full cooperation of the Administrative Procedures Act. This act guarantees the private sector the constitutional right of due process.

I have to ask all my colleagues: In times of peace, in times of calm, in times when there is an opportunity to make the constitutional process work, what is wrong with the aspect of the Administrative Procedures Act which gives everybody the constitutional right of due process? It is basic to what we are working on here, the protection of people's interests.

It should go unquestioned. The report language explained that the new frequency selection procedure would be afforded a full rulemaking process under the APA. The hearing record from last year supports the position that this would be a full rulemaking process.

The term "rulemaking" is a term of art that clearly means full APA rulemaking process, not some sort of modified process.

No one offered any objection to this position during markup when Mr. Salomon, who I remind you was formerly high up in the NTIA, explained this provision. It was all laid out so everyone would know to what was being referred. And, of course, even more important and in support of this position, the committee transcript bears this point out.

Then we get to the lameduck session, after the election. I joined several of my colleagues, under the able leadership of the Senator from Nebraska, in a filibuster of Radio Marti. Not until it became clear that our filibuster was serious and effective did anyone from the administration bother to contact me to see if we could work out something.

When they came to the conclusion that I understood really what they were up to with the fifth criterion, that it was an empty agreement, that without the foundation of the House Commerce Committee report language there was really nothing there, and that was a return to the Machiavellian approach that previously must have been used in the House, then they wanted to talk. Although I felt it was somewhat late and also that I had negotiated in good faith throughout, I decided that I could at least listen to them at this point. This was sometime in early December of last year.

It was difficult to ascertain the real reason for the administration opposition to a full APA rulemaking, referring to the Administrative Procedure Act.

The rationale shifted from concerns about time delays to the desire to assure foreign policy immunity before any courts, to guaranteeing that at least one frequency could be selected, to allowing classified information to be used in selecting the frequency.

Remember this environment at this time. We were sitting down one on one between myself and some staff and with people from the administration to see what they wanted to do. Remember, the environment that goes back to last summer when there was no interest in the amendments that were proposed by this Senator and then their willingness to sit down and do something. The basis for that from my judgment was the House Commerce Committee report language. Then there was their refusal to go along with that report language in the Senate Foreign Relations Committee report. Then we reached a point where the bill eventually comes up where the administration still is sticking by the point of view that they won in the Senate Foreign Relations Committee report, to a filibuster, to people from the administration wanting to visit with me to see what we could work out, and then there was the shifting that goes on in those very meetings as you are trying to reach an agreement from concerns about time delays to their desire to assure foreign policy immunity before our courts, to guaranteeing that at least one frequency could be selected, to allowing classified information to be used in the selection of a frequency. All of these are legitimate concerns by our administration, and we explored all of them.

I was initially informed that the administration opposed a full rulemaking because it feared that it could become time consuming administratively and judicially in the event of a challenge.

Remember this: Back there in December after peddling around with this thing for 5 or 6 months they were concerned about something being time consuming, when just because of their inability or their desiring not to negotiate in good faith and to be very Machiavellian, a lot of time is eaten up. Remember, I said from the very beginning that if some of the efforts that have been put forth in the last 6 months had been put forth 12 months ago, I will be willing to gamble that Radio Marti would already be broadcasting.

Notwithstanding the fact that out of courtesy I should have been informed prior to negotiations of their full intentions to oppose full rulemaking procedure, I decided to work last December for a resolution of their concerns. First, I pointed out that the administrative part could be expedited and conducted within 3 to 4 months.

Second, if they followed the frequency selection criteria faithfully there would be no grounds for a court challenge based on the Administrative Procedure Act violation. In short, if they intended to honor the process to which they had agreed, there existed no reason to fear delay.

Nevertheless, I agree to negotiate an amendment that would provide an expeditious process but would retain the full APA rulemaking protection. This is something I agreed to last December.

The amendment I offered satisfied the time consideration. It did, of course, retain the protection of full rulemaking. We are talking about constitutional due process. At that point I was told that time was not the only problem. Now the full rulemaking protections were not satisfactory because they did not exclude foreign affairs functions from court review.

It was becoming clear what the administration had in mind. The frequency selection process, as established by the legislation, had nothing to do with foreign policy. This is the major reason why the House Commerce Committee in the last Congress developed this process and not the House Foreign Affairs Committee.

The establishment of Radio Marti and the type of material broadcast may fall within the realm of foreign policy, but certainly not the simple adherence to a set of criteria to select a frequency. That seems to me to be a very technical matter.

Eliminating the full rulemaking protections would open the frequency selection process to a cursory review and allow the selection of almost any frequency desired with little consideration for the criteria imposed by Congress.

That is what would happen if you did not have the protection of the APA. If a broadcaster challenged this selection in court the administation could simply plead foreign policy privileges and the court would refuse to hear the case.

Since the administration could offer no legitimate counter to the argument that a frequency selection was not a foreign policy issue, their concerns then shifted to the unlikely possibility that there may not exist a single frequency that could fit this criteria.

Of course, this was not my intention, taking the stand, as I have, that I did not oppose per se Radio Marti. So I offered to work on an amendment that would guarantee at least one eligible frequency.

At this point I was reminded of the purpose behind the compromise amendment, that it was aimed at providing the administration the flexibility to shift Radio Marti's frequency away from 1040 kilohertz, and that is WHO's frequency in Des Moines, Iowa, to another frequency.

I was at this point greatly intrigued by this revelation. This was the first and the last time I had heard any desire from the administration to shift the frequency from 1040 kilohertz.

Other high-ranking administration officials had stated we could not shift to another frequency because, and I would quote "We would lose face by submitting to Castro's blackmail." How many times have you heard that used? You know we just could not shift this from one frequency to another because then our State Department would be submitting to blackmail by this tinhorn dictator down there in Cuba.

But, in these negotiations, it was suggested that we might want to shift it, or that we could shift it.

In support of this wonderment on my part, the initial letter of commitment I received from the administration regarding the compromise contained a qualifier statement supporting—stating its support of and I quote "subject to the stipulation explained."

Since no stipulations had been discussed I inquired about the meaning of this. You understand we are sitting here in an office trying to negotiate a compromise. You think you get something negotiated down and then you receive a letter "subject to stipulation explained." The fact is, there had been no "stipulation explained."

Since none had been discussed, I inquired about the meaning of this. I was informed it meant that no assurances were given that a different frequency would be selected.

I should have known something was wrong when I received a revised letter of commitment only minutes before committee markup that offered only commitment to the "alternative language" when I had asked for specific commitments to that, as well as, to the "word and spirit of the new Radio Marti frequency process."

What was truly ironic was that they had apparently lost sight of the fact that I had stated from the beginning my concern was for all broadcasters, not just for WHO radio. The only reason I supported the compromise was I felt if the administration followed the selection process faithfully at least all broadcasters would be placed on an even footing and would be provided minimal protection.

It certainly did not assure anything for WHO radio and no one from the administration ever indicated that it would. They would not even agree to language that would strengthen protections by making the selection criteria mandatory as opposed to permissive.

In any event, the next administration suggestion, following this revelation, was that we turn to some of the alternatives that I had recommended in the first place in July. So, you see, we negotiate that fifth criterion. Four months later a filibuster takes place. They come to our office to negotiate something, and we think all the time that we are making considerable progress, and then we get letters that indicate there are stipulations in addition, stipulations not spoken to, and then you can imagine how astonished I was before Christmas when they somehow suggested that the alternatives that I had suggested way back there in July ought to be considered.

As I have stated so many times, the administration had summarily dismissed those proposals in the summer of 1982, last year. Now they were suggesting that they were acceptable. Unfortunately for them, another high-ranking official had indicated earlier that these original alternatives could serve as a "first step," that next year Congress could pass legislation to expand Radio Marti's broadcasting authority to suit the initial designs.

I responded by pointing out it was a little late to be offering these alternatives. I had offered them months ago in hopes of being of assistance, but regrettably the administration was not interested, and even if I had agreed at that late hour there was serious question as to whether broadcasters, whose concerns had been repeatedly ignored, were ready to agree. Furthermore there was certainly no guarantee that other Senators involved in the filibuster would be satisfied.

Consequently I recommended that we remain on our course of trying to resolve our differences over the frequency selection process, and that we develop an amendment that would satisfy the administration's most recently stated concern about the possibility that no frequency would be available under the process. For a person like me who has never said anything against Radio Marti per se, if I could assure them that I was willing to adopt an amendment that would assure the frequency, that a frequency would be selected, then why would not that solve their concern?

There was no need for another meeting. Although I had been led to believe that the foreign policy privilege issue had been resolved, I was informed the next day that any rulemaking that would not provide a foreign policy exclusion was unacceptable. You see another turnaround of administration position.

I was also informed that the administration would need an additional amendment to allow them to submit classified information for consideration with the frequency selection criteria. This information obviously would not be made available to the public, consequently, tying the hands of any broadcaster who might be forced to defend its interests in the courts. At no time did the administration offer to me any explanation of the nature of possible classified material that it might want to offer.

It is interesting to note that during our negotiations, rumors began circulating in the Senate that my concerns had been satisfied and that I was ready to support Radio Marti. Throughout these negotiations I took great pains to make certain no one held any false impressions about my continued unresolved concerns. These rumors obviously were concocted in hopes of breaking that filibuster last December.

I also learned that while I was meeting with administration officials to resolve our differences over the APA protections, work was underway to establish during Senate floor debate that the frequency selection process should not be afforded the protection of rulemaking under APA.

Radio Marti negotiations during the past few months have been no more forthright. I am talking now about 1983. While broadcasters worked in earnest with the administration to find a solution to broadcasting concerns, efforts to circumvent this progress were in motion. Attempts were made to misrepresent the position of broadcasters and to undermine their credibility.

I attended a meeting at the White House, I believe it was during the month of March, to discuss Radio Marti. We were told that broadcasting concerns had been satisfied. How many times have you heard that? Fortunately, I had just been on the phone with Eddie Fritts, president of the National Association of Broadcasters, prior to that meeting at the White House. Some of the people in the Chamber now were at that meeting. I was able to assure everyone that the fact of the matter was that broadcasters still had very serious problems with Radio Marti and that the administration and Congress should be interested in hearing what these concerns are before pushing ahead with legislation.

Not everyone shared my desire to hear from the broadcasters. In fact, there was considerable effort expended during this time to discourage broadcasters from publicly stating their position. The longer broadcasters could be dissuaded from taking a public position, the more time proponents would have to secure the necessary support in Congress. As long as broadcasters could be kept silent through numerous enticements to remain at the bargaining table, there was less of a chance that anyone could counter the repeated, erroneous contentions that broadcasters had been given everything they wanted but that they kept shifting their position by asking for more when accommodations were offered.

One of the points made time and again is that present Radio Marti legislation gives broadcasters everything they supported last year as embodied in the alternatives that I proposed. These contentions distort and mislead.

They attempt to discredit broadcasters and cloud the real issue.

There is no question that I offered alternatives last year, and I also offered what I viewed as good reasons why these alternatives were superior to that which was before us in this body last December.

Broadcasters also went on record stating these proposals represented a possible way of minimizing Radio Marti's potential for exacerbating the already intolerable Cuban interference problem, and they urged Congress to give serious consideration to these proposals.

The fact of the matter is that the Senate never did provide the necessary study of these proposals. And the principle reason little consideration was given was because of the strong opposition by the administration. It is incredible now to find these same people who so vociferiously opposed the consideration of these alternatives to try to convince us that the legislation they now offer adequately resolves the concerns of broadcasters simply because it adopts some of the suggestions made last year.

Congress may not have given sufficient consideration to these proposals, but broadcasters have since had the time to thoroughly review each of these alternatives. Through this review, they have found that some of the alternatives present serious problems for broadcasters. Consequently, they have taken a position against certain ideas, but at the same time have made quite clear precisely what they do want.

But instead of squarely facing the serious problems related to Radio Marti, proponents find it easier to attack the credibility of broadcasters for what simply amounts to taking a strong stand in protecting their interests. It became abundantly clear that the administration and Congress were not prepared to help sift through these options to find the best means of protecting broadcasters, so they were forced to do it themselves.

It is time to face reality. The key problem with Radio Marti is that it transforms our domestic broadcasting spectrum into a "chessboard" for foreign policy. It forces broadcasters and the American listening audience into the role of "pawns" to suffer the consequence of foreign policy maneuvering between the United States and Cuba. As with the Soviet grain embargo of the previous administration, any resulting harm will fall upon the private sector, not the Government.

Government assurances that Cuba will not counter with interference have been proven meaningless. Cuba's August 30, 1982, response to the tuning of the facility intended for Radio Marti dismissed any questions as to the ability and willingness of Castro to engage in the U.S. sanctioned "chessgame" on our domestic broadcasting spectrum.

Assurances that the Government holds several options to counter interference are equally insufficient. If these options are available and workable, they should have been implemented years ago to help the Florida broadcasters.

I repeat, they should have been used several years ago to help the Florida broadcasters.

And broadcasting engineers inform me that there is little that an individual broadcaster can do to overcome interference. Our domestic spectrum is so saturated with signals that even minimal adjustments of power or direction can have severe effects on other broadcasters.

Broadcasters did not ask for this battle. They did not ask to be thrown into the middle of a foreign policy debate. But they were forced into it, and have rightfully fought for their interests, first by asking Congress to consider several alternatives, but then by identifying and fighting for their preferred option once it became clear that Congress would not adequately address their concerns.

The blame for any delays or defeat of Radio Marti must fall squarely upon its proponents who have shown an unwillingness to be consistent in their pursuit of the proposal. Had the proposal been handled properly in the first place, Radio Marti would be broadcasting today.

Had the accepted, traditional shortwave spectrum been recommended for Radio Marti, or the use of off-band frequencies, or even a simple expansion of Voice of America broadcasts, U.S. broadcasters would not have been forced into this debate. Unfortunately, this is not the case and now Congress must make the decision as to whether they want to protect broadcasting interests while at the same time support Radio Marti, or whether they want to support Radio Marti at all costs.

Mr. KENNEDY. Mr. President, I support Radio Marti as an important contribution to freedom of information in this hemisphere. In keeping with the tradition established by Radio Free Europe and Radio Liberty, Radio Marti will provide objective news and information and promote the free exchange of ideas between the people of the United States and the people of Cuba.

The goals and purposes of Radio Marti are in full accord with the Universal Declaration of Human Rights. This new capability for open communication and full debate will enhance democracy and human rights and lead to greater understanding and peace.

Radio Marti will operate under the same strict standards of objectivity now maintained by the Board for International Broadcasting. Its primary responsibility will be to provide reliable, accurate and comprehensive information and alternative sources of news to the Cuban people, who are denied access to independent news coverage that is fair and impartial. The credibility and the effectiveness of Radio Marti depend on its scrupulous adherence to these standards of excellence, and I am confident that it will fulfill the important mandate and mission that Congress is giving it.

Throughout my career in the Senate, I have sought effective ways to encourage freedom of information in the Soviet bloc, in authorization regimes of the left or the right in Latin America, and in Asia and other parts of the world. My support today for Radio Marti and for the Radio Broadcasting to Cuba Act is a vote to accord this same freedom to all the people of Cuba.

Mr. BAKER. Mr. President, I announced earlier that we would go out about 6 p.m. Unless someone wishes to speak further on the motion at this time, I am prepared to put us into a period for the transaction of routine morning business.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business to extend no longer than 6:15 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I yield the floor.

A FLAGRANT SOVIET VIOLATION OF THE SALT I ANTIBALLISTIC MISSILE TREATY

Mr. McCLURE. Mr. President, I ask unanimous consent that an article in yesterday's New York Post entitled "New Soviet Radar Violates SALT Pact," by Rowland Evans and Robert Novak, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Post, July 27, 1983]

NEW SOVIET RADAR VIOLATES SALT PACT

(By Rowland Evans and Robert Novak)

The Soviet Union is building an immense new radar system some 500 miles north of the Mongolian border in the central USSR that U.S. specialists are convinced is a dangerous new violation of the SALT I treaty that sharply limits anti-ballistic missile defenses.

A top-secret "warning" from the Intelligence Community was sent to the White House July 15. It said, "The new radar's location appears to be inconsistent with the provisions of the 1972 SALT I ABM [antiballistic missile] Treaty."

Article I of that treaty prohibits any ABM system "for the defense of the territory" of the U.S. or Soviet Union. But the treaty goes further. It even prohibits early-warn-

ing radars—not just the radars that control the firing of anti-missile missiles—from being built anywhere except "along the periphery" of Soviet [and U.S.] territory "oriented outward."

The discovery of the new radar system, called a phased array radar, was made by U.S. spy satellites in a routine sweep of that portion of the Soviet Union, 3000 or so miles from the Pacific Coast. No effort to conceal the construction appears to have been made by the Soviets.

What deeply disturbs U.S. officials is that the new radar, which is oriented toward Alaska, is "almost identical" with the large missile-tracking radars now being tested at Pechora in the Soviet Northwest, at Lyaki near the Caspian Sea and at two other known locations—all "along the periphery." The new construction is the first that appears to be an unambiguous violation of the "periphery."

The new radar, with a transmitter building nearly 500 feet long and 300 feet wide, would close a gap in Soviet coverage to the Northeast against incoming U.S. ICBMs targeted on Eastern Soviet territory and possible submarine-launched missiles from the Pacific.

Secret disclosure of the new system to the President and high administration officials reinforces the dilemma that has plagued every administration since the first SALT agreement: What should the U.S. do after detecting Soviet violations? The problem was raised directly with President Reagan in a June 22 letter signed by 34 Republican senators. They quoted Secretary of State George Shultz as testifying to the Senate Foreign Relations Committee on June 15 that Moscow has been "stretching a series of treaties and agreements to the brink of violation and beyond."

These suspected violations specifically include the phased array radars being built for only one discernible purpose: to protect the Soviet Union with an ABM system which both countries agreed not to build. In the hands of only one country, it could bestow an insurmountable advantage over the unprotected adversary.

Mr. McCLURE. Mr. President, this article published on July 27, 1983, contains the first information about a significant new Soviet violation of the Strategic Arms Limitation Treaty—SALT I—the Anti-Ballistic Missile Treaty signed in Moscow in May, 1972.

The SALT I ABM Treaty has long been regarded as the most successful strategic arms limitation treaty in history. It has been reviewed by the United States and the U.S.S.R. twice, in 1977 and 1982, and is the only strategic arms treaty still in effect—the SALT I Interim Offensive Weapon Agreement having expired in 1977, and the SALT II Treaty of 1979 being unratified. Thus, if the Soviets are flagrantly violating the only Strategic Arms Limitation Treaty in force, this is extremely significant as an indicator of Soviet intentions in negotiating a Strategic Arms Reduction Treaty (START) or an Intermediate-range Nuclear Force Reduction (INF) Treaty.

The Soviets are reportedly building a new large, ABM battle management radar in central U.S.S.R. which is about 500 and 3,000 miles from Soviet borders. In January, 1981, the Joint Chiefs of Staff stated:

Soviet phased array radars, which may be designed to improve impact predictions and target handling capabilities for *ABM battle management*, are under construction at various locations throughout the U.S.S.R. *These radars could perform some battle management functions* as well as provide redundant ballistic missile early warning coverage. The first of these radars is expected to become operational in the early 1980's (Emphasis added.)

Large radars of the battle management type are clearly the long lead-time element of an ABM system. They are the basis for a Soviet breakout from the ABM treaty, together with the following interceptor missiles: The SAM-5, SAM-10, and SAM-12, all tested illegally in an ABM mode, and the ABM-3 missiles and radar, which are illegally mobile.

The new Soviet radar being constructed in central U.S.S.R. violates the following provisions of the SALT I ABM treaty:

Article I, paragraph 2 of the SALT I ABM treaty states:

Each Party undertakes not to deploy *ABM systems* for a *defense of the territory of its country and not to provide a base for such a defense.* (Emphasis added.)

The new ABM battle management radars, which reportedly now number five or six, do constitute a base for an ABM defense of the territory of the U.S.S.R. Moreover, when coupled with SAM-5's, SAM-10's, SAM-12's in an ABM mode, and with the mobile ABM-3 now reportedly in mass production and being deployed around Moscow, it can be argued that the Soviets already have more than a base for a nationwide ABM defense. They are in fact already deploying a nationwide ABM defense.

Article II of the SALT I ABM Treaty defines ABM systems as—

Radars constructed and deployed *for an ABM role*, or of a type tested in an ABM mode . . . and includes those which are *under construction* (Emphasis added.)

The JCS statement of January 1981 indicates clearly that the radars in question in fact have the capability to be ABM battle management radars.

Article VI of the SALT I ABM Treaty, paragraph (b) states:

Each Party undertakes . . . not to deploy in the future radars for *early warning* of strategic ballistic missile attack except at locations along the *periphery* of its national territory and oriented outward. (Emphasis added).

The most flagrant aspect of this new radar, which is also an early warning radar, is the fact that it is in central U.S.S.R. Clearly, it is not on the periphery, and therefore it is a clearcut violation of article VI paragraph (b). Indeed, U.S. Unilateral Statement G to the SALT I ABM Treaty states that:

Soviet hen house radars, which are Soviet ballistic missile early warning radars, have a significant ABM potential.

The new ABM battle management radars are even more powerful than hen house radars, which are themselves defined by the United States as having ABM potential. And of course, both hen house and the new ABM battle management radars also have an inherent early warning capability.

In sum, this new Soviet battle management radar flagrantly violates three important provisions of the SALT I ABM Treaty. Article I of the treaty is widely regarded as the most significant constraint of the treaty, yet the Soviets are flagrantly violating this central constraint.

Mr. President, I also ask unanimous consent that a recent letter from Under Secretary of Defense Fred Ikle be printed in the RECORD. This letter is important, because it strongly implies that the Reagan administration is clearly aware of flagrant Soviet SALT violations, but is unable to do anything about them.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE UNDER SECRETARY OF DEFENSE,
Washington, D.C., July 25, 1983.

Hon. JAMES A. MCCLURE,
U.S. Senate,
Washington, D.C.

DEAR JIM: I greatly appreciated receiving your introduction in the record to my article "After Detection—What?"

Thank you for your kind words about this 22 year old piece. My scepticism at that time about our ability to respond to violations was unfortunately an accurate forecast.

With warm regards and many thanks,

Sincerely,

FRED C. IKLE.

THE TOM ELLIS NOMINATION TO THE BOARD FOR INTERNATIONAL BROADCASTING

Mr. HELMS. Mr. President, at the outset I would emphasize that it is a worthy tradition of the Senate that we endeavor to hold each other in high respect and affection, even when we most strongly disagree on issues. I hope it may be said of me that I do my best to uphold that tradition. It is an important one, and it deserves to survive.

But there are times, Mr. President, when I find myself puzzled by the judgments and the actions of some of my colleagues. I readily acknowledge that I have displeased some of my friends in the Senate from time to time. It happens to all of us at one time or another. The only way to avoid controversy in the Senate is to do nothing and say nothing. But in the long run—and generally it is never very long—today's adversaries on one issue become tomorrow's joint participants in a different issue.

So it is with sadness, Mr. President, that I rise today to state for the RECORD that I was disappointed at the conduct of two of my colleagues during a hearing this past Tuesday involving the Foreign Relations Committee. A good American's name was tarnished deliberately and unjustifiably; a citizen who had been willing to serve his country without compensation or reward was rebuked—and, indeed, vilified—by two Senators, one of whom distributed a press release attacking the character of the nominee before the Senator had even heard the citizen's testimony.

What was involved, Mr. President, was President Reagan's nomination of Mr. Thomas F. Ellis, of Raleigh, N.C., to be a member of the Board of International Broadcasting.

Mr. Ellis is a prominent citizen of my hometown. He is a distinguished lawyer, a former judge, a veteran of World War II, a faithful and active member of his church, a loving husband and father, and very proud grandfather.

I have never heard a nominee subjected to more abuse by Senators. Epithets were hurled at him, sarcasm punctuated the criticism directed at Mr. Ellis. It was a discouraging episode in the history of this Senate.

And what, Mr. President, were the charges against Mr. Ellis? For the most part the characterization of Mr. Ellis's career was inaccurate and the stated conclusions reached by the Senators were irrelevant to the purpose of the hearing called by the Foreign Relations Committee—that is, President Reagan's nominees to the Board for International Broadcasting.

In the first place, Mr. President, only a handful of Senators were present. This is not unusual. All Senators have two or three committee meetings scheduled simultaneously. What was unusual was that one Senator boasted the day before the hearing that he was going to "nail" Mr. Ellis—a man the distinguished Senator had never met. Indeed the Senator had his aide distribute a press release—before the hearing began—calling on President Reagan to withdraw the nomination of Mr. Ellis.

To the credit of the White House and President Reagan, there was no interest in withdrawing the nomination following the attacks upon Mr. Ellis, by the two Senators.

But after the hearing, Mr. Ellis realized that his nomination was obviously a political weapon to be fired at President Reagan, and even though he himself could have survived the onslaught at the Foreign Relations Committee, Mr. Ellis was unwilling to allow the episode to be harmful to a President he admires, whom he has known as a personal friend for many years, and for whose candidacy Mr. Ellis had worked effectively in both 1976 and 1980.

So Mr. Ellis quickly made the decision to remove himself from that position. He reached the judgment that he would ask President Reagan to withdraw his nomination.

Mr. President, I am convinced that these attacks on a fine and decent man will backfire. I confess that I hope they will. Moreover, I hope that in some way all of us may have learned a little something about comity and fair play. Mr. Ellis will not serve on the Board for International Broadcasting, but I am convinced that this is the Nation's loss.

Again, I would emphasize my respect and affection for all my colleagues. While I am disappointed in this instance, I have learned that civility and grace usually await maturity. I am grateful to Tom Ellis for having been willing to serve his country. And, knowing him, I am confident he will bear no grudges even though he has been, in my judgment, seriously and intentionally maligned.

Mr. President, I ask unanimous consent that a copy of Mr. Ellis's letter to President Reagan be printed in the RECORD at the conclusion of my remarks, followed by the text of his letter to two Senators. Both letters are self-explanatory.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MAUPIN, TAYLOR & ELLIS, P.A.,
Raleigh, N.C., July 28, 1983.

President RONALD REAGAN,
White House,
Washington, D.C.

DEAR MR. PRESIDENT: I appeared on Tuesday before the Senate Foreign Relations Committee for consideration of my appointment to the Board for International Broadcasting. It became obvious to me from the outset of the questioning by Senators Tsongas and Biden that they would use that occasion to attempt to divert the hearing away from broadcasting the U.S. views of freedom behind the Iron Curtain into a personal attack on me by my political enemies.

As a matter of fact, Senator Tsongas had issued a press release prior to the hearing criticizing you and prejudging my qualifications. It was an obvious partisan political effort to drive a wedge between you and the black community using me as the instrumentality. I have attached a copy of my letter to Senators Tsongas and Biden.

Frankly, I do not mind taking whatever heat these two ultra-liberal senators want to generate in my direction. However, I believe it is vital to America that they and their ilk be denied the opportunity to use me to hinder your struggle to return economic stablility and provide an adequate national defense to our nation. Therefore, I am respectfully requesting that you withdraw my name from consideration for appointment to the Board for International Broadcasting.

Let me say in closing that I appreciate your appointing me to the Board. I did not seek the appointment but was most anxious to serve as I believe our only hope to survive the spread of Soviet slavery across the free world and to free the hostage people of the USSR is to broadcast the tenets of Christian belief through mass communication. I trust that the Board for International Broadcasting will carry out this task without fear of interference from some of those in public office who do not recognize the threat of Communist world domination.

God Bless you and Nancy,
Sincerely,

THOMAS F. ELLIS.

MAUPIN, TAYLOR & ELLIS, P.A.,
Raleigh, N.C., July 27, 1983.

Senator PAUL TSONGAS,
Senator JOSEPH BIDEN, JR.,
Senate Office Building,
Washington, D.C.

GENTLEMEN: I knew prior to the hearing on my nomination to the Board for International Broadcasting that my views of the Communist threat to the free world were diametrically opposed to yours, nevertheless, I had been under the impression that the Senate Foreign Relations Committee hearing yesterday was to determine my views on broadcasting the message of freedom behind the Iron Curtain. It turned into a personal attack on me on a subject totally unrelated to my views of the Communist world. I congratulate you on your tactics of diverting the hearing from a discussion of the real issues facing Radio Free Europe and Radio Liberty.

I have just been furnished with copies of Sen. Tsongas' press releases regarding hearing on my nominaiton to the Board of International Broadcasting that took place on July 26. I note that you believe that all the Democrat members of the Foreign Relations Committee and several Republican members will vote against my confirmation. I am amazed that so many will be voting against my nomination without the benefit of hearing my testimony or reviewing my background. However, I have never pretended to understand how Congress operates.

I would like to set the record straight in the few areas which you gentlemen appear to have focused your questions of me and your statements during that process, as well as Tsongas' press releases made before and immediately after the hearing.

The following facts were brought out:

THE PIONEER FUND

1. The Pioneer Fund was established in 1937 in Boston, Mass. Its stated purpose was to study "racial betterment." Its first trustees included prominent Boston attorneys.

2. Its charter provided for the study of "racial betterment." In 1937, I submit, the term "racial betterment" was synonymous with the "betterment of mankind".

3. It operated continuously from 1937 to date with distinguished trustees including former Justice John Marshal Harlan of the U.S. Supreme Court; a department head at Columbia University; and other prominent and distinguished Americans from the Boston and New York areas.

4. I was appointed a trustee in 1973 at the request of a prominent Harvard attorney, Harry Weyher. I had nothing to do with determining what institutions received funds from the trust. I would merely sign blank authorizations from Weyher indicating my faith in his selection of universities.

In conclusion, whether academic freedom should include permitting Stanford University, University of California at Berkeley and other universities to fund genetic studies by faculty members is not my decision to make—nor did I do so. If my participation in authorizing grants to these institutions

makes me a "racist", then I suppose it follows that the Boards of Trustees of those institutions stand indicted with me.

SOUTH AFRICA

My only connection with South Africa was agreeing to accept an invitation as a private citizen to visit that lovely country at the expense of their government. I was not a government official accepting a junket paid for by our government or theirs. I made no statement about this trip on my return. Senator Tsongas thought it odd that I refused to discuss this trip with the press, but I believe it to be a private matter. I would have chosen not to discuss it with the Senate Foreign Relations Committee, but answered his questions. I am sure you would have wanted me to condemn South Africa for its race relations policies, but I feel that is a matter for South Africa. I do not believe it is matter for private citizens of the United States, especially those of us, including me, who have so little depth of understanding of the entire picture.

Senator Tsongas inquired as to my owning South African gold mining stock. I addressed him that I felt it was a hedge against inflation in the United States caused by too much government spending and rising deficits. These "extensive holdings" amount to less than $100,000 acquired over a period of 20 years.

BLACK RACIAL INFERIORITY

Senator Tsongas states in his press release that I declined to denounce the theory of Black racial inferiority. Even the press following the hearing made no such allegation. As a matter of fact, they carried my statement that there were studies indicating Black racial superiority. And, further, that I knew about as much of Einstein's theory of relativity as I did genetics, and was therefore in no position to make a scientific judgment on that subject.

RADICALIZED BLACKS

Sen. Tsongas referred to an article in which I stated that radicalized blacks influence the Democratic Party power structure. I stated that by "radical" I meant those who believed in drastic change and that would include Julian Bond who supports changing our free enterprise economic system into a socialistic one. Bond even stated he'd like to see a picture of Jesse Helms in N. C. newspapers with a rifle's crosshair over his chest. He asked that I name other radical blacks within my definition and I named Jesse Jackson and Andrew Young. I have no problem in supporting my charge that the latter two gentlemen are pushing for drastic change in our society.

You even went back over 25 years into my views following *Brown* v. *Board*. Views I held as a Democrat and which I submit were no different from those held by Senators Ervin, Eastland and other southerners. This was a cheap shot at best.

I am afraid that I have been so opposed to your views of what is best for America that I am perfectly willing to personally take whatever heat you may be able to generate. However, when you use the Senate Foreign Relations Committee to distort facts in an effort to hurt President Reagan and Jesse Helms, you seriously damage American foreign policy. I feel sure that the countries behind the Iron Curtain will be pleased that you have so succeeded in distorting the issues that I have withdrawn my name from consideration for appointment to the Board for International Broadcasting.

Finally and personally, I believe you have overreached the bounds of propriety and fair play for purely partisan politics.

Sincerely,

THOMAS F. ELLIS.

NATIONAL HOSIERY WEEK

Mr. HELMS. Mr. President, the week of August 14-20 marks the 13th annual observance of National Hosiery Week. I am proud to pay tribute once again to this important industry, which has played such a vital role in our free enterprise system.

In so many instances, hosiery manufacturers are the major employers in their communities. They provide jobs, and revenue for operating State and local governments. But most important, they provide a way of life for the thousands of Americans, and quality products for the rest of us.

Mr. President, the average hosiery company is a small or medium-sized business. Many of them are still family owned. Most are in smaller towns and cities. Yet they employ 62,000 workers in 417 plants nationwide. Total retail sales amount to more than $6 billion a year. The hosiery business is clearly a vital part of our economy.

Mr. President, this commemorative week is of special significance to me since North Carolina is the leading textile State in the Nation. I am proud that 54 percent of all American-made hosiery is produced in North Carolina. Incidentally, the average hosiery plant produces more than 8.1 million pairs a year, and employs an average of 149 workers.

During National Hosiery Week, retailers across the country will join the celebration as stores display and demonstrate all types of hosiery for the entire family. Mr. President, the hosiery industry is a good example of how well the free enterprise system works, and what it means to the people of this country.

North Carolina is proud of its distinctive leadership in the hosiery industry, and we are grateful for the fine qualify of life this industry has provided for so many people.

On behalf of my fellow North Carolinians, I extend my sincere thanks and congratulations to the hosiery industry for the outstanding job it is doing for the people of our State and Nation.

STUDENT LOANS

Mr. TOWER. Mr. President, during consideration of the emergency supplemental appropriations bill for 1983, H.R. 1718, the Senate approved an amendment which added sense of the Senate language to the effect that Congress opposed the Reagan administration's 1984 education proposals. Only nine of my colleagues joined me in opposing this amendment.

At the time of that vote, I wish that my colleagues would have had the benefit of an essay which appeared in the June 24 issue of the New York Times. The article to which I refer was written by Jospeh D. Rodota, Jr. Mr. Rodota graduated with honors from Stanford University in 1982, and is a former intern with the Senate Republican Policy Committee. In my view, his essay is a frank and objective discussion of Federal student aid policy, from the perspective of a recent graduate who has done his homework.

I ask unanimous consent that Mr. Rodota's article be printed in the RECORD.

[From the New York Times, June 24, 1983]

LIMIT STUDENT LOANS

(By Joseph D. Rodota, Jr.)

WASHINGTON.—I just mailed a check for $60 to a bank in California. By October 1982, I will have repaid—with interest—federally guaranteed student loans totaling $5,000 that helped my family finance my bachelor's degree from one of the most expensive private universities in the country.

Self-appointed defenders of the "right" to student aid claim that the Reagan Administration's proposals to "slash" Federal aid to students threaten the ability of middle-class youth to get a college education. These "spokesmen" are flat wrong.

Student aid is a privilege, not a right. President Reagan seeks to eliminate abuses while preserving aid to the truly needy. Nothing in the Administration's plan bars a student from attending the school of his choice, as long as the student and his family are willing to make reasonable sacrifice toward that end.

I am working to earn money for graduate school. Student aid is still a "hot" issue in my immediate future. Moreover, my experience with student aid is not limited to cashing Federal checks. One of my part-time jobs was as an assistant to my school's director of financial aid.

What is most striking about the present debate is that the typical college student believes that lessons of the classrooms are irrelevant to policy questions surrounding Federal student aid. It is time that each student assessed student-aid reform by applying knowledge acquired in college courses in economics, political science, history and philosophy.

"We live in a world of scarce resources," the economics student would begin. Scarce resources of any sort should not be used to encourage harmful or inefficient behavior. Nor should funds be distributed to promote beneficial or efficient behavior that would have occurred even if that allocation had not been made. In short, put scarce dollars to work where they'll do the most good.

The policy implications are clear. For some families, guaranteed student loans at 7 percent were handy funds for investing in money-market funds yielding 15 percent. In 1981, Congress established a $30,000 income ceiling above which a "needs test" limits borrowing to families with genuine need. The test is not all that severe, and even a family making $50,000 and sending one child to an expensive private college would qualify for $1,000 guaranteed student loan. I would go further and extend the needs test to all borrowers, since it is safe to assume that at least some of the families below the

$30,000 mark do not seek guaranteed loans out of need.

Rigorous analysis also tells us that some forms of aid offer greater incentives to students to reach their degrees. Studies have shown that work-study is the only form of student aid positively correlated with persistence in school. The Reagan Administration's 1984 budget calls for a 60 percent boost in college work-study funds.

Will billions more in Federal student aid enable the higher-education "market" to function more efficiently? The number of 18- to 22-year-olds in this country is declining and will not begin to increase until the year 2000. Beefed-up aid budgets neither encourage individual institutions to operate efficiently nor assist America's orderly transition to a time when significantly fewer colleges will be needed.

"These programs were expanded not to meet economic needs but to cater to political expressions of wants," the student of polical science would say. The dramatic expansion of student aid in the last decade arose from a Congressional desire to establish programs that foster loyal—and dependent—constituencies.

"The road to hell is paved with good intentions," the history major would warn. Federal programs begin with vague goals and then grow substantially: Verifiable results and clearer objectives seldom accompany this growth.

The philosophy major would offer the most thought-provoking observation: "Student aid is a privilege, not a right." A "right" is vested in individuals or groups, but "privileges" are earned. The claim of a "right" to student aid subtly places the responsibility for an individuals' college education on some other actor or institution—in this case, the Government.

My university's financial aid program was administered on the principle that aid was a privilege disbursed according to need and earned by the student's admission to a competitive university and his willingness to commit personal resources to his education. The Administration's 1984 budget seeks to reinforce this commitment, by requiring an explicit self-help contribution from every student seeking a Federal grant.

Before the next student protestor leaves for Washington, he should do his student-aid homework. Uncritical acceptance of half-truths would earn low marks from a college professor. Should Federal policy makers be less discerning?

LSD FOUND TO BE REGAINING ITS POPULARITY

Mrs. HAWKINS. Mr. President, the most recent national drug use survey has revealed a frightening trend—LSD is regaining its popularity among teenagers and young adults. Almost 2 million Americans used a hallucinogenic drug other than marihuana during the month preceding the survey. About three-fourths were young adults between 18 and 25 years old.

Lysergic acid diethylamide (LSD) and phencyclidine (PCP) are the two hallucinogenic drugs of greatest concern. Domestic clandestine laboratories produced virtually all of the LSD and PCP offered for sale. After a continuing decrease through the late 1970's, LSD is now making a sharp comeback on college campuses and among the working and middle class in Boston, Philadelphia, New York, Miami, Los Angeles, and San Francisco. Emergency rooms in hospitals in 26 metropolitan areas monitored by the Drug Abuse Warning Network of the National Institute on Drug Abuse have admitted 4,378 people suffering from overdoses of LSD in the last 4 years. The Drug Enforcement Administration estimates that there are up to 10 times as many LSD overdoses now than during most of the 1970's when this dangerous drug was out of fashion.

The chief of the Dangerous Drug Unit in the DEA's Office of Intelligence indicated that LSD traffic now runs about $20 million a year and sharply rising.

I ask that a July 21, 1983, Washington Post article by Thomas O'Toole entitled "LSD Found to be Regaining its Popularity" and a July 7, 1983, San Antonio Light article by Mark Barabak entitled "A West Coast Revival of LSD Use is Predicted to Spread Across Nation" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the San Antonio (Tex.) Light, July 7, 1983]

A WEST COAST REVIVAL OF LSD USE IS PREDICTED TO SPREAD ACROSS NATION

(By Mark Barabak)

LOS ANGELES.—Young people, skeptical about "bad trip" drug stories from the psychedelic '60s, are starting an LSD renaissance in major cities that will spread across the nation, a drug expert says.

UCLA psychopharmacologist Dr. Ron Siegal said Tuesday that the resurgence in LSD popularity "appears to be ubiquitous throughout all classes of society and all age groups. But I would say the majority of the users we've seen are under 40.

"It's a recreational use, an infrequent use. They're used, but infrequently abused."

Los Angeles police said the highest abuse seems to be among high school students, attracted by the ease with which hallucinogens can be obtained, and by the convenience.

Greater sophistication among drug users, refinement of hallucinogens and fewer "bad trips" are responsible for the West Coast trend toward LSD, PCP and other psychedelics, Siegal said.

He predicted the trend "will spread gradually throughout the United States by the end of the decade."

"We are getting reports of a renaissance of LSD use in major cities such as New York and Chicago," Siegal said, noting users of the mind-altering drugs are cynical of the horror stories surrounding psychedelics.

Drugs such as LSD are more refined today than in the 1960s, making them safer, Siegal said.

The most popular form apparently is a single drop of LSD on a postage-stamp size piece of blotter paper that a user just pops into his mouth.

Among the horror stories that scared drug users away from psychedelics were tales of people who, under the influence of hallucinogenic drugs, exhibited bizarre public behavior, killed themselves or others, or suffered mental damage.

Some of the (current) users are aware of the history of LSD and they're aware a lot of the horror stories were just that, horror stories with little scientific validity," Siegal said.

Use of potent forms of marijuana, resulting in mild hallucinogenic experiences without ill effect, has "tempered the fear and anxiety many people have about experimenting with a hallucinogenic drug," Siegal said.

"Their own experience has convinced them these drugs could be used safely when handled properly," Siegal said.

Don Bays, an administrative assistant with the Los Angeles Police Department, said there recently has been an enormous increase in the confiscation of LSD.

So far this year police have seized 112,222 units of LSD—a 3,000 percent increase over the 3,462 units seized in the first six months of last year.

Detective Sal Nares, of the police juvenile narcotics division, said undercover officers have found it increasingly easy to obtain large quantities of hallucinogens from campus pushers.

[From the Washington Post, July 21, 1983]

LSD FOUND TO BE REGAINING ITS POPULARITY

(By Thomas O'Toole)

In row after row of padlocked drawers in an unmarked laboratory in McLean sit thousands of vials of green, yellow and purple tablets, LSD seized by Drug Enforcement Administration agents from Long Island to Los Angeles.

The pills are not remnants of the 1960s, when "acid" was often the hallucinogen of choice among college-age, artistic-minded and middle-class whites.

The LSD in the DEA's lab has been seized in the last four years, evidence that the drug is making a strong comeback on college campuses and among working- and middle-class whites in Boston, Philadelphia, New York, Miami, Los Angeles and San Francisco.

"There is a whole new generation of kids growing up today who refuse to believe the horror stories the generation before them suffered with LSD," said Dr. Edward Franzosa, chief chemist at the DEA.

They're finding out in growing numbers what the drug is like, authorities say. Emergency rooms in hospitals in 26 metropolitan areas monitored by the Drug Abuse Warning Network of the National Institute on Drug Abuse have admitted 4,378 people suffering from overdoses of LSD in the last four years. Three deaths from LSD overdoses have been reported in the past three years.

While those numbers do not compare with the thousands of deaths and mental hospitalizations attributed to LSD in the 1960s, the DEA estimates that there are five to 10 times as many LSD overdoses now than during most of the 1970s, when the drug was out of fashion.

One reason the number of LSD-related deaths remains low is that the doses of the drug sold on the street are much weaker than those available in the 1960s, when the average dose contained 180 micrograms. Nowadays, dosages run between 10 and 30 micrograms.

The strongest dose sold on the streets is a purple tablet containing 40 micrograms of lysergic acid diethylamide.

"These low dosages are still not safe," said Eric Rosenquist, chief of the Dangerous

Drugs Unit in the DEA's Office of Intelligence. "But they're probably why we're not seeing the incidents of really bizarre behavior we saw from use of the drug in the 1960s, when people thought they could fly and jumped out of windows."

Rosenquist said that there are about 1.2 million Americans who now use hallucinogenic drugs, including mescaline, peyote and LSD. He said his agency estimates that LSD traffic now runs about $20 million a year, nowhere near the sales of drugs like cocaine, marijuana, heroin, PCP and Quaaludes, but a number that is sharply rising.

Not only has the dosage of LSD changed, so has the method of its use. In the 1960s, people generally took LSD when they were alone or with one other person to experience "the trip," where colors swirl, the senses blend, music acquires an aroma and colors carry a sound.

In the 1960s, users took LSD as often as three or four times a week, which made the practice more dangerous because the drug can linger in the blood as long as a week and in fatty tissue even longer.

Today, LSD is generally regarded as a party drug by users who often take it once a week in combination with cocaine or alcohol.

The main reason that the DEA is alarmed over a comeback of LSD is that users develop a tolerance for the drug and may begin turning to higher doses, Rosenquist said. "The temptation is there right now among LSD users to increase their inputs. The time to really start worrying about LSD is when street doses start rising to tablets containing 100 to 150 micrograms."

AUGUST 21, 1968—A DAY OF SHAME

Mr. PERCY. Mr. President, August 21 marks the 15th anniversary of the Soviet invasion of Czechoslovakia. On this date in 1968, a half million Soviet and Warsaw Pact troops invaded that beautiful and peaceful nation and crushed Alexander Dubcek's reform movement, which had blossomed since the Prague spring of that year.

Indeed, this was already the second occasion since the birth of modern Czechoslovakia in 1981 that the Communists massively intervened in the affairs of the Czechoslovakia State. I felt great outrage and sadness when the Communists first toppled the government in 1948, and again when they brutally repressed the Czechoslovak people in 1968.

This anniversary is truly a Soviet day of shame. The Soviets, whose invasion was condemned in 1968 even by many Communists, vowed that their occupation would endure only until Czechoslovakia has achieved "normalcy." The Soviets announced the achievement of "normalcy" in 1971, but their troops remain on the ground in Czechoslovakia and they dictate the State's repressive, Soviet-style domestic and foreign policies.

All of us who cherish our own freedom must remember this sad anniversary. We should applaud all those in Czechoslovakia and expatriates in the United States who hold high the hope that someday their homeland will be free of Soviet repression and their government will be willing to uphold its own laws and international commitments to human rights. There must be no movement toward assisting Czechoslovakia economically, as is desired by the current Czechoslovak Government, until great progress is made in these areas.

On this anniversary, we pledge our continuing support of the aspirations of the Czechoslovak people for freedom and basic human rights. We pledge to remember the heroism and bravery of the proud Czechoslovak people. We honor those who work tirelessly for the rights of the Czechoslovak people, including my friends of the Czechoslovak National Council of America. We shall never forget this Soviet day of shame, August 21, 1968.

COMPREHENSIVE ORGAN DONOR NETWORK

Mr. ANDREWS. Mr. President, today I would like to take the opportunity to announce that after the Senate reconvenes in September, I will introduce legislation creating a comprehensive organ donor network.

As we all know, the greatest hindrance to all transplant programs is the lack of suitable donor organs for those individuals desperately awaiting surgery. Many of these patients may only breathe life for a few more days, weeks, or may linger for a matter of months—while their health is steadily declining moment by moment.

An immediate solution to this tragic dilemma is to have a well-informed public and medical community who comprehend the critical need for organ donation. The donation of an organ—the gift of life—must be offered when a family is dealing with a very traumatic situation—the death of a loved one.

I became aware and concerned of the need for this legislation through repeated contacts with Charles and Marilyn Fiske of Boston, Mass. The Fiskes are the parents of Jamie Fiske, who received a well-publicized liver transplant last year after her father made a nationwide plea for a donor at an appearance before the American Academy of Pediatrics convention.

Through courage, tenacity and the proper forum, Charles Fiske was able to find the vital organ needed to keep his little girl alive, but think of the thousands every year who are not so fortunate.

We must encourage organ donation and it is imperative that organ donations are discussed with family and friends. A cooperative relationship between an informed public and the medical community allows for effective implementation of a national organ donor network.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed in the end of the Senate proceedings.)

DEFERRALS OF BUDGET AUTHORITY—MESSAGE FROM THE PRESIDENT—PM 70

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred jointly, pursuant to the order of January 30, 1975, to the Committee on the Budget, the Committee on Appropriations, the Committee on Energy and Natural Resources, and the Committee on the Judiciary:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report three new deferrals of budget authority totaling $16,118,000.

The deferrals affect Energy Activities and the Department of Justice.

The details of the deferrals are contained in the attached reports.

RONALD REAGAN.

THE WHITE HOUSE, *July 28, 1983.*

PRESIDENTIAL APPROVALS

A message from the President of the United States reported that on July 15, 1983, that he had approved and signed the following joint resolution:

S.J. Res. 68. Joint resolution to authorize and request the President to designate July 16, 1983, as "National Atomic Veterans Day."

On July 19, 1983:

S.J. Res. 18. Joint resolution designating September 22, 1983, as "American Business Women's Day."

S.J. Res. 34. Joint resolution designating "National Reye's Syndrome Week."

On July 22, 1983:

S. 929. An act to amend the act of July 2, 1940, as amended, pertaining to appropriations for the Canal Zone Biological Area.

On July 25, 1983:

S.J. Res. 96. Joint resolution to designate August 1, 1983, as "Helsinki Human Rights Day."

On July 27, 1983:

S.J. Res. 77. Joint resolution designating "National Animal Agriculture Week."

MESSAGES FROM THE HOUSE

At 12:24 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 2972) to authorize certain construction at military installations for fiscal year 1984, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon; and appoints Mr. PRICE, Mr. DELLUMS, Mr. MONTGOMERY, Mr. KAZEN, Mr. WON PAT, Mr. DICKINSON, Mr. KRAMER, and Mr. WHITEHURST as managers of the conference on the part of the House.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the amendment of the Senate to the bill (H.R. 2973) to repeal the withholding of tax from interest and dividends.

The message further announced that the House has passed the following joint resolutions, without amendment:

S.J. Res. 56. Joint resolution to designate the month of August 1983 as "National Child Support Enforcement Month"; and

S.J. Res. 67. Joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "National Respiratory Therapy Week."

The message also announced that the House has agreed to the following concurrent resolution:

S. Con. Res. 35. Concurrent resolution to authorize the printing as a Senate document of a revised edition of "The Capitol."

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-343. A joint resolution adopted by the Legislature of the Northern Marianas Commonwealth; to the Committee on Energy and Natural Resources:

"H.J. RES. No. 33

"Whereas, the T.T.P.I. office of Social Security has been attempting to resolve the matter of funding the Prior Service Benefit Program for sometime; and

"Whereas, the T.T.P.I. office of Social Security has received final word from the U.S. Department of Interior that Prior Service Benefits will not be funded after the official conclusion of the Trusteeship Agreement; and

"Whereas, the T.T.P.I. office of Social Security initiated a U.S. Congressional lobby during March, 1983, to encourage official reconsideration of the prior service funding decision; and

"Whereas, the T.T.P.I. office of Social Security has requested the support of the 3rd Northern Marianas Commonwealth Legislature, through a joint resolution, in their lobbying effort; now, therefore,

"Be its resolved by the House of Representatives of the Third Northern Marianas Commonwealth Legislature, Third Regular Session, 1983, the Senate concurring, That the ongoing lobby to encourage official reconsideration of the prior funding decision be, and hereby is, fully supported by the Third Northern Marianas Commonwealth Legislature; and

"Be it further resolved, That the Speaker of the House of Representatives and the President of the Senate shall certify and the House Clerk and Senate Legislative Secretary shall attest to the adoption hereof and thereafter transmit copies of this house joint resolution to the President of the Senate, U.S. Congress; the Speaker of the House of Representatives, U.S. Congress; Secretary of the Department of Interior; the Honorable Janet McCoy, High Commissioner, T.T.P.I.; the Honorable James A. McClure, Senator; the Honorable Daniel K. Inouye, Senator; the Honorable Lowell P. Weicker, Senator; the Honorable Sidney R. Yates, Congressman; Mr. Jerold F. Facey, Social Security Administrator TTPI, Mr. Robert Myers, Consulting Actuary; and the Honorable Pedro P. Tenorio, Governor of the Commonwealth of the Northern Mariana Islands."

POM-344. A resolution adopted by the House of Representatives of the State of Illinois; to the Committee on Energy and Natural Resources;

"HOUSE RESOLUTION No. 373

"Whereas, Current federal and State regulatory schemes include secondary coal recovery operations in the definition of surface mining activities causing all the surface mine permitting provisions and performance standards of the State and Federal programs to be applied to secondary coal recovery operations; and

"Whereas, The application of these program requirements has caused approximately 20 secondary coal recovery operations in Illinois to cease operations and potential operations to not begin due to lack of the fiscal resources and technical staff or expertise for compliance; and

"Whereas, Program requirements have had a much greater and more devastating impact on secondary coal recovery operators than regular, small surface mine operators since secondary coal recovery operators do business in a limited market place where their product sells for only $5 to $6 per ton; and

"Whereas, It is virtually impossible to generate the resources to gather all the data and prepare all the engineering studies required to obtain a permit under the existing program and to subsequently comply with the performance standards of the existing program as the result of receiving a permit; and

"Whereas, Secondary coal recovery operations recover coal from abandoned coal waste piles (coarse refuse or gob) and slurry ponds and will be given high priority for reclamation under the Abandoned Mine Reclamation program authorized by Title IV of P.L. 95-87; and

"Whereas, If an affordable permitting and environmental control provision can be developed and implemented for secondary coal recovery operators, many of the abandoned mine problem sites in the coal producing regions of the State can be reclaimed by private enterprise, resulting in Title IV funds not being spent to reclaim those sites but being used to reclaim other priority sites; and

"Whereas, The Abandoned Mine Reclamation program under Title IV can be bolstered by secondary coal operators paying the 35¢ per ton of coal produced reclamation fee into the reclamation fund, a fiscal resource lost if the coal had been covered and revegetated under the Title IV program; and

"Whereas, In addition to reclaiming abandoned sites and paying into the reclamation fund, continuance of secondary coal recovery operations will directly provide several hundred jobs, thousands of dollars in federal, State and local taxes and several hundred jobs in associated industries; and

"Whereas, The utilization and conservation of the coal resource as mandated by Section 515(b)(1) of the Federal Act will be maximized by an increase in the number of secondary carbon recovery operations, without which much of this coal resource will be rendered unrecoverable under current economic conditions; and

"Whereas, There are no valid or logical reasons why these operations should be forced out of business and there are numerous reasons for taking action to allow these operators the opportunity to continue to operate; and

"Whereas, The Illinois General Assembly, representing all the citizens of the State of Illinois cannot unilaterally legislate a solution without federal executive branch approval; and

"Whereas, The Illinois Department of Mines and Minerals is seeking stopgap administrative assistance; therefore, be it

"Resolved, by the House of Representatives of the Eighty-third General Assembly of the State of Illinois, That we hereby request the United States Congress and the United States Department of the Interior assist and support the efforts of the State of Illinois to arrive at a solution which will repair existing environmental damage, conserve Abandoned Mine Reclamation Funds and create additional jobs and revenue; and, be it further

"Resolved, That a copy of this resolution be transmitted by the Secretary of State of Illinois to the President of the United States, the Secretary of the Senate of the United States, the Clerk of the House of Representatives of the United States, the Secretary of the Department of the Interior and to each member of the Congress from this State."

POM-345. A concurrent resolution adopted by the Legislature of the State of Texas; to the Committee on Environment and Public Works:

"HOUSE CONCURRENT RESOLUTION

"Whereas, The State of Texas, through the Texas Air Control Board ("TACB"), has long been a leader in implementing reasonable and effective air pollution control measures to protect the health and welfare of the citizens of the State; and

"Whereas, The federal Clean Air Act Amendments of 1977 required that the State of Texas prepare and implement a state implementation plan ("Plan") for attainment of federally promulgated National Ambient Air Quality Standards ("Air Quality Standards") by December 31, 1982, or by 1987 for areas such as Harris County where compliance could not be demonstrated by 1982, that extension being conditioned on the adoption of all Reasonably Available Control Measures and implementation of an Inspection and Maintenance Program for automobiles; and

"Whereas, The TACB, with the assistance of other state and local agencies and in consultation with the Environmental Protection Agency ("EPA"), has diligently devel-

oped an effective and reasonable Plan that meets the requirements of the Clean Air Act and in the development of that Plan has, among other things, performed extensive technical studies and analyses and implemented a pilot program for Inspection and Maintenance of automobiles; and

"Whereas, the TACB developed a Plan in 1979 that demonstrated attainment of the Air Quality Standards by December 31, 1982, for all areas of the State except Harris County (for which attainment could not be demonstrated by 1982 and for which an extension to 1987 was necessary), the Governor submitted that Plan to EPA on April 13, 1979, and EPA approved that Plan with certain conditions on December 18, 1979, and March 25, 1980, declaring that the Plan met the requirements of the Clean Air Act; and

"Whereas, The TACB, in compliance with the Clean Air Act and in consultation with the EPA, developed a 1982 Plan for Harris County demonstrating attainment of the Air Quality Standards by 1987, and included in that Plan an Inspection and Maintenance Program for private automobiles, developed after careful analysis and study and tailored to the specific circumstances existing in Harris County, and the Governor submitted that Plan to the EPA on December 9, 1982; and

"Whereas, The EPA on February 3, 1983, despite acknowledging the overall effectiveness of the Plan for demonstrating the attainment of Air Quality Standards and despite acknowledging significant air quality benefits of the State's proposed Inspection and Maintenance Program, proposed to reject the Texas Plan and impose severe sanctions on Harris County because of alleged deficiencies in the Inspection and Maintenance Program for automobiles; and

"Whereas, The EPA also has alleged that certain areas in Dallas, Tarrant, Cameron, Nueces, El Paso, and Harris counties have not achieved the Air Quality Standards for certain pollutants by December 31, 1982, as originally expected, and on February 3, 1983, proposed sanctions for these areas as well, even though the alleged noncompliance occurred without fault of the State of Texas or the TACB and despite full implementation of the approved Plan; and

"Whereas, the EPA has claimed that its actions and the proposed sanctions, which include a ban on new major industrial development and a threat to withhold federal funds from needed air pollution control programs, public highway projects, and possibly sewage treatment works, are required by Congress under the Clean Air Act; and

"Whereas, EPA disapproval and implementation of sanctions will create severe economic disruption to the citizens of the State of Texas including potential increases in unemployment and will do nothing to promote air pollution control or to protect the public health or welfare; now, therefore, be it

"Resolved by the House of Representatives of the State of Texas, the Senate concurring, That the 68th Legislature hereby request the Congress of the United States of America to act to prevent EPA's proposed actions by instructing the EPA or if necessary by amending the Clean Air Act so that:

"(1) states are allowed a reasonable time to implement additional control measures in areas that are found not to meet the Air Quality Standards after December 31, 1982, despite the implementation of an approved Plan;

"(2) states have the flexibility to develop and adopt alternative inspection and maintenance programs for automobiles at their discretion as long as attainment of the Air Quality Standards can otherwise be demonstrated; and

"(3) no sanctions of any kind may be imposed where a state is making good faith efforts to comply with the mandates of the Clean Air Act and is making continued progress toward attainment of Air Quality Standards; and, be it further

"Resolved, That the Texas Secretary of State forward official copies of this resolution to the President of the United States, to the Speaker of the House of Representatives and President of the Senate of the United States Congress, and to all members of the Texas delegation to the Congress, with the request that the resolution be officially entered into the Congressional Record as a memorial to the Congress of the United States of America."

POM-346. A concurrent resolution adopted by the Legislature of the State of Texas; to the Committee on Finance:

"HOUSE CONCURRENT RESOLUTION No. 9

"Whereas, The steel pipe and tube industry provides thousands of jobs in Texas and other states; and

"Whereas, A reliable domestic supply of specialty pipe and tube products, including oil country tubular goods is essential to U.S. energy exploration and production; and

"Whereas, Rapidly increasing imports of steel pipe and tube products are a substantial cause of serious injury to steel pipe and tube producers in Texas and other states; and

Whereas, This injury will be compounded by the diversion of steel imports from the European Community to pipe and tube producers as a result of recently negotiated restrictions on the importation of other types of European steel products; and

Whereas, The provisions of a separate arrangement between the United States and the European Community on the importation of steel pipe and tube products cannot be adequately enforced to prevent such diversion without federal legislation; now, therefore be it

"Resolved by the House of Representatives of the State of Texas, the Senate concurring, That the 68th Legislature hereto respectfully memorialize the Congress of the United States to enact legislation to prevent the unwarranted diversion of European Steel exports to the United States to pipe and tube products empowering the Secretaries of Commerce and the Treasury to enforce the terms of the October 21, 1982, steel pipe and tube arrangement between the United States and the European Community; and, be it further

"Resolved, That a copy of this resolution shall be forwarded by the Texas Secretary of State to the President of the United States, the President of the Senate, and the Speaker of the House of Representatives of the United States Congress, and all members of the Texas delegation to the Congress with the request that this resolution be officially entered into the Congressional Record as a memorial to the Congress of the United States of America."

POM-347. A resolution adopted by the County Board of Supervisors of the County of Fresno, Calif. urging Congress to pass the Wine Equity Bill of 1983; to the Committee on Finance.

POM-348. A petition from a citizen of Concord, N.H. requesting Congress to hold open hearings on the Missing in Action from Vietnam; to the Committee on Foreign Relations.

POM-349. A resolution adopted by the House of Representatives of the State of Illinois; to the Committee on Foreign Relations:

"HOUSE RESOLUTION No. 155

"Whereas, A plastic bullet of the type being used by British Security Forces in Northern Ireland is 3½ inches long and 1½ inches in diameter, weighs nearly 5 ounces and, when fired from a gun, travels toward its target with a muzzle velocity of 160 miles per hour; and

"Whereas, Far beyond simply disbursing mobs, these projectiles produce lethal results, as exemplified by the 1981 toll of the five children and two other persons who died, and the more than 160 others who suffered losses of eyes, multiple fractures and permanent disfigurement after being stuck by the bullets; and

"Whereas, From 1970 to 1980, British Security Forces fired 42,669 plastic bullets and 55,834 rubber bullets at Irish civilians—many of who were children and many of who were not involved in riot situations; and

"Whereas, In August 1981, the International Tribunal of Inquiry, convened by the Association of Legal Justice, concluded that plastic bullets were, indeed, lethal weapons, and on May 13, 1982, the European Parliament voted overwhelmingly to ban the use of plastic bullets in Common Market countries; and

"Whereas, That alternative methods exist for quelling riots is proven by the fact that the British only fire the plastic and rubber bullets into Nationalist crowds, opting for subtler means when dealing with Loyalist disturbances; therefore, be it

"Resolved, by the House of Representatives of the Eighty-Third General Assembly of the State of Illinois, That this house supports the effort currently being made in Congress to ban plastic bullets, and respectfully requests the United States State Department to urge our British allies to cease the use of plastic and rubber bullets against Nationalist civilians in Northern Ireland, and thereby assuage the pointless killing and maiming now taking place in that troubled land; and be it further

"Resolved, That suitable copies of this preamble and resolution shall be presented, respectively, to Secretary of State George Shultz, Vice President George Bush, in his capacity as President of the Senate, Speaker Thomas P. O'Neill and the members of the Illinois Congressional Delegation."

POM-350. A petition from a citizen of Concord, N.H. opposing House Resolution 427, 'the Gay Bill of Rights"; to the Committee on the Judiciary.

POM-351. A joint resolution adopted by the Legislature of the State of California; to the Committee on the Judiciary:

"ASSEMBLY JOINT RESOLUTION No. 37

"Whereas, The carnage and destruction left in California by persons driving motor vehicles while under the influence of alcohol is unacceptable; and

"Whereas, The federal Bankruptcy Act of 1978 does not authorize the discharge of an individual debtor from any debt for willful and malicious injury by the debtor to another entity or to the property of another entity; and

"Whereas, Certain federal courts, in bankruptcy proceedings, have determined that injuries caused by persons driving motor vehicles while under the influence of alcohol

are not willful and malicious injuries for purposes of bankruptcy law; and

"Whereas, The Congress presently is considering legislation to revise certain aspects of bankruptcy law; now therefore, be it

"Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to carefully consider the possibility of amending the bankruptcy law to discontinue the policy of permitting the debts of a person, including a personal injury judgment, resulting from that person's act of driving a motor vehicle while under the influence of alcohol to be discharged in a bankruptcy proceeding; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-352. A joint resolution adopted by the Legislature of the State of Alaska; to the Committee on the Judiciary:

"RESOLUTION

"Whereas the first action of the Alaska Territorial Legislature in 1913 was to give women the right to vote; and

"Whereas in 1972, shortly after the Equal Rights Amendment was passed by the United States Congress, Alaska was among the first states to ratify the proposed amendment; and

"Whereas, effective October 14, 1972, the Constitution of the State of Alaska was amended by a vote of the people to include a provision that no person is to be denied the enjoyment of any civil or political right because of sex; and

"Whereas the 1972 state constitutional amendment guaranteeing the rights of women has already enhanced the ability of all citizens, not just women, to achieve their full potential; and

"Whereas negative results predicted by opponents of the state provision guaranteeing the rights of women have not materialized; and

"Whereas the 1972 constitutional amendment has not presented difficulties but rather has eliminated some long-standing discriminatory practices against women in our state; and

"Whereas the people of a state are free and equal only when all citizens enjoy the same rights; and

"Whereas the people of the State of Alaska wish to have the Congress again propose an Equal Rights Amendment to the states for their consideration; and

"Whereas adoption of this resolution does not minimize the state's support of and belief in traditicnal American family values:

"Be it resolved By the Alaska State Legislature that Congress is respectfully requested to again propose an amendment to the United States Constitution guaranteeing equal rights to all women in our nation.

"Copies of this resolution shall be sent to the Honorable George Bush, Vice-President of the United States and President of the U.S. Senate; the Honorable Thomas P. O'Neill, Jr., Speaker of the U.S. House of Representatives; and to the Honorable Ted Stevens and the Honorable Frank Murkowski, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. 1696. An original bill authorizing three additional Assistant Administrators of the Environmental Protection Agency (Rept. No. 98-196).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. J. Res. 103. Joint resolution to provide for the appointment of Jeannine Smith Clark as a citizen regent of the Board of Regents of the Smithsonian Institution (Rept. No. 98-197).

S. Res. 150. Resolution authorizing the printing of additonal copies of the Joint Committee print entitled "Changing Economics of Agriculture: Challenge and Preparation for the 1980's." (Rept No. 98-198).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 184. An original resolution relating to the Senate page program (Rept No. 98-199).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment and with a preamble:

S. Con. Res. 59. An original concurrent resolution to authorize the Librarian of Congress to study the changing role of the book in the future (Rept No. 98-200).

By Mr. MATHIAS, from the Committee on Rules and Administration, with amendments:

H.R. 3034. A bill to provide for appointment and education of congressional pages, and for other purposes (Rept No. 98-201).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment and with a preamble:

H. Con. Res. 126. Concurrent resolution providing for the commemoration of the 100th anniversary of the birth of Harry S. Truman.

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 186. An original resolution to pay a gratuity to Katherine C. Ahlers.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of commmittee were submitted:

By Mr. TOWER, from the Committee on Armed Services:

Mr. TOWER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: Maj. Gen. Leo Marquez, U.S. Air Force, to be lieutenant general, Vice Adm. Thomas J. Bigley, U.S. Navy (age 55), to be placed on the retired list, Lt. Gen. Richard E. Merkling, U.S. Air Force (age 57), to be placed on the retired list, Maj. Gen. Clarence E. McKnight, Jr., U.S. Army, to be lieutenant general, Lt. Gen. Lynwood E. Clark, U.S. Air Force (age 54), to be placed on the retired list, and Maj. Gen. Bruce K. Brown, U.S. Air Force, to be lieutenant general. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, in addition, in the Air Force there are five permanent promotions to the grade of colonel (list begins with Barry D. Guyse), James E. Cobean to be appointed to the grade of lieutenant colonel in the Air Force, in the Army Reserve there are 347 promotions to the grade of colonel and below (list begins with James P. Batista), in the Navy there are 866 promotions to the grade of commander (list begins with Dianne M. Abruzzo), in the Marine Corps there are 66 permanent appointments to the grade of colonel (list begins with Tommy L. Adair), in the Air Force Reserve there are 12 promotions from the Air National Guard to the grade of lieutenant colonel (list begins with David A. Beasley), in the Air Force Reserve there are 34 appointments to the grade of colonel and below (list begins with Karel B. Absolon), in the Air Force there are five appointments to the grade of second lieutenant (list begins with Scott L. Brummett), in the Army there are 28 appointments to the grade of major and below (list begins with James N. Stearns, Jr.), in the Army there are 12 permanent promotions/appointments to the grade of lieutenant colonel and below (list begins with Larry E. Caylor), in the Army there are six permanent promotions/appointments to the grade of colonel and below (list begins with Stanford W. Hickman), in the Marine Corps there are four permanent appointments to the grade of second lieutenant (list begins with Robert H. Caldwell), in the Naval Reserve there are 451 permanent promotions to the grade of captain (list begins with Gary W. Aaron), and in the Navy there are 1,643 promotions to the grade of lieutenant commander (list begins with Gerald P. Abbott). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of June 27, July 11, July 14, and July 21, 1983, at the end of the Senate proceedings.)

By Mr. ROTH, from the Committee on Governmental Affairs:

James Brian Hyland, of Virginia, to be Inspector General, Department of Labor.

(The above nomination was reported from the Committee on Governmental Affairs with the recommendation that it be confirmed subject to the nominee's commitment to respond to request to appear and testify before any

duly constituted committee of the Senate.)

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

Paul I. Enns, of California, to be a member of the Federal Farm Credit Board, Farm Credit Adminstration for a term expiring March 31, 1989;

Daniel G. Amstutz, of New York, to be a member of the Board of Directors of the Commodity Credit Corporation; and

Joseph Alison Kyser, of Alabama, to be a member of the Federal Farm Credit Board, Farm Credit Administration, for a term expiring March 31, 1989.

(The above nominations were reported from the Committee on Agriculture, Nutrition, and Forestry with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. MATHIAS, from the Committee on Rules and Adminstration:

Joan D. Aikens, of Pennsylvania, to be a member of the Federal Election Commission for a term expiring April 30, 1989; and

John Warren McGarry, of Massachusetts, to be a member of the Federal Election Commission for a term expiring April 30, 1989 (Exec. Rept. No. 98-17)

(The above nominations were reported from the Committee on Rules and Administration with the recommendation that they be confirmed subject to the nominees' commitment to respond to request to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mrs. KASSEBAUM:

S. 1693. A bill to amend the International Aviation Facilities Act in order to insure the continued preeminence of the U.S. air safety leadership role in the world and, in furtherance thereof, to facilitate and promote the sale of U.S. manufactured aerospace products in world commerce, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. LAXALT (for himself and Mr. HECHT):

S. 1694. A bill to declare that the United States holds certain lands in trust for the Las Vega Paiute Tribe; to the Select Committee on Indian Affairs.

By Mr. CRANSTON (for himself, Mr. HECHT, Mr. LAXALT, Mr. SIMPSON, and Mr. ZORINSKY):

S. 1695. A bill to amend the National Trails System Act by authorizing for study the Pony Express Trail under the provisions of the act; to the Committee on Energy and Natural Resources.

By Mr. STAFFORD:

S. 1696. An original bill authorizing three additional Assistant Administrators of the Environmental Protection Agency; from the Committee on Environment and Public Works; placed on the calendar.

By Mr. HOLLINGS:

S. 1697. A bill to amend the Military Service Act to provide for the reinstitution of the registration and classification of persons under such act and to reinstate the authority of the President to induct persons involuntarily into the Armed Forces, and for other purposes; to the Committee on Armed Services.

By Mr. WILSON (for himself and Mr. CRANSTON):

S. 1698. a bill to amend the Internal Revenue Code of 1954 to provide an alternative method of allocation of property taxes for cooperative housing corporations; to the Committee on Finance.

By Mr. DOLE (for himself, Mr. DOMENICI, Mr. DURENBERGER, Mr. D'AMATO, Mr. JEPSEN, Mr. MATSUNAGA, and Mr. BAUCUS):

S. 1699. A bill to amend title XVIII of the Social Security Act to provide medicare coverage of hepatitis B vaccine for vaccine for end stage renal disease patients; to the Committee on Finance.

By Mrs. HAWKINS:

S. 1700. A bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to provide greater protection to spouses under private pension plans, and to amend such Code to repeal the earned income limitation on the deduction for retirement savings, to establish displaced homemakers as a targeted group for the purposes of computing credit for employment of certain new employees, and to provide a credit for household and dependent care services for individuals performing substantial volunteer services; to the Committee on Finance.

By Mr. McCLURE (for himself, Mr. JACKSON, Mr. BAUCUS, Mr. GORTON, and Mr. SYMNMS):

S. 1701. A bill to impose specific directions on the Bonneville Power Administration; to the Committee on Energy and Natural Resources.

By Mr. DOLE:

S. 1702. A bill to amend the Hostage Relief Act of 1980 to give the provisions of such Act permanent effect, and for other purposes; to the Committee on Finance.

By Mr. JEPSEN:

S. 1703. A bill to require the Commodity Credit Corporation to accept under certain conditions during fiscal years 1984, and 1985 offers to exchange needed strategic and critical materials for surplus dairy stocks; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. ROTH (for himself, Mr. CHAFEE, and Mr. INOUYE):

S. 1704. A bill to encourage the expansion of the international trade in services, and for other purposes; to the Committee on Finance.

By Mr. MOYNIHAN (for himself, Mr. D'AMATO):

S. 1705. A bill to modify Federal land acquisition and disposal policies carried out with respect to Fire Island National Seashore, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. RIEGLE (for himself and Mr. KENNEDY):

S.J. Res. 137. Joint resolution to designate April 7, 1984, as "World Health Day"; to the Committee on the Judiciary.

By Mr. ZORINSKY:

S.J. Res. 138. A joint resolution to establish a Commission on Teacher Education; to the Committee on Labor and Human Resources.

By Mr. MOYNIHAN (for himself, Mr. D'AMATO, and Mr. BAKER):

S.J. Res. 139. A joint resolution to commemorate the centennial of Eleanor Roosevelt's birth; to the Committee on Energy and Natural Resources.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MATHIAS:

S. Res. 184. An original resolution relating to the Senate page program; from the Committee on Rules and Administration; placed on the calendar.

By Mr. DENTON (for himself, Mr. DECONCINI, and Mr. HATCH):

S. Res. 185. A resolution establishing a temporary Special Committee on the Family, Youth and Children; to the Committee on Rules and Administration.

By Mr. MATHIAS:

S. Res. 186. An original resolution to pay a gratuity to Katherine C. Ahlers; from the Committee on Rules and Administration; placed on the calendar.

S. Con. Res. 59. An original concurrent resolution to authorize the Librarian of Congress to study the changing role of the book in the future; from the Committee on Rules and Administration; placed on the calendar.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mrs. KASSEBAUM:

S. 1693. A bill to amend the International Aviation Facilities Act in order to insure the continued preeminence of the United States' air safety leadership role in the world and, in furtherance thereof, to facilitate and promote the sale of U.S. manufactured aerospace products in world commerce, and for other purposes; to the Committee on Commerce, Science, and Transportation.

UNITED STATES INTERNATIONAL AVIATION SUPPORT ACT OF 1983

Mrs. KASSEBAUM. Mr. President, today I am introducing legislation to enhance the international aviation programs of the Federal Aviation Administration (FAA). This legislation has been drafted in response to the growing concern of both Government and aerospace industry leaders about the ability of American aviation manufacturers to meet the challenge of foreign, government-subsidized competition.

The importance of sustaining the U.S. share of the world market for aviation products is self-evident in the fact that foreign sales of aircraft, engines, radars, computers, communication equipment, and engineering/design services has been, and still is the biggest single source of foreign exchange next to agricultural products.

Until recently, the United States enjoyed a near 90-percent share of the world aviation market. However, the traditional leadership of the United States in this area is now under seri-

ous challenge. The competitors are primarily located in Europe—large, State-assisted aerospace manufacturers—who, with considerable financial help from their governments for both developmental costs and purchase financing, have been able to market technically respectable products and services. Similar trends are in incipient stages in other parts of the world. The FAA can be a legitimate vehicle to support U.S. industry.

Traditionally, the FAA has set the standard for aviation safety regulation the world over. FAA certificates of all kinds have been literally prized throughout the world. Countries seeking to setup or enhance their air traffic control systems have wanted to know how we do it. Foreign airlines have sought FAA-certificated aircraft, pilots and repair stations because they know that if it is done according to the FAA book it is done right and that their flights will be safe and reliable. Moreover, once they establish such systems, they have asked us to assure that they continue to operate in concert with our standards. A current example of this desire to be a part of the FAA System emanates from Saudi Arabia, where the national airline has insisted that FAA regulatory practices govern their flight operations.

In addition to enhancing the safety and reliability of international aviation, this reliance on American regulatory standards has important ancillary benefits for U.S. manufacturers.

The reliance on American standards encourages and supports the use of American manufactured planes, parts, and related services. Foreign manufacturers seek American partners for their new projects, not only to spread the financial risk but also because they know the Americans, whose products must always meet FAA's high standards, know how to build safe and reliable airplanes.

Foreign aviation regulatory authorities are actively assisting their local aerospace industries in efforts to secure contracts the world over. Present legislation does not give FAA the freedom to act in behalf of U.S. firms, and provides no funds for such support.

In France, Sofereavia-Societe Francais d'Estudes et de Realisations d'Equipment Aeronautiques and the Aeroport de Paris are working hard to develop overseas markets for French exporters of aviation infrastructure equipment and services.

The range of Sofereavia's services is considerable, including feasibility studies and aviation system plans, turnkey contracts, flight inspection, and training of foreign nationals. Seventeen field offices support the provision of these services to 33 countries. The Aeroport de Paris is conducting similar technical cooperation programs in 11 countries.

Recently, Great Britain, witnessing the success of such programs in France, has instituted a similar approach to worldwide sales. The United Kingdom Department of Trade has helped to form a consortium of airport and airways equipment manufacturers to enhance the potential for export sales. The British consortium just announced its first contract—a $26 million order from Brazil for air traffic control equipment to be used on airports at Sao Paulo and Belo Horizante.

As in the Sofreavia-Aeroport de Paris examples, the Government is involved not only from the organizational standpoint but also in the crucial area of financing. Much of the financing for the Brazilian deal is covered by the U.S. Export Credits Guarantee Department and placed by the Lazard Brothers of London. As a result, the project will be financed over 10 years at a 7.75-percent interest rate—slightly over half of current U.S. prime.

The United States International Aviation Support Act of 1983 responds to these challenges. However, the challenges contemplated by the act do not constitute a significant change in American aviation policy. Federal law has always directed the Administrator of the FAA and its predecessor agencies to foster and promote civil aviation both domestically and internationally. Nor does it institute a program of heavy handed governmental intrusion, whether by regulation or subsidy, into the private sector. What it does do is provide the authority to the Secretary of Transportation to expand existing programs and create new ones which entail cooperative efforts between FAA and the U.S. firms seeking markets abroad. Further, it provides the Secretary with additional authority to meet the continuing demand for FAA technical assistance, thereby insuring that the FAA's worldwide regulatory preeminence is maintained. Finally, the legislation creates a funding mechanism whereby the beneficiaries of the international aviation programs will help support them, so the bill entails minimal new costs for the Government.

I am also submitting a detailed section-by-section analysis for the record specifying the legislative changes designed to meet these goals, and I ask unanimous consent that it be printed in the RECORD.

I hope my colleagues will agree that this legislation represents an important step in addressing the challenge to American aviation leadership and will work with me to seek its early enactment.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows;

SECTION-BY-SECTION ANALYSIS—THE UNITED STATES INTERNATIONAL AVIATION SUPPORT ACT OF 1983

SECTION 1

Provides that the Act may be cited as the "United States International Aviation Support Act of 1983."

SECTION 2

Provides a declaration of policy designed to assure the Administrator that agency programs undertaken to "foster and promote" are consistent with Congressional intent. Furthermore, the language is designed to reinforce the concept that such activities are not inconsistent with the agency's safety responsibilities nor existing trade and economic policy. All in all, the language is meant to convey the concept that a policy of "foster and promote" programs is not a new program, but rather is a reaffirmation of long-standing Congressional guidance. The importance of this proposal is that an undated approach to the challenge of increased competition is needed, and that we undertake these programs cognizant of our traditional policies and values, i.e., free trade and minimal government intrusion into the affairs of business.

SECTION 3

This section is meant to augment general authorities granted the Administrator through the Secretary under Section 303 of the Federal Aviation Act. It again reaffirms that the Administrator's actions are to be consistent with existing law and also "United States Foreign Policy Goals". This reference is intended to reinforce the long tradition of cooperation between the State Department and the FAA in the conduct of FAA international programs.

Subsection (1) authorizes the Secretary to add to the effectiveness of the FAA's technical assistance programs to foreign regulatory authorities, and to continue to provide FAA certificates to qualified non-U.S. citizens and facilities. This is designed to provide clear authority to expand such activities through, for example, the commitment of additional personnel and resources. By so doing, the agency will be in a better position to support U.S. products abroad.

Subsection (2) provides explicit authority for the Secretary to expand existing programs and institute new ones designed to assist U.S. firms in their efforts to export aerospace products and services. Subparagraphs (A), (B), and (D) suggest specific, but not exclusive ways in which to accomplish this goal.

Subparagraph (A) authorizes the Secretary to invite the active participation of U.S. firms in the agency's technical assistance programs with foreign governments. Activities contemplated under this subparagraph would include cooperative FAA-U.S. industry efforts to provide a full range of consultative and management services to requesting foreign aviation authorities.

Subparagraph (B) allows the Secretary to actively assist U.S. firms in their efforts to successfully bid on foreign projects. Such assistance could range from consultations regarding the appropriate personnel to contact in the foreign government or aviation concerns to technical assistance in the preparation of bids.

Subparagraph (C) allows the agency to continue, if the parties so desire, to play a role in the execution of a contract entered into between U.S. firms and a foreign government. For example, the FAA could, under this provision, agree to provide con-

tinuing regulatory oversight over a foreign operator of U.S. aircraft or air trafic control equipment.

Subparagraph (D) authorizes the Secretary to assist U.S. firms in developing training programs designed to enhance foreign sales. It is contemplated that such activities might include the provision of FAA personnel for training seminars or the provision of appropriate FAA studies which would be relevant to such efforts.

Subsection (b) provides explicit authority to allow the Secretary to establish such regulations as are necessary to carry out the policy and provisions of the Act.

SECTION 4

Amends certain provisions of the International Aviation Facilities Act in order to carry out the goals of the United States International Aviation Support Act of 1983.

Subsection (a) amends Section (5) of the International Aviation Facilities Act. This is the section of current law that allows the Secretary to accept payment for technical assistance and other international activities.

The amendments change current law in two basic ways.

First, the scope of the activities for which the Secretary can receive payments is broadened to include those new activities which are contemplated by the United States International Aviation Support Act of 1983. Further, the amendment allows Secretary to receive payment from "persons," thereby allowing him to charge private firms both foreign and domestic for international activities undertaken pursuant to this Act. The Secretary is also authorized, if he so finds, to provide services on a non-reimbursable basis or on a recovery of expense basis. This would permit assistance to U.S. firms in endeavors which exclusively would benefit that company if the manufacturer seeks the assistance of the FAA where such manufacturer is encountering competition from foreign manufacturers which are directly or indirectly supported by the foreign govenment. The amendment explicitly refers to activities undertaken pursuant to Section (3)(a)(2) of the Act, therefore contemplating that the cost of FAA international assistance programs aimed at enhancing U.S. sales opportunities abroad could be reimbursed by the beneficiaries of those efforts.

Secondly, the amendment defines the term "funds" (subparagraph (2)) in such a way as to include the provision of "in kind services" incident to the activities undertaken pursuant to this Act. This would allow FAA personnel to accept meals and lodging in the course of their duties undertaken pursuant to this Act. As the policy statements in Section 2 make clear, these activities are not seen to be in conflict with the safety regulatory mission of the FAA. Therefore the acceptance of such "in kind" services would not constitute an improper conflict or appearance of a conflict of interest on the part of those employees who were authorized to accept them.

This provision of law has always been permissive, i.e., the Secretary has never been required to charge for such services. The amendment does not change this policy. Indeed, subparagraph (3) is included to underscore the fact that in certain cases where the Secretary determines that the interests of safety and the prospects for the sale of U.S. firms would be enhanced by the activity, but payment is not feasible, then it need not be required.

Subsection (b) amends Section 11 of the International Aviation Facilities Act to include, in the protections of that section, any operators of U.S. registered aircraft. Current law applies only to air carriers. Thus, business or other privately owned aircraft which are discriminated against could avail themselves of the protections in Section 11.

Subsection (c) adds a new definition to the International Aviation Facilities Act, that of a "person." This, in turn, serves to clarify the amendments to Section 5, which, as discussed above, would allow the Secretary to accept payment from "persons." The Definition is patterned after that in the Federal Aviation Act.

SECTION 5

This section permits the FAA Administrator to establish an exchange of persons program with foreign aviation authorities and aerospace industries. It is a two-way street which will improve understanding and rapport in the international aviation community. Through the marketing of the competence of our systems, we will be selling foreign governments the quality of the U.S. products which support them.

SECTION 6

Creates a special fund in the U.S. Treasury to finance the activities undertaken pursuant to its provisions. The provision is patterned after the legislation creating the Airport and Airway Trust Fund.

Subsection (b) provides that funds received under the International Aviation Facilities Act (and therefore any funds received under activities undertaken pursuant to this Act) are to be deposited in the fund. This replaces existing language in Section 5 which provides that such funds are to be credited against current appropriations.

Subsection (c) allows the Secretary of State to make contributions to the fund from foreign assistance funds when he believes they may be utilized to carry out projects which would further the foreign policy goals of the United States. The provision allows the Secretary of State, in making such transfers, to require that they be spent on specific projects. Provision is also made to transfer some or all of the funds received in landing fees at the two Federally operated airports to the fund.

Subsection (d) modifies Section 45 of the Airline Deregulation Act to accommodate changes made in existing law by this Act. It is not intended to alter the current prohibition against charges for domestic certification activities but provides for deposit of funds received by the FAA certification services provided outside the United States in connection with airman, aircraft and air agencies.

Subsection (e) authorizes the acceptance and deposit of funds of private contributions given to further the purposes of the Act.

Subsection (f) provides that funds not needed to meet current withdrawals shall be invested. The language describing the types of investments that are permitted, subsection (g) regarding the sale of obligations and (h) regarding the deposit of interest to the fund track similar provisions regarding the Airport and Airways Trust Fund and are intended to have the same import as those provisions. (*See* section 208 of the Airport and Airways Revenue Act of 1970.)

Subsection (i) provides the authority for the Secretary of Transportation to make expenditures from the fund necessary to carry out the purposes of the Act, including salaries and related expenses.

By Mr. LAXALT (for himself and Mr. HECHT):

S. 1694. A bill to declare that the United States holds certain lands in trust for the Las Vegas Paiute Tribe; to the Select Committee on Indian Affairs.

LAS VEGAS PAIUTE TRIBE LANDS TRUST

● Mr. LAXALT. Mr. President, I introduce for appropriate reference a bill to transfer in trust to the Las Vegas Paiute Tribe some 3,840 acres of public domain lands in Nevada. I am joined by my distinguished colleague, Senator HECHT, in proposing this bill.

The Las Vegas Paiute Tribe needs an additional land base on which to provide for the future economic development of the tribe and for the housing and community service needs of its members.

The tribe has undertaken an ambitious and far-sighted planning effort for the future. However, its economic and development goals cannot be met within the confines of the present small 12½-acre colony area. The tribe, with the assistance of the Bureau of Indian Affairs, sometime back determined that a vacant tract of the public domain located northwest of Las Vegas, and comprising some 3,840 acres, would facilitate the tribe's efforts. That land is the subject of this bill.

I have been impressed by the ambitious and determined efforts of the tribe's leadership to provide economic opportunities, maintain the tribe's cultural and spiritual heritage, and provide for the housing and social services of its members. It is appropriate that the Federal Government, under its long-held trust responsibility to Indians, assist Indian communities where it can do so consistent with its responsibilities to the Nation.

The tribe has diligently worked to justify the transfer by submitting an overall plan for the land. It has worked closely with local and county governments and with all private parites with an interest in the land to insure that the tribe's goals are understood. There is a unanimity of support among the parties for this effort. All existing rights will be protected. The unanimity of local and State support for the tribe in this proposal has been most encouraging.

The land involved is part of the aboriginal lands occupied by the Paiutes prior to the coming of settlers and has historic and spiritual significance to tribal members.

The Congress can facilitate a worthy public purpose by giving the tribe an opportunity for growth through self-reliance and the development of the talents of its members through this legislation.●

By Mr. CRANSTON (for himself, Mr. HECHT, Mr. SIMPSON, and Mr. LAXALT):

S. 1695. A bill to amend the National Trails System Act by authorizing for study the Pony Express Trail under the provisions of the act; to the Committee on Energy and Natural Resources.

PONY EXPRESS TRAIL

Mr. CRANSTON. Mr. President, I introduce for appropriate reference a bill to authorize a study of the Pony Express Trail for possible inclusion in the national trails system.

The Pony Express represents an important segment in the development of our Nation. It was the first rapid transit and the first fast mail line across the continent from the Missouri River to the Pacific coast. The Pony Express, furthermore, is one of the best known symbols of courage, enterprise and the conviction that anything is possible when it is for the common good. The service provided by the Pony Express was instrumental in binding our young country together, in linking the far West to the more populous East at a time when overland travel was slow and cumbersome and when the impending Civil War made the rapid communication of news between these sections a necessity.

There were 190 stations spaced some 15 miles apart with 400 horses, as many stationmen and assistants, and approximately 80 riders served the Pony Express. It was like a giant relay. At each station the riders were given 2 minutes in which to transfer the saddlebags to fresh ponies and be on their way again. After riding a certain distance, one rider would hand the mail over to another and so on until the destination was reached. This relay continued day and night during both summer and winter through some of the wildest regions of the country.

The Pony Express Trail extended from St. Joseph, Mo., to Sacramento, Calif. In general, the route followed the well-known California-Oregon Trail by way of Fort Kearny and Scottsbluff (Nebraska); Fort Laramie, South Pass, and Fort Bridger (Wyoming); and Salt Lake City (Utah). From there the trail went around the southern end of the Great Salt Lake, by way of Fort Churchill and Carson City (Nevada), and Placerville to Sacramento (California).

The 22-day delivery time of the previous overland mail route was cut virtually in half by the Pony Express. Initially, its delivery schedule was set at 10 days for 8 months of the year and 12 days during the winter season. These times soon were lowered to 8 and 10 days respectively. An average speed of 10 miles, including stops, had to be maintained on the summer schedule. In the winter a speed of 8 miles an hour was sustained despite deep snows. The best record set by the Pony Express was in delivering a copy of President Lincoln's inaugural address across the country in March 1861. Lincoln's speech arrived in Sacramento, Calif., from St. Joseph, Mo.—a distance of 1,966 miles—in just 7 days and 17 hours.

Nonetheless, actual mail service via the Pony Express lasted a brief 19 months. Yet that period from April 3, 1860, when the first mail pouch and rider left St. Joseph, Mo. to October 24, 1861, when the Pony Express was officially ended, represents one of the most colorful episodes in American history. Certainly the deep impression the Pony Express made on the times belies its short duration. It marked the highest advancement in overland travel to its time and made clear that a central route across the continent would expedite the carrying of the mail to the west coast.

Over the years the progression of our postal service has been a vital force in the evolution of our country. This service followed the covered wagons with means of communication that maintained the early settlers' contacts with the families and friends they had left behind. It has been said that without this postal service, the development of the West may have been delayed for many years. The discovery of gold in California fueled the West's demand for rapid communication with the East, a demand that was intolerable of slow convoys or ships and that could not wait for railroad construction or the extension of the telegraph.

The Pony Express, however, proved the feasibility of a transcontinental railroad and paved the way for the first such rail to span the country 9 years later. The Pony Express demonstrated that such a line could be built and operated year round—a feat previously regarded as impossible. Not surprisingly, completion of the transcontinental telegraphic line long preceded the cross-country railroad. On October 24, 1861, it was the telegraph that escorted the Pony Express formally out of existence. On that date, the two telegraphic lines being built across the continent—one from Missouri and one from California—were joined. Messages could be sent from coast to coast and the need for the Pony Express no longer existed.

As the humming telegraph wires and roaring railroad took over its task, the Pony Express passed into legend. Nonetheless, it continues to be an exciting chapter in the Nation's history. The operation of the Pony Express was a supreme achievement of physical endurance on the part of men and their horses. Its history is truly a tribute to American courage and American organizing genius. The romance, courage, endurance, and individual exploits which the routine operations of the Pony Express involved, along with its relationship to issues of nationwide importance, make it well worth remembering. In view of its well-established historical and cultural values, Mr. President, I believe the Pony Express route merits study to determine the suitability and feasibility of its designation as a national historic trail and inclusion in the National Trails System.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1695

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 5 (c) of the National Trails System Act is amended be adding at the end thereof the following: "( ) Pony Express Trail, extending from St. Joseph, Missouri through Nebraska, Wyoming, Utah and Nevada to Sacramento, California.

By Mr. HOLLINGS:

S. 1697. A bill to amend the Military Selective Service Act to provide for the reinstitution of the registration and classification of persons under such act and to reinstate the authority of the President to induct persons involuntarily into the Armed Forces, and for other purposes; to the Committee on Armed Services.

REINSTITUTION OF THE DRAFT

Mr. HOLLINGS. Mr. President, I rise today to introduce legislation reinstituting the military draft. We need the draft for many reasons—most importantly, we need it in order to remain true to the ideals which built this country.

President Reagan and Defense Secretary Weinberger may cite the success of the All-Volunteer Force in reaching all of DOD's recruiting objectives. I do not for 1 minute think that the American public and our military leaders are fooled by such statistical gimmicks. We are in a recession, and our young people need jobs. It is that simple. There is over 20 percent unemployment of our young people—it is over 50 percent for young blacks—where else can these people turn? The AVF is the employer of last resort. If the economy improves—the military will no longer be able to compete with private industry and higher education for the young.

The AVF is a product of the Vietnam mindset. Early in the 1970's, with America's morale sapped by our involvement in Vietnam, everyone wanted the easy way for America to defend itself without personal sacrifice. So we instituted the Volunteer Army, and with that problem moved beyond arm's length, we put the whole defense problem beyond arm's length. That Volunteer Army which no longer touches every neighborhood is forgot-

ten in appropriations and removed from everyday life in America as far as most citizens are concerned.

That attitude must change. I continually warned my colleagues when the AVF was begun in 1973 that the proposed AVF would only institutionalize the inequities of the draft—inequities which could have been remedied with much less dislocation. Specifically, the poor, the black, and the disadvantaged who fought in Vietnam would constitute the bulk of the Volunteer Force. This is precisely what happened, and it goes on today. Many Members of the Senate will chastise me for these remarks. They will speak proudly of how well the AVF works, that it draws from all walks of life. They do not fool me with their comments. They should not fool themselves. The decision of 1973 insured that our Nation's defense burden would rest with the poor, the black, and the disadvantaged for years to come. And without a cross-section of representation, we have no cross-section of support. Rather than an equal call on all, we perpetuated the rich man's undemocratic lie: "We will pay for it."

The fact is we can never pay it. We can appropriate to cure the pay deficiencies, as we did with the large pay and benefits packages of recent years, but the fact is these were only halfway measures that did not address our long-term needs. On one end we have the equivalent of a military Job Corps—fertilely bred by a failed Reagan economic program. On the other end, we have commissioned officers who take home paychecks larger than those of a U.S. Senator.

There are those who point out that in times like today, with unemployment high and the economy sluggish, we will meet our manpower requirements. I say it is a sad commentary when we have to bank on a recession in the economy to man America's fighting forces. Even bigger problems are just around the corner, for all the demographic indicators warn that the pool of 17- to 21-year-old males—the largest grouping of potential recruits—is going to fall off sharply. The baby boom is history, and the prognosis is for a rapidly shrinking recruiting pot. In 1980, there were approximately 11 million males in the 17- to 21-year-old category. By 1990, this group is projected to total less than 9 million.

In 1980, the AVF was attempting to recruit one of five males 17 to 21 years old. By 1993, it is estimated that the AVF must get one of two in this age group due to the competition from an improved economy and when higher education is once again within the economic means of most young people.

Mr. President, how will we meet such demanding goals? One out of two. You and I both know that answer. It is money. We will once again be on the treadmill of escalating pay and benefits for our troops while diminishing arms for our troops and lessening our capability to defend ourselves.

The quality of recent volunteers in the Army is a matter of grave concern. Fewer Army recruits in recent years have demonstrated reading skills above the eighth grade level. And this is after we have required a larger number of high school graduates. This is especially disconcerting because the military's technical operations and complex equipment demand greater skill and judgment of our servicemen. If we fail to face up to the quality problem today, we will depend more and more on less educated soldiers to carry the weight of our conventional military force tomorrow.

The all-volunteer approach has been a failure. It has failed to provide the necessary number of combat troops. It has failed to provide a quality defense force. And we have failed as a people to fairly and equitably distribute the burden of our national defense. Our volunteer forces are sadly unrepresentative of the society they serve. Over one-quarter of all new recruits are black—double their proportion in the population. The number of other minorities, especially Hispanics, is growing. The minority soldiers are overrepresented in combat formations such as tank, artillery, and infantry outfits, raising the specter of disproportionate casualties among minorities in wartime. And, more than a racial problem, it is a class problem. For even the white recruits are drawn from the poorer and less educated segments of society.

The cross-section approach of an equitable draft solves this problem. The burden would be shared by all. Exemptions can and must be kept to a minimum. Just prior to the institution of the All-Volunteer Force, and in response to the inequitable deferment and exemption standards which had been in place, we tightened eligibility standards and greatly limited deferments and exemptions. Under the proposal I am introducing today, we would observe those necessary and tightened standards. Specifically, deferments and exemptions would be limited to: First, persons on active duty, in the Reserves, or in advanced ROTC study; second, surviving sons or brothers of those killed in war or missing in action; third, conscientious objectors and ministers; fourth, professions necessary to national health, like doctors; fifth, judges of courts of record and elected officials; and sixth, for students, short-term postponements of their military obligation. Those in high school could be deferred until they graduate, but in no case extending beyond age 20. And those in college could continue studying until the end of the semester or, if in their senior year, until the end of that school year. We all share the benefits of life in America; under my plan, we insure that we all help shoulder the burden of defending it.

The cost, the concept, the civil wrong of a volunteer army are bad enough, but more than anything, it has required a civilianization. That process can keep the army content and happy in peacetime, but in war it fairly well guarantees that the soldier will not fight. Anyone who has ever served in war realizes that the motivation to kill, to defend, to advance, to hold an untenable spot all springs from a unit loyalty—a loyalty developed from working together, playing together, training together, staying together and sacrificing together. It is an inner discipline; it is a developed pride for the organization that you are a part of. But to give the Volunteer Army appearances of success and harmony, civilianization has taken over. Soldiers stay off camp or fort with their wives, weekends are off with their families, promotions are made with little regard to merit, and the commander that breaks down his barracks and finds drugs can only turn in the drugs and not the man because civilian law has taken over and a warrant is required. Turning the Army into a microcosm of the office down the street does not suffice. The kind of camaraderie needed to weld an effective fighting force cannot flourish in an atmosphere where the military is a part-time chore. Defending America is not a 9 to 5 job.

In fairness to ourselves as a people, we need the draft—a universal draft, not the kind with all the exemptions that caused so much bitterness during Vietnam—a draft that would reflect the true character of America's greatness. We must provide for the reinstitution of registration and classification and for the reinstatement of the President's authority to induct individuals. We cannot respond to crises around the world unless our forces are significantly improved. The Joint Chiefs tell us so.

Conscience tells us that we need a cross-section of America in our Armed Forces. Defense is everybody's business. It is everybody's responsibility. Even if we had the money to make the All-Volunteer Army work, a professional army is un-American. It is an anathema to a democratic republic—a glaring civil wrong. Not until it makes an equal call on rich and poor alike, educated and uneducated, white and black, will it be a true reflection of us as a people. America benefits when serving alongside the high school dropout is the Harvard graduate who goes on to win the Navy Cross. A free society defended by the least free is a dangerous contradiction.

The great need of the hour is not so much planes and tanks, pilots and sol-

diers, and military power. The great need for America in foreign policy is willpower. We lack credibility. Even since Vietnam, we have receded and withdrawn, refusing to commit. The lesson should have been learned by now that a President's commitment counts for little unless it reflects the commitment of the people.

The direction of our foreign policy, the power of our newest weaponry, and the number of dollars in the defense budget are meaningless unless we, as a people, are committed to the task of protecting a nation and aiding our allies—allies who by and large do maintain systems of military conscription.

From all of these standpoints then, Mr. President, the lack of military cohesiveness, extravagant cost, and primarily the unequal sharing of equal responsibilities—America needs the draft.

We should listen to the words once again of John F. Kennedy—"Ask not what your country can do for you: Ask what you can do for your country." Mr. President, there is no painless way that we can provide for the defense of freedom.●

By Mr. WILSON (for himself and Mr. CRANSTON):

S. 1698. A bill to amend the Internal Revenue Code of 1954 to provide an alternative method of allocation of property taxes for cooperative housing corporations; to the Committee on Finance.

CO-OP PROPERTY TAX EQUITY ACT

Mr. WILSON. Mr. President, along with my colleague from California, Senator CRANSTON, I am today introducing the Co-op Property Tax Equity Act, S. 1698. This bill would provide for fair and equitable taxation of owners of co-op housing.

A co-op, technically a "cooperative housing corporation," is similar to a condominium arrangement, but each resident does not own his own unit. Instead, each resident owns shares of stock in a corporation that owns the building. The current law, section 216 of the Internal Revenue Code, allocates the property tax deductions in proportion to each resident's stockholding interest in the corporation.

Before the adoption in California of a limitation on property taxes—proposition 13—this method allocated to each resident the amount of property tax actually assessed and paid on his or her unit. Proposition 13, however, freezes property tax assessments until a unit is sold and then requires the new owner to pay the full amount of the increased assessment. As currently written, section 216 splits up the deduction, including the increased assessment, on an equal, per share basis, among all the residents, including those whose assessments have not changed. As a result, some of the residents get a greater tax deduction than they should—and others less than they deserve.

The legislation I am introducing today would revise section 216 so that if a State law requires that the real property tax be allocated other than on the basis of the shareholding interests of each resident of a co-op, each resident would be entitled to deduct exactly as much real estate tax as he or she actually pays.

Mr. President, the bill I am introducing does not place any drain on the Federal Treasury. The fiscal impact is zero. Under present law, some people are getting too great a deduction for Federal income tax purposes, while others are getting too small a deduction. This legislation would merely reallocate these deductions for property taxes, while the aggregate would remain the same.

Mr. President, my bill is straighforward, noncontroversial, and cost-free to the Federal Government, and I hope that the Finance Committee will soon give it consideration.

By Mr. DOLE (for himself, Mr. DOMENICI, Mr. DURENBERGER, Mr. D'AMATO, and Mr. JEPSEN):

S. 1699. A bill to amend title XVIII of the Social Security Act to provide medicare coverage to hepatitis B vaccine for end stage rental disease patients; to the Committee on Finance.

COVERAGE OF HEPATITIS B VACCINE

● Mr. DOLE. Mr. President, the bill we introduce today would permit medicare coverage of vaccinations for hepatitis B for end stage renal disease (ESRD) patients. These patients, the majority of whom rely on hemodialysis for their survival, are at high risk of contracting the hepatitis B virus because of the nature of the treatment for their condition. This virus is transmitted primarily by contact with infected blood and blood products. Consequently, the populations most at risk include patients who receive blood or blood products. Although many dialysis patients will not become seriously ill with hepatitis, a significant number of them become permanent carriers of the virus, exposing their therapists and fellow patients to infection. The cases of clinically significant hepatitis B infections which do occur in dialysis patients result in prolonged illness, expensive hospitalizations, and death.

INCIDENCE OF HEPATITIS B VIRUS

According to the centers for disease control (CDC), about 200,000 people are infected with the hepatitis B virus each year, resulting in over 10,000 hospitalizations and 250 deaths. Moreover, many of those infected become carriers of the disease and develop chronic active hepatitis. Information provided by the CDC indicates that about 4,000 people die each year from hepatitis B related cirrhosis and more than 800 die from hepatitis B related liver cancer.

CURRENT COVERAGE LIMITATIONS

At present, end stage renal disease patients, because of their high risk of exposure to the hepatitis B virus, are monitored through monthly blood tests to screen for the virus. These tests are covered and paid for under the medicare program. However, the vaccine used to immunize people against the virus is not covered.

The availability of a safe, efficacious hepatitis B vaccine means that not only can the costs of monthly monitoring and hospitalization be avoided, but more importantly, the incidence of morbidity and mortality for high risk patients can be reduced. The vaccine is administered in three doses over a period of 6 months and has been shown to be effective in producing immunity in about 90 percent of those tested to date. The effectiveness rate for ESRD patients may be lower, and may vary inversely with age, but will probably still be in the range of 75 to 80 percent. Researchers believe the vaccine provides protection for at least 3 years.

The vaccine would cost about $215 to administer to each patient. Therefore, the cost during the first year of vaccinating the existing population of dialysis patients covered by medicare would exceed the cost savings derived from foregoing frequent blood tests. The Congressional Budget Office estimates a first year net cost of $2.2 million. However, in subsequent years the cost of vaccinating those continuing in the program and the approximately 20,000 new end stage renal disease patients entering the program each year would be greatly outweighed by the savings resulting from the reduced need for monthly monitoring and for the treatment of those contracting the virus. CBO estimates savings in the second year of $1.5 million and net savings over 5 years of $7.2 million.

CONCLUSION

Mr. President, the hazard of hepatitis B virus is especially high for ESRD patients. Medicare coverage of a vaccine which provides for safe and effective immunization can have a significant impact on the quality of life and general health status of ESRD patients. If program costs can be reduced in the process, all the better.●

By Mrs. HAWKINS:

S. 1700. A bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to provide greater protection to spouses under private pension plans, and to amend such code to repeal the earned income limitation on the deduction for retirement savings, to establish displaced homemakers as a targeted group for the purposes of computing credit for employment of

certain new employees, and to provide a credit for household and dependent-care services for individuals performing substantial volunteer services; to the Committee on Finance.

ECONOMIC PARITY ACT

● Mrs. HAWKINS. Mr. President, sometimes I wonder how many women survive in this day and age. I wonder how they make ends meet, considering the grievous inequities in earning power, the puny size of their pensions, the dearth of day-care benefits, and the tragic deficiencies of current child-support laws. Sometimes I wonder that if women could earn at least as much as men, these inequities would not seem so drastic and truly life threatening. Since it is not really my job to wonder why but to do something about these inequities, today I am introducing legislation entitled the Economic Parity Act, identical to H.R. 3554 introduced by my distinguished colleague from Florida, Representative TOM LEWIS. This legislation seeks to correct many of the inequities in the pension laws affecting women, and most important, not just employed women, but divorced and widowed women as well.

Mr. President, no woman in this country should be penalized for choosing homemaking as a full-time career, interrupting an active career to raise children or combining an active career with childrearing. Because employed women tend to be young, work part time or part year, and interrupt their service for family obligations, most working women receive no pension coverage. My legislation attempts to remedy this grave situation by adressing the differing needs of employed women. For example, my legislation recognizes that women between the ages of 20 and 24 have the highest labor force participation and it amends ERISA to require employers to offer pension benefits at age 21 or after 1 year of employment, instead of age 25. In addition, the legislation would modify breaks-in-service rules to give up to 20 hours per week credit for up to 1 year of employer-approved maternity or paternity leave, if the employee returns to the job. This change is important because only 41 percent of women working full time were vested in their pension plans, as opposed to 51 percent of the men. The difference is clearly due, in part, to time off for childbearing.

The Women's Economic Parity Act (WEPA), also seeks to improve the pension laws affecting women who work within their homes. For many years, widows or divorced women have been unfairly treated by the pension and tax laws. Because they choose careers as homemakers, they are often dependent upon their spouse's pension plan. Yet, under current law, joint or survivor benefits can be terminated without notice or consent by the spouse. WEPA would correct this inequity by making joint and survivor benefits automatic unless both the plan participant and the spouse agree in writing to waive this section. It also corrects the problem of survivor benefits being withdrawn if the plan participant dies before retirement. WEPA provides that the survivor benefit be paid to the spouse even if the plan participant dies before retirement, as long as he or she was vested.

A very important provision of this legislation would clarify the extent to which State courts can consider pension benefits in divorce, child support, and other domestic-relations cases. This is consistent with recent congressional action to amend the Social Security Act to provide pension benefits to divorced wives married 10 years. It is also consistent with passage of the Foreign Service Act of 1980, which made military and foreign-service pension benefits subject to alienation by the courts in domestic-relations cases. I feel that this provision recognizes marriage as the economic partnership which it indeed is.

Displaced homemakers who have spent years creating a home and binding together a family and who have subsequently lost their jobs through divorce, separation, or death often lack marketable skills and need special assistance to reenter the labor force. WEPA would assist in the reentry of this special group by amending the targeted jobs tax credit to include displaced homemakers. Employers would receive a tax credit when hiring this targeted group.

A homemaker is crucial to the survival of the family; her work is all the more priceless because no one can put a value on it. It is high time we attempted to correct certain inequities created by this situation.

Another important provision in the Women's Economic Parity Act would amend the individual retirement accounts. IRA's are a new and innovative way to encourage people to save for their retirement. An important segment of the population is being ignored, however. Since alimony and spouse support is not considered earned income, separated or divorced women whose sole source of income may be alimony or spouse support are prevented from taking advantage of this method of retirement savings. Since elderly women are the fastest growing poverty group in America—in fact, 81 percent of women over age 65 not living with relatives are below the poverty line—the small reduction in revenues caused by this provision is well justified.

Mr. President, there is a saying; "Women are not a minority; they're just treated like one." Well, women are a majority—no minority, and certainly not women, should be subject to economic indignities that threaten their self-esteem, their well-being, and the health and safety of their families. I feel that these reforms in pension and tax laws are long overdue, and I urge my Senate colleagues to join me in supporting this bill.●

By Mr. McCLURE (for himself, Mr. JACKSON, Mr. BAUCUS, Mr. GORTON, and Mr. SYMMS):

S. 1701. A bill to impose specific directives on the Bonneville Power Administration; to the Committee on Energy and Natural Resources.

DIRECTIVES TO THE BONNEVILLE POWER ADMINISTRATION

Mr. McCLURE. Mr. President, today I am introducing for myself and others a bill to impose specific directives on the Bonneville Power Administration. The text of this bill is identical to Section 317 of H.R. 3363, the Department of the Interior and related agencies appropriation bill for 1984 which is currently awaiting action by the Senate. The report accompanying H.R. 3363 (S. Rept. 98-184) contains language approved by the Senate Appropriations Committee which provides in addition to the language of the bill, the limitation and directives intended to be imposed upon the Bonneville Power Administration (BPA). This language is intended to be applicable to this bill, as well, and is, therefore, included at this point in its entirety:

SEC. 317. The Committee, through section 317 of the bill and the provisions contained in this report, imposes specific directives on the Bonneville Power Administration (BPA), a Federal power marketing agency. BPA does not receive appropriations because it is a wholly self-financed entity under the provision of the Federal Columbia River Transmission System Act of 1974 (Transmission Act), 16 U.S.C. 838-838K. BPA's costs are, therefore, borne by its customers, not by the U.S. Treasury or the U.S. taxpayer. However, under section 11(b) of the Transmission Act, BPA expenditures are subject to "specific directives and limitations * * * included in appropriations act." 16 U.S.C. 838i(b). This provision is a specific directive and limitation of this type.

Federal power marketing agencies have authority under the Flood Control Act of 1944 to acquire resources by net billings. The Public Works Appropriations Act of 1971 specifically affirmed BPA's authority to acquire the plant capability of WPPSS 1, 2, and 70 percent of 3. This acquisition was affirmed in the Transmission Act of 1974 which authorized BPA to expend funds for the "purchase of electric power, (including the entitlement of plant capability) * * * if such purchase has been heretofore authorized." These resources were defined as "Federal base system resources," for example, "resources acquired by the Administrator under long-term contracts in force on" December 5, 1980, the effective date of the Pacific Northwest Electric Power Planning and Conservation Act, (Regional Act), 16 U.S.C. 839a(10)(B). As Federal base system resources, these facilities play a critical role in carrying out the purposes of the Regional Act. Under section 2(f) of the Bonneville Project Act and section 9(a) of the Regional

Act the Administrator is authorized to "enter into contracts" or to "make expenditures, upon such terms and conditions and in such manner as he may deem necessary," 16 U.S.C. 832a(f); 16 U.S.C. 839f(a). These statutory authorities give BPA a variety of alternative means by which it can fulfill its obligations under the existing net-billing agreements and protect the Federal interest in the three net-billed WPPSS projects.

The Washington Public Power Supply System (WPPSS), a municipal corporation, is currently facing difficulties because of its apparent inability to pay when due financial obligations it incurred in constructing two power projects (WPPSS 4 and 5) which are now terminated and in which there is no Federal investment. These difficulties have affected WPPSS' ability to finance WPPSS 1, 2, and 70 percent of 3, which have not been terminated, but are in various stages of construction. The remaining 30 percent of WPPSS 3 is owned by four investor-owned utilities which have separately financed their interest in WPPSS 3. To date, WPPSS has financed the construction of WPPSS 1, 2, and 70 percent of 3 through conventional bond issues secured by BPA's revenues under net-billing agreements. Although additional construction funding for WPPSS 1 is not presently needed as construction on that project has been extended indefinitely, such funding is required for WPPSS 2 and 70 percent of 3, which are approximately 98 and 78 percent complete, respectively.

WPPSS does not believe that it can raise the funds required to complete WPPSS 2 and 3 through conventional bond issues. The Committee recognizes that BPA will directly fund some or all of the costs of completing WPPSS 2 or 3 from current revenues under its existing authorities. It is not anticipated that the use of payments from rates for costs of construction of WPPSS 3 would increase substantially from those budgeted for the preservation costs of that plant by the Administrator in the BPA's June 22, 1983 supplement budget submitted to the Committee.

This provision directs an additional method for construction financing for either WPPSS 2 or 3 through the formation of a new entity, established pursuant to State law, that would issue bonds, notes or other evidences of indebtedness, the proceeds of which would be used to continue construction of these projects. The security on which lenders would rely for repayment of funds provided to the new entity would be a contract between the new entity and BPA. This contract would commit BPA to pay the principal, interest, and related costs on the new borrowings directly to the new entity, its obligees or their trustees.

This arrangement has several benefits. First, an entirely new entity, rather than WPPSS, could be the issuer of the financing instruments. Second, the construction funds raised by the new entity could be paid by the entity under appropriate contractual arrangements, precluding any attempt by WPPSS' creditors to levy on or attach such funds. Such arrangements may be made between the entity and the suppliers, contractors, laborers, and others on these projects or between the entity and WPPSS. These arrangements must assure that such funds are used for project construction and related costs. Third, direct payment would eliminate lenders' concerns over the authority of third parties to make payments (for example, the participants under the net-billing agreements).

The Committee intends that this provision would not disturb or supplant the Administrator's authorities, rights or obligations under the existing net-billing agreements, other contractual arrangements or provision of law, related to these three projects. Instead this provision represents an additional method available to the Administrator to provide the security necessary to meet BPA's existing obligations with respect to WPPSS 1, 2, and 3.

Utilizing the arrangements contemplated by this provision, construction financing should be available on reasonable terms to enable continuation of construction, particularly on WPPSS 3, which otherwise would be subject to a construction delay occasioned by WPPSS' financing difficulties. The Committee believes that the clarification of the authority of the BPA to enter into such arrangements will provide it with additional flexibility to address the problems facing the region. However, this directive should not be interpreted to be the only clarification of authority or remedy needed to protect the Federal investment in the Federal base system resources. The committee is also concerned that this directive might create a climate in the region which might precipitate unwise decisions. Accordingly, as a condition precedent to the BPA entering into any arrangements or agreements to provide security for financing completion of the projects pursuant to his provision, an agreement must be reached among BPA and the project owners of WPPSS 3, providing for the schedule upon which WPPSS 3 will be constructed. In negotiating the agreement the BPA shall consider among other relevent factors the need for and marketability of the power. If such a schedule is agreed upon, only the may the BPA exercise such authority.

Further, the Committee intends the BPA to exercise its authority directed by this amendment in a prudent and business-like manner. BPA shall not enter into any contractual arrangements pursuant to this provision without due consideration of the effects on the ratepayers of the region, including consideration of the effects of the duration of indebtedness, the interest rate, and the terms upon which such financial agreements are likely to be refinanced if necessary.

The BPA should also take into consideration the following factors prior to making any contractual arrangements pursuant to this provision: *(a)* the Committee's concern over the effect of the arrangement on the ratepayers of the region as compared to other viable alternatives for the acquisition of power from generating resources; *(b)* the committee's expectation that the BPA will not enter into arrangements which will result in financial obligations unreasonably in excess of those which would have otherwise accurred assuming financing by WPPSS: and *(c)* the Committee's recognition that this provision does not create any authority for BPA to incur liability with respect to WPPSS 4 and 5 and the investor owned utilities' shares of WPPSS 3.

In addition to this financing arrangement the Committee envisions that BPA would pay directly to WPPSS for BPA's share of the projects capability in the event that any of the existing net-billing agreements are determined to be invalid or unenforceable and BPA elects to affirm its right to the capability in the projects by contracting directly with WPPSS.

In order to keep the Committee fully informed of BPA's activities in this regard, new contractual agreements between BPA and the new entity or entities described in the provision shall be furnished to the Senate and House Appropriations Committees in the form in which they are to be executed at least 30 days prior to their execution. In addition, BPA shall reflect the cost impacts of any undertaking which it proposes to enter into pursuant to the provision in any annual, amended or supplemental budget which it is required to submit to Congress.

The Committee adopted this provision upon receipt of requests or expressions of support for action by the Bonneville Power Administration, the Governor of the State of Washington, WPPSS, investor-owned utilities which own shares of WPPSS 3, and other interested parties.

I would like to briefly summarize at this point the combined effect of the proposed statutory language and the accompanying report language. I will also clarify for the record some important points which are not authorized by this bill. First, the statutory language clarifies BPA's authority to enter into alternative financing agreements for construction of WPPSS No. 2 and No. 3. The financing alternative would utilize an appropriate entity or entities established pursuant to State law. Financing could be from bonds, notes, or other evidences of indebtedness. Second, the report language provides the directives and limitations under which BPA may use the authority which include:

First, a condition precedent that a schedule for the construction of WPPSS No. 3 be agreed upon.

Second, a directive that the authority be used in a prudent and business-like manner.

Third, a requirement that effects of the terms of the financing on the ratepayers be considered.

Fourth, a prohibition on BPA incurring a liability for WPPSS No. 4 and No. 5 or the private ownership in WPPSS No. 3.

Fifth, a requirement to consider the new financing in relationship to the cost of other viable alternatives for generating resources and the cost of traditional financing through WPPSS.

Sixth, a requirement that the Appropriations Committees of the Senate and House receive all contracts proposed to be entered into 30 days prior to their execution. In addition all costs associated with the agreements will be reflected in BPA's budget submissions to Congress.

Third, this proposal does not authorize:

First, BPA to seek appropriated funds.

Second, BPA to borrow funds from the Federal Treasury or any other source.

Third, extending the full faith and credit of the United States to financing agreements entered into by BPA.

Fourth, BPA itself to establish the new entity or entities referred to in section 317 of H.R. 3363 and this bill. Such entity or entities must be estab-

lished by a non-Federal party pursuant to State law.

I would like to add at this point that introduction of this bill does not in any way prejudice or compromise the sponsors' belief that the inclusion of identical language in H.R. 3363 is appropriate under the rules and practice of the Senate and the express terms of section 11(b) of the Federal Columbia River Transmission Act which states that BPA expenditures are subject to "specific directives and limitations * * * included in appropriations acts." 16 U.S.C. 838i(b). It is the sponsors' intent that this bill be utilized to provide an opportunity for the Senate Committee on Energy and Natural Resources to hold a hearing on the proposal contained in the appropriations measure. To that end, in a separate official notice, it will be announced that the Energy and Natural Resources Committee will hold public hearings on this bill on Wednesday, August 3, 1983 beginning at 2 p.m. in room SD-366, subject of course to the proviso that permission for the committee to sit is granted by the Senate.

(Personal views of Senator McCLURE on need will follow.)

During the past few weeks, the newspapers have been filled with information—and misinformation—about the WPPSS situation, and about the effort mounted by myself and other Northwest Senators to provide a workable means of maintaining the construction schedules of those plants (WPPSS No. 2 and No. 3) in which there is a Federal interest by virtue of net-billing agreement which BPA has with the project participants.

It is important to differentiate the interest in these plants from the other WPPSS projects (No. 4 and No. 5) in which there is no direct Federal interest. I say direct because we all must be concerned about the effect of the recently announced default by WPPSS in its ability to make payments on bonds issued for WPPSS No. 4 and No. 5. That situation is of great concern not only within the region for public entities seeking to finance capital expenditures, but for similar entities throughout the Nation. The effect the default has and will have on private investors, many of whom are private individuals, is cause for alarm among us all.

However, as I said, this legislation does not attempt to solve that problem. It relates only to WPPSS No. 1, No. 2, and No. 3 in which the region has an interest in maintaining viable sources of power. WPPSS No. 1 is currently in a preservation state. It is not anticipated to be needed until 1991. WPPSS No. 2 is currently 98 percent complete and is scheduled to be operational in early 1984 and will begin generating not only power but revenues in that time frame. WPPSS No. 3 is 78 percent complete and was scheduled to be completed in early 1986. However, the inability of WPPSS to obtain conventional financing due to the spillover effect of its problems with units No. 4 and No. 5 has necessitated a ramp-down of activity for unit No. 3 eventually placing it in a preservation mode.

The forced decision to preserve unit No. 3 has immediate adverse consequences. Perhaps foremost is the loss of some 3,000 jobs in the State of Washington which, like other States in the Northwest, can ill afford more unemployment. Second, if no foreseeable alternative for further financing of WPPSS No. 3 becomes available in the near term, experienced personnel needed to complete the plant may be lost forever. Third, if the bondholders of the net-billed plants do not have some reasonable assurance in the near future that their interests are protected through eventual completion of the projects, the legal and investment climate may become one in which financing is even more difficult, expensive, or impossible.

The ratepayers of the region must also be concerned about not completing WPPSS No. 1, No. 2 and No. 3 as expeditiously as possible and at the least possible cost. As a recent favorable editorial in the Oregonian pointed out:

> Regardless of one's position on nuclear energy or the events that led this region down this path, it should be clear to ratepayers that two revenue-producing nuclear plants are better than one, and three would be better than two. Conversely, dry holes, such as the terminated plants 4 and 5, produce no revenue toward retiring the debt.

Parenthetically, I would note that while I appreciate the Oregonian editorial, it was erroneous in characterizing the plan as similar to loan guarantees to Chrysler Corp. although that plan seems to be paying off.

Lastly, the 20 year power plan adopted by the Northwest Planning Council clearly shows a need for all three of the net-billed plants within a decade. Current surplus will not last forever. Opportunities for the sale of any surplus which may exist are being aggressively pursued. The lead time involved in powerplant construction is very lengthy. Unless a method to finance that construction is provided now, ratepayers may end up with the worst of all results—3 dry holes, a multibillion dollar debt which they must pay, and a shortage of power.

Mr. GORTON. Mr. President, I am pleased to join my colleagues, Senators McCLURE and JACKSON, as a cosponsor of this legislation to impose specific directives on the Bonneville Power Administration. I would also like to associate myself with the comments of the distinguished chairman of the Energy and Natural Resources Committee regarding the need for this legislation.

The language in this bill is identical to a provision in H.R. 3363, the Department of the Interior and Related Agencies Appropriations Bill for 1984, which has been reported out of the full Senate Appropriations Committee and is currently pending before the Senate.

I commend the efforts of Senators McCLURE and JACKSON for introducing this proposal as a separate bill so that the Energy and Natural Resources Committee can hold a hearing on the proposal in the near future.

By Mr. DOLE.

S. 1702. A bill to amend the Hostage Relief Act of 1980 to give the provisions of such act permanent effect, and for other purposes; to the Committee on Finance.

HOSTAGE RELIEF ACT AMENDMENTS OF 1983

● Mr. DOLE. Mr. President, today the Senator from Kansas is pleased to introduce the administration's proposed Hostage Relief Act of 1983. This act would make permanent many of the provisions of the Hostage Relief Act of 1980.

BACKGROUND OF THE ACT

The Hostage Relief Act of 1980 was a temporary measure designed to provide immediate financial relief to the families of the individuals then held hostage in Iran. The act as passed was deliberately made temporary with the suggestion that a committee be appointed to study and make recommendations on appropriate permanent legislation to provide relief for U.S. hostages and their families. Accordingly, the President's Commission on Hostage Compensation was created by Executive order on January 19, 1981.

The Commission was asked to make recommendations to the President as to whether the United States should provide financial compensation to U.S. nationals held hostage in Iran on and after November 4, 1979. The Commission was also asked to make recommendations concerning payment of compensation to all U.S. nationals held in captivity outside the United States.

In carrying out this mandate, the Commission considered current statutory remedies that provide monetary benefits to U.S. nationals in a hostage situation, and Federal employment compensation presently available to the hostages and their families.

One of the recommendations of the Commission was that the Hostage Relief Act of 1980 be made permanent and that it be amended to apply to future hostage situations. The hostage Relief Act of 1983 incorporates many of the recommendations of the Commission's report, as well as the results of analyses by the Departments of State and Defense, and by the Office of Management and Budget.

PROVISIONS OF THE ACT

The Hostage Relief Act of 1983 would authorize—but not require—payments of medical expenses and limited VA-type educational expenses for American hostages and their families. The medical and educational expenses are authorized only to the extent that the agency employing the hostage does not currently pay such expenses. The bill would also allow the filing of a joint income tax return by a hostage's spouse, and the postponement of certain tax deadlines and civil actions. A special savings fund for the deposit of the portion of a hostage's pay not needed by dependents would be required. These provisions would generally be applicable only to Federal civilian and military personnel, although the deferral of tax deadlines and stay of civil actions would apply to any individual taken hostage in an action directed against the United States.

The bill also authorizes payment of a detention benefit of $10.50 per day to the hostages detained during the Iranian crisis. This amount was based in part on the recommendation of the President's Commission on Hostage Compensation with assistance from the State Department, Defense Department, and OMB. This bill would allow the President to authorize special detention benefits for future hostages.

The agencies that employ the hostages will pay the cost of the benefits, including the detention benefit, out of their operating funds.

RISKS TO U.S. CITIZENS SERVING ABROAD

Mr. President, the suffering of the hostages in Iran and their families served to highlight for us the risks and sacrifices of those military and civilian employees who serve this country abroad. Fortunately a hostage situation like the one involving Iran is an unusual one. However, we are all too aware of the growth of terrorist activities throughout the world in recent years, of which the recent bombing attack on the U.S. Embassy in Beirut is an example.

The Hostage Relief Act of 1983 is designed to provide, in the event of a future hostage taking, the special benefits that are needed by hostages and their families but not generally part of a U.S. Government employee's compensation package. It is hoped that, through this act, the agencies employing citizens who serve abroad will be better able to serve those employees who, in turn, have provided an incomparable service to this Nation and its citizens.

I ask unanimous consent that the text of this act and a general and technical explanation be printed immediately following this statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1702

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Hostage Relief Act Amendments of 1983".

SEC. 2. Section 101 of the Hostage Relief Act of 1980 (94 Stat. 1967; 5 U.S.C. 5561 note) (hereinafter referred to as the "Act") is amended—

(1) by striking out "title" and inserting in lieu thereof "Act",

(2) by amending paragraph (2) to read as follows:

"(2) The term 'hostage period' means the period beginning and ending on a date determined by the Secretary of State and published in the Federal Register.", and

(3) by inserting "activities of" after "against" in subparagraph (A) of paragraph (4).

SEC. 3. Subsection (a) of section 102 of the Act is amended by inserting ", who remains in a captive status for 30 days or more," after "American hostage" the first time it appears.

SEC. 4. Section 103 of the Act is amended—

(1) by striking out "and" at the end of paragraph (1),

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and", and

(3) by adding after paragraph (2) the following new paragraph:

"(3) is not covered by other Government medical or health programs.".

Sec. 5. Section 104 of the Act is amended—

(1) by striking out "shall" in paragraph (1) of subsection (a) and inserting in lieu thereof "may",

(2) by amending paragraph (2) of subsection (a) to read as follows:

"(2) Payments may be made under this subsection for education or training of a spouse or child of an individual who is an American hostage or whose death is incident to being an American hostage, on the same basis as educational assistance benefits provided individuals made eligible under subparagraph (A) (i), (A) (iii), (B), or (C) of section 1701 (a) (1) of title 38, United States Code, except that in order to respond to special circumstances, the President may specify a date for purposes of cessation of assistance under this paragraph which is later than the date which would otherwise apply.",

(3) by striking out paragraph (3) of subsection (a) and redesignating paragraph (4) as paragraph (3) of subsection (a),

(4) by inserting in paragraph (3) of subsection (a) (as redesignated by paragraph (3)) ", or similar assistance under any other law" immediately before the period, and

(5) by inserting ", to the extent that such payments are not authorized by any other law" immediately before the period in paragraph (1) of subsection (b).

SEC. 6. Section 105 of the Act is amended—

(1) by striking out "an American hostage" in subsection (a) and inserting in lieu thereof "an individual who is placed in a captive status during a hostage period", and

(2) by striking out "American hostage" each time it appears in subsections (b) and (c) and inserting in lieu thereof "individual".

SEC. 7. Section 106 of the Act is repealed and section 107 is redesignated as section 106.

SEC. 8. Sections 201, 202, and 206 of the Act are repealed and sections 203, 204, and 205 are redesignated as sections 201, 202, and 203, respectively.

SEC. 9. Section 203 of the Act (as redesignated by section 8) is amended to read as follows:

"SEC. 203. HOSPITALIZED AS A RESULT OF CAPTIVE STATUS.

(a) IN GENERAL.—For purposes of this title, an individual shall be treated as hospitalized as a result of captive status if such individual is hospitalized as a result of injury or disease or physical or mental disability incurred or aggravated while such individual was in captive status.

(b) 2-YEAR LIMIT.—Hospitalization shall be taken into account for purposes of subsection (a) only if it is hospitalization—

(1) occurring on or before the day which is 2 years after the date on which the individual's captive status ends (or, if earlier, the date on which the hostage period ends), or

(2) which is part of a continuous period of hospitalization which began on or before the day determined under paragraph (1).".

SEC. 10. The Act is amended by striking out title III and inserting in lieu thereof the following new title:

"TITLE III—ADDITIONAL HOSTAGE BENEFITS "PRESIDENTIAL DISCRETION

"SEC. 301. (a) For any captive status occurring on or after November 4, 1979, the President may provide a payment to any American hostage or to the surviving spouse or dependent of any American hostage who dies in captive status. Such payment shall be in addition to any other benefit provided by law.

"(b) The President, in determining whether to make such a payment and its amount, may take into account unusually harsh treatment received by such hostage. The President shall prescribe regulations for the implementation of this section.".

SEC. 11. Any determination, authorization, regulation, order, agreement, or other action made, issued, undertaken, entered into, or taken under the authority of any provision of the Hostage Relief Act of 1980 repealed by this Act shall continue in full force and effect until modified, revoked, or superseded by appropriate authority. Any claim or appeal which was filed or made or is hereafter filed or made in timely fashion by an individual heretofore eligible to file or make such claim under any such provision shall continue to be governed by the repealed provision.

HOSTAGE RELIEF ACT OF 1983—GENERAL EXPLANATION

Prior Law: The Hostage Relief Act of 1980 (the "1980 Act") authorized the appropriate agencies (the Departments of State and Defense) to provide medical care and educational expenses for individuals held hostage in Iran and their families. In addition, the 1980 Act postponed certain tax filing deadlines for such individuals. The 1980 Act expired on January 1, 1983.

Proposal: A number of provisions of the Hostage Relief Act of 1980 would be made permanent.

Specificially, the bill would authorize the following measures for government civilian or military personnel and members of their families in the event of a future hostage-taking abroad in an action against the activities of the U.S. Government:

Deposit of a portion of the hostage's pay and allowances not needed by dependents in a special savings fund;

Payment of medical expenses not otherwise covered by the hostage's employing

agency to the hostage or his family as authorized by the agency;

VA-type education benefits for the education or training of a spouse or child of a hostage who had died or is missing in action;

Postponement of certain tax filing deadlines for a limited period, and the filing of a joint income tax return by a spouse of a hostage during the hostage's captivity;

Authorization of special detention benefits to future hostages in accordance with the regulations that may be issued by the President.

The agencies employing the hostages will pay the cost of the medical and educational benefits out of their operating funds. These benefits will be paid only to the extent that they are not authorized by the hostages' employing agency's ordinary educational and medical plans.

The bill also authorizes the payment of a detention benefit of $10.50 per day to hostages detained during the Iranian crisis. This amount was based in part on the report of the Presidential Commission on Hostage Compensation of September 21, 1981 and on the analysis of interested parties, particularly the State Department, Defense Department and Office of Management and Budget. The detention benefit will be paid by the affected agencies out of their operating funds.

The bill also extends the provisions of the Soldiers' and Sailors' Civil Relief Act to any individual (even if he or she is not a civilian or military employee of the U.S. Government) taken hostage abroad during an action directed against the United States. These provisions allow deferral of certain tax deadlines and permit a court to stay enumerated civil actions when an individual is prevented from performing due to captive status.

Revenue Effect: The revenue estimate for the Hostage Relief Act of 1980, which covered 73 hostages, was approximately $2 million, and a portion of that estimate represented decreased revenues under a section of the 1980 Act that will not be made permanent. Although the Joint Committee on Taxation has not made an estimate of the number of persons who will be taken hostage in the future and whether such persons will use any relief offered by the proposed legislation, it estimates that the revenue effect will not be significant.

HOSTAGE RELIEF ACT OF 1983: TECHNICAL EXPLANATION

A. PURPOSE

The Hostage Relief Act of 1983 (the "Act") makes permanent the Hostage Relief Act of 1980, by eliminating its January 1, 1983 termination date. The Secretary of State is authorized to define "hostage periods" by publishing the beginning and termination dates of such periods in the Federal Register. It is not intended that a period prior to November 4, 1979 shall be declared a "hostage period".

B. INDIVIDUALS COVERED

Except as noted in Section C(4) below, the benefits under the Act are available only to "American hostages". An "American hostage" is a Federal military or civilian employee or a citizen or permanent resident alien rendering personal services to the United States abroad similar to those performed by a civil officer or employee of the United States, as determined by the Secretary of State, who is placed in "captive status" during the "hostage period". Contractors, generally, as well as employees of contractors, will not be American hostages.

"Captive status" is defined as missing status arising because of a hostile action abroad directed against the activities of the United States.

C. BENEFITS PROVIDED

1. Savings Fund: The Act makes permanent the requirement that a special interest-bearing savings fund be established to allow allotments of a portion of the hostage's pay and allowances not necessary for the dependents' immediate support.

2. Medical Benefits: The 1980 Act is made permanent and amended to make it clear that medical payments authorized under the Act supplement rather than duplicate existing government medical health benefits.

Since the Act is permanent, payments authorized by the appropriate agency may continue to the Iranian hostages and their families after the 1983 termination date, until the end of the "hostage period."

3. Educational Benefits: The educational benefit provisions of the 1980 Act are amended to authorize, rather than require, payment of such benefits to the hostages and their families. Like the medical benefit provisions, the educational benefit provisions are amended to make clear that educational benefits supplement, not duplicate, other government educational programs.

The educational benefits that may be authorized under the Act are:

Payments for education or training of a spouse or child of an American hostage, or for a spouse or child of an American hostage whose death is incident to being a hostage. Payments to dependents of hostages in captivity are made only during the hostage period. Generally any educational assistance will not extend for a period greater than 45 months. In special circumstances the President may order an extension of the time for the payments.

In special circumstances the head of an agency may authorize payments for education and training of an American hostage after his captive status terminates and generally on or before the end of any semester or quarter beginning before the date which is 10 years after the hostage ceases to be in captive status.

4. Limitation on Civil Actions: The 1980 Act is amended to allow all individuals (as well as American hostages) the relief allowed under the Soldiers' and Sailors' Civil Relief Act of 1940, which permits a court to stay certain civil actions until the individual is in a position to respond.

5. Certain Tax Provisions Allowed for Iranian Hostages: Provisions in the 1980 Act allowing certain exemptions of pay and allowances from Federal income taxes for Iranian hostages are not allowed in the permanent 1983 Act.

6. Joint Returns: The 1983 Act makes permanent the rule that the spouse of an American hostage otherwise entitled to file a joint return may file such return for any taxable year beginning on or before the day which is 2 years after the hostage period ends.

7. Federal Tax Deferred: The Act makes permanent the rule exempting from certain tax filing deadlines American hostages in captive status or hospitalized outside of the United States due to the hostage-taking.

D. SPECIAL PAYMENTS

The Act authorizes a payment to Federal civilian and military personnel who were taken hostage during the Iranian hostage period or who may be taken hostage in the future. The president would invoke this authority when, in his judgment, the circumstances were appropriate, taking into account the treatment of the hostages. The amount and method of payment would be prescribed by regulation. It should be noted that for the Iranian hostages, the payment level has been set after taking into account the recommendation of the Presidential Commission on Hostage Compensation, and the input of the affected agencies, and the payments will be subject to taxation. Agencies will absorb the costs of these payments through current appropriation funding.

E. SAVINGS PROVISION

A new title is added to the Act, which makes clear that the provisions of the Hostage Relief Act of 1980 being repealed by this Act remain valid for individuals now covered by those provisions—the Iranian and other eligible former hostages and their families. Such former hostages with valid claims that are timely under the 1980 Act may continue to be granted benefits under the provisions proposed for repeal.●

By Mr. JEPSEN:

S. 1703. A bill to require the Commodity Credit Corporation to accept under certain conditions during fiscal years 1984 and 1985 offers to exchange needed strategic and critical materials for surplus dairy stocks; to the Committee on Agriculture, Nutrition, and Forestry.

SURPLUS DAIRY STOCKS

Mr. JEPSEN. Mr. President, today I am introducing legislation which, if enacted, would relieve us of a small part of our embarrassment of agricultural riches in exchange for critical and strategic minerals required for our national defense.

The bill would require the Department of Agriculture to barter surplus dairy products for minerals designated for priority acquisition for the strategic stockpile.

The heart of this bill is a requirement that the Department of Agriculture dispose of 15 percent of its surplus dairy products in each of the next 2 years by the sort of barter arrangement described above.

Here are some basic facts about the national defense stockpile:

Stockpile goals are set for a total of 61 family groups and individual materials at levels that will sustain the United States for 3 years in the event of a national emergency. The type of materials involved include bauxite, nickel, fluorspar, cobalt, quinidine, columbium, and many others.

Due to lack of funding, the stockpile is estimated to be $10.3 billion short of materials, many of which are only available from foreign sources. For example during 1978–82 our import dependency averaged 94 percent for bauxite; 73 percent for nickel; 85 percent for fluorspar; and 100 percent for columbium, quinidine, and rubber—these dependency figures are based on commercial as well as stockpile acquisitions.

With annual appropriations of around $120 million—the total for the current fiscal year—it will take close to a century to meet those goals.

In these times of tight budgets, simply trying to increase appropriations for the stockpile is not a viable option.

However, while the Government has this critical shortage in one area, there is a sizable surplus in another—namely, agricultural products, especially dairy products.

Currently, the dairy stocks owned by the Commodity Credit Corporation (CCC) are valued at over $3.25 billion. These stocks include over 476 million pounds of butter, 891 million pounds of cheese, and 1.33 billion pounds of nonfat dry milk.

Even with the movement of some of this dairy surplus through domestic and international donation programs, procurement and storage costs for the uncommitted dairy stocks continue to mount. Over the past year—July 16, 1982 to July 15, 1983—the butter stocks increased by 33 million pounds or 7.4 percent, the cheese stocks increased 107 million pounds or 13.6 percent, and the nonfat dry milk stocks increased 202 million pounds or 17.9 percent.

It seems to me and some of my colleagues that swapping some of our surplus dairy products for the strategic and critical materials that our country needs makes good sense.

We have been encouraging the administration to use the barter authority that exists and have introduced some measures that would strengthen or open up new methods of reaching a better balance in these two areas.

According to the U.S. Department of Agriculture (USDA), the barter authority included in the CCC Charter Act facilitated the barter of some 60 materials from 50 countries over the period of July 1, 1949 and June 30, 1973.

In 1973 the program was suspended for a number of reasons including changes in the strategic stockpile goals and an inability to match suppliers of strategic materials with those which needed grains. Generally, it was felt that barter was not a cost-effective way to expand U.S. agricultural exports.

I would like to remind you that during the 1970's our agricultural exports expanded at an unprecedented rate—total sales in fiscal year 1972 were $8.2 billion and by fiscal year 1982 the figure was $43.8 billion; that is 5-fold increase.

However, the world economic situation has taken its toll on our exports. This year USDA is projecting a second consecutive year of decline in total exports to perhaps $34.5 billion. Prior to 1982 our agricultural exports had increased every year since 1969.

Many of our current and potential customers for agricultural commodities, especially in developing countries, are facing serious debt problems. This has resulted in the inability of these nations to obtain the credit necessary to finance purchases from the United States. Consequently, these nations are either tightening already snug belts or they are benefiting from some enticing credit available from competing agricultural exporting nations.

Many of the countries that would like to buy farm products from us do have natural resources which are on our stockpile list.

Clearly, there appear to be the proper international market conditions for a return to barter transactions.

Under the current administration two separate barter arrangements have been worked out—both have been with Jamaica and both involve the exchange of Jamaican bauxite for U.S. dairy products.

The first agreement, signed in February 1982, encompasses 400,000 tons of bauxite for 9,115 metric tons of nonfat dry milk and butteroil. The General Services Administration will reimburse the CCC for the bauxite by the end of fiscal year 1984.

At this date the second agreement is being negotiated and the details have not been finalized by the two governments.

This bill does not place the burden of these transactions on the shoulders of the Government, but rather in the hands of private traders who are better equipped for trading.

The pricing structure requires that the dairy products be valued at not less than the current world price and the strategic materials at not more than the world price. This provides the margin necessary to interest private traders and to assure a reasonable return to them.

I believe this legislaton, similar to that introduced in the House by my colleague Representative COOPER EVANS, contains all the elements required to bring about the reduction of our dairy surpluses while enhancing our national security. I hope these two goals can be achieved.

I ask unanimous consent that a copy of my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1703

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other provision of law, during fiscal years 1984 and 1985, the Commodity Credit Corporation shall accept offers from individuals or commercial firms to exchange strategic and critical materials needed to meet unmet national goals established under the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.) for surplus dairy stocks owned by the Corporation if—

(1) such stocks will be exported;

(2) the value assigned to such stocks at the time of delivery is less than the world price at such time;

(3) the value assigned to such materials at the time of delivery is less than the world price at such time;

(4) the Secretary of Agriculture is reasonably assured that export markets for United States dairy products through commercial channels will not be displaced by such exchange; and

(5) such exchange will not result in the expenditure of funds by the Secretary or the Corporation other than for normal administrative costs.

(b) In carrying out subsection (a), the Corporation shall use in each of the fiscal years 1984 and 1985 a quantity of dairy products equal to—

(1) at least 15 percent of uncommitted surplus dairy stocks existing at the beginning of fiscal year 1984; or

(2) if the Corporation does not receive offers to exchange such quantity of dairy products, a quantity equal to the quantity of such stocks offered to be exchanged.

(c) The Corporation may—

(1) transfer strategic and critical materials acquired under this section to the National Defense Stockpile established under the Strategic and Critical Materials Stock Piling Act, and shall be reimbursed for such materials, in accordance with section 4(h) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714(h)); or

(2) retain possession of, and title to, such materials.

(d) No later than six months after the date of the enactment of the Dairy and Tobacco Adjustment Act of 1983, and each six months thereafter through fiscal year 1985, the Secretary of Agriculture shall submit a report to the Congress describing—

(1) exchanges made under this section during the previous six month period; and

(2) any offers for exchanges made under this section during such period which were rejected by the Corporation and the reasons for such rejection.

By Mr. ROTH (for himself, Mr. CHAFEE, and Mr. INOUYE):

S. 1704. A bill to encourage the expansion of international trade in services, and for other purposes; to the Committee on Finance.

TRADE IN SERVICES ACT OF 1983

Mr. ROTH. Mr. President, today I join my colleagues, Senator CHAFEE and Senator INOUYE, in introducing the Trade in Services Act of 1983. This bill is a bipartisan effort to improve the treatment accorded services in our international trading efforts and to move services issues to center stage in global trade discussions.

The services sector is a large and growing segment of the U.S. economy, and its positive contribution to our trade balance continues to increase. These so-called invisibles—engineering and construction, shipping, insurance, banking, transportation, accounting, communications, and tourist services, just to name a few—generate over half the Nation's gross domestic product

and provide jobs for over 54 million Americans. The Commerce Department estimates that U.S. international service activities rose from $92 billion in 1977 to over $140 billion in 1981. The United States earned a trade surplus on services in 1981 of $40 billion, Despite a worldwide recession in 1982, our exports of services again earned a surplus of an estimated $40 billion. These export earnings were sufficient to offset the deficits we suffered in goods trade in those years.

Services have enabled us to keep a foothold on the positive side of the international trade ledger.

Our recent strong performance in services trade is no cause for complacency, however. While exports of services continue to grow absolutely, the U.S. share of world invisibles trade has fallen from 25 percent in 1969 to 21 percent in 1979. Moreover, this general trend is repeated in specific sectors such as banking, construction, engineering, insurance, and transportation.

Other countries, attempting to build or protect fledgling services industries, have begun to devise methods to stem foreign services supplies. These rising overseas trade barriers could send our now internationally strong services industries down the path already trod by U.S. merchandise producers. Once the world's predominant merchandise supplier, we have seen our market share whittled away by foreign import barriers and unfair export practices.

We must avoid making the same mistake in services.

The rising barriers to services trade affect every sector. In the accounting area, for example, provisions regarding confidentiality in the European Community's eighth directive on auditors' qualifications could be used to bar U.S. firms from participation in EC markets. In the information transfer business, restrictions on the use of foreign data processing facilities bar U.S. computer software firms from selling their services in countries like West Germany.

Foreign countries' subsidization of construction operations has enabled overseas firms to capture third-country markets from traditional U.S. suppliers. U.S. motor carriers are virtually excluded from providing trucking services in Mexico. Our truckers face stringent restrictions in Canada. Moreover, our insurance firms encounter nearly impenetrable barriers in many developing countries that seek to retain control for domestic monopolies or national insurance companies.

At the same time, U.S. service markets remain relatively open to foreign suppliers. With the enactment of the Motor Carrier Act of 1980, for example, foreign truckers have easy access to the U.S. market. Canadian suppliers alone have received hundreds of licenses in the past several years to provide interstate services. Foreign insurers, too, find fewer difficulties penetrating the lucrative U.S. market.

Despite their importance to our domestic and global trade accounts, despite the rising barriers to trade overseas, services have often been treated as an afterthought in United States and international trade law. The Trade Act of 1974 was the first attempt to raise the issue of services trade in international consciousness. Notwithstanding that act's charge that the President negotiate barriers to both goods and services, however, little was accomplished in the latter during the 1975–79 Tokyo Round of multilateral trade negotiations.

Distortions in services trade continue to increase unchecked by international agreement.

It is time to reverse that trend. It is clear we must begin to work now if we are to guarantee a continuing predominant role for U.S. service industries in the world economy. We must lay the groundwork now for international discipline in the treatment of services trade.

The Trade in Services Act of 1983 represents an important step in the direction of insuring open markets for services trade. The bill charges the President with placing a high priority on, and developing a work program for, negotiations to reduce services trade barriers. Section 2 of the Trade in Services Act builds upon the existing provisions of section 102 of the Trade Act of 1974 by providing a clear congressional directive to place services issues on the front burner.

In addition, the legislation would clarify and expand the coverage of U.S. trade law to deal more effectively with trade in services problems. In the past, arguments have been made that establishment-related issues involve investment, not trade and are therefore not covered by the 1974 Trade Act's negotiating and retaliatory authority. Sections 2 and 3 of this bill would resolve any potential problem or confusion by expressly including barriers to the establishment and operation of U.S. businesses in foreign markets within the Trade Act's meaning of "barriers to trade."

Section 4 of this bill assures that the President can take action to remedy services trade problems under section 301 of the Trade Act, which deals with unfair trade practices, notwithstanding any other provision of law.

The bill would also improve the coordination in the services trade policymaking process and Federal-State communication in trade regulation. As chairman of the Governmental Affairs Committee, I strongly believe State and local governments should continue to exercise their traditional regulatory authority over a variety of services, such as banking insurance, and accounting. Therefore, section 2 of the Trade in Services Act provides that, before entering into any negotiations in a service sector over which the States have regulatory responsibility, the U.S. Trade Representative must consult with representatives of the States concerning negotiating objectives and methods of implementing any agreements reached. Section 5 provides for the establishment of non-Federal governmental trade advisory committees. In addition, the legislation calls for coordination with private sector advisory groups specializing in services trade matters.

The Trade in Services Act would establish a service sector development program, providing for much needed collection and analysis of domestic and international services information. The United States is heads and shoulders above its trading partners in its appreciation of the role of services in the international economy, but more work remains to be done to understand, quantify, and take into account services' full impact on trade and national accounts.

I believe this legislation is crucial in our efforts to expand our export performance in the services sector. It is time we stop treating services as an afterthought and begin to consider what international rules would best promote free trade in the ever-growing service sector.

Mr. CHAFEE. Mr. President, I am delighted to join my colleagues, Senators ROTH and INOUYE, in introducing the Trade in Services Act. These provisions have enjoyed wide support, indeed they passed the Senate twice this year. They were first passed as a part of S. 144, the International Trade and Investment Act, introduced by Senator DANFORTH, and which I also supported as an original cosponsor. They were again approved as a part of H.R. 2973.

However, in the absence of companion provisions from the House, the reciprocity and services provisions were not included in the conference bill on H.R. 2973. I understand that in the course of the conference on H.R. 2973, Chairman ROSTENKOWSKI and Chairman GIBBONS indicated they would seek to move reciprocity and services through the House in September.

Mr. President, these provisions are important for many reasons, as I think the Senate has clearly recognized in passing them earlier this year.

First, the bill recognizes the significance of trade in the service sector. Indeed, we often cite statistics revealing a dramatic balance-of-trade deficit. But, while our balance-of-trade problem is growing, the fact is that trade in services has over the years produced an overall trade surplus. Clearly services trade is vital to our economy, deserving recognition and integration

into our trade policies and international efforts.

This bill provides for effective coordination and implementation of U.S. trade policy with regard to services. The bill directs the USTR to coordinate the development of services trade policy and requires that he consult with Federal regulatory agencies and the States in those areas of the services sector that are subject to Federal and/or State regulation, such as insurance and banking.

The bill provides that, prior to the negotiation of any agreement on services, the USTR must develop negotiating objectives in consultation with the private sector service industry advisory groups and the States. The bill also authorizes the Department of Commerce to establish a services industries program to develop information on the flow of trade in services, analyze the impact of U.S. laws pertaining to services, and provide information to the States on U.S. policy on international trade in services.

The third and perhaps most important purpose of this legislation is to insure that U.S. service industries continue to have free access to foreign markets. The bill specifies the elimination of barriers to U.S. service sector trade in foreign markets and the elimination of practices which distort international trade in services as negotiating objectives. It clarifies and emphasizes the President's authority to take action against unfair practices either at home or abroad which affect U.S. service industries. The bill allows Federal regulatory agencies with authority over service industries to take into account the extent to which U.S. service industries are accorded access to foreign markets. These regulatory agencies must act in consultation with the USTR.

Mr. President, I believe this legislation is an important tool that can help us insure that the rapidly expanding world of trade in services remains free and open. I urge my colleagues to support it again, and I look forward to expeditious action on it.

By Mr. MOYNIHAN (for himself and Mr. D'AMATO):

S. 1705. A bill to modify Federal land acquisition and disposal policies carried out with respect to Fire Island National Seashore, and for other purposes; to the Committee on Energy and Natural Resources.

FIRE ISLAND NATIONAL SEASHORE

● Mr. MOYNIHAN. Mr. President, I rise today, along with my distinguished colleague from New York, Senator D'AMATO, to introduce legislation to amend the Fire Island National Seashore Act (P.L. 88-587), passed in 1964. This bill is identical to one being introduced today in the House of Representatives by Congressman THOMAS DOWNEY.

The Fire Island National Seashore was established by Congress in 1964 for the purpose of conserving and preserving for use of future generations certain relatively unspoiled and undeveloped beaches, dunes, and other natural features within Suffolk County, N.Y., which possess high values to the Nation as examples of unspoiled areas of great natural beauty in close proximity to large concentrations of urban population. Fire Island, located just 50 miles East of New York City, is composed of sandy beaches, salt marshes, and sand dunes, which are among the highest in the Northeast. Within the boundaries of the seashore there are 17 small, heavily developed communities, primarily consisting of single-family homes and cottages and the businesses serving them and day visitors.

The 1964 act grants the Secretary of the Interior limited powers of condemnation in order to further the purposes of preserving the natural features of the seashore. In 1980, I joined Senator Jacob K. Javits, one of the prime sponsors of the legislation creating the seashore, in requesting that the General Accounting Office (GAO) review the National Park Service's land acquisition and management policies and practices for the Fire Island National Seashore. The GAO report (CED 81-78), issued on May 8, 1981, made several suggestions concerning ways to improve land acquisition and management policy at the seashore.

The legislation I introduce today is designed to perfect certain provisions of Public Law 88-587. The bill allows the Secretary of the Interior to sell certain acquired property, with covenants to insure future conforming uses, and to retain the proceeds from such sales for additional seashore acquisitions. Second, it permits the Secretary to apply for an injunction or temporary restraining order to prevent any use of, or construction upon, property after the commencement of a condemnation action taken pursuant to the Seashore Act. Finally, it clarifies the power of the Secretary to condemn property within the seashore that becomes the subject of a variance or exception under any applicable zoning ordinance.

The bill specifically implements two of the recommendations contained in the May 1981 GAO report. First, the GAO suggested that the National Park Service should sell unneeded land. This bill adds a new subsection to the law that provides for a turnaround provision that would direct that certain lands in the developed communities, acquired as nonconforming properties and not needed to further the purposes of the act, be sold. Properties thus sold would carry with them restrictions to insure that their use conforms to all applicable seashore regulations. The Park Service is currently in the process of identifying which of its present holdings may be eligible for such a turnaround. The revenues from the sale of these properties would be used to create a revolving fund to pay for future Park Service acquisitions within the seashore.

Second, the GAO pointed out a need to clarify land acquisition policy within the seashore's developed communities. This bill addresses that issue by amending section 3(e) of the current law. The new language provides that the Secretary's authority to condemn property in areas of the seashore with approved zoning ordinances would be reinstated only if a property becomes the subject of a zoning variance or exception and the Secretary finds that such an exception or variance results in the property being used in a manner that is inconsistent with the Secretary's guidelines issued pursuant to section 3. Currently, the Secretary does not make the latter finding. As the GAO observed, existing law "does not create a variance process that would permit the Park Service to certify if a nonconforming structure might harm the resource or not." The GAO went on to say, "The Secretary's authority to suspend condemnation is not discretionary." The new language in the bill will make it clear that a zoning variance is not, in and of itself, cause for condemnation. Instead, only a zoning variance that results in a use inconsistent with the purposes of the act would be cause for condemnation. This would put the Park Service back into the business of resource protection, where it belongs.

On January 18, 1983, the management of the Fire Island National Seashore presented a draft land protection plan for public review and comment. This plan will help clarify National Park Service intent with regard to its land management policies within the seashore. This bill is consistent with the management objectives contained in the draft land protection plan.

Mr. President, as I previously stated, the intent of this bill is to simply perfect the existing law (Public Law 88-587). This is necessary not only to make the operations of the seashore more efficient but also to help alleviate some very real concerns being expressed by Fire Island landowners about land acquisition policies within the seashore. It is for these reasons that I am today introducing this bill.

I should add that this matter was brought to my attention by the Honorable Thomas J. Schwarz, mayor of the village of Ocean Beach. Mayor Schwarz has long been dedicated to preserving the beauty of the natural features and comfortable settings that abound on Fire Island. I am confident that this legislation will serve to further such purposes.

11-059 O-87-3 (Pt. 16)

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD as follows:

S. 1705

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Fire Island National Seashore Amendments Act of 1982".

SEC. 2. Section 2 of the Act entitled "An Act to establish the Fire Island National Seashore, and for other purposes", approved September 11, 1964 (16 U.S.C. 459e-1), is amended by adding at the end the following new subsections:

"(h)(1)(A) The Secretary shall sell any property described in subparagraph (B) of this paragraph acquired by condemnation under this Act—

"(i) to the highest bidder;

"(ii) at not less than the fair market value; and

"(iii) subject to covenants or other restrictions that will ensure that the use of such property conforms to the standards specified in regulations issued under section 3(a) of this Act which are in effect at the time of such sale and to any approved zoning ordinance or amendment thereof to which such property is subject.

"(B) The property referred to in subparagraph (A) of this paragraph is any property within the boundaries of the National Seashore as delineated on the map mentioned in section 1 except—

"(i) property within the Dune district referred to in subsection (g) of this section;

"(ii) beach or water and adjoining land within the exempt communities referred to in the first sentence of subsection (e) of this section; and

"(iii) property within the eight-mile area described in the second sentence of subsection (e) of this section; and

"(iv) any property acquired prior to October 1, 1982, that the Secretary determines should be retained to further the purposes of this Act.

"(2) Notwithstanding any other provision of law, all moneys received from sales under paragraph (1) of this subsection may be retained and shall be available to the Secretary, without further appropriation, only for purposes of acquiring property under this Act.

"(i)(1) Upon or after the commencement of any action for condemnation with respect to any property under this Act, the Secretary, through the Attorney General of the United States, may apply to the United States District Court for the Eastern District of New York for a temporary restraining order or injunction to prevent any use of, or construction upon, such property that—

"(A) fails, or would result in a failure of such property, to conform to the standards specified in regulations issued under section 3(a) of this Act in effect at the time such use or construction began; or

"(B) in the case of undeveloped tracts in the Dune district referred to in subsection (g) of this section, would result in such undeveloped property not being maintained in its natural state.

"(2) Any temporary restraining order or injunction issued pursuant to such an application shall terminate on the date the United States acquires title to such property or, if such proceedings are terminated without the United States acquiring title to such property, on the date of such termination.".

SEC. 3. Section 3(e) of the Act entitled "An Act to establish the Fire Island National Seashore, and for other purposes", approved September 11, 1964 (16 U.S.C. 459e-2(e)), is amended to read as follows:

"(e) If any property, including improved property but excluding undeveloped property in the Dune district referred to in section 2(g) of this Act, with respect to which the Secretary's authority to acquire by condemnation has been suspended under this Act—

"(1) is, after the date of the enactment of the Fire Island National Seashore Amendments Act of 1982, made the subject of a variance under, or becomes for any reason an exception to, any applicable zoning ordinance approved under this section; and

"(2) such variance or exception results, or will result, in such property being used in a manner that fails to conform to any applicable standard contained in regulations of the Secretary issued pursuant to this section and in effect at the time such variance or exception took effect;

then the suspension of the Secretary's authority to acquire such property by condemnation shall automatically cease.".●

● Mr. D'AMATO. Mr. President, I rise today to continue a long tradition of support by Members of the U.S. Senate from New York for a resolution of the problems unique to the Fire Island National Seashore. Specifically, I rise to cosponsor the legislation introduced by my colleague, Senator MOYNIHAN, and to commend him for his long involvement with this matter and his judicious resolution to a most pressing concern.

This legislation is vitally necessary to the communities located on Fire Island. Many residents of those communities are concerned with provisions of Public Law 88-587 that deal with land acquisition policies within the seashore. These concerns have prompted my colleague and I to introduce this legislation.

The bill would create a turnaround provision that would mandate that lands in developed communities within the seashore which were acquired as nonconforming lands and are not needed to further the purposes of the act be sold. Conveyed with these properties would be restrictions to insure that any future use conform with seashore regulations. The revenues from these sales would be used to create a revolving fund for the Park Service to purchase additional lands within the seashore. This is a well thought out and innovative solution to a long-standing problem.

Other sections of our bill address problems detailed by GAO in its 1981 assessment of the seashore, done at the request of Senator MOYNIHAN and Senator Javits. Specifically, section 3(e) of the current law would be amended to insure that the Park Service performs its proper role in assuring the continued viability of the seashore and that it interferes as little as possible with local governments, while still fulfilling its obligation to protect this valuable resource. I believe that this legislation offers a very just settlement to the concerns of the local residents and I urge my colleagues to adopt it.●

By Mr. RIEGLE (for himself and Mr. KENNEDY):

Senate Joint Resolution 137. A joint resolution to designate April 7, 1984, as "World Health Day"; to the Committee on the Judiciary.

WORLD HEALTH DAY

Mr. RIEGLE. Mr. President, today I am introducing for myself and Senator KENNEDY, Senate Joint Resolution 137 designating April 7, 1984, as "World Health Day."

April 7 is celebrated as "World Health Day" around the world to promote better health care for all people and to draw attention to the World Health Organization's goal of health for all by the year 2000. Good health is essential for people to be able to lead socially and economically productive lives.

Mr. President, given the quality of life enjoyed in this country, the view of a healthy world embodied in the call for "World Health Day" could easily be taken for granted. The goals of "World Health Day" are minimal, yet essential if we are to improve the health status of millions all over the globe. The objectives are simply the minimum requirements of safe water and adequate sanitary facilities; immunization against diphtheria, pertussis, tetanus, poliomyelitis, measles, and tuberculosis; local health care with 20 essential drugs on hand within 1 hour's travel; and trained personnel to attend childbirth and to care for infants and pregnant women.

Without the World Health Organization, the central agency of the United Nations directing international health activities, these goals would remain unrealized. The constant surveillance, control, and eradication of disease; the collection, dissemination, and exchange of health data; and collaborative research are all directed and supported by the World Health Organization. In this country, the American Association for World Health serves to heighten our awareness of the issues surrounding world health and works with the World Health Organization to make our participation in their efforts worthwhile.

Mr. President, health for all begins with each one of us becoming aware of how we we can improve our own health and which contributions we can make to the goals of "World Health Day" in other parts of the world.

In declaring April 7, 1984, as "World Health Day," it is my hope that we will increase our awareness of what must be undertaken to make ourselves and all people in the world healthier. Good health does not just happen. To

contribute to making health for all by the year 2000 a reality, I urge all my colleagues to join me in cosponsoring this resolution.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 137

Whereas the health of a nation depends upon the health of its people;

Whereas improvement of the health of the people of our Nation contributes to world health, and world health contributes to the health of our Nation—a principle enunciated in the Constitution of the World Health Organization and accepted by the United States;

Whereas the United States is an active member of the World Health Organization and has both benefited from and contributed to the achievements of the Organization;

Whereas the countries of the world, acting through the World Health Orgnization, are committed to the goal of "Health for All by the Year 2000;"

Whereas primary health care is recognized as a key to the attainment of "Health for All by the Year 2000;"

Whereas health education and health awareness, prevention and treatment of common diseases and illnesses, basic sanitation, and adequate nutrition are essential elements of primary health care;

Whereas the World Health Organization has established April 7 of each year as World Health Day to call attention to what individuals and governments can do to further the health of human beings everywhere, and the American Association of World Health has sponsored and assisted in this endeavor; and

Whereas it has been the custom for the President to call attention to World Health Day each year in the form of a public message: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That April 7, 1984, is designated as "World Health Day," and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the day with appropriate programs, ceremonies, and activities.

● Mr. KENNEDY. Mr. President, I rise in support of my colleague, Mr. RIEGLE, as he introduces this resolution to declare the day of April 7, 1984, as "World Health Day."

"World Health Day" will be celebrated in the coming year on the 36th anniversary of the signing of the World Health Organization's (WHO) constitution. Yet on "World Health Day" we look beyond the admirable efforts of WHO to direct and coordinate international efforts to improve health on a global scale. On "World Health Day" we should remind ourselves that the responsibility for our Nations' health must also include responsibility for other nations. Disease, malnutrition, and pestilence honor no boundaries, economic, geographic, or political.

Tuberculosis, a disease which once posed a major threat in the United States, still afflicts almost 11 million people annually worldwide; 1 in 10 cases of the 30,000 cases of TB reported in the United States is fatal. Despite the tragedy of those deaths, there are areas of the world with far greater prevalences and TB mortality rates, such as Latin America where 1 in 5 of the 220,000 reported cases are fatal. As such, we must work in concert with other nations to improve health for all.

Vaccination against the diseases of childhood—diphtheria, measles, poliomyelitis, tetanus, tuberculosis, and whooping cough—has been a priority for State and local government in the past decade here in our own country. The diseases from which we have worked to spare our Nation's children are the same ones against which other countries are fighting to save their next generation. As we have strived to improve our Nation's health through education about health and diet so, too, must we help to educate the rest of the world. WHO has been working to educate people in all countries, especially those of the Third World, about the importance of sound nutrition especially for mothers and children.

Waterborne diarrheal disease is the cause of 80 million deaths annually. To reduce the threat of disease and death WHO has promoted programs for improved drinking water and sanitation systems. One such program underway is called oral rehydration, the distribution of kits to individuals which provide the requisite materials to increase that individual's ability to retain water and fight infection from the water.

"World Health Day" will call attention to some of the real victories the people of the world have accomplished in the field of health. Smallpox is perhaps the greatest example of what we are capable of in making the world a healthier place. For ages, smallpox was a disease which killed up to 40 percent of its victims. There were 250,000 victims in 1958 worldwide. By 1980, efforts by health care professionals to isolate and destroy the disease were so successful that smallpox had been eradicated. The smallpox eradication programs which achieved worldwide success in removing the threat of one fatal disease serve as a model for the current fight against malaria. While we here in the United States have eradicated malaria, other countries are still plagued by this disease. Eradication and control programs have been working in many countries and have been successful in checking the spread of malaria only when their efforts were coordinated on both the national and international levels.

On "World Health Day" we should look at our national achievements as being part of the global health effort. Yet we should not limit our view of world health to medical terms. The World Health Organization outlined that primary care including education about health, diet, and safety, in addition to medical treatment is one of the key elements in improving the world health. On April 7, 1984, "World Health Day," we should remember that our work to improve the health and the quality of life in the United States will also positively effect the health of the world.●

By Mr. ZORINSKY:

S.J. Res. 138. Joint resolution to establish a Commission on Teacher Education; to the Committee on Labor and Human Resources.

(The remarks of Mr. ZORINSKY and the text of the joint resolution appear earlier in today's RECORD.).

By Mr. MOYNIHAN (for himself, Mr. D'AMATO and Mr. BAKER):

S.J. Res. 139. Joint resolution to commemorate the centennial of Eleanor Roosevelt's birth; to the Committee on Energy and Natural Resources.

CENTENNIAL OF THE BIRTH OF ELEANOR ROOSEVELT

Mr. MOYNIHAN. Mr. President, October 11, 1984, will mark the 100th anniversary of the birth of Eleanor Roosevelt, one of the most remarkable women of the 20th century. Today, I am introducing a joint resolution to commemorate that centennial. This legislation is the outgrowth of a suggestion I received from Lucille Pattison, the energetic county executive of Dutchess County, N.Y.—the county in which Franklin and Eleanor Roosevelt's Hyde Park home was located.

Eleanor Roosevelt will, forever, be remembered as the dynamic First Lady and U.N. delegate who championed the cause of the underprivileged and the oppressed. She redefined the role of the American political wife, and, in her own right, had an enduring influence in domestic and international politics.

Eleanor Roosevelt was a niece of President Theodore Roosevelt and grew up in the narrow world of privileged New York society. Although she cultivated an interest in public affairs when her husband became a New York State senator, she developed a strong sense of public service only when Franklin Delano Roosevelt assumed subcabinet duties in Washington during World War I.

After F.D.R. was crippled by polio in 1921, Eleanor Roosevelt served as his surrogate in New York Democratic Party affairs. Though she had not been sympathetic to the suffrage movement, she became active in the League of Women Voters and the Women's Trade Union League. Uncomfortable at public speaking, she nonetheless accepted scores of speak-

ing invitations. She also established a furniture factory at Val-Kill, in Hyde Park, to aid the unemployed.

During F.D.R.'s 4-year term as Governor, she answered his mail and represented him in inspections of State institutions. When he became President, in addition to the usual social duties of First Lady, she promoted various New Deal projects, including subsistence homesteads, the National Youth Administration, and women's programs.

Her influence was such that she had her own weekly press conferences and syndicated daily newspaper column. During World War II she served briefly as cochairman of the Office of Civilian Defense. She corresponded with many servicemen overseas and toured several theaters of operations.

Following F.D.R.'s death, President Truman sought Eleanor Roosevelt's advice and she gave it freely, urging him in particular to appoint women to public service posts and to continue the Fair Employment Practices Committee. President Truman appointed her a delegate to the first U.N. General Assembly and later to the U.N. Human Rights Commission. In this latter post, she drafted and fought for adoption of the Declaration of Human Rights. A U.N. delegate until 1952, she forcefully urged the establishment of the State of Israel. She was reappointed a U.N. delegate by President Kennedy in 1961 and remained in the delegation until her death on November 7, 1962.

I knew Eleanor Roosevelt. In December of 1961, President Kennedy created a President's Commission on the Status of Women, with Mrs. Roosevelt as its chairman. I was an assistant to the Secretary of Labor at the time and represented him on the Commission. Mrs. Roosevelt was an energetic chairman up until the time of her death. She was gracious but firm minded and helped guide the Commission to its conclusion that the role of women in American economic affairs was artificially and unwisely restricted.

The resolution I am introducing will establish a commission to encourage and coordinate commemorations of the centennial of Eleanor Roosevelt's birth. Day-to-day staff assistance to the Commission will be provided by the Eleanor Roosevelt Institute, a nonprofit organization headquartered in New York City. The Eleanor Roosevelt Institute is legal successor to the Eleanor Roosevelt Memorial Foundation, a federally chartered organization under the provisions of Public Law 88-11, approved on April 23, 1963. Except for nominal travel and per diem payments to private members of the Commission when they attend meetings, the resolution will not entail any Federal expenditures over those otherwise authorized in law.

Section 5 of the resolution directs the Interior Department to substantially complete renovation of Val-Kill, the Eleanor Roosevelt National Historic Site, in fiscal year 1984. The renovation has been underway for some years and the purpose of this section is simply to make certain that the National Park Service has Val-Kill fully open to the public in time for the Eleanor Roosevelt centennial year.

When Eleanor Roosevelt died, Adlai Stevenson, the U.S. Ambassador to the United Nations and long-time friend of hers remarked, "She would rather light candles than curse the darkness, and her glow warmed the world."

Her life and work were a credit to the United States; she, in turn, devoted her life to our country and to the pursuit of our ideals of liberty and opportunity the world over.

I am pleased to be joined in introducing this resolution by my colleague, Senator D'AMATO. The majority leader has been most helpful in preparing this resolution and has assured me of his support for its adoption. I am most grateful. I urge other Senators to cosponsor this resolution. I ask that the text of the resolution be printed in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S.J. RES. 139

Resolved by the Senate and House of Representatives of the United States of American in Congress assembled, that the Congress finds and declares that—

(1) Eleanor Roosevelt, who was First Lady of the United States from 1933 to 1945, was one of the country's great First Ladies;

(2) Born into wealth and privilege herself, Eleanor Roosevelt nevertheless worked tirelessly to secure opportunities for disadvantaged Americans and to improve the lot of the needy elsewhere and particularly in developing countries;

(3) Both during and after her service in the White House, Eleanor Roosevelt campaigned indefatigably for human rights in the United States and throughout the world;

(4) Eleanor Roosevelt devoted her efforts especially to promoting the welfare of children.

(5) For this service, for her articulate and compassionate advocacy of the highest American ideals, and for demonstrating by personal example the capacities of American women to succeed in areas of daily life and work from which they were frequently excluded in her day, Eleanor Roosevelt earned a place of honor and respect in the hearts of the American people;

(6) October 11, 1984, marks the centennial of Eleanor Roosevelt's birth, and it is appropriate for Americans to mark this occasion with appropriate commemorations during 1984.

SEC. 2 (a) There is hereby established a Commission on the Eleanor Roosevelt Centennial.

(b) The membership of the Commission shall consist of the following:

(1) two members of the House of Representatives, designated by the Speaker of the House;

(2) two members of the Senate, designated by the President of the Senate;

(3) the Director of the National Park Service, ex officio;

(4) the Archivist of the United States, ex officio;

(5) the Librarian of Congress, ex officio;

(6) the Governor of the State of New York, ex officio;

(7) the county executive of Dutchess County, New York, ex officio;

(8) the surviving children of Mrs. Eleanor Roosevelt; and

(9) the chairman of the Eleanor Roosevelt Institute.

(c) Commission members shall designate one of their number as Chairman.

SEC. 3. The Commission established by section 2 of this Act shall—

(1) encourage and recognize appropriate observances and commemorations, throughout the United States, of the one hundredth anniversary of the birth of Eleanor Roosevelt;

(2) provide advice and assistance in establishing such observances and commemorations; and

(3) coordinate the activities of Federal agencies in support of such observances and commemorations.

SEC. 4. (a) The Commission shall meet no later than thirty days after enactment of this Act at a place and location determined by the Librarian of Congress, and at such intervals thereafter as the Commission may decide.

(b) The Administrator of General Services and the Director of the National Park Service shall provide the Commission such assistance and facilities as may be necessary to conduct its meetings.

(c) The Commission may accept donations of money and services to carry out its responsibilities.

(d) The Eleanor Roosevelt Institute, a not-for-profit organization incorporated in the State of New York, and successor organization to the Eleanor Roosevelt Memorial Foundation, chartered pursuant to Public Law 88-11, shall provide staff assistance to and coordinate policies and events for the Commission.

(e)(1) The private members of the Commission shall be reimbursed for their travel and compensated for their time engaged on Commission business at the daily rate established for employees at grade 18 of the General Schedule.

(2) The Secretary of the Interior is authorized, out of appropriations otherwise available to him, such sums as may be necessary to carry out the provisions of this paragraph.

SEC. 5. (a) In commemoration of the one hundredth anniversary of the birth of Eleanor Roosevelt, the Secretary of the Interior, acting through the Director of the National Park Service, shall complete the renovation of the Eleanor Roosevelt National Historic Site at Val-Kill in Hyde Park, New York, in fiscal year 1984 sufficiently to open it to full public visitation.

(b) The Secretary of the Interior is authorized, out of funds available to him in any fiscal year, such sums as may be necessary to carry out the purposes of this section.

Mr. D'AMATO. Mr. President, I rise today to join my distinguished colleague, Senator MOYNIHAN, in com-

memorating the 100th anniversary of the birth of Eleanor Roosevelt. A native of New York, Eleanor Roosevelt was a lady who accomplished a great deal as a woman in her own right, as well as in the capacity of the wife of our 32d President.

The chronicling of her accomplishments would be a task requiring many volumes. I wish to bring to attention only a few. Born into a situation which could have offered a life of leisure and ease, Mrs. Roosevelt, chose instead to reach out to those less fortunate with an indefatigable spirit and a compassion that left few unmoved. Long before any political advantage could be attributed as her motive, she joined many organizations in an effort to further the cause of those whose rights were less protected than her own. The question of equality for women and minorities found a place in the national spotlight as a direct result of her efforts.

As First Lady, she served a unique role in this country's history. President Roosevelt, because of his illness, could not travel around the country. Therefore, Mrs. Roosevelt acted as his eyes and ears, ceaselessly apprising him of the feelings of the people. In the midst of the steepest depression and most cataclysmic war in this country's history, she carried a beacon of hope whose light none of her critics could dim. Many soldiers, wounded and far from home, were comforted by her. The long hours she spent in this task and others too numerous to cite are legend born of fact.

After the tragic death of her husband, Eleanor Roosevelt continued to play a vital role in the affairs of our country. As American Ambassador to the United Nations, she was the guiding force behind the Universal Declaration of Human Rights and commanded the respect of the entire assemblage in a way none of her successors has been able to match.

Her final official capacity, in which she served until her death, was as chairman of President Kennedy's Commission on the Status of Women. She championed the cause of equality both in words and through the example she set.

Today, we accept as given many of the benefits for which Eleanor Roosevelt fought. Let us not forget, however, the dedication, toil, and, most of all, compassion of the woman who was their champion. She stood, often alone, for justice in America and the world. She remains the standard bearer of the conscience of our Nation. She will always be remembered by those who admire the select few whose deeds outstrip their words.

Mr. BAKER. Mr. President, I want to take this opportunity to commend my distinguished colleagues from New York for sponsoring this joint resolution, and I would like to add my name to the list of cosponsors.

History leaves no doubt as to the remarkable and unique and vital force that was Eleanor Roosevelt. Her legacy is as bright today as it ever was, and she will forever be a symbol of caring and unselfish devotion. It is all too fitting that we commemorate the 100th anniversary of her birth.

I am most pleased to learn Mr. President that the Eleanor Roosevelt Institute will be involved in the centennial celebration. The institute is a not-for-profit organization that has already distinguished itself through the expert work of its members, and I am confident that their assistance will be significant.

ADDITIONAL COSPONSORS

S. 617

At the request of Mr. STENNIS, the name of the Senator from Ohio (Mr. GLENN) was added as a cosponsor of S. 617, a bill to promote the use of energy-conserving equipment and biofuels by the Department of Defense, and for other purposes.

S. 1051

At the request of Mr. TOWER, the name of the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 1051, a bill to amend the Internal Revenue Code of 1954 to allow certain prepayments of principal and interest to be treated as contributions to an individual retirement account, to allow amounts to be withdrawn from such account to purchase a principal residence, and for other purposes.

S. 1080

At the request of Mr. GRASSLEY, the names of the Senator from Illinois (Mr. DIXON), the Senator from North Dakota (Mr. BURDICK), and the Senator from Colorado (Mr. ARMSTRONG) were added as cosponsors of S. 1080, a bill to amend the Administrative Procedure Act to require Federal agencies to analyze the effects of rules to improve their effectiveness and to decrease their compliance costs, to provide for a periodic review of regulations, and for other purposes.

S. 1146

At the request of Mr. BENTSEN, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 1146, a bill to amend the Federal Aviation Act of 1958 to provide for the revocation of the airman certificates and for additional penalties for the transportation by aircraft of controlled substances, and for other purposes.

S. 1350

At the request of Mr. LAXALT, the name of the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 1350, a bill to amend the Federal Election Campaign Act of 1971 to increase the role of political parties in financing campaigns under such act, and for other purposes.

S. 1575

At the request of Mr. SASSER, the name of the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of S. 1575, a bill to improve the highway bridge replacement and rehabilitation program.

S. 1634

At the request of Mr. WALLOP, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 1634, a bill to amend the Mineral Lands Leasing Act of 1920 and for other purposes.

SENATE JOINT RESOLUTION 54

At the request of Mr. NICKLES, the names of the Senator from Arizona (Mr. DECONCINI), and the Senator from Connecticut (Mr. DODD) were added as cosponsors of Senate Joint Resolution 54, a joint resolution to authorize and request the President to designate the month of January 1984 as "National Eye Health Care Month."

SENATE CONCURRENT RESOLUTION 32

At the request of Mr. SPECTER, the name of the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of Senate Concurrent Resolution 32, a concurrent resolution to express the sense of the Congress concerning the legal minimum age for drinking and purchasing alcohol.

SENATE RESOLUTION 127

At the request of Mr. ANDREWS, the names of the Senator from South Carolina (Mr. THURMOND), the Senator from Wisconsin (Mr. KASTEN), the Senator from Connecticut (Mr. WEICKER), and the Senator from Kansas (Mrs. KASSEBAUM) were added as cosponsors of Senate Resolution 127, a resolution to make the Select Committee on Indian Affairs a permanent committee of the Senate.

SENATE CONCURRENT RESOLUTION 59—ORIGINAL RESOLUTION REPORTED RELATING TO THE CHANGING ROLE OF THE BOOK IN THE FUTURE

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original concurrent resolution; which was placed on the calendar:

S. CON. RES. 59

Whereas the Congress of the United States has built and nurtured a library preeminent in the world;

Whereas this library beginning as a small collection of books has now grown to over one hundred eighty million items in all formats encompassing all areas of knowledge;

Whereas eighteen million of these items are conventional books which throughout history have been the most powerful and democratizing learning device known to mankind;

Whereas the book is now among the least expensive and most widely accessible means to liberty and learning;

Whereas advances in technology over the last two decades have in many ways complemented the book as a learning tool;

Whereas rapidly advancing technologies and electronic printing and publishing are revolutionizing the world of learning and the role of the book in the future; and

Whereas the Congress in 1977 established the Center for the Book in the Library of Congress to study the development of the written record in our society: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That—

(1) a timely study of the changing role of the book in the future is highly desirable;

(2) the Congress authorizes the Librarian of Congress, under the auspices of the Center for the Book of the Library of Congress, to conduct such an inquiry;

(3) in conducting such a study, the Librarian of Congress shall seek the advice and assistance of persons highly knowledgeable about the role of the book in civilization and the influence of new technologies on the future of the book;

(4) such persons should include scholars, authors, educators, publishers, librarians, scientists, and individuals in computer technology, industry, and labor; and

(5) the Librarian of Congress should transmit the results of such a study to the Congress of the United States not later than December 1, 1984.

SENATE RESOLUTION 184—ORIGINAL RESOLUTION REPORTED RELATING TO THE SENATE PAGE PROGRAM

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 184

Resolved, That until otherwise hereafter provided for by law, there shall be paid out of the contingent fund of the Senate such amounts as may be necessary to enable the Secretary of the Senate to furnish educational services and related items for Senate Pages in accordance with this resolution.

SEC. 2. The Senate Page Program shall be administered by the Sergeant at Arms and Doorkeeper of the Senate and the Secretaries for the Majority and Minority of the Senate. All policy decisions regarding the operation of the Senate Page Program shall be made by the Senate Management Board, with the concurrence of the Majority and Minority Leaders of the Senate.

SEC. 3. In order to provide educational services and related items for Senate Pages, the Secretary of the Senate is authorized to enter into a contract, agreement, or other arrangement with the Board of Education of the District of Columbia, or to provide such educational services and items in such other manner as he may deem appropriate.

SEC. 4. The educational services under the Senate Page Program shall consist of an academic year comprising two terms, and a page serving in such program shall be in the 11th grade.

SEC. 5. This resolution shall take effect as of the date of its approval.

SENATE RESOLUTION 185—RELATING TO ESTABLISHMENT OF A SPECIAL COMMITTEE ON THE FAMILY, YOUTH, AND CHILDREN

Mr. DENTON (for himself, Mr. DECONCINI, and Mr. HATCH) submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 185

Resolved, That (a)(1) there is established a temporary special committee of the Senate to be known as the Special Committee on the Family, Youth, and Children (hereafter in this resolution referred to as the "special committee"). The special committee shall be composed of eleven members appointed by the President pro tempore from the recommendations of the Minority and Majority Leaders. Six members shall be appointed from the majority party and five members shall be appointed from the minority party.

(2) The President pro tempore shall designate a member of the special committee recommended by the Majority Leader to serve as chairman.

(b)(1) A majority of the members of the special committee shall constitute a quorum for the transaction of business, except that the special committee may fix a lesser number as a quorum for the purpose of taking sworn testimony.

(2) Vacancies in the membership of the special committee shall not affect the authority of the remaining members to execute the functions of the committee, and shall be filled in the same manner as original appointments are made.

(3) The special committee shall adopt rules of procedure not inconsistent with the rules of the Senate governing standing committees of the Senate.

(c) Service of a Senator as a member or as chairman of the special committee shall not be taken into account for the purposes of paragraph 4 of rule XXV of the Standing Rules of the Senate.

(d) The chairman may establish such subcommittees of the special committee as he considers appropriate, but each such subcommittee shall be composed of not less than four members.

SEC. 2. (a) It shall be the duty of the special committee to—

(1) make a full and complete study and investigation of the matters pertaining to the family, childhood and adolescence, including but not limited to, the problems of health (including child development and adolescent pregnancy), welfare (including child pornography and obscenity), education, marital relations, employment, economic policy, recreation, nutrition, adoption, foster care, and other problems of childhood, adolescence, and the welfare of families generally;

(2) study the use of all practicable means of encouraging the development of public and private programs and policies which will assist the family, youth or children; and

(3) review and recommendations relating to the family, youth or children made by the President or by any department or agency of the Federal Government.

(b) The special committee shall report to the Senate on the results of any investigation and review conducted under subsection (a) not later than March 31, 1984. The special committee shall submit a final report on the results of the investigation and review conducted pursuant to subsection (a) not later than November 30, 1984.

(c) No proposed legislation shall be referred to the special committee, and such committee shall not have the power to report by bill or otherwise have any legislative jurisdiction.

(d) After submission of its report pursuant to subsection (b), the special committee shall have 30 days to close its affairs and on the expiration of such 30-day period shall cease to exist.

SEC. 3. (a) For the purposes of this resolution, the special committee is authorized (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, (3) to hold hearings, (4) to sit and act at any time or place during the sessions, recesses, and adjourned periods of the Senate, (5) to require, by subpena or otherwise, the attendance of witnesses and the production of correspondence, books, papers, and documents, (6) to take depositions and other testimony, (7) to procure the services of individual consultants or organizations thereof, in accordance with the provisions of section 202(i) of the Legislative Reorganization Act of 1946, and (8) with the prior consent of the department or agency of the Federal Government concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) With the consent of the chairman of any other committee of the Senate, the special committee may utilize the facilities and the services of the staff of such other committee of the Senate, or any subcommittee thereof, whenever the chairman of the special committee determines that such action is necessary and appropriate.

(c) The chairman of the special committee or any member thereof may administer oaths to witnesses.

(d) Subpenas authorized by the special committee may be issued over the signature of the chairman or any member of the special committee designated by the chairman, and may be served by any person designated by the member signing the subpena.

SEC. 4. Expenses of the special committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the special committee, except that vouchers shall not be required for the disbursement of salaries of employees paid an annual rate.

Mr. DENTON. Mr. President, I am pleased today to submitting with my distinguished colleagues, Senators DECONCINI and HATCH, a resolution to establish a Senate Special Committee on Family, Youth, and Children. The committee would be a temporary committee composed of 11 members appointed by the President pro tempore of the Senate on the recommendations of the minority and majority leaders. The committee would have no legislative jurisdiction.

As I am sure many of my colleagues are keenly aware, the Senate for too many years now has lacked any vehicle for a comprehensive examination of policies, legislation, and national trends as they effect the well-being of our Nation's families and children. Our attention to the needs of families has at best been fragmented among an assortment of different legislative

committees and subcommittees. At worst, we have essentially ignored those needs. Yet one way or another, the policies which our Federal Government establishes by law or by regulation can play a major role in promoting either family unity or family disintegration; either a positive environment for children growing into adulthood or a negative one.

The family is now in a worse period of crisis than ever before in our Nation's history. Roughly one out of every two marriages now ends in divorce, and according to one estimate, single parent families are forming at 20 times the rate of two-parent families. One result of that unfortunate trend is that more and more children go without attention from a parent during the day, as increasing numbers of single mothers are forced into the work force to provide for children without help from a husband. Indeed, estimates show that close to 1 million children under age 5 are left without any adult care during the day.

The percentage of female-headed households has almost doubled since 1970, so that 19 percent of all households are now headed by women. The number of children living with only one parent has doubled since 1960 so that, according to one estimate, 45 percent of all children born in 1977 will live in a single-parent home at some time before reaching age 18.

The formation of families and the successful rearing of children have become more difficult than ever before. As healthy parental influence has diminished, we have seen the results in rising rates of juvenile problems, including teenage alcohol and drug abuse, adolescent pregnancy, teenage suicide, and juvenile delinquency. We see great confusion among our young people about direction and purpose in their lives.

Mr. President, the special committee I am proposing today would make a comprehensive study of matters affecting the family, childhood, and adolescence including, but not restricted to, problems of health, including child development and adolescent pregnancy; welfare, including child pornography; education, marriage, employment, economic policy, recreation, adoption, foster care, and other issues and problems. It would encourage and promote public and private policies and programs that assist families, youth and children.

I urge its prompt consideration.

Mr. DECONCINI. Mr. President, today I join my colleague, Senator DENTON in introducing a resolution calling for a Senate Special Committee on the Family, Youth, and Children.

The problems facing the family in America today are multifaceted and complex and because the problems are not simple, neither are the solutions. I believe that this special committee will give the Senate the opportunity to truly focus on these problems and at least begin the search for meaningful solutions.

The committee's purpose is to make a comprehensive overview of the family in America today. The committee will look at problems of employment, education, health, welfare, and economic policy and will report back to Congress by the end of 1984 with its findings.

The crisis of the family is neither a conservative nor a liberal issue. It is an issue which crosses party lines and ideologies. That is why I call on all of my colleagues in the Senate to join me in support of this resolution.

SENATE RESOLUTION 186—ORIGINAL RESOLUTION REPORTED TO PAY A GRATUITY TO KATHERINE C. AHLERS

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original legislation; which was placed on the calendar:

S. RES. 186

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Katherine C. Ahlers, widow of John C. Ahlers, an employee of the Senate at the time of his death, a sum equal to one year's compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

AMENDMENTS SUBMITTED

CRITICAL AGRICULTURAL MATERIALS

JEPSEN AMENDMENT NO. 2102

(Ordered to lie on the table.)

Mr. JEPSEN submitted three amendments intended to be proposed by him to the bill (H.R. 2733) to extend and improve the existing program of research, development, and demonstration in the production and manufacture of gauyule rubber, and to broaden such program to include other critical agricultural materials, as follows:

At the appropriate place in the bill, insert the following new section:

ANNOUNCEMENT OF ACREAGE LIMITATION AND SET-ASIDE PROGRAMS

SEC. . (a) Effective for the 1984 and 1985 crop of feed grains, the second sentence of section 105B(e)(1)(A) of the Agricultural Act of 1949 (7 U.S.C. 1444d(e)(1)(A)), as amended by section 124(1) of the Omnibus Budget Reconciliation Act of 1982, is amended by striking out "November 15" and inserting in lieu thereof "September 30".

(b) Effective for the 1985 crop of wheat, the second sentence of section 107B(e)(1)(A) of the Agricultural Act of 1949 (7 U.S.C. 1445b-1(e)(1)(A)), as amended by section 122(1) of the Omnibus Budget Reconciliation Act of 1982, is amended by striking out "August 15" and inserting in lieu thereof "July 1".

DAIRY PRICE SUPPORTS

JEPSEN AMENDMENT NO. 2103

(Ordered to lie on the table.)

Mr. JEPSEN submitted an amendment intended to be proposed by him to the bill (S. 1529) to stabilize a temporary imbalance in the supply and demand for dairy products, to enable milk producers to establish, finance, and carry out a coordinated program of dairy product promotion, to adjust the support levels for the 1983 and subsequent crops of tobacco, to make modifications in the tobacco production adjustment program, and for other purposes; as follows:

At the appropriate place in the bill, insert the following new section:

BARTER OF SURPLUS DAIRY PRODUCTS FOR STRATEGIC AND CRITICAL MATERIALS

SEC. . (a) Notwithstanding any other provision of law, during fiscal years 1984 and 1985, the Commodity Credit Corporation shall accept offers from individuals or commercial firms to exchange strategic and critical materials needed to meet unmet national goals established under the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.) for surplus dairy stocks owned by the Corporation if—

(1) such stocks will be exported;

(2) the value assigned to such stocks at the time of delivery is less than the world price at such time;

(3) the value assigned to such materials at the time of delivery is less than the world price at such time;

(4) the Secretary of Agriculture is reasonably assured that export markets for United States dairy products through commercial channels will not be displaced by such exchange; and

(5) such exchange will not result in the expenditure of funds by the Secretary or the Corporation other than for normal administrative costs.

(b) In carrying out subsection (a), the Corporation shall use in each of the fiscal years 1984 and 1985 a quantity of dairy products equal to—

(1) at least 15 percent of uncommitted surplus dairy stocks existing at the beginning of fiscal year 1984; or

(2) if the Corporation does not receive offers to exchange such quantity of dairy products, a quantity equal to the quantity of such stocks offered to be exchanged.

(c) the Corporation may—

(1) transfer strategic and critical materials acquired under this section to the National Defense Stockpile established under the Strategic and Critical Materials Stock Piling Act, and shall be reimbursed for such materials, in accordance with section 4(h) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714(h)); or

(2) retain possession of, and title to, such materials.

(d) No later than six months after the date of the enactment of the Dairy and Tobacco Adjustment Act of 1983, and each six months thereafter through fiscal year 1985, the Secretary of Agriculture shall submit a report to the Congress describing—

(1) exchanges made under this section during the previous six month period; and

(2) any offers for exchanges made under this section during such period which were rejected by the Corporation and the reasons for such rejection.

CRITICAL AGRICULTURAL MATERIALS

JEPSEN (AND KASSEBAUM) AMENDMENT NO. 2104

(Ordered to lie on the table.)

Mr. JEPSEN (for himself and Mrs. KASSEBAUM) submitted an amendment intended to be proposed by them to the bill H.R. 2733; as follows:

At the appropriate place in the bill, insert the following:

SEC. . (a) The Congress finds that—

(1) the United States balance of merchandise trade was a negative $31,800,000,000 in 1982;

(2) the United States share of world exports has declined from 15.4 per centum in 1970 to 13 per centum in 1982;

(3) one out of every eight United States manufacturing jobs is for export production and 20 per centum of our industrial production is exported;

(4) agriculture is the largest employer in the Nation providing for almost twenty-three million jobs, one million three hundred thousand of these being export related;

(5) the value of agricultural exports has dropped 18.9 per centum since 1981 and United States agricultural market share has dropped precipitously for such commodities as course grains, wheat, cottom, soybean meal and oil, rice, and poultry;

(6) increased ocean shipping costs will negate numerous United States efforts to promote exports;

(7) current world market conditions translate increased export prices into reduced income for domestic producers and lost United States sales abroad for such goods as agricultural products, coal, forest products, fertilizers, chemicals, ores and metals, and pulp and paper products;

(8) increased import costs for such goods as petroleum and other bulk materials will increase energy costs and production costs for the agricultural, fertilizer, iron and steel, rubber, textile, chemical, nonferrous refining, and paper industries;

(9) trade barriers have proven harmful to United States industry, labor, and consumers in the past;

(10) world bulk shipping capacity is currently in excess and is expected to remain so for at least the next decade;

(11) the effective United States controlled fleet, which is controlled by United States companies and subject to requisition by the United States Government, remains a strong and competitive force in the international ocean shipping industry;

(12) the United States merchant marine is uncompetitive in the world market with United States-flag bulk shipping costs as much as 300 per centum higher than the world average; and

(13) ocean shipping costs comprise a significant portion of import and export costs and these costs will be increased by expansion of cargo preference requirements.

(b) It is the sense of Congress that further expansion of cargo preference requirements, whether for commercial or other trade, is not in the interest of the United States and should not be imposed.

THURMOND AMENDMENT NO. 2105

(Ordered to lie on the table.)

Mr. THURMOND submitted an amendment intended to be proposed by him to the bill H.R. 2733, supra:

At the appropriate place in the bill, insert the following new section:

EXPANSION OF MILK MARKETING ORDERS

SEC. . Section 8c(17) of the Agricultural Adjustment act, as amended and reenacted by the Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 608c(17)), is amended by adding at the end thereof the following new sentence: "An amendment to a milk order that would expand the production area specified in such order shall not be effective unless the Secretary of Agriculture determines, in addition to other required findings and determinations, that such amendment is approved or favored by at least (A) a majority of the producers who, during a representative period determined by the Secretary, have been engaged, within the area proposed to be added to the existing production area, in the production for market of milk, and (B) two-thirds of the producers who, during a representative period determined by the Secretary, have been engaged, within the area composed of the existing production area and the area proposed to be added to the existing production area, in the production for market of milk.".

Mr. THURMOND. Mr. President, I am today submitting for printing in the RECORD an amendment I intend to offer to H.R. 2733, the agricultural target price bill, at an appropriate time.

The amendment requires that, before an existing Federal milk order may be expanded, a majority of the dairy farmers in the area to be annexed, as well as two-thirds of the dairy producers in the entire area to be included within the order, must approve the expansion in a referendum. Under the current law, only the latter requirement—two-thirds of the producers within the total area of the expanded order—applies.

Mr. President, this amendment simply provides a measure of additional democratic protection to dairy farmers within a State or part thereof proposed to be included within an expanded milk order. It insures that the prevailing will of dairy producers in the area to be annexed is not overwhelmed by the collective will of dairy farmers already operating under a Federal milk order, especially in cases where the latter substantially outnumber the former. This amendment applies only to the expansion of milk marketing orders and would not affect other commodities.

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources on S. 1701, to impose specific directives on the Bonneville Power Administration. The hearing will be held on Wednesday, August 3, beginning at 2 p.m. in room SD-366 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Gary Ellsworth of the committee staff at 224-5304.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Thursday, July 28, to continue the markup of S. 757, Solid Waste Disposal Act Amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, July 28, to consider the nominations of Paul Enns and Joseph Kyser to be members of the Federal Farm Credit Board.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Thursday, July 28, to conduct hearings with the House Committee on Energy and Commerce on local phone rate legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Friday, July 29, to conduct joint hearings with the House Committee on

Energy and Commerce on local phone rate legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Friday, July 29, to hold a hearing on S. 905, the National Archives and Records Administration Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Friday, July 29, to hold a code word briefing on the classified arms control issue.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Oversight of Government Management of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Friday, July 29, to continue hearings on oversight of the management of the Synthetic Fuels Corporation.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

BIRTHDAY TRIBUTE TO RED SKELTON

● Mr. QUAYLE. Mr. President, I am pleased for this occasion to bring to the attention of my Senate colleagues, a recent milestone in the life of one of Indiana's most favored sons: The 70th birthday of Red Skelton, a native of Vincennes, Ind., observed on July 18.

It is appropriate that we honor Red Skelton today and I am pleased to join him in a special visit to the White House to commemorate his birthday with the President.

Red Skelton has brought happiness and laughter to generations of Americans throughout a career that has spanned five decades. His comic talent was first enjoyed by audiences in vaudeville, carnivals, circuses, riverboats, and burlesque houses in the early years. Later, Red starred in radio and in over 40 motion pictures. From the 1950's through the 1970's, Red Skelton delighted new generations of TV audiences with his unique brand of humor, mime, and unforgettable characters. In addition, Red Skelton is a talented composer, short story writer, and a recognized painter. One of his favorite subjects: clown portraits, with shocking red hair.

Red Skelton has ably proved the adage that laughter is the best medicine. During World War II and the Korean war, he entertained U.S. troops overseas. He has been honored numerous times for his selfless contributions to the needy and disabled. Red Skelton's success in show business is equaled only by his universal appeal to all ages.

I believe it fitting that we pay tribute today to Red Skelton and I know my Senate colleagues join me in wishing him continued health, humor, and his special grace which brings us cheer.●

THE GUNS OF GUATEMALA

● Mr. INOUYE. Mr. President, in April of this year, the New Republic printed an article on Guatemala written by Allan Nairn. The events depicted in this article show a shocking disregard for human rights. Indeed, they demonstrate that many in positions of authority in Guatemala overtly dismiss the sanctity of human life. I am grateful to a constituent, Mr. Paul Henning of Waianae, Hawaii, for bringing this article to my attention. I believe each member of the Senate could benefit from a close reading of Mr. Nairn's article.

Therefore, Mr. President, I ask that the article, "The Guns of Guatemala," be printed in the CONGRESSIONAL RECORD.

The article follows:

[From the New Republic, Apr. 11, 1983]

THE GUNS OF GUATEMALA

(By Allan Nairn)

On April 20, 1982, government troops entered the village of Acul in Guatemala's northwest highlands. According to an eyewitness, "They searched the houses and pulled the people out, and took us to the churchyard. The lieutenant walked up and down, pointing at people, saying 'These will go to hell, these will go to heaven.' The ones he said would go to hell they took out to be shot. They tied them up and kicked them and gave them karate chops to the throat. One soldier had a big knife and he stuck it into their genitals and hacked them on the neck and on the back. The people were crying and crossing themselves. The soldiers pulled out one boy and put him up against the big tree. They said they were going to shoot him because he was against the government. They took the others to the cemetery with their hands tied behind their backs. They dug a big ditch and lined them up at the edge. We all had to come and watch. The lieutenant said they were going to be shot because 'you haven't educated your children, your children are going around with scum, and that doesn't suit us. But we're not going to throw their bodies on the roadside, we're just going to shoot them.' He said this was the new law of Ríos Montt. They shot each one with a bullet in the face from about a meter away. Parts of their brains spilled out and scattered into the ditch." By the end of the day twenty-four lay dead. The next day the troops killed twenty-two more.

According to figures compiled by Amnesty International, at least 12,000 unarmed civilians have died by violence in Guatemala since 1978. Last year Amnesty reported that 2,600 had been killed between July and March 23, when General Efrain Ríos Montt seized power in a military coup. By December, however, army massacres had become more sporadic and the pace of guerrilla raids had slackened. These developments were widely interpreted to mean that the government had begun to curb human rights abuses and had succeeded in crushing the guerrillas.

The interpretation was wrong on both counts. The number of massacres fell because the army had completed the first stage of a major operation designed to depopulate the rural villages that are the guerrillas' logistical and political base. The guerrilla's level of activity fell because their village support network had been disrupted. During this operation, I conducted interviews with several dozen soldiers and officers in the field, as well as with refugees and government officials. What they said points to the conclusion that Ríos Montt's strategy was based on organized killing, torture, and bombing of unarmed civilians—a round of carnage that can be expected to resume as soon as guerrilla activity reaches a sufficently threatening level. And far from crushing the guerrillas, the counterinsurgency drive has left their corps of armed combatants essentially intact, while sowing bitterness among the peasant survivors.

Ríos Montt, who was trained in counterinsurgency at Fort Bragg and served in 1973 as director of studies at the Pentagon's Inter-American Defense College in Washington, D.C., brought the Guatemalan Army back into the mainstream of international counterinsurgency theory. General Romeo Lucas García, whom Ríos Montt toppled in the coup, had attempted to fight the guerrillas with an uncoordinated series of rural massacres. In the urban areas Lucas undertook a campaign of assassinations that destroyed a powerful popular movement of trade unionists, professionals, clergy, students, slum dwellers, and moderate politicians; he recklessly continued these highly visible killings long after their political objective had been accomplished. Besides bringing international condemnation of Guatemala's human rights abuses, Lucas' actions actually increased guerrilla strength.

Ríos Montt curtailed the politically disastrous urban assassinations. He shifted to a program of centralized planning, local and international public relations, and, as an army strategy document put it, "establishment of a scheme for control of the population"—forced labor "civil patrols" used for road repair, surveillance, and army-led military forays. The cutting edge of the strategy was a series of province-by-province sweeps by massed troops to clear the tiny mountain villages and to resettle much of the population in army-controlled towns. The sweeps concentrated the killing in a few brief but fierce bursts. After the phalanx had run out of villages in one region and moved on to the next, it could be said that violence in the first region had diminished and human rights improved. By October this claim could be made for the country as a whole.

As the sweeps began, in provinces of Chimaltenango and Alta Verapaz and Baja Verapaz, the level of killing—the highest in Guatemalan history—shocked even traditionally reserved elements of the local establishment. "Not even the lives of old people, pregnant women, or innocent chil-

dren were respected," said Guatemala's Conference of Catholic Bishops in a May 27 pastoral letter. "Never in our history has it come to such grave extremes." In an unprecedented series of editorials in May, the conservative *El Gráfico*, the country's leading newspaper, stated: "Massacres have become the order of the day . . . How is it possible to behead an 8- or 9-year-old child? . . . We do not deserve aid as long as this keeps occurring."

At the same time, the United States Embassy was assuring visitors that human rights conditions had dramatically improved and that if abuses were occurring they were contrary to policy. By way of proof, they distributed copies of the army's "Code of Conduct Toward the Civil Population," a twelve-point guide to counterinsurgency etiquette that admonishes soldiers not to "flirt or take liberties with the women," and to "show special affection and respect for the aged and children."

On May 24 Ríos Montt set the stage for the sweeps through Quiché and Huehuetenango, the provinces with the heaviest guerrilla activity, by announcing that he would grant amnesty to all guerrillas and collaborators who turned themselves in before July 1. After the amnesty had expired, any resident of a village believed to be collaborating with the guerrillas would be considered fair game. On June 30 Ríos Montt declared on television that "today we are going to begin a merciless struggle," and issued a decree that ordered all men age 18 to 30 to present themselves for military service. The decree stated that the army would "proceed with a vigorous and firm military action to annihilate the subversion that has not understood the good intentions of the government."

According to soldiers and officers who participated in the action last July, August, and September, the sweeps were directed not at armed guerrillas but at civilians in villages suspected of guerrilla collaboration. Ríos Montt had outlined the rationale in a May 17 interview. "The problem of the war," he explained, "is not just a question of who is shooting. For each one who is shooting, there are ten working behind him."

According to Lieutenant Romeo Sierra, who commands a 20-man patrol base at La Perla, a northwest highlands plantation, the sweeps were directed from the top. Field commanders like Sierra receive their orders through a chain of command which places only three steps—the minister of defense, the army chief of staff, and a colonel in the provinical capital—between themselves and Ríos Montt. The commanders receive daily orders from the colonel, and maintain hourly radio contact with his headquarters. "I advise him that 'I'm going to Tutzuhil with twenty men.' He knows everything. Everything is controlled." All field actions must be reported in the commanders' daily "diary of operations," which is reviewed and criticized in monthly face-to-face evaluations. "We're on a very short leash," Serra said.

Sierra, who directed the sweeps through his patrol area of 20 square kilometers and 10,000 people, told me that thousands of civilians were displaced but that "in the time I've been here [two-and-a-half months] no subversives have fallen. Lots of unarmed people, women refugees, but we haven't had actual combat with guerrillas."

Each patrol officer, after describing the success of his sweep, would casually point to his local mountain and say that 50 to 75 guerrilla combatants were still at large. Lieutenant Sierra estimated that 70 guerrillas were moving in the mountains immediately surrounding La Perla. "There are lots of them around here," said Miguel Raimundo, a sergeant in Nebaj, a medium-sized army-occupied town south of La Perla. "It's hard to fight them. There are about 300 of them—the ones who fight."

Just outside Nebaj, more than 2,500 peasants had been resettled on an army airstrip. "They didn't want to leave voluntarily," explained Felipe, a corporal who manned the 50-caliber machine gun that dominated the town from the church belfry. "The government put out a call that they would have one month to turn themselves in. So now the army is in charge of going to get all the people from all these villages."

Sergeant Miguel Raimundo, who was guarding a group of 161 suspected guerrilla collaborators (which included 79 children and 42 women), said, "The problem is that almost all the village people are guerrillas." According to camp records, these peasants had been rounded up in army sweeps through the villages of Vijolom, Salquil Grande, Tjolom, Parramos Chiquito, Paob, Vixaj, Quejchip, and Xepium. Sergeant José Angel, who commands a 40-man platoon based at La Perla, explained the procedure. "Before we get to the village, we talk with the soldiers about what they should do and what they shouldn't do. They all discuss it so they have it in their minds. We coordinate it first—we ask, what is our mission?"

According to José Angel, "One patrol enters the village from one point, on another side another patrol enters. We go in before dawn, because everyone is sleeping. If we come in broad daylight they get scared, they see it's the army, and they run because they know the army is coming to get them."

The army has a policy about such behavior. "The people who are doing things outside the law run away," the sergeant said. "But the people who aren't doing anything, they stay." He said he had seen cases where "lots of them ran, most of a village. They ran because they knew the army was coming."

Miguel Raimundo cited three cases where villages fled en masse. "All the villages around here, like Salquil, Palob, or here in Sumal, they have a horn and there's a villager who watches the road. If the soldiers come, he blows the horn. It's a signal. They all go running."

For the soldiers, the killing of fleeing, unarmed civilians has become a matter of routine. I ask Felipe, the Nebaj corporal, how the villagers react when the troops arrive.

"They flee from their homes. They run for the mountain."

"And what do you do?

"Some we capture alive and others we can't capture alive. When they run and go into the mountains that obligates one to kill them."

"Why?"

"Because they might be guerrillas. If they don't run, the army is not going to kill them. It will protect them."

"Among those you have to kill, what kind of people are they? Are they men or women?"

"At times men, at times women."

"In which villages has this happened?"

"Oh, it's happened in lots of them. In Acul, Salquil, Sumal Chiquito, Sumal Grande."

"In those villages, about how many people did you kill?"

"Not many, a few."

"More than ten? More than twenty? More than a hundred?

"Oh no, about twenty."

"In each village?"

"Yes, of course. It's not many. More than that were captured alive."

José Angel, the sergeant at La Perla, recalled a similar experience in the village of Chumansan in the province of Quezaltenango. "When we went in, the people scattered," he said. "We had no choice but to shoot at them. We killed some. . . . Oh, about ten, no more. Most of them got away."

According to accounts from soldiers and survivors, the army follows a consistent step-by-step procedure after entering a village. First, Sergeant José Angel explained, "We go into a village and take the people out of their houses and search the houses." Among the items the soldiers look for are suspiciously large stocks of grain or beans. The army takes what it can use and burns the rest. Next, he said, "You ask informers who are the ones that are doing things, things outside the law. And that's when you round up the collaborators. And the collaborators—you question them, interrogate them, get them to speak the truth. Who have they been talking to? Who are the ones who have been coming to the village to speak with them?"

The interrogations are generally conducted in the village square with the entire population looking on. I asked José Angel how he questioned people. He replied, "Beat them to make them tell the truth, hurt them."

"With what methods?"

"This one, like this [he wraps his hands around his neck and makes a choking sound]. More or less hanging them."

"With what?"

"With a lasso. Each soldier has his lasso."

The day before, in Nebaj, an infantryman who was standing over the bodies of four guerrillas who had been executed a few hours before demonstrated the interrogation technique he had learned in "Cobra," an army counterinsurgency course for field troops. "Tie them like this," he said, "tie the hands behind, run the cord here [around the neck] and press with a boot [on the chest]. Knot it, and make a tourniquet with a stick, and when they're dying you give it another twist and you ask them again, and if they still don't want to answer you do it again until they talk." According to sergeants and infantrymen of Nebaj and La Perla, the tourniquet is the most common interrogation technique. Live burial and mutilation by machete are also used.

The director of an ambulance squad in one of Guatemala's largest provinces said that roughly 80 percent of the bodies recovered by his unit have their hands tied behind their backs and show signs of strangulation. The bodies are usually naked and have been finished off by 5.56 millimeter bullets (the kind used in the army's assault rifles) fired at close range into the chest, or by puncture wounds to the neck, generally consisting of four intersecting slices, characteristic of the army's four-flanged bayonet.

The soldiers said they expect those they question to provide specific information, such as the names of villagers who have talked with or given food to guerrillas. Failure to do so implies guilt, and brings immediate judgment and action. "Almost everyone in the villages is a collaborator," said Sergeant Miguel Raimundo. "They don't say anything. They would rather die than talk."

When I asked Miguel Raimundo about the interrogation method, he replied: "We say, if you tell us where the guerrillas are, the army won't kill you. . . . If they collaborate with the army, we don't do anything."

"And if they don't say anything?"

"Well, then they say, 'if you kill me, kill me—because I don't know anything,' and we know they're guerrillas.

They prefer to die rather than say where the compañeros are."

According to Sergeant José Angel, it is common for suspected collaborators to be pointed out, questioned, and executed all on the same day. Explaining how he extracted information so quickly, he said, "Well, they don't talk like that voluntarily. You just have to subdue them a little to make them speak the truth."

After the interrogations have been completed, the patrol leader makes a speech to the survivors gathered in the village square.

"We tell the people to change the road they are on, because the road they are on is bad," said José Angel. "If they don't change, there is nothing else to do but kill them."

"So you kill them on the spot?"

"Yes, sure. If they don't want the good, there's nothing more to do but bomb their houses."

José Angel said he had participated in operations of this kind in the provinces of Sololá and Quezaltenango in which more than 500 people were killed. He and other soldiers said that smaller villages are destroyed with Spanish, Israeli, and U.S.-made grenades. Boxes of these grenades could be seen stacked in the Nebaj ammunition dump. The soldiers said they also used a 3.5-inch U.S.-made shoulder-held recoilless rocket that was designed as an antitank weapon but is effective against people and straw huts. At the La Perla headquarters, one such launcher was sitting next to boxes of "explosive projectile" rockets from the Iowa Army Ammunition Plant.

For larger operations, José Angel said, patrols called in army planes and helicopters to bomb the villages. The helicopters are U.S.-manufactured Hueys and Jet Rangers. (Until January 1983, when the State Department rescinded the Carter Administration's 1977 ban, the sale of spare parts for the helicopters had been withheld on human rights grounds.) The bombs include U.S.-made 50-kilogram M1/61As, twelve of which were stacked in the base munitions dump in Nebaj. José Angel said he had seen such bombs dropped from Huey helicopters in Pujujil and the surrounding cantons in Sololá. The ambulance squad leader cited six cases in his province where survivors told of being bombed from planes and from blue and white (the color of the Jet Rangers) helicopters. He said he had observed craters, shattered houses, and trees marked with heavy shrapnel. On December 8, at the graduation ceremonies of the Military Aviation School, the army gave a public demonstration of bombing from Huey helicopters.

The American Embassy would neither confirm nor deny that U.S. helicopters were being used for bombing, but a senior diplomat said that if they were, it would not be a violation of U.S. intent. "If you're engaged in a war, you bomb and you strafe," the official said. "If you have a fort you've got to take out, you save lives. That's what we did in World War I and World War II."

Some Guatemalan officers contend that although helicopters are widely used for bombing, they are of greater tactical importance for surprise entry. "When you go in on foot," said Lieutenant Cesar Bonilla, the officer in charge of the villagers resettled at the Nebaj airstrip, "they see the patrol three kilometers away and know you're coming. But with air transport, you land different units in the area, all the units close in rapidly, and the people can't go running away."

Bonilla said that this type of operation could only be executed by several helicopters at once. "With just one helicopter you scare them away and there's no control." The United States' refusal to sell spare parts had grounded much of the fleet, so Lieutenant Bonilla was encouraged by reports that the Reagan Administration was considering a change in policy. "That would be wonderful," he said, "With six helicopters, for example, the airborne troops would land all at once before they could make a move. The nicest, the ideal, the dream, would be a surprise: suddenly, pow! Helicopters with troops!" As he spoke, he made machine-gun noises and waved his Galil toward the refugee shacks. "Ta, ta, ta, ta, ta! All at once from the air! Pow! No escape routes. That would be ideal."

The day before this conversation, a peasant family in Bonilla's camp, interviewed in their shack outside the view of soldiers, described such an assault on their village. "Two times they came there in helicopters," said one of the men. "They would come in and land and the people would retire and they would always kill a few. They flew over, machine-gunning people from the helicopter." The family said that five were killed in the strafing.

This family, like its neighbors, was moved out of its village and told that the army would provide for its security, food, and housing. This is the "beans" component of General Ríos Montt's heralded "beans and rifles" program. Removed from their houses and fields, the people must depend on the army. Such relocations are a standard counterinsurgency tactic. Ríos Montt, however, has succeeded in portraying them as part of an economic reform program. The relocations make the army the well-publicized partner of international organizations that answer the government's plea to aid the villagers. Many foreign observers, unfamiliar with how and why the army resettled the people, are impressed by the sight of an army feeding and housing a peasantry it has been accused of massacring.

By September the sweep was coming to an end, and the next stage of the operation was beginning. "Up here there aren't any villages anymore," said José Angel, speaking of the patrol areas around La Perla. "There used to be, but then the soldiers came. We knew that such and such a village was involved, so went to get them. We captured some and the rest of the people from the village ran away. They're hiding in the mountains. Now we're going to the mountains to look for them.

Going into the mountains to track down refugees meant going into guerrilla territory. According to the soldiers and refugees who have come down from the mountains, many villagers fleeing the army wander through the hills alone, armed only with machetes and an occasional hunting shotgun. But some make contact with guerrilla patrols that act as their guides, sometimes sending them toward the relative safety of the Mexican border.

In some regions, the army has abandoned armed pursuit in favor of a strategy of waiting until hunger and disease flush out the villagers, who must live off weeds, roots, and quick-growing vegetables while staying constantly on the move. This tactic scored its first major success in mid-October, when several thousand refugees from the San Martín Jilotepeque area in Chimaltenango, many of whom had been in the hills since February following a series of massacres during the Lucas period, came down and surrendered to the army, asking for food. Nobody knows how many refugees are in the mountains. In May, before the Quiché and the Huehuetenango sweeps, the Conference of Catholic Bishops estimated that the number of refugees (not all of whom are living in the mountains) exceeded one million. Guatemala's total population is seven million.

Major Tito Arías, commander of the Nebaj base, said in mid-September that 2,000 people from the area of Sumal Grande had fled to the mountains and would be pursued by foot patrols and helicopters. Sergeant José Angel said his platoon went on such operations frequently. I asked José Angel what his troops did when they find refugees.

"At times we don't find them. We see them but they get away."

"But when you do find them, what do you do?"

"Oh, we kill them."

"Are they a few people or entire villages?"

"No, entire villages. When we entered the villages we killed some and the rest ran away."

Under the army's policy, a peasant found outside the army-controlled towns can be in mortal danger. "We know the poor people from close up and far away," said Sergeant Miguel Raimundo. "If we see someone walking in the mountains, that means he is a subversive. So we try to grab him and ask where he's going; we arrest him. And then we see if he is a guerrilla or not. But those who always walk in the mountains, we know they are guerrillas. Maybe some of them will be children, but we know that they are subversive delinquents. I've been walking in the mountains for a year now, and just in the mountains, one by one, we've captured more than 500 people."

Like his fellow sergeants and lieutenants, Miguel Raimundo is comfortable with the army's assumptions. "A woman told me yesterday that the soldiers kill people, that the soldiers killed her husband. But I told her that if the soldiers killed her husband it was because he was a guerrilla. The soldier knows whom to kill. He doesn't kill the innocent, just the guilty. And she said, 'No, my husband wasn't doing anything.' So I said, 'And how do you know it was nothing? How do you know what he was doing outside?' 'No,' she said, 'because he never went anywhere.' 'Yes,' I said, 'That's because he was a collaborator.' "

It is possible that Ríos Montt's strategy will succeed in isolating and demoralizing the guerrillas. But it is more likely that it will end up strengthening them. For all the relative sophistication of Ríos Montt's approach, it has relied largely on violence directed at the civilian population. And it was such violence, after all, that made the guerrillas a threat in the first place. In 1967 and 1968, the Guatemalan Army, assisted by U.S. advisers, did succeed in defeating the guerrillas of the eastern provinces of Zacapa and Izabal with a campaign that took 5,000 to 10,000 civilian lives. But those insurgents numbered only a few hundred and were poorly organized. By 1978 the guerrillas had reorganized, established political links with the peasantry, and expanded their combat force. When the army began killing peas-

ants whom speculators were evicting from the land, the guerrillas were ready to take advantage of the resulting popular resentment. It was Lucas's counterinsurgency campaign that made the difference. His massacres and assassinations sent the guerrillas waves of new recruits and transformed them from a militarily marginal force into a powerful movement.

Severe as Lucas's spasms of violence were, however, they pale in comparison to the death and dislocation sown by Rios Montt's systematic sweeps. Today there are tens of thousands of Guatemalans roaming the mountainsides and living in the villages and camps who have lost husbands, wives, parents, children, friends, and homes, and who carry with them graphic memories of a brutal encounter with their government. Ríos Montt's destruction of the rural social structure has set back the guerrillas, but has left them alive to organize and fight another day.

On March 23, the anniversary of his coup, Ríos Montt modified the state of siege. Speaking on television in the wake of the Pope's visit, the General, who is an evangelical Protestant, said, "We know and understand that we have sinned, that we have abused power, and we want to reconcile ourselves with the people." Ríos Montt has talked this way before, even while directing the bloodiest of his military campaigns. And it is hard to see how any kind of reconciliation can be achieved without the kind of basic political and economic changes that have been steadfastly resisted ever since a C.I.A.-sponsored coup brought the military to power in 1954. It is equally hard to see how such changes can be made as long as the army and the oligarchs continue to rule.

Neither Efraín Ríos Montt nor the officers and politicians constantly plotting to replace him can expect ultimately to achieve a military victory. They are more likely to find themselves on a downward spiral—having to kill more and more to stave off the consequences of the killing they have done before. Whether the guerrillas succeed in using this situation to fashion a victory of their own is another question. But it appears that given the logic of the Guatemalan struggle, the war is theirs for the losing.●

A BAD IDEA FOR TESTING

● Mr. GOLDWATER. Mr. President, for anyone sitting outside the operation of the military, particularly the operation of the Pentagon, it is not difficult at all to come up with places where money might be saved. Even with all of my background in the military and with my association with the Pentagon, I could come up with ideas that I think might work. Some of them do, but most of them do not.

The case in point I want to address today appeared in Aviation Week and Space Technology July 25, and it is entitled, "A Bad Idea for Testing."

There is no question in my mind that any person who has never been close to, observed or participated in the testing of complicated military equipment can figure that there could be a better way to do it. Having lived through the process for a long time, I can say, flatly, that there is not, if you want to get the real results. Let us say we are going to test something that sounds as simple as a radio to handle communications. This sound simple, yes; but the most important part of our world, whether it is military or civilian, in communications then becomes the question of: How will this piece of equipment operate under all degrees of heat, under all degrees of usage, with the use of the equipment by people who have never even seen a radio set before?

I cite a radio because it is a common thing. But, when you get into a complicated piece of equipment like an airplane it is not all that simple.

I am not going to go into great lengths about the testing of an aircraft. This is laid out in great detail and at great length, by a myriad of engineers, academics, test pilots, and so forth, whose every movement and every movement of the aircraft is carefully recorded by telemetry which is studied and restudied. Books could be and have been written on what has been found out about the testing of any one aircraft.

I mention these things because I am acquainted with them. But, I think it would be well for the Members of the Congress to read the article by William Gregory on this subject pointing out that congressional monitoring of testing would be a very dangerous and a very bad mistake.

I ask that the article I refer to be printed in the RECORD.

The article follows:

[From Aviation Week & Space Technology, July 25, 1983]

A BAD IDEA FOR TESTING

(By William H. Gregory)

Independent testing of weapons systems as an idea buzzed around a small circle in Congress this spring as a new solution to the problem of waste in military procurement—something the services have been convicted of by consensus. In the throes of trying to get a Fiscal 1984 budget authorization out of the Senate before the August recess, and to save funding for the MX, Senate leadership accepted the independent test force idea as a compromise—at least for the moment.

There are a lot of things wrong with this palliative. The worst is that it will slow down systems development a year or two at least, and development already has become an excruciatingly long process. Ten years is the going average.

Part of the slowdown will come from grafting onto the testing process of one more agency that must at least go through the motions of doing the job Congress mandated it to do. A more insidious time waster will be the way the existence of such a super agency—the bill proposes to make it part of the Defense Dept.—will further paralyze the decision-making process. Program managers are being second guessed more than sufficiently now by the multilayered management system in the Pentagon, by Congress and by its investigative arm, The General Accounting Office. One more layer of review will encourage even less boldness by program directors than the existing system does.

CONGRESSIONAL MONITORING

One of the sponsors of the independent testing agency is Rep. James A. Courter (R.-N.J.), who is cochairman of the military Reform Caucus, which is not antidefense but which is generating its own personal favorite policies for how the country should be defended. Courter is calling on Congress to improve military testing procedures as a means of improving its own monitoring of the weapons-acquisition process.

"This can be done," Courter contends, "by creating a new office in the Defense Dept. which would issue reports to Congress and the secretary of Defense on the adequacy of testing in major defense programs before the decision to begin full-scale production is made. . . . The imposition of strict standards on operational testing, coupled with the knowledge that an independent report on testing will be made to Congress, will be a strong impetus to eliminate success-oriented test procedures."

Not only would Courter's idea paralyze the program manager in his decision making, but it would also strike at the introduction of new technology itself. Instead of eliminating success-oriented testing, as Courter suggests, the creation of a super agency to audit test programs would do just the opposite. It would place incentives for program managers, and the services generally to play the acquisition game just as safely as possible. The obvious way to play the acquisition game as safely as possible is to stick to well-proven technology.

There is a story told that the late aerodynamicist Theodore von Karman once wrote to a program manager of an advanced missile system to this effect: "I see that you have had six successful test flights in a row. This tells me that you are being too cautious." Six successful test flights in a row is exactly the goal every program manager would strive for, not to mention every service chief, if he knew he were to face a grilling by Congress on the conduct of a test program. For better or for worse, the independent test agency idea will inject Congress into the details of weapons testing.

FAILURE-ORIENTED TESTING

Courter is right about one thing. Success-oriented test programs are not the way to test weapons. Failure-oriented testing is the way to find out what is wrong before a weapon system goes into the field, but a super watchdog agency with a mandate from Congress is the last way in the world to encourage failure-oriented testing.

The services already do independent testing. The Navy has its operational evaluation squadrons with pilots drawn from the fleet, and the Air Force has its Air Force Test and Evaluation Center at Kirtland AFB, N.M., which reports to the Pentagon rather than to its acquisition command. The Navy's OpEval of the McDonnell Douglas F-18 was hardly a whitewash. Try finding a test pilot anywhere who minces words about an aircraft he is evaluating. Testing by the services has singled out the problems that Congress now complains about.

Much of the new-found expertise being passed about in Congress on weapons testing starts from a false premise: that testing in a noncombat situation can ever simulate precisely how a system will perform under fire. The whole history of World War 2 for the U.S. was a case of finding out in the first year what worked in combat and using that experience to develop the hardware that did finally win on the battlefield. Some weapons developed in peacetime do work in

battle and some do not, but the idea that testing can do the kind of winnowing combat does if only a super agency keeps tab on the testers is a delusion.

If Congress wants to do something useful in the weapons testing field, it could look at the question of user participation in the testing process. The services have supported such participation for years, but the reliability problems of advanced weapons systems raise the question of whether the difficulties in blending user requirements with advanced technology and development and production realities need further attention. Congress should look carefully at the independent testing it has before adding to the bureaucracy.●

COMPUTER EDUCATION FOR ALL CHILDREN

● Mr. LAUTENBERG. Mr. President, a number of newspapers in my State of New Jersey and around the country have recently commented editorially on the issue of equal access to programs of computer learning for all children, rich and poor alike. This is an issue which concerns me greatly. While great strides are being made in the development of educational programs using computers, and the number of schools which are equipped with computers is growing at a fast clip, these benefits are not evenly distributed across all schools. Evidence is already available to show that schools in poor areas are not keeping up with more affluent schools. This is a problem to which the Congress must be sensitive.

The Senate will soon be considering a bill to improve science and mathematics instruction, the Education for Economic Security Act. The bill will provide assistance to strengthen teachers' skills in computer education. It will be very important that teachers in disadvantaged areas make use of this assistance to prepare themselves to provide computer education programs in their schools. I believe that children in all socioeconomic groups can benefit greatly from computer education, to learn basic skills and prepare for their future. As the Christian Science Monitor recently noted metaphorically, ". . . children without water can hardly learn to swim."

Mr. President, I ask that a number of editorials discussing the need for computer education for all children be printed in the RECORD for the information of my colleagues.

The editorials follow:

[From the Trenton Times]

GETTING ON LINE

"The concept of computer illiteracy defines a new type of illiteracy, and the potential for new and distressing divisions in our society."

Sen. Frank R. Lautenberg, in his maiden speech in the U.S. Senate, took hold of a problem we are going to have to deal with.

Lautenberg cited U.S. Office of Technology studies that show that almost 70 percent of wealthy school districts now have microcomputers for students; 60 percent of poor school districts don't. The number of home computers doubled in the past year. "Those computers are being acquired by the affluent, reinforcing disparities of opportunity," he said. ". . . In a nation that is plugged into computers, questions of success and failure may become questions of who is online and who is off-line."

A computer represents a large investment for a school district or a home, and it does not have an immediate payback. But if being able to use one is the key to getting a job in the future, people unable to make the investment will be unemployed, society's wards.

Lautenberg was sounding a "theme," not offering detailed solutions in this first speech. It's a new theme. He promised during the campaign he would be taking a longer vision than is customary in Congress, and with this speech he surely did.

The problem he is pointing to won't hit with its full fury until this school generation is in the job market. By then we may have lost part of a generation to computer illiteracy. The time to act to prevent that is now.

As a matter of equality of opportunity, we have to be sure our schools are graduating people who are "on-line" with computers.

[The New York Times, June 12, 1983]

HAVE-NOTS OF THE NEW ERA

Twenty years ago, C. P. Snow foresaw a "gulf of mutual incomprehension" separating literary intellectuals and scientists. In his maiden speech in the Senate last week, Frank R. Lautenberg, Democrat of New Jersey, said a similar gulf now separates computer literates and illiterates—meaning, all too often, children in wealthy school districts and children in poor ones.

In describing "the potential for new and distressing divisions in our society," Mr. Lautenberg put before lawmakers what has so far been primarily a scholarly concern. He spoke as an expert, having founded the nation's larges data-processing firm.

The results of recent studies support Mr. Lautenberg's warning that in an age demanding computer literacy, students from low-income families may be disenfranchised. A 1982-83 survey, conducted by the Center for Social Organization of Schools at Johns Hopkins University, found 67 percent of public schools in wealthier districts (those with no more than 10 percent of families below the poverty line) had microcomputers; only 41 percent of schools in poorer districts (with 21 percent or more families living in poverty) had them.

[From the Christian Science Monitor, June 9, 1983]

COMPUTERS AND THE POOR

Americans have received fresh warning that a new class of poor people could be created by lack of equal opportunity for computer learning in America's public schools. At the same time they are hearing of organizations and individuals dedicated to preventing such an outcome.

A leader among these organizations is the Minnesota Educational Computer Consortium with its goal of ensuring equal access to computers for every student from rich suburbs to poor rural districts. The consortium and its ripple effects are described elsewhere in today's Monitor.

As for individuals, a senatorial champion with the highest relevant credentials has emerged to join the cry against leaving poor children out of the computer revolution. He is freshman Frank Lautenberg (D) of New Jersey, former head of Automatic Data Processing, who used his maiden speech this week to stake out the effects of "the information age" as a framework for his Senate tenure.

Without doubt Congress can benefit from the focus of such a qualified individual on the rising importance of information in all forms—both for those who draw on it and for those with the skills and resources to control and purvey it. Many matters beyond education—privacy, security, manipulation—have to be addressed as information technology burgeons. But Mr. Lautenberg was on the mark in warning at the outset that, without equal opportunity for "computer literacy," a new class of poor people could be created.

As it is, he noted, computers are proliferating in the homes and schools of the affluent, while schools in poor districts average 25 percent fewer computers than other schools. The urgency of correcting the situation is suggested by another event drawing attention to the need. It is the start of Project Athena, a $70 million academic-industrial experiment to overhaul university teaching, with computers as the textbooks of the future. The Massachusetts Institute of Technology—allied with two computer manufacturers in the venture—compares it to previous MIT projects revamping whole academic fields with new sets of texts. In some cases a computer disk might be packaged in the cover of a textbook; it could simulate processes otherwise requiring much time and expense.

Since MIT's faculty includes at least one notable skeptic about computer teaching, particularly for young children, Project Athena will no doubt take account of pitfalls as well as promise in its assignment. But its thrust toward computerization appears in one form or another on many campuses.

The point for us—and presumably Senator Lautenberg—is that computer skills, like reading skills, are soon going to be taken for granted in higher education as well as in a growing number of workplaces. Students at lower levels without access to learning these skills will be just as surely discriminated against as those suffering any other denial of equal opportunity.

Fortunately the challenge is not going unnoticed. More evidence has come in since our editorial, "Children and computers" and the Monitor's special education section on computers (April 15).

There are examples on our own Massachusetts doorstep. In the fall a Cambridge magnet school will teach computers from kindergarten to eighth grade. The University of Massachusetts offers scholarships and other incentives to science students in exchange for agreeing to teach in public schools.

All this may be news more to parents than to young people taking to computers like ducks to water. But it cannot be said too often that children without water can hardly learn to swim.

[From the Washington Post, July 2, 1983]

COMPUTERS COST, MR. PRESIDENT

(By Ellen Goodman)

BOSTON.—At times I have the unhappy feeling that the president of the United States is suffering from computer illiteracy. He doesn't seem to speak the lingo of LOGO. He keeps talking about going back to basics instead of forward to BASIC.

Anyone following his political teaching across the country these weeks—if this is Wednesday, it must be Louisville—would suspect that he is living in the Misinformation Age. He maintains our education problems won't be solved by more money but by getting our money's worth for what we already spend. The target may be excellence but it's not one he thinks we should throw dollars at.

From where I sit, however, in front of a video display terminal, the notion that he can cut the federal funds for education and raise the tide of mediocrity qualifies as Voodoo Education.

It's true that money can't buy the love of learning. There is much that can be done with no more loose change than a change of mind. But if you want a hint of the true cost of getting our education system up to date and up to speed, try computing it.

There's little doubt about the need and value of preparing the next generation for their high-tech futures. Even the president noted it in his State of the Union Address last winter.

Sen. Frank Lautenberg (D-N.J.), the high-tech son of a man who worked in a textile mill that doesn't exist any longer, also talked about it in a speech to the Senate this month. He brought it down to the academic level. "In an age that demands computer literacy," he said, "a school without a computer is like a school without a library."

At the moment, there are a lot of schools without these "libraries." For all the talk of an "explosion" of computer use in education, there are no more than 250,000 terminals and microcomputers for 45 million schoolchildren. If kids are to get skills in using computers as a tool—which is what a vast proportion will do as adults—they need more than a few minutes a week, more than one computer for every 180 students.

Marc Tucker of the Carnegie Project on Information Technology and Education calculates the idea formula this way: "Suppose we want a reasonably capable computer for every four students and we have 40 million children in public schools. We need, then, 10 million work stations. With that kind of market, the price of this machinery might go to, say, $1,000 a station. That adds up to $10 billion. Assume again, that the state and local people pay for half. The bill still comes to $5 billion."

This may be pie-in-the-sky stuff, but any significant plan is going to cost plenty. As Tucker says, "There is no way on God's green Earth that we'll be able to do this without very significant federal assistance."

Computers are obviously not the magic solution to the woes of education. It's as easy to misuse a computer as a slide projector. Computers are just machines, and schools are just day-care centers if they don't attract high-quality teachers and caring administrators. But they do offer one small, concrete example of real costs.

The cost of buying this hardware and software also says something about fairness, about the gap between rich kids and poor kids and how they are affected by the gap between rich schools and poor schools.

Lautenberg, who comes from a state with the third highest per-capita income and some of the poorest cities, notes that a full 70 percent of wealthy schools in the country have computers, while 60 percent of poor schools have none. Not surprisingly, the school systems in wealthy and technologically sophisticated areas are gaining an advantage, increasing their side of the gap.

What's the role of the federal government in this? Since the early '60s, the government has played a part in equalizing opportunities, narrowing the gap. The Reagan administration has turned away from that role in and out of education, but it's a part of our heritage and our future.

Most of us talk about computers as education tools and as part of the transforming economy. The two—national education and the national economy—are simply inseparable.

Ideally, as Marc Tucker fantasizes the future, "If they were the right sort of machines, designed to be used in schools, with trained teachers, we'd have an extraordinary improvement in reading and writing. Kids would be able to handle data, use it, analyze it, understand it, which would make an extraordinary contribution to our ability to compete with other countries."

You can't do what with mirrors.●

COMMENDATIONS FOR INTERCEPT OF DRUG SMUGGLERS

● Mr. CHILES. Mr. President, I would like to take this opportunity to applaud and commend the commanders and crew of the destroyer U.S.S. *Kidd* and the Coast Guard law enforcement team, known as a TACLET, who were aboard the *Kidd* when it recently intercepted, stopped, and secured a drug trafficking vessel ladened with approximately 35 tons of marihuana estimated to be worth $23 million.

I think it is important that all of us who are involved in the fight against drugs here at home take notice of this superb performance by the Coast Guard and the Navy. On very short notice and in a potentially sticky situation, a historical precedent was set and successfully carried out. This is the first case since we amended the Posse Comitatus laws where a U.S. military vessel, working under the tactical control of the Coast Guard, has used disabling fire on a vessel involved in drug smuggling.

During the current and planned manuevers in and around the Carribean, it is my hope that more Coast Guard TACLET teams are put to use aboard Navy vessels. While we are intercepting gunrunners, we might as well catch a few drugrunners, too.

Mr. President, I ask to insert in the RECORD a copy of the July 16, 1983, statement released by the U.S. Atlantic Fleet Headquarters of the Commander in Chief about this incident.

The statement follows:

[News release]

U.S.S. "KIDD" ASSISTS COAST GUARD

A U.S. Coast Guard TACLET embarked onboard U.S.S. *Kidd*, a United States Navy guided missile destroyer, stopped and boarded a vessel for suspected drug smuggling into the United States today. The vessel, the merchant ship *Ranger*, is a 70-foot-long steel-hulled cargo carrier.

After visual signals and voice communication failed to halt the *Ranger* early last night, the Commanding Officer of the U.S.S. *Kidd*, acting with the approval of the Commander, Coast Guard District Seven, in Miami, Fla., fired warning shots from the ship's 50-caliber guns to attempt in bringing the *Ranger* to a halt for boarding.

At approximately 7:30 a.m. this morning, when all other means failed to halt the *Ranger*, the Commanding Officer of U.S.S. *Kidd*, acting with the approval of the Commander of the Coast Guard District, took action to disable the vessel. Eighteen inert rounds from the ship's guns were directed at the rear of the vessel to bring the *Ranger* to a halt for boarding. Every effort was made to minimize property damage, and there was no report of personnel injury.

The *Ranger* was boarded by the Coast guard TACLET and seized when illegal drugs were found. The crew was arrested and the vessel seized approximately 450 miles east of Miami, Fla., at 8:35 a.m. this morning. U.S.S. *Kidd* was operating under tactical control of the Commander, U.S. Coast Guard District Seven at the time of the boarding. The boarding was conducted by the senior Coast Guard boarding officer, acting in accordance with current Coast Guard directives and policy.

This operation is a result of President Reagan's commitment to strengthen Drug Interdiction efforts through the South Florida Task Force, headed by Vice President Bush. The specific administrative and logistic details of Navy operations in support of the U.S. Coast Guard were coordinated by the Secretary of Transportation, the Secretary of Defense, and the Secretary of the Navy.

The *Ranger* will be escorted to San Juan, Puerto Rico by the Coast Guard Bouy Tender USCGC *Sagebrush* and will arrive at approximately noon on Tuesday, July 19.

U.S.S. *Kidd* is commanded by Navy Commander William J. Flanagan, Jr., and is homeported in Norfolk, Va. U.S.S. *Kidd* was flying the U.S. Coast Guard Ensign during the course of this operation.●

TUITION TAX CREDITS

● Mr. BOREN. Mr. President, I wish to focus the Senate's attention today on the issue of tuition tax credits for parents who send their children to private schools. I believe such credits would be bad policy for several reasons.

First, tuition tax credits will lead to the destruction of fundamental principles of equality in which Americans have always believed. The Equal Opportunity Act of 1983 is ironically named: Instead of contributing to an educational system that will serve as an "open door" through which all children regardless of race, creed, or economic background can pass, the educational system will become "two-tiered." If this legislation is adopted, the most promising and brightest students will be skimmed from our public schools and placed in private schools. Such skimming will defeat one of the primary purposes of the public school system—the goal of providing all children an equal chance to enter the mainstream of American life and to achieve success.

I am also opposed to tuition tax credits because of their excessive cost. At a time of record budget deficits and diminished Federal support for public education, it would be irresponsible to enact tuition tax credits and drain ad-

ditional billions of dollars from the Federal Treasury.

Recently, I received a letter from former Senator Sam Ervin, Jr., of North Carolina, in which he outlined his reasons for being opposed to tuition tax credits. While in the Senate, Sam Ervin was a strong supporter of public education.

In an open letter to the President last year, Senator Ervin discussed in some detail why he believes tuition tax credits are a bad idea. In the same letter, he makes a forceful argument challenging their constitutionality. He also discussed this latter point in remarks delivered to the National Press Club on March 16, 1983.

I believe the issues raised in these papers by Senator Ervin are important ones for the Senate to consider. I therefore ask that the letter and the remarks of Senator Ervin be printed in the RECORD.

The material follows:

SAM J. ERVIN, JR.,
Morganton, N.C., April 20, 1982.

AN OPEN LETTER TO PRESIDENT RONALD REAGAN FROM FORMER SENATOR SAM ERVIN

Re the tuition tax credit.

The PRESIDENT,
The White House
Washington, D.C.

DEAR MR. PRESIDENT: When they send their children to parochial and private schools which teach religion, parents are primarily motivated by their understandable desire to have them instructed in the religious faith of their churches.

No matter how worthy your motive for urging it may be, the proposal that Congress grant these parents credit on their federal income taxes for the tuition they pay to these schools is indefensible for three reasons. It is unwise; it is unjust; it is unconstitutional.

WHY THE PROPOSAL IS UNWISE

The proposal is unwise because it is repugnant to good government, sound economics, and true religion.

Government owes the people specific obligations, which require substantial taxes to finance them. The teaching or the financing of the teaching of religion is not one of them. But public education is.

Apart from its constitutional infirmities, the tax credit proposal is repugnant to good government.

The government's financial resources are limited. It has none beyond what it can exact from taxpayers without impoverishing them or crippling the economy.

Government should never dissipate its limited financial resources to finance non-government obligations. When it does, it offends both good government and sound economics because it impairs its capacity to perform its own obligations in an acceptable way.

If it should approve the tax credit proposal, Congress would diminish the nation's ability to finance the public schools, and public education would suffer accordingly.

This observation is always true. Its importance is much magnified, nowadays, however, because the nation is staggering under a national debt in excess of a trillion dollars, and is anticipating a deficit in the coming fiscal year exceeding one hundred billion dollars. It is no time for government to increase the deficit by financing a non-governmental and constitutionally forbidden undertaking.

Furthermore, the tax credit proposal is repugnant to true religion. Under God's plan, religion is dependent for its support on the persuasive power of the truth it proclaims, and not on the coercive power of governmental taxation.

The Man of Galilee affirmed this to be so when he said, "Ye shall know the truth, and the truth shall make you free" (John, c. viii, v. 32), and "render, therefore unto Caesar the things which are Caesar's, and unto God the things that are God's" (Matthew c. xxii, vs. 15–22).

Government is contemptuous of true religion when it confiscates the taxes of Caesar to finance the things of God.

If it is to be faithful to itself, religion must look to the voluntary contributions of its adherents and not to the involuntary taxes of Caesar for its support. Churches merit no praise for undertakings if their own members are unable or unwilling to finance them.

WHY THE PROPOSAL IS UNJUST

It is unjust for government to compel one taxpayer to pay taxes and to exempt another, either in whole or in part, from paying like taxes. Yet that is exactly what the tax credit proposal, if approved by Congress, would do.

Moreover, it would do this with a vengeance. While every man receiving as income the bare pittance which subjects him to federal income taxes would be compelled by it to pay his income taxes in full, the proposal would grant special exemptions from taxation, in whole or in part, to parents for tuition paid by them to schools teaching religion, even though their incomes total $75,000.00 a year.

Taxation to support the established church in Virginia was abolished by Thomas Jefferson's Statute of Virginia for Religious Freedom.

This Statute declares that it is both sinful and tyrannical for government to compel men to make contributions of tax moneys for the propagation of religious opinions they disbelieve.

It is just as sinful and tyrannical for government to do this in 1982 as it was in Thomas Jefferson's day.

Yet that is exactly what the tax credit proposal, if adopted by Congress, would do. Protestants and Jews and all other Americans who do not send their children to parochial and private schools for religious instruction would be compelled to pay taxes to propagate the religious doctrines these schools teach, even if they disbelieve them.

This is so because these Protestants, Jews, and other Americans would be compelled by law to supply the deficiency in treasury receipts the tax credit would occasion.

WHY THE PROPOSAL IS UNCONSTITUTIONAL

In times past government imprisoned the minds and spirits of men and women in intellectual and spiritual jails. It did so by denying them freedom of religion, and by compelling them to pay taxes to support churches established by it, even if they disbelieved the doctrines the churches proclaimed.

The Founding Fathers knew the history of these governmental tyrannies, and were determined that they would not be repeated in our land. They staked the very existence of America as a free Republic on their abiding conviction that the state must keep its hands off religion, and religion must keep its hands off the state in general and the public purse in particular.

To this end, they added the First Amendment to the Constitution, and thus forbade government to make any law "respecting an establishment of religion, or prohibiting the free exercise thereof."

The tax credit proposal is repugnant to both prohibitions of the First Amendment.

If it were adopted by Congress, the tuition tax credit would be a law "respecting an establishment of religion" because it would indirectly supply to parochial and private schools tax credits to aid them to teach religion.

If it were approved by Congress, the tuition tax credit would also be a law "prohibiting the free exercise of religion" because it would tax Americans who do not send their children to parochial and private schools for religious instruction to supply the deficiency in treasury receipts arising out of the tax credits to those who do.

SUMMARY

Tuition tax credits would be governmental rewards to taxpayers who send their children to parochial and private schools to be taught the religious faith of their churches. The rewards would be funded by imposing on taxpayers who send their children to public schools the burden of supplying the deficiency in treasury receipts the tax credits would cause, and by impairing the financial capacity of public schools to perform their essential public mission. Moreover, the tuition tax credits would confiscate taxes of Caesar to finance things of God.

As a Senator, I always endeavored to make the First Amendment a reality for all Americans. If it should make the tuition tax credit proposal a reality, Congress would mortally wound the First Amendment.

I pray Congress will not murder the First Amendment.

Sincerely yours,

SAM J. ERVIN, JR.,
Former U.S. Senator.

THE CONSTITUTION AND RELIGION

(Remarks prepared by former Senator Sam J. Ervin, Jr., of Morganton, N.C., for delivery to a conference commemorating the birthday of President James Madison at the National Press Club in Washington, D.C., at 1:30 p.m., March 16, 1983)

I entitle my remarks "The Constitution and Religion."

Religion is man's belief in and reverence for a superhuman power recognized as the creator and governor of the universe. Believers call this power God.

I am a Presbyterian, whose Scotch-Irish, English, and French Huguenot ancestors came to America before the Revolution. All of them were Protestants. Most of them dissented from the established churches in the lands of their origin.

Religious faith, which is tolerant of other beliefs, is, in my opinion, the most wholesome and uplifting power on earth. Religious faith is not a storm cellar to which men and women can flee to escape the storms of life. It is, instead, an inner spiritual strength that enables them to face those storms with courage and serenity.

The Constitution makes two references to religion. One appears in Article 6, section 3 of the original Constitution, and the other is found in the first words of the First Amendment and the Bill of Rights.

Article 6, section 3 provides that all legislative, executive, and judicial officers "of the United States and the several States

shall be bound by oath or affirmation to support this Constitution, but no religious test shall ever be required as a qualification to any office or public trust under the United States."

The First Amendment provides in pertinent part that "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

If we are to understand the meanings of these provisions, we must understand the historic events which prompted the Founding Fathers to embody them in the Constitution.

RELIGIOUS INTOLERANCE

The ugliest chapters in history are those which reveal the religious intolerance of the civil and ecclesiastical rulers of the Old World and the religious persecutions it inspired. I quote two comments indicating their nature and history.

Blaise Pascal, the French mathematician and philosopher, was moved by them to proclaim this tragic truth more than 300 years ago: "Men never do evil so completely and cheerfully as when they do it from religious conviction."

Chief Justice Walter P. Stacy, of the North Carolina Supreme Court, epitomized them in these words in *State* v. *Beal*, 199 N. C. 278, 302 (1930):

"It would be almost unbelievable, if history did not record the tragic fact, that men have gone to war and cut each other's throats because they could not agree as to what was to become of them after their throats were cut. Many sins have been committed in the name of religion. Alas! the spirit of proscription is never kind. It is the unhappy quality of religious disputes that they are always bitter. For some reason, too deep to fathom, men contend more furiously over the road to heaven, which they cannot see, than over their visible walks on earth."

Religious intolerance was fostered in Great Britain and virtually all the nations of Europe by unholy alliances between governments and particular churches recognized and established by law as the sole custodians of religious truth.

The objective of the unholy alliance in each nation was to persuade or coerce the people to accept and practice the political and religious orthodoxy sanctioned by the state and the established church. As pragmatists, state and church sought to accomplish this objective by imprisoning the minds and spirits of the people within intellectual and spiritual jails.

The British Parliament made the Church of England the established church in Great Britain. It created the crime of seditious libel to punish those who spoke ill of the government or its officers, and the crime of blasphemous libel to punish those who spoke ill of the established church. Besides, the British Parliament enacted laws compelling the people to pay tithes or taxes for the support of the established church, and to attend its worship services; denying those who dissented from its doctrines the capacity to hold civil office in government; and forbidding ministers of dissenting congregations to administer the sacraments to their members.

As a consequence of these attempts to regulate relations between men and religion, dissenters from the established church were compelled to make contributions of money for the propagation of religious opinions they disbelieved; required to listen to the exposition of religious doctrines they rejected; and denied the right to hold civil offices in government. Besides, they sometimes had their marriages annulled and their children adjudged illegitimate for daring to speak their marital vows before ministers of their own faiths than clergymen of the established church.

ESTABLISHED CHURCHES IN THE COLONIES

While they were joined by many Germans and French Huguenots and smaller numbers of Dutch, Swedes, and Swiss, natives of the British Isles constituted by far the greater part of those who migrated from the Old World to the thirteen British colonies in America.

A substantial proportion of the colonists were dissenters from the churches established by law in the lands of their origins.

Like the colonists who conformed to the established churches, these dissenters came to America to better their economic lots. But they were also motivated by the hope that they would find in the New World the political and religious freedom denied them by the civil and ecclesiastical rulers of the Old.

When they reached America, however, they discovered to their disappointment that in many of the colonies predominant groups had set up established churches here, and that they were compelled, in such colonies, to pay taxes for the support of established churches whose doctrines they disbelieved. Moreover, most of the colonies had established religious qualifications in their oaths for public office holders. As a rule, these tests were designed to exclude dissenters, Catholics, Jews, Deists, or unbelievers.

There is more than a modicum of historical truth in this statement of Artemas Ward, a humorist of a by-gone generation: "The Puritans nobly fled from a land of despotism to a land of freedom, where they could not only enjoy their own religion, but could prevent everybody else from enjoying his."

The colonies of Virginia, North Carolina, South Carolina, Georgia, and Maryland had established churches, and the Anglican Church was the favorite under their laws.

In the colonies of Massachusetts, Connecticut, and New Hampshire, the Congregational Church was the established church.

In the colony of New York, the Dutch Reformed and Anglican Churches were, in turn, established by law.

The people in these nine colonies were compelled by law to pay taxes for the support of these established churches, and in some cases to attend their services.

The dissenters were outraged by these requirements. They believed it tyrannical for government to attempt to regulate by law the relationship between an individual and his God. Moreover, as they pondered verses 15 to 22 of the 22nd chapter of Matthew and its moral, "Render, therefore, unto Caesar the things that are Caesar's, and unto God the things that are God's," they concluded that in addition to being tyrannical, the attempt to regulate religion by law was also sinful.

SEPARATION OF CHURCH AND STATE IN THE STATES

As a consequence, they demanded the separation of church and state in America.

During the Revolution and the years immediately following it, the dissenters found staunch allies in their fight for separation of church and state among non-church members and those adherents of established churches who believed that it was abhorrent to reason as well as freedom for earthy government to regulate the relationship between human beings and religion.

The separation of church and state presented no problems in Rhode Island, where Baptists led by Roger Williams had settled under a royal charter granting complete religious freedom to all, or in Delaware, New Jersey, and Pennsylvania, where establishment never acquired a foothold.

When their revolt against Great Britain converted the thirteen colonies into self-governing states, Rhode Island retained separation under its original charter, and Delaware, New Jersey, and Pennsylvania did so under Constitutions adopted in 1776. North Carolina, New York, Georgia, and Virginia granted the right of freedom of worship to all and disestablished religion within their borders before the drafting of the First Amendment, and South Carolina did likewise before the Amendment was ratified.

Hence, the only states maintaining any financial and legal relationship to religion at the time the First Amendment became a part of the Constitution were Connecticut, Maryland, Massachusetts, and New Hampshire. These four states were able to do this after the adoption of the First Amendment because the Amendment applied originally to the federal government and not to the States.

But in those four states there was no single established church at that time. As a concession to those demanding complete separation of church and state, they had substituted for single established churches multiple establishments and were providing for an impartial use of taxes for the support of all churches they deemed respectable.

The last of these four states to terminate such relationship to religion was Massachusetts, which did so in 1833.

THE STATUTE OF VIRGINIA FOR RELIGIOUS LIBERTY

It is not surprising that James Madison loathed religious intolerance and loved religious liberty. As a student at what is now Princeton University, he sat at the feet of the great educator and patriot, John Witherspoon, the Scottish divine, who taught that a mere condescending tolerance of other religious views is not enough; that every man is entitled to worship God as he chooses or not at all; and that every church should be supported by the contributions of its own members and not by taxation.

On entering politics in his native Virginia, Madison adopted as his wise and trusted counselor Thomas Jefferson, the great apostle of liberty, who had sworn on the altar of God eternal hostility to all forms of tyranny over the mind of man.

Jefferson, the theorist, and Madison, the pragmatist, were an ideal combination. They led the fight for the disestablishment of religion in Virginia. Madison subsequently authored the religious clauses of the First Amendment. For these reasons, the fight for religious freedom in Virginia illuminates the meaning of these clauses, and merits detailing.

In 1776, Virginia, as an independent Commonwealth, adopted a new Constitution. James Madison was a member of the constitutional convention which drafted it, and he succeeded in writing into it the proposition that all men are equally entitled to the free exercise of religion according to the dictates of conscience.

Shortly after the adoption of the new constitution, the Virginia Legislature met, and a conflict ensued between the members who

demanded total separation of church and state in Virginia, and those who favored supplanting the single established Anglican Church by an establishment of all the churches deemed to be respectable.

As a member of this legislature, James Madison was able to persuade his colleagues to provide that no dissenters should be compelled to pay taxes to the Anglican Church, which had been established in Virginia in 1629. He also secured the enactment of a law which suspended for the time being the requirement that members of the Anglican Church should pay taxes for its support.

But the Legislature of 1776 expressly reserved for the future the crucial decision of whether general taxes should be levied for the support of all the denominations which the controlling element in the Virginia Legislature deemed to be respectable.

The conflict was renewed in the Virginia Legislature of 1779, when James Henry introduced a bill for a multiple establishment, and James Madison introduced a bill which was drafted by Thomas Jefferson, and which is known to history as the Virginia Statute for Religious Liberty.

James Henry's bill undertook to establish by law virtually all of the Christian churches of Virginia as the established churches of Virginia, and to levy taxes for the support of all of them on an impartial basis. It is significant that in this bill reference to an establishment appears at a number of points, in contexts which clearly show that James Henry and the others of his day understood the term "an establishment of religion" to mean an official connection between the state and one or more churches whereby the state recognized such church or churches and provided for taxation for its or their support.

The bill for religious freedom which was drafted by Thomas Jefferson and introduced by James Madison, is one of the great documents which preceded the writing of the Constitution. It was designed to effect complete separation of church and state in Virginia.

To this end, the bill laid down these propositions in its preamble: First, "Almighty God hath created the mind free"; second, "to compel a man to furnish contributions of money for the propagation of opinions he disbelieves is sinful and tyrannical"; third, "the proscribing any citizen as unworthy the public confidence by laying upon him an incapacity of being called to offices of trust and emolument, unless he profess or renounce this or that religious opinion is depriving him injuriously of those privileges and advantages in which in common with his fellow citizens he has a natural right"; fourth, such action "tends only to corrupt the principles of that religion it is meant to encourage by bribing with a monopoly of worldly honors and emoluments those who will externally profess and conform to it"; fifth, "to suffer the civil magistrate to intrude his powers into the field of opinion, and to restrain the profession or propagation of principles on supposition of their ill tendency is a dangerous fallacy, which at once destroys all religious liberty, because he being of course judge of that tendency will make his opinions the rule of judgment, and approve or condemn the sentiments of others only as they will square with or differ from his own"; sixth, "it is time enough for the rightful purpose of civil governments for its officers to interfere when principles break into overt acts against peace and good order"; and, seventh, "truth is great * * * and has nothing to fear from the conflict" with error, and "will prevail" over error, and error will cease "to be dangerous" unless by human interposition "truth is disarmed by her natural weapons, free argument and debate."

On the basis of these propositions, the bill proposed that the Virginia Legislature make these enactments: First, "that no man shall be compelled to frequent or support any religious worship, place or ministry whatsoever"; second, that no man "shall be enforced, restrained, molested, or burthened in his body or goods" or "otherwise suffer on account of his religious opinions or beliefs"; third, "that all men shall be free to profess, and by argument to maintain, their opinion in all matters of religion, and that the same shall in no wise diminish, enlarge, or affect their civil capacities"; and, fourth, that "the rights hereby asserted are of the natural rights of mankind, and * * * if any act shall be hereafter passed to repeal the present or to narrow its application, such act shall be an infringement of natural right."

The opposing forces in the Virginia Legislature of 1779 were so nearly equal in power that it was impossible to secure the enactment of either the James Henry bill for a multiple establishment of religion or the Jefferson bill for complete religious freedom.

The contest was renewed in the Virginia Legislature of 1784, when James Madison again presented Jefferson's bill for religious freedom and Patrick Henry sponsored a new bill for a multiple establishment.

Patrick Henry's bill, which was entitled "A Bill Establishing A Provision For Teachers Of The Christian Religion", undertook to recognize the legal interest of Virginia in virtually all the Christian churches functioning within its borders, and to impose taxes on all Virginians for their support.

When the Legislature was apparently on the verge of passing Patrick Henry's bill, Madison persuaded it to postpone a final vote until its next session, which was scheduled for November 1785.

Between that time and the next meeting of the Legislature, Madison composed a most convincing and eloquent appeal for religious freedom, which he called "The Memorial and Remonstrance Against Religious Assessment." In it Madison said:

"It is proper to take alarm at the first experiment on our liberties . . . The same authority which can establish Christianity, in exclusion of all other religions, may establish with the same ease any particular sect of Christians, in exclusion of all other sects . . . The same authority which can force a citizen to contribute three pence only of his property for the support of any one establishment, may force him to conform to any other establishment in all cases whatsoever."

This document is crucial in determining what the Founding Fathers meant when they yield to the insistence of James Madison and wrote into the First Amendment the provision that Congress shall make no law respecting an establishment of religion.

In this document, which was a protest against the bill sponsored by Patrick Henry to levy taxes for the support of virtually all Christian churches in Virginia, Madison used the word "establishment" at least five times in contexts which showed that in his mind "an establishment of religion" meant an official relationship between the state and one church or many churches or all churches, and the imposition of taxation for the support of one church or many churches or all churches.

Madison caused "The Memorial and Remonstrance Against Religious Assessments" to be widely distributed throughout Virginia. By so doing, he insured his victory. When the members of the Legislature which was scheduled to convene in November 1785 were elected, those who supported Jefferson and Madison in their fight for religious freedom were in an overwhelming majority. Upon convening, they enacted into law Jefferson's bill for religious freedom.

THE FIRST AMENDMENT

After the Constitution of the United States was drafted and submitted to the States for ratification or rejection, many Americans were dissatisfied with it because it did not contain any bill of rights, or any provision relating to religious freedom other than Article 6 prescribing that no religious test should be required as a qualification for any office or public trust in the United States.

When New York, New Hampshire, and Virginia ratified the Constitution, they adopted resolutions which insisted that the Constitution should be amended by incorporating in it guaranties of religious freedom and freedom from taxation for the support of religion.

North Carolina and Rhode Island both postponed ratifying the Constitution, and their conventions resolved they would not ratify it unless it was amended to provide for the disestablishment of religion.

As a result of the actions of these five states and the demands of multitudes of Americans in the other original states, the Constitution was amended in these respects by the First Amendment which, as part of the Bill of Rights, was adopted by the requisite number of states by December 15, 1791.

The Constitution was so amended as a result of the efforts of James Madison, who was elected a Representative from Virginia to the First Congress which met after its ratification.

As soon as this Congress convened, Madision began his great fight to have the First Amendment added to the Constitution. Some of his colleagues did not want the Amendment to deny to government the power to support religion, and others insisted that the religious clauses of the amendment should merely prohibit a single established church.

But Madison contended at all times that the First Amendment should embody in it provisions that Congress should pass no law respecting an establishment of religion or prohibiting its free exercise.

He triumphed after much effort.

As has been observed, the First Amendment was originally an inhibition on the federal government and not on the states.

In July, 1868, the Fourteenth Amendment was added to the Constitution. Section 1 of this Amendment provides that no state shall deprive any person of liberty without due process of law.

The Supreme Court clearly adjudged for the first time in *Cantwell* v. *Connecticut*, 310 U.S. 296, which was decided in 1940, that the fundamental concept of liberty embodied in the Fourteenth Amendment embraced the liberties guaranteed by the First Amendment relating to religion, and that in consequence the First and Fourteenth Amendments in combination forbid the states as well as the federal government to make any law or take any action respecting the establishment of religion or prohibiting its free exercise, and thus secure to all people in the United States religious free-

dom. This ruling has been subsequently reaffirmed by the Supreme Court in many cases.

The First and Fourteenth Amendments do this by erecting a wall of separation between government and religion at all levels and in all areas of the United States. By prohibiting any official relationship between government and religion, they forbid government to undertake to control or support religion, and deny any religious group or groups the power to control public policy or the public purse.

The constitutional separation of government and religion is best for government and best for religion. It enables each of them to seek to achieve its rightful aims without interference from the other. Besides, it is wise. History reveals that political freedom cannot exist in any nation where religion controls government, and that religious freedom cannot survive in any nation where government controls religion.

Moreover, constitutional separation of government and religion is indispensable to the domestic tranquility of the United States "whose people came from the four corners of the earth and brought with them a diversity of religious opinion." As the Supreme Court revealed in *Abington School District* v. *Schempp* and *Murray* v. *Curlitt*, 374 U.S. 203, 214 (1963): "Today authorities list 83 separate religious bodies, each with a membership exceeding 50,000, existing among our people, as well as innumerable smaller groups." These organizations compete for the religious allegiance of the people.

By securing the absolute equality before the law of all religious sects and requiring government to be neutral in respect to them, the constitutional separation of government and religion makes the love of religious freedom and the other things which unite our people stronger than their diversities, and enables Americans of varying religious faiths to live with each other in peace.

As made applicable to the states by the Fourteenth Amendment, the religious clauses of the First Amendment accomplish their wholesome objectives in their entirety in these ways:

1. They prohibit the federal government and the states from establishing any religious test as a qualification for any public office at any level of government.

2. "The establishment of religion clause of the First Amendment means at least this: Neither a state nor the federal government can set up a church. Neither can pass laws which aid one religion, aid all religions, or prefer one religion over another. Neither can force nor influence a person to go to or remain away from church against his will or force him to profess a belief or disbelief in any religion. No person can be punished for entertaining or professing religious beliefs or disbeliefs, for church attendance or nonattendance. No tax in any amount, large or small, can be levied to support any religious activities or institutions, whatever they may be called, or whatever form they may adopt to teach or practice religion. Neither a state nor the federal government can, openly or secretly, participate in the affairs of any religious organizations or groups or vice versa. In the words of Jefferson, the clause against establishment of religion by law was intended to erect a wall of separation between church and state." (*Everson* v. *Board of Education*, 330 U.S. 1, 15-16 (1947))

3. The free exercise clause of the First Amendment secures to every person the absolute right to accept as true the religious beliefs that appeal to his conscience and to reject all others; to practice the religious beliefs he accepts in any mode of worship not injurious to himself or others; to seek by peaceful persuasion to convert others to his religious beliefs and practices; and to be exempt from taxation for the support of religious activities or teachings. A person is denied religious freedom if he is taxed to support any religious faith, including his own.

OPPOSITION TO THE FIRST AMENDMENT

Numerous Americans of the utmost sincerity are not in intellectual and spiritual rapport with the First Amendment's separation of government and religion. Whether they are hostile to the principle of separation itself or do not understand what it entails, I do not know and will not surmise.

One group demands that the public schools of the states teach religion to the children attending them; and the other group demands that government provide public funds to aid and support private schools maintained by various churches to teach their religious doctrines to the children attending them. In so doing, the second group demands that the taxes of Caesar be used to finance the things of God.

While one is concerned with the public schools and the other with private religious schools, both groups base their demands on the assumption that governmental fidelity to the First Amendment frustrates the religious education of children.

This assumption is without foundation. While it forbids government to teach religion, the First Amendment leaves individuals, homes, and non-governmental institutions, such as Sunday schools, churches, and private schools, free to do so. Indeed it encourages them to do so by securing religious freedom to all.

Churches should look to their members and their friends only for the financing of their undertakings, and no church should engage in any undertaking, no matter how laudable it may be, which its members and friends are unable or unwilling to finance.

THE PUBLIC SCHOOLS

For generations before the school prayer cases, the public schools of various states conducted religious exercises each school day conforming to the religious beliefs which prevailed in the communities where the schools were located. The school prayer cases are *Engel* v. *Vitale, School District of Abington Township* v. *Schempp*, and *Murray* v. *Curlett*.

The *Engel* case, 370 U.S. 421 (1962), involved the constitutionality of a New York regulation requiring the following prayer to be said aloud by each class in a public school in the presence of a teacher at the beginning of each school day: "Almighty God, we acknowledge our dependence upon thee, and we beg thy blessing upon us, our parents, our teachers, and our country."

The *Abington School District* and *Murray* cases, which were consolidated for decision, involved the constitutionality of a Pennsylvania statute which required that "at least ten verses from the Holy Bible shall be read, without comment, at the opening of each public school on each school day", and a rule of the School Commissioners of Baltimore, Maryland, which required the holding of opening exercises in the schools of the city consisting primarily of "reading, without comment, of a chapter in the Holy Bible and/or the use of the Lord's Prayer."

It was provided in each instance that any child would be excused from participating in the prescribed religious exercises on the request of his parent or guardian.

By a vote of 6 to 1 in the *Engel* case and 8 to 1 in the *Abington School District* and *Murray* cases, the Supreme Court ruled that by using their public school systems to require these religious exercises, New York, Pennsylvania, and Maryland violated the Establishment Clause of the First Amendment, and that the regulation, statute, and rule requiring them were, therefore, unconstitutional.

The Court dismissed as immaterial the circumstance that any child was excused on request from participating in the exercises on the ground that governmental coercion is not an essential ingredient of government establishment of religion.

The rationale of the rulings was thus summarized in the opinion in the *Abington School District* and *Murray* cases: "They are religious exercises required by the state in violation of the command of the First Amendment that the government maintain strict neutrality, neither aiding nor opposing religion."

These rulings shocked sincere people throughout the nation. It is not surprising that this was so. The custom of holding religious exercises in public schools had been followed in many states for generations, and the school authorities in these states had acted on the assumption that it was proper for these schools to teach the religious beliefs which prevailed in the communities in which they operated.

Many sincere persons charge that the school prayer cases show the Supreme Court to be hostile to religion. This charge is untrue and unjust. In these cases the Supreme Court was faithful to its judicial duty. It enforced the First Amendment, which commands government to maintain strict neutrality respecting religion, neither aiding nor opposing it.

In these and other cases, the Supreme Court recognizes the supreme value of religious faith in the lives of individuals and through them in the life of the nation.

The First Amendment forbids the states to teach religion to the children attending their public schools. Without impairing this principle to any degree, the Supreme Court makes this observation in its opinion in the *Abington School District* and *Murray* cases:

"It might well be said that one's education is not complete without a study of comparative religion or the history of religion and its relationship to the advancement of civilization. It certainly may be said that the Bible is worthy of study for its literary and historic qualities. Nothing we have said here indicates that such study of the Bible or of religion, when presented objectively as part of a secular program of education, may not be effected consistently with the First Amendment." (374 U.S. 203, 225)

It is to be noted, moreover, that the school prayer cases do not question the soundness of the prior ruling in *Zorach* v. *Clauson*, 343 U.S. 306 (1962) where the Supreme Court held that the New York system of released time for religious instruction did not violate the First Amendment. Under this system, the state authorities in charge of public schools released from their customary studies an hour a week children, acting without any pressure from them, who desired to receive religious instruction in churches or church schools outside public school property.

Those who demand that public schools be made instruments to teach religion to the

children attending them suggest varying ways to achieve their objective.

Since the school prayer cases adjudged the religious exercises involved in them to be rupugnant to the First Amendment because they were required by state authorities, they propose initially that state authorities sanction voluntary religious exercises in public schools. Despite their good faith, this proposal is fatally defective. In the nature of things, religious exercises sanctioned by public authorities are not, in reality, voluntary.

They propose secondarily that Congress deprive federal courts of jurisdiction to hear and determine cases in which states are alleged to have taught religion to the children attending their public schools in violation of the First Amendment. If it should take such action, Congress would nullify the First Amendment in substantial part by abolishing judicial enforcement of one of the Amendment's commands.

They propose finally that Congress and the states amend the Constitution to authorize the states to teach religion to children attending their public schools. If consummated, this forthright proposal would repeal the First Amendment in substantial part insofar as it applies to the public schools.

As a general rule, those who demand that the public schools of the states be made instruments to teach religion are motivated by their desire to have the children attending them taught the religious beliefs of their particular sect of Christianity.

The word "religion" as used in the Constitution is not restricted in its meaning to any particular sect of Christianity, or to the Christian religion in general. It embodies Buddhism, Hinduism, Judaism, Mohammedanism, Shintoism, and all other religions; and the Constitution confers on all persons of all religious persuasions an equality of constitutional right. If those who demand that the public schools be made instruments to teach religion would pause and ponder these things, the ardor of their demand might abate.

PRIVATE SCHOOLS THAT TEACH RELIGION

The Supreme Court held in *Pierce* v. *Society of Sisters*, 268 U.S. 510 (1925), that a state statute requiring all children to attend the public schools was unconstitutional because the guaranty of liberty of the due process clause of the Fourteenth Amendment gave Catholic parents a constitutional right to send their children to a Catholic School to receive both secular and religious instruction from it.

Although multitudes of Catholics revere and understand the First Amendment in its entirety and oppose taxation of any Americans to support the teaching of any religion, Catholics comprise the majority of those who insist that government give financial aid to private schools which teach religion.

The Catholic Church establishes and operates its parochial schools to teach the children of Catholic parents its religious doctrines and observances. Since the First Amendment forbids the public schools to teach any religion, Catholic parents who desire their children to be taught the Catholic faith send their children to parochial rather than public schools. As taxpayers, these Catholic parents pay taxes to help the state to maintain the public schools; and as parents, they bear the added expense of the instruction of their children in the parochial schools.

Many of these parents and others demand that government should provide public funds either directly or indirectly to aid and support the parochial schools. They base their demand on the propositions that it is unjust to compel Catholic parents to pay taxes for the support of public schools and bear the additional expense occasioned by sending their children to the parochial schools, and that the Catholic Church saves government enormous outlays of money because Catholic children go to parochial rather than public schools.

Without questioning the validity of the unadorned facts underlying these assertions, these observations are of crucial import:

1. The Catholic parents voluntarily impose the additional financial burden on themselves by sending their children to the parochial schools to obtain instruction in the Catholic faith, instruction which the First Amendment forbids the public schools to give them.

2. The Catholic Church operates the parochial schools to insure that it rather than government will control the education of Catholic children.

Justices Jackson and Rutledge present irrefutable reasons in their dissenting opinions in the *Everson case* why government must refuse to give financial aid and support, either directly or indirectly, to parochial and other private schools which teach religion if the religious freedom the First Amendment establishes is to endure in the United States. Justice Jackson added the warning that government may regulate the private schools it subsidizes.

CONCLUSION

As Justice Jackson stated in his dissent in the *Everson* case, 330 U.S. 1, 22-28, the First Amendment occupies first place in the Bill of Rights because its objective occupied first place in the minds of the Founding Fathers. He made the objective of the Bill of Rights clear in the opinion he wrote for the Court in *West Virginia Board of Education* v. *Barnette*, 319 U.S. 624, 638 (1943):

"The very purpose of a Bill of Rights was to withdraw certain subjects from the vicissitudes of political controversy, to place them beyond the reach of majorities and officials and to establish them as legal principles to be applied by the courts. . . . One's right to freedom of worship . . . and other fundamental rights may not be submitted to vote; they depend on the outcome of no elections."

The Oklahoma Court proclaimed truth when it said in *Cline* v. *State*, 9 Okla. Crim. 40, 130 P. 510:

"The crowning glory of American freedom is absolute religious liberty; every American has the unquestioned and untrammeled right to worship God according to the dictates of his own conscience, without let or hindrance from any person or any source."

It is just as sinful and tyrannical now as it was in the day of Jefferson and Madison for government to tell people what they must think about religion, or to compel them to pay taxes for the propagation of religious opinions they disbelieve.

May America cherish the First Amendment and thus keep religious freedom inviolate for its people as long as time shall last.

NOTES

1. North Carolina embodied this declaration in its Constitution of 1776, "that all men have a natural and unalienable right to worship Almighty God according to the dictates of their own conscience," and added to it as an amendment in 1835 the words "and no human authority should, in any case whatever, control or interfere with the rights of conscience."

2. *Torcaso* v. *Maryland*, 367 U.S. 488 (1961)

3. The statement revealing the meaning of the Establishment Clause appears in the majority opinion in *Everson* v. *Board of Education*, 330 U.S. 1, 15-16 (1947), which was written by Justice Black. In this case the Supreme Court upheld the constitutionality under the Establishment Clause of a statute which required New Jersey to use state funds to reimburse the cost of transportation of children to the state's public schools and Catholic parochial schools. The state was not permitted, however, to reimburse the cost of transportation of children attending private schools operated for profit.

The majority and dissenting opinions illuminate the Establishment Clause. The Justices did not disagree as to its meaning. They disagreed only as to its application to the New Jersey statute.

The majority concluded that the expenditure required by the New Jersey statute was comparable to governmental expenditures for fire and police protection, and were for the public purpose of promoting the safety of the children traveling between their homes and the public and parochial schools. The dissenters maintained that the expenditure did nothing to increase the safety of the children over that of other patrons of the transportation system and was for the private purpose of aiding parochial schools to teach the Catholic faith to the children attending them.

Some years after the *Everson* decision, the Supreme Court explained in the first school prayer case, *Engel* v. *Vitale*, 370 U.S. 421 (1962) that the Establishment Clause is unlike the Free Exercise Clause in that governmental coercion is not an essential ingredient of it, and enunciated the several reasons why the Founding Fathers embodied the Establishment Clause in the Constitution. In so doing, the Court said:

"Although these two clauses may in certain instances overlap, they forbid two quite different kinds of governmental encroachment on religious freedom. The Establishment Clause, unlike the Free Exercise Clause, does not depend on any showing of direct governmental compulsion and is violated by the enactment of laws which establish an official religion, whether those laws operate directly to coerce nonobserving individuals or not. This is not to say, of course, that laws officially prescribing a particular form of religious worship do not involve a coercion of such individuals. When the power, prestige, and financial support of government is placed behind a particular religious belief, the indirect coercive pressure upon religious minorities to conform to the prevailing officially approved religion is plain. But the purposes underlying the Establishment Clause go much further than that. Its first and most immediate purpose rested on the belief that a union of government and religion tends to destroy government and to degrade religion. The history of governmentally established religion, both in England and in this country, showed that whenever government had allied itself with one particular form of religion, the inevitable result had been that it had incurred hatred, disrespect, and even contempt of those who held contrary beliefs. That same history showed that many people had lost their respect for any religion that had relied upon the support of government to spread its faith. The Establishment Clause thus

stands as an expression of principle on the part of the Founders of our Constitution that religion is too personal, too sacred, too holy, to permit its 'unhallowed perversion' by a civil magistrate. Another purpose of the Establishment Clause rested upon an awareness of the historical fact that governmentally established religions and religious persecutions go hand in hand. . . . It was in large part to get completely away from . . . religious persecution that the Founders brought into being our Nation, our Constitution, and our Bill of Rights with its prohibition against any governmental establishment of religion."

4. *Cantwell* v. *Connecticut*, 310 U.S. 296 (1940); *Jones* v. *Opelika*, 316 U.S. 584 (1942); *West Virginia Board of Education* v. *Barnette*, 319 U.S. 624 (1943); *Follett* v. *City of McCormick*, 321 U.S. 573 (1944); *Kovacs* v. *Cooper*, 336 U.S. 77 (1949); *Sherbert* v. *Verner*, 374 U.S. 398 (1963); *Flast* v. *Cohen*, 392 U.S. 83 (1968).

Justice Rutledge made the meanings of both the Establishment and Free Exercise Clauses plain in his dissent in *Everson* v. *Board of Education*, 330 U.S. 31-63 (1947). He said:

"Not simply an established church, but any law respecting an establishment of religion is forbidden. The Amendment was broadly but not loosely phrased. It is the compact and exact summation of its author's views formed during his long struggle for religious freedom. In Madison's own words characterizing Jefferson's Bill for Establishing Religious Freedom, the guaranty he put in our national charter, like the bill he piloted through the Virginia Assembly, was a 'model of technical precision, and perspicuous brevity.' Madison could not have confused 'church' and 'religion' or 'an established church' and 'an establishment of religion.' "

"The Amendment's purpose was not to strike merely at the official establishment of a single sect, creed or outlawing only a formal relation such as had prevailed in England and some of the colonies. Necessarily it was to uproot all such relationships. But the object was broader than separating church and state in this narrow sense. It was to create a complete and permanent separation of the spheres of religious activity and civil authority by comprehensively forbidding every form of public aid or support for religion. In proof the Amendment's wording and history unite with this Court's consistent utterances whenever attention has been fixed directly upon the question."

" 'Religion' appears only once in the Amendment. But the word governs two prohibitions and governs them alike. It does not have two meanings, one narrow to forbid 'an establishment' and another, much broader, for securing 'the free exercise thereof.' 'Thereof' brings down 'religion' with its entire and exact content, no more and no less, from the first into the second guaranty, so that Congress and now the states are as broadly restricted concerning the one as they are regarding the other."

"No one would claim today that the Amendment is constricted in 'prohibiting the free exercise' of religion to securing the free exercise of some formal or creedal observance, of one sect or many. It secures all forms of religious expression, creedal, sectarian or nonsectarian, wherever and however taking place, except conduct which trenches upon the like freedoms of others or clearly and presently endangers the community's good order and security. For the protective purposes of this phase of the basic freedom, street preaching, oral or by distribution of literature, has been given 'the same high estate under the First Amendment as . . . worship in the churches and preaching from the pulpits.' And on this basis parents have been held entitled to send their children to private, religious schools. *Pierce* v. *Society of Sisters*, 268 U.S. 510 (1925). Accordingly, daily religious education commingled with secular is 'religion' within the guaranty's comprehensive scope. So are religious training and teaching in whatever form. The word connotes the broadest content, determined not by the form or formality of the teaching or where it occurs, but by its essential nature regardless of those details."

" 'Religion' has the same broad significance in the twin prohibition concerning 'an establishment.' The Amendment was not duplicitous. 'Religion' and 'establishment' were not used in any formal or technical sense. The prohibition broadly forbids state support, financial or other, of religion in any guise, form or degree. It outlaws all use of public funds for religious purposes."

"Two great drives are constantly in motion to abridge, in the name of education, the complete division of religion and civil authority which our forefathers made. One is to introduce religious education and observances into the public schools. The other, to obtain public funds for the aid and support of various private religious schools. . . . In my opinion both avenues are closed by the Constitution. Neither should be opened by this Court. The matter is not one of quantity, to be measured by the amount of money expended. Now, as in Madison's day, it is one of principle, to keep separate the separate spheres as the First Amendment drew them: to prevent the first experiment upon our liberties; and to keep them from becoming entangled in corrosive precedents. We should not be less strict to keep strong and untarnished the one side of the shield of religious freedom than we have been of the other.

5. After pointing out that parochial schools are established and maintained by the Catholic Church to teach "Catholic faith and morals", and that its Canon Law prescribes that they shall be "schools where religious and moral training occupy the first place", Justice Jackson declared in his dissenting opinion in the *Everson* case, 330 U.S. 22-28:

"It is no exaggeration to say that the whole historic conflict in temporal policy between the Catholic Church and non-Catholics comes to a focus in their respective school policies. The Roman Catholic Church, counseled by experience in many ages and many lands and with all sorts and conditions of men, takes what, from the viewpoint of its own progress and the success of its mission, is a wise estimate of the importance of education to religion. It does not leave the individual to pick up religion by chance. It relies on early and indelible indoctrination in the faith and order of the Church by the word and example of persons consecrated to the task."

"Our public school, if not a product of Protestanism, at least is more consistent with it than with the Catholic culture and scheme of value. It is a relatively recent development dating from about 1840. It is organized on the premises that secular education can be isolated from all religious teaching so that the school can teach all needed temporal knowledge and also maintain a strict and lofty neutrality as to religion. The assumption is that after the individual has been instructed in wordly wisdom he will be better fitted to choose his religion. Whether such disjunction is possible, and if possible is wise, are questions I need not try to answer."

"I should be surprised if any Catholic would deny that the parochial school is a vital, if not the most vital part of the Roman Catholic Church. If put to the choice, that venerable institution, I should expect, would forego its whole service for mature persons before it would give up education for the young, and it would be a wise choice. Its growth and cohesion, discipline and loyalty, spring from its schools. Catholic education is the rock on which the whole structure rests, and to render tax aid to its Church school is indistinguishable to me from rendering the same aid to the Church itself."

"It is of no importance in this situation whether the beneficiary of tax-raised funds is primarily the parochial school and incidentally the pupil, or whether the aid is directly bestowed on the pupil with indirect benefits to the school. The state cannot maintain a Church and it can no more tax its citizens to furnish free carriage to those who attend a Church. The prohibition against establishment of religion cannot be circumvented by a subsidy, bonus or reimbursement of expense to individuals for receiving religious instruction and indoctrination . . ."

"I agree that this Court has left, and always should leave to each state, great latitude in deciding for itself, in the light of its own conditions, what shall be public purposes in its scheme of things. It may make public business of individual welfare, health, education, entertainment or security. But it cannot make public business of religious worship or instruction, or of attendance at religious institutions of any character. There is no answer to the proposition . . . that the effect of the religious freedom to our Constitution was to take every form of propagation of religion out of the realm of things which could directly or indirectly be made public business and thereby be supported in whole or in part at taxpayers' expense. That is a difference which the Constitution sets up between religion and almost every other subject matter of legislation, a difference which goes to the very root of religious freedom. . . . This freedom was first in the Bill of Rights because it was first in the forefathers' minds; it was set forth in absolute terms, and its strength is its rigidity. It was intended not only to keep the state's hands out of religion, but to keep religion's hands off the state, and, above all, to keep bitter religious controversy out of public life by denying to every denomination any advantage from getting control of public policy and the public purse. . . ."

"This policy of our Federal Constitution has never been wholly pleasing to most religious groups. They all are quick to invoke its protections; they all are irked when they feel its restraints. . . ."

"But we cannot have it both ways. Religious teaching cannot be a private affair when the state seeks to impose regulations which infringe on it indirectly, and a public affair when it comes to taxing citizens of one faith to aid another, or those of no faith to aid all. If these principles seem harsh in prohibiting aid to Catholic education, it must not be forgotten that it is the same Constitution that alone assures Catholics the right to maintain these schools at

all when predominant local sentiment would forbid them. *Pierce* v. *Society of Sisters*, 268 U.S. 510 (1925). Nor should I think that those who have done so well without this aid would want to see this separation between church and state broken down. If the state may aid these religious schools, it may therefore regulate them. Many groups have sought aid from tax funds only to find that it carried political controls with it. Indeed this Court has declared that 'It is hardly lack of due process for the government to regulate that which it subsidizes.' "

"But in any event, the great purposes of the Constitution do not depend on the approval or convenience of those they restrain."

Justice Rutledge made these observations in his dissent in *Everson* v. *Board of Education*, 330 U.S. 58-60 (1947):

"No one conscious of religious values can be unsympathetic toward the burden which our constitutional separation puts on parents who desire religious instruction mixed with secular for their children. They pay taxes for others' children's education, at the same time the added cost of instruction for their own. Nor can one happily see benefits denied to children which others receive, because in conscience they or their parents for them desire a different kind of training others do not demand."

"But if those feelings should prevail, there would be an end to our historic constitutional policy and command. No more unjust or discriminatory in fact is it to deny attendants at religious schools the cost of their transportation than it is to deny them tuitions, sustenance for their teachers, or any other educational expense which others receive at public cost. Hardship in fact there is which none can blink. But, for assuring to those who undergo it the greater, the most comprehensive freedom, it is one written by design and firm intent into our basic law."

"Of course discrimination in the legal sense does not exist. The child attending the religious school has the same right as any other to attend the public school. But he foregoes exercising it because the same guaranty which assures this freedom forbids the public school or any agency of the state to give or aid him in securing the religious instruction he seeks."

"Were he to accept the common school, he would be the first to protest the teaching there of any creed or faith not his own. And it is precisely for the reason that their atmosphere is wholly secular that children are not sent to public schools under the *Pierce* doctrine. But that is a constitutional necessity, because we have staked the very existence of our country on the faith that complete separation between the state and religion is best for the state and best for religion."

"That policy necessarily entails hardship upon persons who forego the right to educational advantages the state can supply in order to secure others it is precluded from giving. Indeed this may hamper the parent and the child forced by conscience to that choice. But it does not make the state unneutral to withhold what the Constitution forbids it to give. On the contrary it is only by observing the prohibition rigidly that the state can maintain its neutrality and avoid partisanship in the dissensions inevitable when sect opposes sect over demands for public moneys to further religious education, teaching or training in any form or degree, directly or indirectly. Like St. Paul's freedom, religious liberty with a great price must be bought. And for those who exercise it most fully, by insisting upon religious education for their children mixed with secular, by the terms of our Constitution the price is greater than for others."

"The problem then cannot be cast in terms of legal discrimination or its absence. This would be true, even though the state in giving aid should treat all religious instruction alike. Thus, if the present statute and its application were shown to apply equally to all religious schools of whatever faith, yet in the light of our tradition it could not stand. For then the adherent of one creed still would pay for the support of another, the childless taxpayer with others more fortunate. Then too there would seem to be no bar to making appropriations for transportation and other expenses of children attending public or other secular schools, after hours in separate places and classes for their exclusively religious instruction. The person who embraces no creed also would be forced to pay for teaching what he does not believe. Again, it was the furnishing of 'contributions of money for the propagation of opinions which he disbelieves' that the fathers outlawed. That consequence and effect are not removed by multiplying to all-inclusiveness the sects for which support is exacted. The Constitution requires, not comprehensive identification of state with religion, but complete separation."●

THE AIR TRAVELERS SECURITY ACT OF 1983

● Mr. WARNER. Mr. President, yesterday, the Senator from Tennessee (Mr. SASSER) and I appeared before the Aviation Subcommittee of the House Public Works and Transportation Committee to testify in favor of the Air Travelers Security Act (H.R. 2053 and S. 765).

This is one of the most important proderegulation, proconsumer rights, procompetition bills to come before the Congress in some time. It is a bill which insures that the consumer is protected from fraud in the marketing of travel accommodations while at the same time the opportunities for competition in the marketing of travel accommodation are made unlimited.

So that all Senators may have the opportunity to gain a broader understanding of this important measure, I ask that the statements made by the Senator from Tennessee (Mr. SASSER) and myself be printed in full in the RECORD.

The statements follow:

SENATOR JIM SASSER—STATEMENT ON H.R. 2053 BEFORE THE COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION, SUBCOMMITTEE ON AVIATION

Mr. Chairman, I want to thank you for this opportunity to discuss, along with Senator Warner—with whom I co-chair the Senate Tourism Caucus, my views on H.R. 2053.

I suppose I could sum up what I have to say, Mr. Chairman, by posing as a question the title of a popular song of the 1960's, "Do You Know The Way to San Jose?"

I am sure that you do. But someone from my home state of Tennessee probably wouldn't know. They would probably contact their local travel agent in order to learn the quickest way. Likewise, the people from your home district in San Jose would probably have to contact their travel agent if they wanted to visit the "Home of the Blues" on Beale Street in Memphis or the Grand Ol' Opry in Nashville.

The problem is this: the ability of people to find the way to San Jose, or to Memphis, or to Nashville, is going to be seriously threatened come January 1984—if we don't set aside last year's narrow CAB decision. H.R. 2053 would do just this, vacate that decision and provide immunity for the current relationship between travel agents and the airline industry.

Other witnesses this morning will more than cover the many arguments related to H.R. 2053 and its Senate companion, S. 764. My brief remarks focus on what I believe will be the outcome . . . if immunity from antitrust statutes is not maintained for the Air Transport Conference.

Let's take the precedent of so-called rate deregulations. I supported deregulation of the airline industry and the sunset of the Civil Aeronautics Board. I had hoped that deregulation would encourage a healthy competition among carriers. I had hoped that short-haul carriers would fill in on those routes that were less-than-lucrative for major airlines.

That's what I had hoped. What we got was: a suicidal rate war among the airlines in which cut-rate prices made it attractive to go from Washington to Miami—but both costly and inconvenient to go from Washington to Chattanooga; a rate war that contributed to the demise of Braniff airlines; a rate war that still threatens the basic stability of the industry.

No one in the Congress really wants to regulate once again the routes or rate structures of airlines. But there is strong sentiment toward that direction—unless the airlines can exercise restraint and common sense on their own.

That kind of industry self-restraint, that kind of working and workable arrangement, is already in operation in the relationship among travel agents and the airlines. I say: let it continue to work.

The last thing we need is another episode of suicidal competition among airlines and travel agents. But I submit that this is exactly what could happen should the CAB ruling be allowed to stand.

I am concerned, too, about the economic impact to my state should the CAB decision be effected.

The more than 1,000 people working at travel agencies in Tennessee were responsible last year for $195 million in airline bookings. The payroll derived from booking commissions and the tax revenues these agencies generated for federal, state and local governments represent scores of millions more in positive economic impact for our state.

So, it comes down to this: common sense tells us it would be illogical not to act on the CAB ruling; economic sense tells us it would be too costly not to act.

I therefore urge this subcommittee to act, and to act favorably and quickly on H.R. 2053.

TESTIMONY OF SENATOR JOHN W. WARNER BEFORE THE AVIATION SUBCOMMITTEE, HOUSE PUBLIC WORKS COMMITTEE

Thank you, Mr. Chairman.

I appreciate the courtesy you have extended Senator Sasser and me, as the primary Senate sponsors of the Air Travelers

Security Act, to testify before the Aviation Subcommittee on this very important travel and tourism, consumer rights legislation.

There are some critical issues surrounding this measure which I feel must be examined more fully. The general public and the parties interested in the outcome of this debate must have every opportunity to completely understand these issues. They are:

(1) "Exclusivity," and

(2) Antitrust immunity.

EXCLUSIVITY

The Air Transport Conference program contains three provisions which, collectively, have been termed "exclusivity." The word, "exclusivity," is potentially confusing because the Conference program does not exclude qualified travel agents, and there are no quotas or other inappropriate barriers to entry into the travel marketplace.

In his decision, the Civil Aeronautics Board's administrative law judge found that the program merely prevented non-accredited persons from acting as agents for Conference airlines. But the judge also found that the program should not bar people from having other relationships with the airlines.

Further, the CAB's administrative law judge determined that elimination of this recognition by the Conference of its agents would endanger the viability of the present worldwide transportation marketing system.

He determined that elimination of this recognition would undermine intercarrier confidence in the travel agent network and in the reliability of interlining, ticket interchangeability and refundability.

He determined elimination of this recognition would reduce the universality of carrier representation by travel agents;

Threaten the competence and professionalism of the travel agency industry as a whole;

Undermine consumer confidence in the competence, professionalism and universal representation of such agents;

Reduce consumer use of the travel agent marketing system and competition within it; and

Reduce the availability of travel agents representing all carriers providing consumers with complete and reliable information on all travel options.

Clearly, the Conference certifies travel agents for purposes of consumer convenience and confidence. But if a consumer does not want to purchase travel accommodations through a travel agent, he or she has several other alternatives available.

The consumer can pick up the phone and shop from one airline to another until he or she finds just the right flight, at the right time and at the right price.

Or the consumer can go to a tour broker, purchase travel accommodations in a package, and obtain either regular schedule transport, charter service.

Finally, a consumer can, in some areas of the country, buy airline tickets from automated dispensing machines representing a limited number of carriers, or directly from an airline ticket office.

As far as the travel agencies are concerned, as a competitive force in the marketplace there are over 22,000 of them.

Virtually all are small businesses with fewer than 10 employees. Over half of these agencies are owned by women, and as employers of minorities, travel agencies have one of the finest records of any enterprise in our nation.

The travel agency business grows by an average 1,000 new agencies a year. That's over 1,000 new entrepreneurs a year who enter the marketplace to make it or break it on their own, in competition with other travel agencies, in competition with every customer who chooses to take the time and effort to arrange their own travel, in competition with tour brokers, and in competition with the automated ticketing machines and airline ticket offices operated by the airlines themselves.

The only thing exclusive about a travel agent is that a travel agent is a promoting force in the marketplace and because of that, the airlines remunerate travel agents with commissions for the tickets they sell.

Other market forces, if they can demonstrate and are able negotiators in the free marketplace, also may obtain remuneration in the form of customer discounts, and other nonfinancial benefits.

So let's be perfectly frank, Mr. Chairman. Let's recognize once and for all that the term, "exclusivity," is nothing more than a smoke screen behind which certain interests are hiding in the hopes of radically changing the present marketing system so that they do not have to meet certification requirements.

The present marketing system is highly competitive. It affords the consumer confidence, convenience, and the broadest selection possible. It has evolved over the past 40 years . . . responding to the demands of the marketplace; doing so without complaint or objection from the traveling public or the industries it represents.

ANTITRUST IMMUNITY

Antitrust immunity is a very important aspect of the Air Travelers Security Act. It is, in my estimation, the cornerstone of the Air Transport Conference. Without it, I am convinced the Conference will be forced out of existence. The travel marketing system—as we know it and as it is evolving during CAB sunsetting—will collapse, and in its place will come a highly decentralized, totally chaotic marketplace in which the battle cry will be "Buyer, beware."

Let me clarify one thing in light of this statement.

Supporters of this legislation are not anti-deregulation.

On the contrary, I believe I can safely speak for at least all of the Senate cosponsors of this legislation when I say, we believe that Congress made the right decision, and we would not for a moment attempt to re-regulate the airlines industry.

And that, Mr. Chairman, is why we are so amazed by the CAB's split decision to strip the Conference of its immunity effective January 1, 1985.

With the protection of immunity, the Conference will be able to act, as we believe the present administration would desire, and as we believe Congress intended after CAB sunset, as the industry's self-regulating mechanism.

The Conference would be capable of seeking the continued cooperation of industry members and agents, ensuring that the consumer continues to enjoy the best possible service in the most universal fashion obtainable.

And the Conference could do that free of government interference—but only if the Conference continues to have antitrust immunity.

Without antitrust immunity, the Conference would be forced into the regulatory environment of the courts and the U.S. Justice Department.

The CAB itself, in its order instituting the Competitive Marketing Investigation, recognized the importance of antitrust immunity, and wrote:

"Without immunity * * * it is likely that neither the IATA (International Air Transport Association) nor the ATC (Air Transport Conference) conference systems could have been developed."

In the course of the Congressional debate, as they did during the CAB's debate on this issue, the few opponents of the present system have publicly attempted to downplay the importance of the antitrust aspects of the Conference agreements.

But, for the airline members of the Conference, antitrust litigation would spell continued, deep financial hardship, especially during these times when the airlines are not in strong financial condition.

For the travel agencies, antitrust litigation could spell bankruptcy, especially since most of them are only small businesses, and many are barely able to meet their day to day expenses, let alone the cost of prolonged and expensive antitrust law suits.

And for everyone else who, at this time, thinks the way to attain a more rewarding financial relationship with the airlines is by stripping the Conference of its antitrust immunity, that kind of litigation can only spell higher cost air travel and a higher cost of doing business.

Mr. Chairman, the antitrust aspects of this legislation go far beyond simply the working relationships of the airlines with one another and the travel agents with the airlines.

The antitrust aspects of this issue go to the heart of the consumers' ability to have a meaningful choice and the consumers' ability to shop with confidence in the travel marketingplace.

The antitrust aspect of this issue effect all forms of accommodation in the travel and tourism industry, and they effect the millions of persons who not only consume, but who are employed throughout the industry.

That is why, almost without exception, people who understand the agency-carrier system believe it should remain intact.

The system relies heavily on collective agreements, on common rules and standards. But without immunity, these agreements and standards are strongly disfavored by the federal antitrust courts. Therefore, the system must receive antitrust immunity if it is to continue.

A final point, Mr. Chairman, from a foreign relations perspective. The State Department advised the CAB that without antitrust immunity, foreign governments which participate in bilateral agreements for the marketing of air travel would consider those agreements as empty gestures, tantamount to disapproval.

At at time when international tensions are so high, and our balance of payments is so distorted, it seems to me we ought to be doing more to encourage international travel . . . the understandings and commerce it generates . . . rather than discouraging it. The Air Travelers Security Act would help achieve that goal.

In the end, Mr. Chairman, it is the consumer who has the most at stake here.

The choices for Congress, it seems to me, are quite clear.

Is it the will of Congress to allow the present, highly competitive, extremely adaptable, totally consumer oriented travel marketing system to continue—protected as it must be by antitrust immunity to insure that when a consumer chooses to use a travel agent that agent is indeed a bonafide

representative for all travel accommodations?

Or is it the will of Congress to destroy the present, highly competitive, extremely adaptable, totally consumer oriented travel marketing system . . . subjecting the consumer to unnecessary risk, fraud, chaos, and inconvenience; subjecting member firms of the travel industry to unnecessary and arbitrary litigation and the inherent costs involved?

Mr. Chairman, there is an old adage: "If it ain't broke, don't fix it."

The present system certainly is not broken. It serves the public interest efficiently and effectively while promoting unlimited competition.

If Congress accepts the CAB's fix, neither the public's interest, nor the interests of the very few who oppose our legislation will be served.

I urge support of the Air Travelers Security Act of 1983.●

REHABILITATION AMENDMENTS OF 1984

● Mr. STAFFORD. Mr. President, I would like to add support to S. 1340, the Rehabilitation Amendments of 1983. I commend my distinguished colleagues, Senator WEICKER and Senator RANDOLPH, on their leadership in developing this legislation and their commitment to handicapped individuals of this Nation.

The vocational rehabilitation program has been in effect for 63 years, providing restorative services to handicapped individuals as well as job training and placement. The focus of the rehabilitation State grant program is to train disabled people so that they are able to enter the job market.

According to the Rehabilitation Services Administration, persons rehabilitated in fiscal year 1980 are expected to pay to Federal, State, and local governments an estimated $211.5 million more in income, payroll, and sales taxes than they would have paid had they not been rehabilitated. In addition, another $68.9 million will be saved as a result of decreased dependency on public support payments and institutional care. The estimated total first year benefit to Federal, State, and local government will be $280.4 million. The vocational rehabilitation program is cost effective.

Mr. President, three issues need to be highlighted.

REPORTS

Currently, the Rehabilitation Services Administration is required to submit to Congress an annual report which includes data on services and activities provided to their clients. Due to the reduction in paper work order, there has been a lack of available data. Senate Bill 1340 specifies the type of data RSA is to collect and include in its annual report. Under the amendments, the Rehabilitation Services Administration is mandated to include demographic data on clients; costs and types of services provided, and the earnings of a client when they become employed. This information is necessary for Congress to properly assess the rehabilitation program.

EVALUATION

Besides the State grant program, the rehabilitation act authorizes several discretionary programs, including the projects with industry and independent living programs. The Congress is interested in the performance of this program which it has authorized. Therefore, under the amendments, RSA is required to develop standards for evaluating these programs authorized by the Rehabilitation Act.

INDEPENDENT LIVING

In the 1978 amendments to the Rehabilitation Act, Congress established the independent living program to serve severely handicapped individuals. Since that time, over 154 independent living centers have been established across the country. The services most frequently offered by the programs are: Information and referral; personal care attendant programs; peer counseling; housing assistance; transportation assistance; independent living skills, and advocacy services. These services give severely handicapped individuals an opportunity to live as independently as possible. The staff of these centers is primarily comprised of disabled individuals. The Vermont Center for Independent Living was established in August of 1980. In Vermont, the center has served 248 individuals in their peer advocacy counseling program, while the information and referral program responded to 1,319 contacts last year.

This legislation increases the authorization for this program, and provides for an evaluation of the program.●

● Mr. STEVENS. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee has received a request for a determination under rule 35 which would permit Ms. Kathy Stoner of the staff of Senator JESSE HELMS, to participate in a program sponsored by Tunghai University, in Taipei, Taiwan, from August 9–17, 1983.

The committee has determined that participation by Ms. Stoner in the program in Taiwan, at the expense of Tunghai University, to discuss United States-Taiwan relations, is in the interest of the Senate and the United States.●

MAMMOTH SITE A NATIONAL TREASURE

● Mr. PRESSLER. Mr. President, it is with great pride that I rise today to talk about one of the most important archaeological discoveries in North America. I am referring to the Mammoth Site of Hot Springs, S. Dak., which was discovered in 1974. The Mammoth Site is a historical gold mine which contains the remains of some 100 giant mammoths, and countless other prehistoric animals. The remains date back over 26,000 years before the time Christ walked the Earth. It contains possibly the largest concentration of these ancient animals to be found in North America. In recognition of the Mammoth Site's importance, the U.S. Department of the Interior designated it as a national natural landmark in 1980.

This treasure of scientific knowledge will provide us with a unique insight into the history and evolution of this wonderful and fascinating planet we call Earth. I am extremely proud that we have this vitally important find in my home State of South Dakota. I also take great pride in the way the local community of Hot Springs, S. Dak., and the entire State have reacted to and cared for this invaluable historical laboratory.

In the spirit of volunteerism and dedication to learning for which South Dakota is so famous, a nonprofit organization—the Mammoth Site of Hot Springs, S. Dak., Inc.—was created to preserve and develop the site. Hundreds of thousands of dollars of local money have been raised for the benefit of the entire scientific world. We are now in the process of fighting for a Federal grant to help defray some of the costs of this project. We are working to build a protective shelter for the site, a museum and visitors center to educate visitors, a laboratory, and other necessary facilities.

In addition to its great scientific and educational value, the Mammoth Site holds great potential for the economic well-being of Hot Springs and the entire State. It will bring more tourists, educators, scientists and other interested parties into the State. It will stimulate businesses and provide jobs for many unemployed South Dakotans.

In the past 2 years, 50,000 visitors have toured the site, despite its limited facilities. With increased development, those numbers will quickly mushroom. As chairman of the Senate Subcommittee on Business, Trade and Tourism, I know well what an important site like this means to the State's economy.

I strongly urge my colleagues to join me in support of this great treasure. I am very proud that we in South Dakota have been entrusted with its care, and will do every thing possible

to see that it receives proper recognition as one of the greatest discoveries of our century.

SENATE JOINT RESOLUTION 136—VOLUNTEER FIREMEN RECOGNITION DAY

● Mr. D'AMATO. Mr. President, I rise today to cosponsor Senate Joint Resolution 136, to help recognize the excellent job performance of the volunteer firemen of this country. Being a volunteer fireman myself, I well know the sacrifice that all these men and women must endure. These unsung heroes risk their lives every time they respond to a call.

Over 80 percent of the firefighters in the United States are volunteers. They protect a large percentage of the rural towns in the United States; 337 volunteer firefighters have lost their lives in the line of duty during the last 5 years, with 68 such deaths in 1982 alone. Their job is becoming increasingly more dangerous and difficult. Towns are rapidly expanding in size, and fire departments are forced to cover ever larger areas without increases in funds or manpower. Sadly, the firemen in America face one of the highest fire death tolls in the world.

Mr. President, it is for this reason that we must all respect and admire the hard work of the U.S. volunteer fireman. I wholeheartedly support "Volunteer Fireman Recognition Day" and I urge quick action by the Senate to pass this joint resolution.

TRIBUTE TO THOMAS D'ALESANDRO, JR.

● Mr. SARBANES. Mr. President, the people of Baltimore have been well served indeed by one of the most remarkable public servants it has ever been my privilege to call my friend, Thomas D'Alesandro, Jr.

The son of immigrant parents from central Italy and one of 14 brothers and sisters raised in Baltimore's Little Italy, "Big Tommy" as he is respectfully known, was elected to the Maryland House of Delegates in 1926, served in the Baltimore City Council from 1935 to 1938, followed by five terms in the House of Representatives, where he was chairman of the District of Columbia Committee, and then three terms as mayor of Baltimore from 1947 to 1959. On the eve of his 80th birthday this week, Tommy D'Alesandro lives in Little Italy, near St. Leo's Church where he was educated. This remarkable man, who has worked with and advised Presidents Roosevelt, Truman, Kennedy, and Carter, as well as a host of Senators, Governors, and Congressmen, remains an enthusiastic leader of our community.

His outstanding record of public service and leadership has inspired many to emulate and follow his example. Members of his own family have followed in his distinguished footsteps. "Young Tommy" D'Alesandro III also served as mayor of Baltimore with distinction and remains active in law practice, and daughter Nancy D'Alesandro Pelosi is a leader in the Democratic Party in California.

Mr. President, this unique and respected public servant will celebrate his 80th birthday this week. I ask that excerpts from a recent biography of "Big Tommy" D'Alesandro be printed in the RECORD at this point.

The material follows:

[From the Baltimore Magazine, July 1982]

THOMAS D'ALESANDRO, JR.

(By Robert Douglas)

One August morning in 1979 President Carter boarded an Amtrak Metroliner and came to town, the lastest track in his whistle-stop tours. He visited East Baltimore, proffered advice on energy, and spoke at the national convention of the Sons of Italy at the newly opened Convention Center.

Around noon the president's motorcade pulled into South High Street in Little Italy, the compact neighborhood of row houses and restaurants on the eastern edge of the Inner Harbor. But Carter had a visit to make before lunch at Chiapparelli's. He and his wife, Rosalynn, stepped into the crowd and walked around the corner to Albemarle Street. It was a route most local politicans had taken, but few members of the presidential press corps knew where it led.

"Where's he going?" shouted one national correspondent.

"To Tommy D'Alesandro's home," a member of the crowd replied.

"*Whose* home?" said the correspondent, flipping open his notebook.

Carter was following in the footsteps of virtually every major Democratic politician who had visited Baltimore during the past forty years. Thomas D'Alesandro Jr.—"Mr. Democrat" to local party members, "Dad" to another former Baltimore mayor, and just plain "Tommy" to several presidents—was the mentor to see. And there in the home at 245 Albemarle Street, beneath framed pictures of D'Alesandro and Roosevelt, D'Alesandro and Truman, and D'Alesandro and Kennedy, Carter posed for his addition to that lineup.

Then Carter and D'Alesandro and their entourages walked the thirty yards to Chiapparelli's and a chicken cacciatore lunch with other prominent Democrats (among them Senator Paul Sarbanes, Mayor William Donald Schaefer, then-Attorney General designate Benjamin Civiletti, City Councilman Dominic "Mimi" DiPietro, Governor Harry Hughes, and Senator Charles McC. Mathias).

But high-powered politics apparently were not what Carter wanted to hear that day. Before the white wine had been sipped, the conversation shifted to tales of rough ward politics and the brutally honest observations permitted an older man—one who began his campaigning known as a "goddamn dago." Tommy D'Alesandro held center stage with his salty political yarns. Jimmy and Rosalynn Carter listened entranced.

In an age of media consultants, campaign polls, and voter profile analyses, Tommy D'Alesandro is an expert on basic politics.

His own political career spanned thirty-three years, beginning in 1926 when he was elected to the House of Delegates. He served on the City Council from 1935 to 1938, then in the House of Representatives for a decade (where, as chairman of the District of Columbia Committee, which then ran the District, he became known as the "mayor of Washington"). He was mayor of Baltimore from 1947 to 1959.

But after the series of victories came two losses. Republican J. Glenn Beall beat him by seven thousand votes for a U.S. Senate seat in 1958. The second, and perhaps more painful, loss came the next year to J. Harold Grady in the Democratic primary for mayor of Baltimore, Grady arguing in his campaign that D'Alesandro had been in office too long.

At 78 D'Alesandro has been retired from active politics for almost two decades, but his sharp political eye has not dulled at all. And the national and local politicians (Harry Hughes, up for renomination, is among them) who come to share a meal and the stories at Chiapparelli's come because "Old Tommy" bridges two political and social eras.

The mayoral era of Old Tommy (so called to distinguish him from his son, Thomas III, who served as mayor beginning in 1967) was the start of a new Baltimore, a planning and building campaign geared to give the city the status he describes simply as "major league." D'Alesandro also is a man born and reared during the heyday of political machines. That makes Old Tommy—and only Old Tommy—the son of old Baltimore and the father of the new. In him many find where Baltimore started or where it's going.

But in the Baltimore of 1982 D'Alesandro finds a lot he does not understand. During four hours of interviews in his home—part shrine, and part museum—D'Alesandro touches upon the issues of today and of simpler times.

For example, his was an era when, as he told Time magazine in 1955, keeping the streets blacktopped helped big-city mayors pave their way to victory at the polls. D'Alesandro still regards the "inch-inch" method of paving as one of his greatest achievements as mayor. By that method road crews covered streets with a thin coating of asphalt rather than digging up the entire surface. Repairs were finished in a few days without greatly disrupting travel or business.

D'Alesandro says he's told Mayor Schaefer he can't understand the current state of the city's roadways. "There're a lot of axles being broken now. I told the mayor, 'I thought Rome was the Holy City when I became mayor, until I found out Baltimore was the Holey City. It's full of potholes. Now, you better get a loan through and start fixing these streets. That's the only thing you'll have to do, and you'll walk in. These streets are bad.'"

He admits to amazement at Schaefer's success during an era of higher taxes and fewer municipal services. "I don't understand. When I was mayor, we had a million and some people. The population made us the sixth largest city in the country. Today, it's dropped to eighth or almost ninth. The population has decreased, but taxes went up and more people are working for the city government. I don't understand it.

"Yet the government and mayor go on. I had an average [property] tax rate over ten years of $2.98 [per $100 of assessed value]. He's got one of $6 [actually, $5.97]. He gets reelected; they love him. Just like 'You beat me, daddy. I love it. Beat me again!'"

Although D'Alesandro professes not to understand the success of Schaefer, there are many parallels between the two. Both worked hard to improve the city's image. Both gained national reputations through their achievements and their ability to generate positive publicity (and both shared a talent for hamming it up in front of press photographers). Both have stayed in their boyhood neighborhoods.

But, says D'Alesandro, his duties as a family man added pressures today's bachelor mayor never has had to face. "The difference between me and Schaefer? I had a gang of kids. I had to send them to college and school and all. He has nobody but his mother and a cat, and I don't think the cat even hollers meow."

Although his children have presented public relations problems, D'Alesandro says they also were an asset in the early years. "When I was running for Congress, my wife and them made a song. My opponent was walking down the boardwalk at Ocean City, and my kids had a sign and a song." D'Alesandro places both hands atop his cane and taps out march time on the floor as he sings, to the tune of "The Notre Dame Fight Song":

Cheer, cheer for Tommy D'A,
He is the winner of every fray.
Cast your vote for Tommy D'A,
The defender of the USA.

Unlike politicians today D'Alesandro has not moved from his roots. He still lives in the small row house near the main corner of Little Italy—the one with Chiapparelli's, Sabatino's, Capriccio, and Trattoria Petrucci restaurants on the four corners. It is "sacramental ground," he says, just three blocks from President Street, where he was born in August 1903.

And unlike most former politicians nowadays, he is not eager to tell all; he is not searching for a ghostwriter to expose his true story as a best-seller. During interviews D'Alesandro appears content to keep any secrets he has, fending off questions about past political bosses with a quick retort: "I'm still around. They're not around."

He shows signs of age. He walks cautiously with the help of a cane, complains about the medicine he has to take at prescribed times, worries aloud about eating on the proper schedule. "I feel a little weak," he admits. "I lost some weight, but I'm getting along nice."

Nice enough to keep what amounts to a campaign pace. "I get out. Saturday night I'm going to the Italian American Charities banquet. I was one of the original organizers of it. Sunday I'm going to St. Leo's party. I go to different places. On the ninth I'm going to go to Italian American Charities [for its monthly meeting]. I went to the races one day, got tired, and had to stay and sit down. I won't go to the Preakness because it's too crowded, and everybody wants to talk and hello and then you'r Joed out and no good. If you get a winner, that helps."

The dapper style that impressed photographers has not gone. He still wears smart-looking suits. He is reluctant, though, to pose for photographers now because he lost nearly thirty pounds while hospitalized briefly this spring. (He checked in for treatment of a bleeding ulcer, a bladder infection, and diabetes—all miseries of aging.)

The first floor of the row house where he, his wife, and two of their sons live still looks as though it were designed to receive large groups. The first-floor dining and living rooms are unusually spacious. Along one wall is an antique cabinet displaying many of the gifts the couple received four years ago for their fiftieth wedding anniversary. Nearby, along the wall of the stairs leading to the second floor, are the pictures that mean the most: D'Alesandro and presidents, D'Alesandro and the local politicians of the past, D'Alesandro and the famous. With little effort he remembers all the names.

The drawers of several tables and desks are filled with mementos. From this collection he pulls out a large brochure. He opens it, exposing dozens of color pictures showing the projects either started or completed during the first ten years he was mayor. The pictures are the baby photos of Baltimore today. There are views of Friendship Airport (now Baltimore-Washington International) with a crowd gathered around a bulky prop plane, Memorial Stadium, Liberty Dam, the Ashburton filtration plant, the new Lexington Market, the Jones Falls Expressway, the City Hospitals infirmary building, and a score of other, now familiar, buildings.

D'Alesandro discusses his other successes—the building of the Civic Center, the fluoridation of the drinking water, the installation of 16,500 electric street lamps to replace the ancient gas ones, the $2.88 property tax rate. "Fifty years of progress in a decade," D'Alesandro says as he folds the brochure, closing in his hands a time when—as the brochure boasts—small-town Baltimore became major league.

It was a time of great planning and extraordinary cooperation between City Hall and business leaders, who founded the Greater Baltimore Committee. The GBC's formation stemmed from an insult. "I went to Pittsburgh one time and saw the work that Mellon did," D'Alesandro recalls. "And they had me down to the Baltimore Association of Commerce one day to speak, and I told them the difference between Baltimore and Pittsburgh is that they have Andy Mellon in Pittsburgh, and we got watermelon for business leaders here. That started the GBC to go to town."

That inauspicious event may not have been the actual birth of Baltimore's renewal, but there is no doubt that major changes began in the next few years. The Inner Harbor was transformed from a decaying backwater to a waterfront park, clearing the way for later development. More important, after D'Alesandro's speech to business leaders, work began on Charles Center, the first new portion of glass-and-concrete Baltimore.

In 1952, the mayor helped form a syndicate of local buyers for a professional football franchise. Later, when the Colts were struggling, he stepped in to save the team. "I sent out twenty telegrams to twenty people to come to my office and asked for $20,000 apiece. . . . Nineteen showed up. One didn't, but he called me up and he pledged the other $10,000 to $20,000. I know they wouldn't do that today."

For two years D'Alesandro cajoled major-league baseball owners, trying to convince them to bring a franchise to sports-hungry Baltimore. He succeeded when the St. Louis Browns moved to Baltimore in 1954 and became the Orioles. (A tidbit from those days: Richard Nixon threw out the ball at the Orioles' opening day in 1954 when D'Alesandro was in the hospital.) The man who brought baseball to Baltimore says he is not afraid that Washington superlawyer Edward Bennett Williams, the team's present owner, may be the man to take them away.

But current Colts owner Robert Irsay, who periodically threatens to move the team, is a horse of a different color, D'Alesandro says. "You know what I would do? I'd give him a one-way ticket to Alabama and tell him to get the hell out. One day he's one way; the next day he's another way. I really don't understand the man."

A product of rugged East Baltimore machine politics, in which absolute loyalty always reaped rewards, D'Alesandro is disillusioned with today's breed of politician. "I don't want to say some of them are liars, but in the olden days your word was your bond. . . . They just sometimes say they're for you, and they're half-hearted for you and they're half for somebody else. . . . They take a chance on two horses in the race, and one of them has to come in first."

The hedging on bets may reflect changed political realities. "Anybody's got a chance today. It ain't like it used to be in the old days when I could go down in my cellar and name a ticket and the whole ticket would win. Today, political clubs are has-beens. The radio and television and newspapers, civic leagues, and community associations have taken their place."

In the "old days" when D'Alesandro began campaigning at age 21, political machines ruled the city. Power was divided among political camps, which retained their ascendacy through simple and direct back-scratching—helping those who had helped bring in the votes (see box, page 58). Loyalty was the most important attribute anyone brought to politics. At 23, when he became the youngest member of the Maryland House of Delegates, D'Alesandro aligned himself with the machine of political boss Willie Curran and then-mayor Howard Jackson.

When he became mayor twenty-one years later, D'Alesandro didn't forget the nuts and bolts of machine politics. "I'd come home with a pocketful of favors: Get me a job, get this, get that done. . . . Sometimes I would walk out of the house, and there was a line of people wanting to go to work. I'd put them in the limousine and drive them uptown and try to get them a job with the city. . . . . They'd be loyal to you, most of them working in the campaign and voting."

Throughout D'Alesandro's twelve years as mayor, it was rumored that James "Jack" Pollack, Northwest Baltimore's machine boss, had a direct line to City Hall for patronage in return for his support. However, D'Alesandro insists the late Pollack "never took a nickel."

(In 1959 J. Harold Grady, a fast-rising former FBI agent who had tied his political campaign to fund-raiser Irvin Kovens, beat D'Alesandro in the Democratic mayoral primary. Below the surface lurked the issue of D'Alesandro's friendship with Pollack.)

By 1967, when D'Alesandro actively campaigned for his son to become mayor, he had found a vastly different world. And when "Young Tommy" was elected, the new mayor inherited a city tense with racial animosity. The riots following the 1968 assassination of Rev. Martin Luther King, Jr., D'Alesandro remembers, put out the political fires in his son.

"My son was a great mayor; then they had the riot. I think it took the heart out of him. I think he went through it all right, but it took the heart out of him. He wanted to get out, and I said, 'Don't do that, and don't say you want to. You'll be a lame-duck mayor. Nobody'll pay any attention to you.' He said 'I don't care, I want to get the hell out.'" His son, now a private lawyer, indeed

did not seek reelection in 1971. D'Alesandro denies any regret over his son's decision, but adds that Young Tommy still could have been mayor today. "He was off to a good start."

D'Alesandro does blame the animosity of some city blacks for Young Tommy's move. "They were threatening his life, his kids' life, they were behind the trees at his house, and all that kind of stuff. And there was no call for it. Tommy was good for the minorities." Racial politics still are a powerful force in the city, he says, adding that the root of the city's economic and social problems today started with the 1968 riots. He refuses, though, to answer any questions on the matter.

For D'Alesandro much about today's realities are unsettling. "The nation is lopsided. I don't know what they are doing. The state's trying, the city's trying, and the federal government has cut them off." And now the nation has a president who acts as if he doesn't even want to be president, he says. "I doubt he [Reagan] even wants it, because I think he's fed up already . . . getting shot. He's trying. I like his smile and his waving. He acts like he's on the way to Mandalay."

Matters are just as topsy-turvy in the city, he says. "I built them [schools], and he's closing them," he says of Schaefer. "They tell me the teachers can't read and write, so I don't know what the pupils are going to do. . . . They want to be doctors without going to school, lawyers without going to law school."

The city buses, he says, are just as bad. "I never ride them. I got on once, but I'll never get on again. You have to fight your way in and your way out." Asked what he thinks of the subway, he says, "Well, about all we can do is think. It's been taking a hell of a time. . . . Where it starts or where it ends or where it's going to stop I don't know."

His assessments of local politicians are just as blunt. Hughes looks "like he's ahead" in his face for a second term, and "he's becoming a leader," D'Alesandro says. Republican gubernational candidate Robert Pascal is in trouble "because he has Ronald Reagan for president. If Reagan were strong, he'd be a strong candidate for governor. But the weaker Reagan gets, the weaker Pascal gets." And state Senator Harry McGuirk, also a candidate for governor, has "no chance at all."

D'Alesandro says he can't understand why City Council President Walter Orlinsky was indicted for allegedly accepting kickbacks on sludge-dumping contracts. "He's only got one vote in the City Council and only one vote on the Board of Estimates. How he can do anything for anybody I don't know." He dismisses City Comptroller and self-styled poet Hyman Pressman as a good "yodeler."

Still, D'Alesandor may have saved his most candid assessment for himself: "I hope you get the story printed in time for me to read it."

For him there is time now to enjoy his friends and family. All his sons are healthy and employed, several in the city courthouse, a once-popular haven for patronage jobs. His daughter, Nancy, is a Californian on the National Democratic Committee. His wife is able to move around with little difficulty now after her hip replacement operation.

His main source of excitement is gambling—handicapping horses and putting his well-known address to another use he likes to play 245, his house number, in the Maryland State Lottery. He interrupts one interview to ask, "What time is it?" It is 7:30 p.m., time for the lottery's daily drawing. He rushes to the TV, only to discover he has lost.

At the end of the interview he invites me to Chiapparelli's to sit below the second-floor dining room where he so richly entertained Jimmy and Rosalynn Carter. "When you are in Little Italy," he says, "you are my guest."

As soon as we enter the dining room, Old Tommy disappears down the side aisle and into the kitchen, walking carefully with his cane. He wants to see who is cooking this night. If it is someone he does not trust, he says, we will go elsewhere.

He returns, satisfied, and tells me the spaghetti with clam sauce looks good. We both order it, and when dinner arrives, I discover his portion is half again as big as mine.

"MR. PREZ, IF THE BOYS COULD ONLY SEE US NOW": D'ALESANDRO WITH ROOSEVELT AND KENNEDY

Tommy D'Alesandro, an honors graduate of the pragmatic school of politics, always said that loyalty should be repaid by those in power. This code applied to him when he was in office, and he expected it of those above him—even two of the most powerful presidents of the twentieth century.

As a U.S. representative, D'Alesandro remembers, he supported Franklin Delano Roosevelt's New Deal policies, but found another Maryland politician at the head of the line when federal appointments were being handed out.

"I got mad one day. I was always supporting Roosevelt, and [Senator Millard] Tydings was getting all the patronage. So I wrote him a letter and said, 'Mr. President, we believe in you and support you and your philosophy, but have received a political smack in the face when the distribution of political patronage comes around. Senator Tydings vilifies you and always votes against you and gets all the patronage.'"

D'Alesandro fired off the letter and got back to work on congressional matters. One bit of extracurricular horseplay involved a joke he and several colleagues were playing on a New York representative, Arthur Klein, who was awaiting word on whether he had been appointed a federal judge. D'Alesandro and friends invented bogus messages from Jim Rowan, then an important White House staffer, to keep the anxious Klein jumping. But the trick almost backfired on D'Alesandro.

"Later on I'm sitting in my [House of Representatives] seat, and a page comes up to me and says, 'Mr. D'Alesandro, the White House is calling.' I thought somebody was pulling a Darby [joke] on me and said, 'You take this message to the president. Tell him if he wants to talk to me to come to Little Italy. I'll talk to him, but not unless he comes down there.'

"So when I got back to my office, the secretary said, 'Did you get the call from the White House?' I said, 'What?' and she said, 'Mr. Rowan called, the president wants to see you.'

"So I called Jim Rowan, and he's laughing. He said the president got a kick out of it. So I got an appointment the next day, and I got into the White House. I remember he had a beautiful suit on. I said, 'That's a nice suit, Mr. President.' So he put his hand in his pocket and got his silver cigarette case out and gave me a cigarette, then he took one. He got a lighter to light mine, and I said, 'No, after you, Chief.' I could see the glitter in his eye. He's smiling, and I'm smiling.

"So what do you think slipped out of my mouth? I said, 'Mr. Prez, if the boys could only see us now.'" They did. Roosevelt had a picture taken of the meeting, and D'Alesandro used it in his next congressional campaign. More to the point, Roosevelt also handed D'Alesandro several patronage jobs that day.

Back-scratching was an art that cemented relationships with many powerful politicans, even with the Democratic Party's progressive new leader for the '60s, John Kennedy. While running for president in 1960, Kennedy contacted D'Alesandro in Ocean City, where he was vacationing.

For D'Alesandro, who was out of office, it was a chance to renew his political activity. His spectacular string of elective victories had been broken by two successive losses, but Kennedy still wanted D'Alesandro's help.

Kennedy, he says, "came down to Ocean City to see if I'd campaign for him. I said OK and let it go. "Two days later he called and said, 'When are you coming up?' I said, 'After the season.' He said, 'Noooooo, I want you to come up now.' So I went up the next day."

D'Alesandro set up a meeting between Kennedy and state Democratic leaders and also accompanied the candidate on several speaking engagements in the Baltimore area. After the election local newspapers reported that D'Alesandro was in line for an appointment with the Kennedy administration. But D'Alesandro says he was waiting impatiently for confirmation from Washington.

"I started getting endorsements, and nothing was happening. So I sent a telegram to the president. I got it upstairs. It's a beautiful, long telegram. I said, 'You mentioned my name, got me out on a limb, and you left me there. What are you going to do about it?' And then I got a call. I was at a banquet at the Belvedere, and I got a call to come."

D'Alesandro says he went to the White House the next day, and during his interview Kennedy suddenly walked into the room, put his arm around him, and said, "Hello, Tomatso." "And I said, 'Hello, Johnny.' I was kidding him and he laughed and that was it." D'Alesandro received an appointment to the powerful renegotiation board, an independent government agency that settles cost overrun disputes on federal contracts. He served from 1961 to 1969.●

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, there is a little bit of wrap-up to do tonight, matters we can dispose of, I believe, by unanimous consent.

Before I do that, however, I should make an announcement, I suppose. I talked to the distinguished minority leader of the House of Representatives a few minutes ago to get from him an estimate as to when we might have the supplemental appropriations conference report from the House. It was his best estimate that we are not likely to have that over here until after 3 p.m. in the afternoon.

Senators should not be under any misapprehension that that means we do not have to stay and deal with it tomorrow afternoon. We have very serious problems if we do not have that

bill on the President's desk before next Monday. Senators should know that we will continue to debate the Radio Marti, but as soon as we receive the conference report on the supplemental appropriations bill we will take it up.

As I said, I do not expect that conference report now before 3 p.m. in the afternoon. That means we will be in until 5 or 6 p.m. tomorrow in order to complete action on that measure.

ORDER FOR THE RECOGNITION OF CERTAIN SENATORS ON TOMORROW

Mr. BAKER. Mr. President, I am advised that there are requests for special orders for tomorrow. I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order, three Senators be recognized on special orders of not to exceed 15 minutes each as follows: Senators RIEGLE, BYRD, and WILSON, in that order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. Yes.

Mr. BYRD. Mr. President, I ask unanimous consent that my time under the order just entered by the majority leader be given to Mr. RIEGLE.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, there is one item on the Calendar of Business for today that has been cleared on this side for action at this time by unanimous consent. I inquire of the minority leader if he is prepared to consider at this moment Senate Concurrent Resolution 58, Calendar Order No. 318?

Mr. BYRD. Mr. President, this side had cleared that item for action.

Mr. BAKER. I thank the minority leader.

CORRECTIONS IN ENROLLMENT OF S. 272

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Senate Concurrent Resolution 58.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 58) correcting the enrollment of S. 272.

The concurrent resolution (S. Con. Res. 58) was considered and agreed to, as follows:

S. CON. RES. 318

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the bill (S. 272) to improve small business access to Federal procurement information, and for other purposes, the Secretary of the Senate is hereby authorized and directed, in the enrollment of said bill, to make the following corrections, namely, strike the matter relating to subparagraph (D) of section 8(e)(1) of the Small Business Act in its entirety and insert in lieu thereof "(D) the procurement is made from another Government department or agency, or a mandatory source of supply;"; in the matter relating to section 8(e)(1)(G) of such Act strike out "from an educational institution"; in the matter relating to section (8)(e)(4) of such Act after the phrase "or section 9 of this Act" insert "or unless a Federal department's need for the property, supplies, or services is of such unusual and compelling urgency that the Government would be seriously injured if the provisions of this paragraph were complied with"; in the matter relating to section 8(e)(4) of such Act after the phrase "for the award of a sole source contract" insert "or a contract that results from an unsolicited proposal"; and in the matter relating to section 8(e)(4)(B) of such Act strike out "sole source"; and in the matter relating to section 8(e)(4) of such Act add at the end thereof the following: "Annually, each department shall report to the Congress on each negotiation above the stated amount if the head of the procuring activity or his deputy did not approve the authority to enter into such contract.".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR STAR PRINT

Mr. BAKER. Mr. President, I ask unanimous consent that the Report of the Committee on the Judiciary to accompany S. 52 (No. 98-190) be star printed to reflect the change which I send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, that concludes the items in my folder for unanimous consent at this time. Tomorrow, the Senate will convene at 10 a.m. After the recognition of the two leaders under the standing order, special orders totaling 45 minutes will be available for Senators as previously ordered. After the discussion of the special orders, a time for the transaction of routine morning business will be provided for.

At the expiration of the time for the transaction of routine morning business, the Senate will resume the consideration of the unfinished business, which will be the motion to proceed to consideration of the Radio Marti bill.

It is anticipated that, during the day, the Senate will receive from the House of Representatives the conference report on the supplemental appropriations bill. As and when that occurs, it is the intention of the leadership on this side to ask the Senate to turn to the consideration of that conference report.

It is anticipated that the Senate will be in session for a full day tomorrow, I would now estimate about 5 or 6 p.m., perhaps even later.

Mr. President, I have nothing further to place before the Senate. I inquire of the minority leader if there is anything he wishes to address at this time.

THE ATTORNEY GENERAL'S REMARKS CONCERNING THE PRESIDENT'S STATEMENT BEFORE THE ILA

Mr. BYRD. Mr. President, I thank the majority leader. I will take advantage of the opportunity to speak a few words.

On the UPI wire, Washington, I find the following:

Attorney General William French Smith said Thursday if groups are to be condemned by the White House for the criminal activities of their leaders, the administration might "have to terminate all of our relationships with Congress."

Apparently caught off guard at a news conference on the President's new crime commission, both Smith and FBI Director William Webster sidestepped questions about the propriety of President Reagan appearing before the International Longshoremen's Association last week and his frequent political contact with Teamsters Union leaders.

Both Unions are among the handful that supported Reagan's Presidential campaign and both have been identified repeatedly by Federal prosecutors as having links to organized crime.

In his ILA speech, Reagan praised union President Thomas "Teddy" Gleason as a man of integrity, despite Senate and grand jury testimony that his union is controlled by organized crime.

Thirty-four ILA leaders have been convicted of racketeering in recent years as the result of FBI investigations into the links between organized crime and the union.

"You have to make a distinction between the individual who may have engaged in some illegal activity and the organization, Smith told reporters at the White House.

Mr. President, as one of the elected leaders in Congress, I do find it shocking to read what the Attorney General said, and I repeat these words from the wire:

Attorney General William French Smith said Thursday if groups are to be condemned by the White House for the criminal activities of their leaders, the administration might "have to terminate all of our relationships with Congress."

Now, while the report does not quote Mr. Smith as having used the word "leaders," it must have been very clear to a reporter or else the wire should not have used it.

I do not know what leaders he may have in mind, whether it is Senator BAKER or the Speaker or Minority Leader MICHEL of the House or myself or whips or other elected leaders in

either party. But I am shocked by that kind of statement, and I think the Attorney General should put up or shut up. If he is talking about a leader or leaders, he should publicly state which leader he has in mind. In any event, I would call upon him to publicly retract his statement, and he ought to apologize for it. It is shocking that the chief legal officer of the Government should speak so contemptuously of the Congress.

That is all I have to say, Mr. President.

● Mr. NUNN. Mr. President, on behalf of Mr. BIDEN and myself, I wish to state that the Attorney General's recent comments raise some very serious questions which he has apparently left unanswered. The criminal activities of certain Teamsters and ILA leaders are well documented not only in extensive hearings before the Senate Permanent Subcommittee on Investigations, but also in the files of the U.S. Department of Justice.

The Attorney General should disclose what information, if any, he has indicating criminal activities by the leaders of Congress who are generally recognized to be Senators HOWARD BAKER and ROBERT BYRD, and Representatives TIP O'NEILL, JIM WRIGHT, and ROBERT MICHEL. If he has no such information or charges against the leaders of Congress, then he should retract his statement and immediately apologize.●

Mr. BAKER. Mr. President, I have nothing further.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I move, in accordance with the order previously entered, that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to; and the Senate, at 6:21 p.m., recessed until Friday, July 29, 1983, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate July 28, 1983:

IN THE ARMY

The Army National Guard of the United States officer named herein for appointment as Reserve Commissioned Officer of the Army, under the provisions of title 10, United States Code, sections 593(a), 3385, and 3392:

HOUSE OF REPRESENTATIVES—*Thursday, July 28, 1983*

The House met at 10 a.m.

Rev. Msgr. Paul W. Clunan, St. Louis Catholic Church, Memphis, Tenn., offered the following prayer:

We pray Thee, O God of divine wisdom and justice, through whom authority is rightly administered, laws enacted, and judgments decreed, assist with Thy Holy Spirit of counsel and fortitude, these, our chosen leaders. Give them the light of wisdom to know what is right and the strength to act upon their honest convictions. Save them from pride and arrogance. Never let them use any situation or information to their own unfair advantage. Let them be fearless in defense of justice and truth. Give them a strength to uphold our laws and follow what is right, that they may obey Thy holy will and follow Thy divine purpose. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On July 12, 1983:

H.R. 3133. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes.

On July 13, 1983:

H.R. 1746. An act to authorize appropriations for the Navajo and Hopi Indian Relocation Commission; and

H.R. 2713. An act to amend the Public Health Service Act to authorize appropriations to be made available to the Secretary of Health and Human Services for research for the cause, treatment, and prevention of public health emergencies.

On July 14, 1983:

H.R. 3132. An act making appropriations for energy and water development for the fiscal year ending September 30, 1984, and for other purposes; and

H.R. 3135. An act making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes.

On July 15, 1983:

H.R. 1271. An act with regard to Presidential certifications on conditions in El Salvador; and

H.R. 2065. An act to authorize appropriations for the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes.

On July 25, 1983:

H.R. 3392. An act to amend the Agricultural Act of 1949.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a joint resolution and a concurrent resolution of the following title:

H.J. Res. 139. Joint resolution to designate the week beginning June 24, 1984, as "Federal Credit Union Week"; and

H. Con. Res. 39. Concurrent resolution expressing the sense of the Congress with respect to implementing the objectives of the U.N. Decade of Disabled Persons (1983-92).

REV. MSGR. PAUL W. CLUNAN

(Mr. FORD of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FORD of Tennessee. Mr. Speaker, it is a pleasure and an honor for me to welcome one of my district's most distinguished and best loved religious leaders to Washington, D.C.

Msgr. Paul Clunan was ordained into the priesthood some 41 years ago. For the past 25 years he has served the family and friends of St. Louis Church in Memphis, Tenn. He has been a source of inspiration, support, and encouragement to his parishioners, as well as to the entire community.

St. Louis Church, under the outstanding leadership of Monsignor Clunan has become a beautiful landmark in our city.

The vision and wisdom of his 25 years at St. Louis Church have provided many blessings to all those who know Monsignor Clunan. He has been successful in bringing many families together in a spirit of eternal happiness through the glory of God.

He has generously given his time and energies to numerous charities in Memphis, always remembering the needy and disadvantaged.

He has always opened the doors of his parish and the windows of his heart to all those who seek to come there.

Msgr. Paul Clunan has successfully bridged the gaps between all peoples in our community through his loving, ecumenical spirit.

Mr. Speaker, Memphis, the U.S. House of Representatives, and our country are all blessed by Msgr. Paul Clunan's divine presence today.

REV. MSGR. PAUL W. CLUNAN

(Mr. SUNDQUIST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SUNDQUIST. Mr. Speaker, as my colleague and friend the gentleman from Tennessee (Mr. FORD) said, this is the 25th anniversary of St. Louis Church in Memphis.

Monsignor Clunan opened the session today with a beautiful prayer. Monsignor Clunan is my friend. He could be said to be a product of the entire State of Tennessee. Born and raised in Nashville in middle Tennessee, he served as a young priest at a Maryville mission in east Tennessee. He spent most of his mature life as a religious leader in west Tennessee.

Monsignor is a graduate of St. Ambrose College in Davenport, Iowa, which is an archrival of my own alma mater, Augustana College. He has endeared himself to everyone in Tennessee and to other States and to those who have known him.

At different times, he has been both the chaplain of both the University of Tennessee and Memphis State athletic programs, which is no mean feat in itself.

Monsignor Clunan is the pastor of St. Louis Catholic Church in Memphis. He is the Vicar General of the Catholic Diocese in middle Tennessee. Paul Clunan is respected, highly appreciated, and deeply revered as a leader, as a friend, and as a man of God. He has a twinkle in his eye and he has love in his heart. We are grateful today for his recovery from a recent illness and we celebrate that by his presence today.

Monsignor Clunan, all who know you and who have been influenced by you have great love and affection for you.

PROVIDING AMOUNTS FOR FURTHER EXPENSES OF INVESTIGATIONS AND STUDIES BY COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT

Mr. ANNUNZIO. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

resolution (H. Res. 267) providing amounts from the contingent fund of the House for further expenses of investigations and studies by the Committee on Standards of Official Conduct in the 1st session of the 98th Congress, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 267

Resolved, That (a) for further expenses of investigations and studies by the Committee on Standards of Official Conduct (hereinafter in this resolution referred to as the "committee"), including expenses for procurement of consultant services under section 202(i) of the Legislative Reorganization Act of 1946, there shall be paid out of the contingent fund of the House not more than $200,000.

(b) Not more than $200,000 of the amount specified in subsection (a) may be used for consultant services referred to in such subsection.

SEC. 2. Payments under this resolution shall be made on vouchers authorized by the committee, signed by the chairman of the committee, and approved by the Committee on House Administration.

SEC. 3. Amounts shall be available under this resolution for investigations and studies carried out during the period beginning at noon on January 3, 1983, and ending immediately before noon on January 3, 1984.

SEC. 4. Amounts made available under this resolution shall be expended in accordance with regulations prescribed by the Committee on House Administration.

Mr. ANNUNZIO (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER. The gentleman from Illinois (Mr. ANNUNZIO) is recognized for 1 hour.

Mr. ANNUNZIO. Mr. Speaker, upon conclusion of my opening statement, I intend to yield to the gentleman from California (Mr. BADHAM), the distinguished ranking minority member of the Subcommittee on Accounts, such time as he requests, not to exceed 30 minutes, for the purposes of debate only.

Mr. Speaker, I yield myself such time as I may consume.

The purpose of House Resolution 267 is to provide $200,000 in supplemental funds for the special investigation authorized by the House during the 97th Congress, and reauthorized in this Congress by House Resolution 12.

I know of no investigation so important to the integrity of this institution and to retaining the confidence of the people. The value of the people's trust in our legislative branch is beyond measuring. Its loss would be catastrophic for this country.

The task set out in House Resolution 12 is of the greatest delicacy demanding the utmost in professionalism. The Committee on Standards of Official Conduct was directed by this House to investigate any improper sexual conduct; and illicit use or distribution of drugs; and any preferential treatment accorded in exchange for either of them, by any of our Members, officers, or employees.

The Nation's antennas are set aquiver by any news from this investigation. Any disclosures from it are instant headlines. Every step taken by the committee must be taken with infinite care. The results of its efforts can ruin families and taint careers. The disciplinary measures it recommends are sorely judged by millions of Americans.

A professional body is one which is specially entrusted with the confidence of the public. The Members of this House constitute such a body. As such a body, we must live within a voluntarily self-imposed code of ethics with strong sanctions against those who violate its provisions. By protecting the integrity of our code, we protect the integrity of our institution for which it is provided.

We repose the task of investigation, and recommendation with respect to imposition of sanctions, in our Ethics Committee, which is the Committee on Standards of Official Conduct.

As chairman of the Subcommittee on Accounts, I feel, as I know you do, a very personal responsibility for the integrity of this institution. Our responsibility includes all possible support of those to whom we have entrusted the responsibility and the authority; to study, to investigate, and to report any violations of our Code of Official Conduct.

The Standards Committee's contract with its professionally able special counsel, Mr. Joseph A. Califano, Jr., expires July 31, 1983. A new contract is required, so that the investigation and legal work in which he is engaged can be completed. The budget authorization in House Resolution 267 assures him the resources necessary to carry out the mandate of the House of Representatives.

I know there are Members who question whether we should spend large sums of money for the operations of our Ethics Committee. While some Members question the expenditure of funds, I feel we must provide an adequate sum to make certain that the House of Representatives polices itself in a professional manner.

It serves no purpose to have an Ethics Committee that functions in name only. The committee must have the funds to do—not just a good job, but—a first-class job.

This body will open itself to challenge of its real desire to police itself if we fail to give the committee the funds it needs.

This body is the House of the People. Its purpose is to write laws not break them. And, when Members do not comply with the laws of our land, or the accepted conduct of the land, then our Ethics Committee must have the funding to conduct its investigation fully, thoroughly, and expeditiously.

What we seek here is the truth. I would hate to think that we could not find the truth because we failed to spend enough money to do a thorough job.

This investigation is a nonpartisan matter. The supplemental budget requested should have the unanimous support of this House.

I urge all Members to vote "aye" on the previous question.

Mr. BADHAM. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is a difficult task that I face this morning, because I feel constrained to rise to oppose expenditure of the taxpayers money in this regard.

We are being asked to supply an additional $200,000 to the Committee on Standards of Official Conduct for the purpose of continuing investigations into the subject of sex and drugs amongst Members of the House of Representatives and those with whom they come in contact.

We all remember, with various degrees of emotion and various emotions indeed, the actions of this body last week when we received the report from the committee, which did do a thorough job—and I must say at this point that I have the utmost respect for its chairman, the gentleman from Ohio (Mr. STOKES), and the ranking minority member, the gentleman from South Carolina (Mr. SPENCE) and all the other Members who are called upon to serve as members of that committee.

But, Mr. Speaker, we should examine the work of this committee and examine whether or not and to what extent we should continue the work of that committee which has an apparently insatiable appetite for funds, investigation and staff.

Mr. Speaker, the committee and subsequently the House, by censure, called to the bar two Members of our body. Now, I cannot disagree with the fact that the admitted transgressions were intolerable; on the other hand, I think that dispassionately we should recognize that those acts, if performed by a Member of Congress with someone not a page, would be no crime. And, indeed, if the pages themselves had conducted the same acts with people not Members of Congress, there again would be no crime. But between Members and pages—the House after great investigation and great deliberation decided these acts were beyond the realm of acceptable conduct.

□ 1015

Now we are asked to fund an additional $200,000 for the purposes of continuing this probe into alleged drug abuse of the Members of the House.

We have spent in the investigation—just in consulting fees—not staff, not equipment, not telephone, not travel—from July 1982 to June 1983, $743,719.78.

We should stop and ask ourselves at this point: What have we received for this? Have we indeed demonstrated to the American people that the House has greater integrity than it had a week ago? I do not think so.

I have read the report of the committee, I have read letters to editors, I have seen editorial cartoons that certainly do not indicate an increased amount of credibility or integrity for this House. I agree that Members of Congress do feel required to have a different set of standards than most other people they represent.

In this morning's Washington Post an article appeared which quoted a letter to Joseph Califano from the Justice Department pointing out that the Justice Department conducted a complete investigation of allegations against Representatives DELLUMS, WILSON, and former Member Goldwater and has "determined there is insufficient admissible, credible evidence to support criminal charges."

Now, the difference between sex and dope is certainly great. But I said earlier there were no crimes involved in the previous stage of this probe. In this one, in the area of dope, there are crimes alleged, and the crime enforcement and investigation department of our Federal Government, the Justice Department, has said, and I quote again, has "determined that there is insufficient admissible, credible evidence to support criminal charges."

Why, then, do we have the additional burden of an endless search into the same thing that has already been decided by the Justice Department not to merit further investigation and not to merit any charges at all?

Those are the things we should consider before we go further into more fishing expeditions.

So, Mr. Speaker, I rise reluctantly, because I have the greatest respect for not only this House, but the committee on which I serve, the House Administration Committee, and for the members of the Ethics Committee, who have a difficult job, but I would ask for the defeat of this resolution so that the House might get back to legislating for the people of this country.

Mr. ANNUNZIO. Mr. Speaker, I reserve the balance of my time, and I yield 30 minutes to the gentleman from California (Mr. BADHAM) for the purposes of debate only.

Mr. BADHAM. Mr. Speaker, I yield 6 minutes to the gentleman from Minnesota (Mr. FRENZEL) for purposes of debate.

Mr. FRENZEL. Mr. Speaker, the Standards of Official Conduct Committee is one of the great committees of this House. Its work is tedious, its work is unpleasant, and the work that it does has been extraordinarily good since it was put together.

Its chairman, the distinguished gentleman from Ohio (Mr. STOKES), and its ranking minority member, the distinguished gentleman from South Carolina (Mr. SPENCE), have been cooperative and they have been effective in discharging the duties of their committee and of this House.

The fact that that committee is so strong and works so well is a tribute to the leadership of this House for insuring that good people get put on that committee and for insuring that the committee carries out its duties effectively. I have no criticism with the committee. I have only admiration and sympathy for the committee and the work that it does.

That committee is faced with real difficulty at this point. The House of Representatives gave it a charge with respect to the sex and drug investigations, and it has done its very best. It has finished its sex investigation, which culminated in the censure of two Members. It feels it must proceed with drug investigations.

It has a terrible problem. If it should stop its investigations and suddenly a rumor should arise anywhere in this country that relates to the House of Representatives and any sort of drug use, that rumor will stampede the press and stampede the country. As all of us know, the only thing that intrigues the press more than the salaries of Members of Congress is the possibility of sex or drug scandals in the Congress. And whatever scandal is raised gets automatic front page billing or 6 o'clock news time.

The problem, however, can be resolved if the committee is relieved of its charge by the whole House. If the committee goes the way it has been going, it will have to investigate every conceivable rumor that comes its way. It cannot decide for itself when to stop its investigation. I think it is time for the House to tell it to stop. Enough is enough. The pending resolution is too much.

That committee has already spent three-quarters of a million dollars of the taxpayers' money. This resolution allows it to spend $200,000 more, which will total about $1 million, of additional costs for these investigations.

This current investigation has not yet assumed the proportions of the Assassinations Committee, which labored for several years and $7 million, to no good effect for the taxpayers of the United States.

What we need to know and decide today is where the Standards of Official Conduct Committee is going. I do not think it knows where it is going. It has told its staff and its consultants to look into these problems. As the gentleman from California (Mr. BADHAM) correctly pointed out just a moment ago, the drug allegations against Members and ex-Members have been determined by the Justice Department to be unworthy of prosecution.

Now, how much additional work the committee has to do, I do not know, and the committee does not know. My suspicion is that its work will continue as long as its consultant lawyers continue to send invoices.

The committee feels obliged to investigate every rumor. It will send our lawyers to Nome or Pocatello or Blooming Prairie, or wherever, just as it did on the sex investigation, even though it already knows that the Justice Department has dropped its investigation.

And what sort of dope offenses will we find? I do not know, and they do not know. My judgment is that we are going to be the dopes because we continued to finance an investigation after the point which it became unreasonable.

I am in a difficult position. I have great respect for that committee. I have great respect for my subcommittee chairman, the distinguished gentleman from Illinois, Mr. FRANK ANNUNZIO. He has seen his duty and tried to relate to the obligation that the House has given the Standards Committee. But nevertheless, I feel obliged to part company from them. In subcommittee I voted for this resolution because it had to move forward. It had to come to the House for discussion. But now I am going to vote against it. I think it is time that we said, "Stop, we have had enough."

I think the committee staff should be able to handle whatever is left of the problem from here on out. I am not going to recommend that any other Member vote against this or that this resolution necessarily be defeated. I am only going to say that for one Member who has followed the course of these investigations, we have gone far enough.

I intend to request a vote, if no one else does. I intend to vote against the resolution myself, and I hope that the House will not want to continue this investigation forever.

I close with a further commendation for the Standards Committee and the leadership.

Mr. ANNUNZIO. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Illinois.

Mr. ANNUNZIO. Mr. Speaker, I want to assure the gentleman from Minnesota that this investigation will

end. As the gentleman knows, from the hearings of the subcommittee, I talked with the chairman of the Ethics Committee, the gentleman from Ohio (Mr. STOKES). He is present on the floor of the House this morning, I have talked with Mr. Califano. The sex portion of the investigation is over. They are now dealing with the drug portion of the investigation, and this investigation will be concluded possibly by the end of October.

So I want to set the record straight. As far as I am concerned, as chairman of the Accounts Subcommittee, I am taking both gentlemen at their word that this investigation will be concluded.

Mr. FRENZEL. I thank the gentleman for his statement. I feel much better after hearing it.

I still feel compelled to vote against the resolution.

Mr. BADHAM. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. LATTA).

The SPEAKER. It was the understanding of the Chair this morning that this debate was going to take but a few moments and that the House would proceed to the business of the day.

If this is going to be a prolonged debate, the Chair might suggest that the gentleman withdraw the resolution.

Mr. ANNUNZIO. Mr. Speaker, I have no further requests for time, and I intend to move the previous question on the resolution.

Mr. BADHAM. Mr. Speaker, I understand the time constraints. I yield 1 minute to the gentleman from Ohio (Mr. LATTA), and further than that, I have no requests for time.

Mr. LATTA. Mr. Speaker, I take this time to ask a question. I read in the local "Gazette" this morning that the Justice Department has already indicated that this drug investigation is over. Now, if the Justice Department has indicated that, why do we need to spend $200,000?

Mr. BADHAM. I said earlier on the floor, if the gentleman will yield to me—I do not read the Gazette, I read the Post this morning—a complete investigation has been done on the allegations and that the Justice Department "has determined that there is insufficient admissible, credible evidence to support criminal charges."

That is why I asked that this resolution be defeated.

Mr. ANNUNZIO. Mr. Speaker, if the gentleman will yield, as far as the Justice Department is concerned, the criminal investigation is over. But as far as the three Congressmen are concerned, they have taken all of the material of the investigation, and have now dumped it into the lap of the Ethics Committee.

Mr. BADHAM. Mr. Speaker, I do not want to prolong this debate.

Mr. ANNUNZIO. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 407, nays 3, answered "present" 1, not voting 22, as follows:

□ 1045

Mr. WHITTEN changed his vote from "present" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore (Mr. MOAKLEY). Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO MEET TODAY DURING 5-MINUTE RULE

Mr. McNULTY. Mr. Speaker, at the direction of the gentleman from New Jersey (Mr. HOWARD), I ask unanimous consent that the Committee on Public Works and Transportation be permitted to meet today during the 5-minute rule.

The matter has been cleared with the minority.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

REPORT OF NEW DEFERRALS OF BUDGET AUTHORITY AFFECTING ENERGY ACTIVITIES AND DEPARTMENT OF JUSTICE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98—88)

The SPEAKER pro tempore (Mr. MOAKLEY) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

(For message, see proceedings of the Senate of today, July 28, 1983.)

APPOINTMENT OF CONFEREES ON H.R. 2972, MILITARY CONSTRUCTION AUTHORIZATION, FISCAL YEAR 1984

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2972) to authorize certain construction at military installations for fiscal year 1984, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mrs. VUCANOVICH. Mr. Speaker, reserving the right to object, may I inquire, has this been cleared with the minority?

Mr. DELLUMS. Mr. Speaker, will the gentlewoman yield?

Mrs. VUCANOVICH. I yield to the gentleman from California.

Mr. DELLUMS. Yes; it has been cleared with the minority. All we are doing is appointing conferees to engage in a conference with the Senate on the military construction bill. It has, of course, been cleared with the minority.

Mrs. VUCANOVICH. Mr. Speaker, I thank the gentleman very much, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California? The Chair hears none, and, without objection, appoints the following conferees: Messrs. PRICE, DELLUMS, MONTGOMERY, KAZEN, WON PAT, DICKINSON, KRAMER, and WHITEHURST.

There was no objection.

CONFERENCE REPORT ON H.R. 2973, INTEREST AND DIVIDENDS TAX WITHHOLDING REPEAL

Mr. ROSTENKOWSKI. Mr. Speaker, I call up the conference report on the bill (H.R. 2973) to repeal the withholding of tax from interest and dividends, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of yesterday, July 27, 1983, at page 21219.)

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 30 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am bringing to the floor for immediate consideration the conference agreement on H.R. 2973. As this bill left the House, it repealed withholding on interest and dividends and provided relief from estimated tax penalties for those who had relied on withholding taking effect in making their estimated tax payments. The Senate added a number of related and unrelated provisions to the bill including the Caribbean Basin Initiative and returned it to the House. The House later added its version of the Caribbean Basin Initiative to the legislation prior to going to conference.

The conference agreement I bring to you today only contains provisions relating to matters which have been considered by the Committee on Ways and Means and the House. The House conferees have refused to agree to those provisions added by the Senate which were unrelated to the original bill or which had not been considered previously by the committee and the House. Thus, the agreement only contains provisions on the backup withholding system contained in the Senate amendment and on the Caribbean Basin Initiative. It does not contain provisions of the Senate amendment relating to trade reciprocity, enterprise zones, mortgage subsidy bonds, or the discharge of mortgage indebtedness. These matters will be considered by the Committee on Ways and Means in due course and will be brought before the House only after full and complete deliberations by the Committee on Ways and Means.

As to withholding, the conferees agreed to repeal withholding on interest and dividends and to include in the agreement a simplified version of the backup withholding provisions contained in the Senate amendment. The House version of estimated tax penalty relief was accepted. Under the agreement, backup withholding would be extended to taxpayers having unreported interest and dividend income, beginning January 1, 1984. Backup withholding would be generally applied at a 20-percent rate and would be instituted on a taxpayer only after an extensive notice period. Once instituted a taxpayer would generally stay on the backup withholding system until the end of the calendar year in which the problem was resolved.

A number of other changes were made to simplify the Senate provisions on backup withholding and penalties. However, the House conferees basically agreed with the thrust of the Senate amendments which are intended to encourage taxpayers and payors of interest and dividends to provide correct taxpayer identification numbers, that is social security numbers, to the Internal Revenue Service. It is clear that if the information reporting and matching process is to operate as a substitute for withholding, it must be greatly improved. Correct identification numbers are crucial as is payor reporting by magnetic media.

To reach that end, new requirements are included for providing sworn statements as to such identification num-

bers and as to one's status with regard to backup withholding. Reporting on magnetic media is required for all by 1985, although hardship exceptions are permitted. Stiffer penalties are provided for payors of interest and dividends for failures to accurately report such payments to the IRS and to taxpayers on 1099's, where due diligence has not been exercised. Due diligence requires an annual mailing, including one in 1983, to account holders with regard to the need for correct identification numbers. We are hopeful that institutions are preparing for such mailings now so that their files can be improved in this regard prior to January 1, 1984, We assumed in TEFRA that institutions would take the actions necessary to minimize the number of taxpayers who will face backup withholding on January 1 as a result of missing identification numbers. The conference agreement specifically requires a mailing, as described, in a further attempt to reach this result.

The conference agreement also requires a new 1099 form to be prescribed by the Department of Treasury and sent by payors of interest and dividends, in a separate mailing, to inform taxpayers of their liability for tax on these income amounts. While the conferees agreed not to require these 1099's to be stapled to the tax return because of processing difficulties, we did agree to take these other steps as a means of insuring that taxpayers have full notice of these amounts of income and understand that they are taxable. The adequacy of such notice is of added significance because the conferees also agreed to a recommendation from the Department of Treasury to adopt an additional negligence penalty instead of the added fraud penalty contained in the Senate amendment. This negligence penalty would apply to the tax due on any unreported interest and dividend income at the present law rate of 5 percent plus one-half of the interest due, unless the taxpayer had clear and convincing evidence to show that the failure to report the income was not negligent.

In conclusion, let me also stress that in repealing the withholding provisions, the conferees provide payors relief for whatever actions they might have taken in this period of great uncertainty about the status of the withholding provisions. For example, some dividend payors had to make decisions about withholding before June 15 and before Treasury's announcement of an across-the-board delay for 30 days in the withholding effective date. Other payors may find themselves in the same situation as the expiration of that 30-day period approaches. The conference report provides relief for amounts withheld through September 1. We also intend that payors be allowed to return withheld amounts to their customers under procedures to be prescribed by the Department of Treasury.

I turn now to the provisions of the agreement with regard to the Caribbean Basin Initiative.

Title II of the conference report contains the Caribbean Basin Economic Recovery Act, better known as the CBI. This legislation provides a very important package of trade and tax incentives to encourage economic development and revitalization in the Caribbean Basin region. Its centerpiece is the limited grant of a duty-free arrangement for qualifying CBI imports, subject to numerous conditions to protect vital U.S. interests. It also includes important benefits for Puerto Rico and the Virgin Islands. The program is designed to provide a means by which the countries of the Caribbean can promote their own economic growth through the incentive of increased trade and pull themselves out of an endless cycle of poverty and economic uncertainty.

This legislation recognizes the urgent need to provide greater trading opportunities for the Caribbean. In 1982, their combined trade deficit with the United States (excluding petroleum) was $2.9 billion. They are also amassing a huge foreign debt. If we do not give them the means and the incentive to sell more in the U.S. market in order to earn vital foreign exchange, they will be forced to buy less, and American industries will suffer as a result. Passage of this measure will preserve two-way trade and thereby serve America's long-range economic interests.

The conference agreement preserves all of the basic safeguards included in the House bill to protect U.S. industries and workers. Items which are import-sensitive in the context of Caribbean trade are still exempt; import relief measures are still included; special restrictions still apply to sugar; and the conferees accepted the House provision calling for annual reports to Congress by the Secretary of Labor on the impact of CBI on U.S. workers.

The conference report provides for payment of certain rum excise taxes to Puerto Rico and the U.S. Virgin Islands. It also allows tax deductions for business conventions held in certain beneficiary Caribbean countries or Bermuda provided the country enters into an exchange of information agreement. The conferees agreed to waive the exchange of certain civil tax information for a particular country when the Secretary of the Treasury determines the action would significantly assist tax administration and the President determines it is in our national security interest. The Treasury Department will also study the impact of Caribbean tax havens on U.S. tax revenues.

Mr. Speaker, the impact of this legislation on U.S. trade is miniscule and every possible safeguard has been included. However, I want to reiterate the commitment of the Committee on Ways and Means to maintain vigorous oversight of this program. We will receive regular reports from the International Trade Commission and Department of Labor, and if problems that we do not now foresee actually develop we will recommend modifications to the legislation.

In conclusion, I ask your support on this conference agreement.

□ 1100

Mr. KEMP. Mr. Speaker, will the gentleman yield for a question?

Mr. ROSTENKOWSKI. I yield to the gentleman.

Mr. KEMP. Mr. Speaker, I am a strong supporter of the Caribbean Basin Initiative and I congratulate the gentleman from Illinois, as well as my friend, the gentleman from New York, on the conference report which repeals the withholding of taxes on savings and dividends; so I want to congratulate the gentleman for his hard work in the conference along with that of my neighbor from New York (Mr. CONABLE).

What concerns me, there are more than 165 bipartisan cosponsors of a bill to encourage development in the economies of the inner cities of this country called enterprise zones.

The gentleman mentioned in passing that the enterprise zone legislation which had passed the Senate and has a number of cosponsors on both sides of the aisle was dropped. Could the gentleman tell us why and what are the plans for holding hearings on enterprise zones in 1983 giving this vital piece of jobs legislation a chance to come to the floor.

Mr. ROSTENKOWSKI. Well, in the conference, the chairman of the Committee on Ways and Means made a commitment to hold hearings on enterprise zones this fall. The reason, naturally, that we have not entertained any consideration of it is because our calendar has been so full; but it is the intention of the committee to engage in some hearings this fall.

Mr. KEMP. So there is not going to be any delay, if the chairman would yield another moment, there is not going to be any delay once those hearings are held this fall in bringing that legislation forward that is so critical to the job climate of the inner cities of this country?

Mr. ROSTENKOWSKI. I think the committee will make that judgment after the hearings have been held.

Mr. KEMP. Mr. Speaker, I thank the chairman.

Mr. HARKIN. Mr. Speaker, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman.

Mr. HARKIN. Mr. Speaker, I thank the gentleman for yielding.

I am a little more than just curious as to why and exactly how the Members of the House today are faced with voting on a conference report that contains a bill that was passed overwhelmingly by the House, that is, the repeal of withholding, which passed overwhelmingly in the House, coupled with another bill that was highly controversial and which did not pass overwhelmingly that is, the Caribbean Basin Initiative.

Mr. ROSTENKOWSKI. Well, the Caribbean Basin bill was also passed overwhelmingly by the House. The Senate added it as an amendment to H.R. 2973, and subsequently the House, by unanimous consent, agreed to add the House version of CBI to H.R. 2973 for purpose of a conference.

Mr. HARKIN. I know it was passed by the House, but I said it was a highly controversial bill.

Mr. ROSTENKOWSKI. I think that depends on how you define "highly controversial." There were only 129 votes against the Caribbean Basin Initiative. It had overwhelming bipartisan support. It even had a large majority of Democrats supporting it.

Mr. HARKIN. One hundred twenty-nine?

Mr. ROSTENKOWSKI. The vote on the Caribbean Basin Initiative was 289 to 129.

Mr. HARKIN. That is right; 129 Members of the House were strongly opposed to the Caribbean Basin Initiative.

What was the vote on withholding, if the gentleman can tell me, in the House?

Mr. ROSTENKOWSKI. I do not recall.

Mr. HARKIN. I do not think there were 10 votes against it, were there?

Mr. ROSTENKOWSKI. But both bills were passed by the House by very large majorities.

Mr. HARKIN. But it would seem to me, though, that Members of the House today are faced with voting on one conference report, I am curious as to how these two very distinct and different bills could be put together, forcing Members of the House to make one vote on those two.

Mr. ROSTENKOWSKI. I will say to the gentleman that the Senate provisions and the House bill were combined at the acquiescence of the House. Obviously, we were in a negotiating situation with the Senate, which first added CBI to this bill. We had no justification for turning down a measure the House overwhelmingly supported.

PARLIAMENTARY INQUIRY

Mr. HARKIN. Then I have a parliamentary inquiry, Mr. Speaker.

The SPEAKER pro tempore. The gentleman will state it.

Mr. HARKIN. Mr. Speaker, under rule 28, it seems to me that after the reading of any conference report a point of order lies if, in fact, there is a provision in the conference report that is not germane to the bill that was passed by the House, and I do not think CBI is germane to the repeal of withholding.

The SPEAKER pro tempore (Mr. MOAKLEY). In answer to the gentleman, by unanimous consent the House, prior to sending the bill to conference, joined both issues as a House amendment to the Senate amendment, so there is no germaneness question.

Mr. HARKIN. Mr. Speaker, I am sorry, I cannot hear the Speaker.

The SPEAKER pro tempore. By unanimous consent, the House joined both these issues, so there is no germaneness question.

Mr. HARKIN. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. HARKIN. Mr. Speaker, in other words, a unanimous-consent request was offered on the floor of the House during a House session to join both these issues and no one objected to that unanimous-consent request?

The SPEAKER pro tempore. The gentleman is correct.

Mr. HARKIN. So therefore today the Members of the House who are in favor of voting for repeal of withholding would also find themselves voting for the Caribbean Basin Initiative; is that correct, if they voted "aye"?

The SPEAKER pro tempore. The gentleman has not stated a parliamentary inquiry.

Mr. ROSTENKOWSKI. Mr. Speaker, I reserve the balance of my time.

Mr. CONABLE. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker, I would like to review what occurred in the conjunction of the CBI and the repeal of withholding. The Senate had added to the repeal of withholding a number of nongermane measures including the Caribbean Basin Initiative. Following the subsequent passage of the Caribbean Basin Initiative by the House, here on the floor we by unanimous consent added that to the repeal of withholding, and so there was no question they were properly conjoined. This was an effort to provide some comity to the Senate.

The other nongermane measures added by the Senate were dropped out in conference.

My fellow managers on the part of the House should be commended, because the positions of this body were upheld in virtually all important respects.

I think the managers on the part of the other body also fared equitably and I commend them for coming to an agreement on this most important piece of legislation.

This has been delayed to this point because of efforts by Members of the Senate to bargain with respect to other nongermane amendments not having to do with withholding.

The conference action, assuming it is ratified by both bodies, should be signed into law by the President soon, and this should end a long and painful ordeal for all of us on the issue of interest and dividend withholding. This has not been among the more glorious episodes in congressional history, and I do not intend to relive it in my comments here today. I merely would like to note that the conference agreement achieves an accommodation which is workable and with which all parties should be able to live without serious administrative difficulty.

Now, quite frankly, as the repeal of withholding came from the Senate, I think there would have been some serious difficulties in the administration of backup withholding.

The conference agreement repeals withholding of interest and dividends and substitutes in its place a modification of backup withholding system which was enacted as part of the Tax Equity and Fiscal Responsibility Act of 1982, also known as TEFRA. The modified backup withholding system has the effect of retaining some of the revenue which would have been raised through withholding on interest and dividends and does improve compliance with respect to reporting of interest and dividends. The backup withholding changes which were adopted by the conferees are a modification of those which were contained in the Senate bill also, and they improve the provisions in a significant manner. It is the belief of the House conferees that these modifications will reduce significantly the burden which would have been placed on both payors and taxpayers if the Senate version had been adopted without change. The conference agreement also modified significantly the other provisions of the Senate bill in a manner which was considered to be less burdensome than would have occurred if the Senate provisions had been adopted.

Now, let me say in this respect, Mr. Speaker, that ultimately compliance with this important aspect of our tax law is going to depend to some extent on the willingness of this body and the other body to make available money to the IRS for enforcing the compliance that is implicit in backup withholding, and the information requirements that are placed on the payors of dividends and interest.

In that respect, I am not talking about a large number of additional agents; but the IRS must have clerical help to bring about the matching of the information returns that are pro-

vided by the payors and the returns filed by the taxpayers. There also must be more money for computer use by the IRS. We should make available that money; but of course, we cannot do that in a germane fashion in a tax bill. We will be asking later for additional money for the IRS and I think it will be money well spent in terms of compliance. It is one of our obligations if we are to bring about enforcement of the tax laws, to make this money available.

This conference also produced what I believe to be an excellent resolution of the differences on the Caribbean Basin Initiative. The results should work to the immediate advantage of our good friends in the Caribbean region and the long-range advantage of all of us who live in the United States.

The conference committee declined to accept amendments by the other body which were not germane to legislation passed by this body. We did not, for example, agree to the Senate amendments with respect to enterprise zone legislation, already inquired about by the gentleman from New York (Mr. KEMP); but the chairman of the Committee on Ways and Means, the gentleman from Illinois, did agree to hold hearings on this legislation at some point in the fall, and I intend, Mr. Speaker, to press for those hearings at the earliest possible opportunity and for appropriate action by the committee after the hearings have been held.

We do not agree to the so-called reciprocity legislation—the International Trade and Investment Act provisions—which the Senate also added to the conference; but the chairman of our Trade Subcommittee, the gentleman from Florida, agreed to arrange action on the subject as soon as possible and practicable, to the reassurance of the Members of the other body pressing that particular legislation.

We did not agree to an amendment to make permanent the tax exemption for interest on qualified mortgage revenue bonds. Here again, however, the chairman of the Committee on Ways and Means indicated clearly his intention of further and more definitive action on this subject later in the year. That is a matter which I know has considerable interest in this body and it will be acted on, I am sure, as the fall progresses.

All in all, Mr. Speaker, this was a good and productive conference—one of our better cooperative efforts. I strongly urge my colleagues to support the conference report, and the hope the President will be able to sign it into law very soon.

Mr. SKEEN. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from New Mexico.

Mr. SKEEN. Mr. Speaker, I thank the gentleman for yielding.

I want to also commend the gentleman from New York and the gentleman from Illinois for the great work that they did in the conference.

As an original sponsor of one of the bills for repeal of withholding on interest and dividends, I am very pleased with the results of the work; but there is one question in my mind. That is, when we are dealing with this topic, the proposition comes up every time, or the issue arises that it is the U.S. Treasury itself that is having problems with its reporting.

I want to ask both gentlemen what consideration was given to getting the Treasury to do a better job of reporting what they pay in interest?

I think that would probably go a great distance toward helping in the recoupment of some of this money.

Mr. CONABLE. In this area, as in the area of pollution, the Treasury and the other agencies of Government are frequently among the worst offenders.

We are assured by the Secretary of the Treasury and by the representatives of the executive branch generally that as of the beginning of this year a much more serious effort has been made to make available 1099's, for instance, and to improve their reporting requirements so that the Government itself will not be a major offender in this area.

I must say, the proof of the pudding is in the eating. We are going to have to check that further; however, it is always one of those ironies of government that the Government itself is one of the most serious lawbreakers when it comes to complying with laws which we impose on the private sector and with which we expect total compliance.

Mr. SKEEN. Mr. Speaker, I thank the gentleman for his reassurance and I thank him for yielding.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Speaker, will the gentleman please explain to me what this rate of backup withholding being increased to 20-percent means. How does that work?

Mr. CONABLE. The backup withholding will be available as a compliance requirement for those people who have been demonstrated not to be in compliance with the tax law with respect to investment income.

In other words, that is part of the existing law, part of TEFRA. It would take effect next year and people who do not pay taxes on their dividends and interest can expect the IRS to come in with the power to order the people paying them dividends and interest to withhold 20 percent.

□ 1115

That is not a generalized withholding, which is what this body objected to and what the other body objected to.

It is, however, something to improve compliance and it is the stick that we can hold over the heads of those who have been found not to be in compliance with the tax requirements with respect to investment income.

Mr. KAZEN. But this does not come into effect until a taxpayer has been found not to have been in compliance?

Mr. CONABLE. That is correct, until he has been found not to be in compliance. And there are certain minimum requirements for notice to him before that. It is a way of enforcing, however, the payment of taxes on dividends and interest.

You recall we got into withholding in the first place because of the studies which showed there was substantial noncompliance on the part of some taxpayers with respect to investment income.

Mr. DAUB. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Nebraska.

Mr. DAUB. Mr. Speaker, I want to take this opportunity to commend the conferees. I know it was not an easy process. America has been waiting.

I rise in support of this legislation to repeal immediately mandatory withholding, to provide a system to insure the payment of taxes due by those who would seek to underreport interest and dividend income, and to implement the trade portion of the Caribbean Basin Initiative.

In the months since the Congress enacted withholding on dividend and interest income the American people have spoken out clearly to demand repeal. There have been some who criticized this grassroots effort but they fail to understand that opposition to withholding is both deep and wide in this Nation. Over the years the American people have made clear that they did not want the earnings from their interest and dividends withheld at the source. It does not matter that it is a more efficient means of collection. The American people are the final arbiters of how they shall be taxed. When the Congress would defy the clear intent of the electorate it should not be surprised to find itself under great—and deserving—criticism.

When I voted against withholding last year I understood that although the American people were opposed to it in principle that did not mean that they countenanced those persons who underreport interest and dividend income. That is why I embrace the decision of the conference committee to include this strong language that leaves unaffected the honest taxpayer but provides mandatory payment of

interest and dividends when due for those who underreport. This is a fair provision that will be very helpful in seeing that no American has to pay an unfair share of the tax burden.

The implementation of the trade portion of the Caribbean Basin Initiative is a historic landmark in our relations with those countries. The future of the United States is to a very great degree dependent upon the continuing peaceful and prosperous relations we now enjoy with our American neighbors.

This legislation will inure to the benefit of each one of us while at the same time adding greatly to the economic and political growth of the Caribbean region. By strengthening the Caribbean we provide the opportunity for increasing American exports to that region. These exports will mean more jobs in this country. By helping the Caribbean nations in this fashion we are demonstrating just how good a neighbor we in the United States can be.

H.R. 2973 is that all too rare combination in legislation considered by this Congress. It combines the wishes of the American people with an effort of help and assistance that will mean better lives both for those who receive it and those who will provide it.

Mr. CONABLE. I thank the gentleman for his comments.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the distinguished gentleman from Massachusetts (Mr. CONTE), one of the country's more renowned athletes.

Mr. CONTE. Mr. Speaker, I rise in support of the conference report on H.R. 2973, a bill which repeals withholding of interest and dividends, and which also contains, for the most part, the recently passed House Caribbean Basin Initiative. I commend my friends from the Ways and Means Committee—especially Chairman ROSTENKOWSKI, BARBER CONABLE, SAM GIBBONS, and all the conferees for so quickly bringing this important legislation to the floor.

Although the other body added several controversial tax amendments to this legislation, the House conferees rightfully decided to delete them at this time. Although such provisions as Urban Enterprise zones—of which I am a cosponsor—and extending the sunset on mortgage revenue bonds—of which I am also a cosponsor—need to be looked at further, and hopefully will be considered in the context of a larger revenue measure, this legislation is too important to be held hostage to these provisions. So I also want to commend the House colleagues for holding firm on deleting all but the two most important provisions of the legislation.

First, this legislation repeals withholding of taxes on interest and dividends. Unlike the bill passed by the House earlier this year, however, it imposes back-up withholding requirements for taxpayers who refuse to furnish a taxpayer identification number, or for those who have substantially under-reported their income. For these taxpayers, withholding will be imposed at a 20-percent rate. Although withholding was not a new tax, and probably would have hurt the honest taxpayer more than necessary, it is good that we are coming after those who are tax evaders—that was the point of withholding in the first place.

I was opposed to withholding because it took needed capital out of the economy just as it was beginning to expand. If we are serious about an economic recovery—and we all should be—then we do not want to take money out of the economy that could have been and should have been available for expansion. The conference report gets around that difficulty.

I also support the provisions relating to the Caribbean Basin Initiative. That legislation is in the national interest of the United States. The economic security of this country depends on a politically stable Caribbean Basin. Nearly one-half of U.S. trade—including three-quarters of our imported oil—passes through that region.

The net effect on employment of this legislation as a result of greater trade opportunities could be positive under the legislation. Increased Caribbean imports to the United States are likely to result in increased American exports to the Caribbean Basin countries.

On balance, the CBI provisions of this legislation, with repeal of withholding, make it easy to support. I urge my colleagues to act quickly for this legislation, pass it, and send it to the other body and to the White House. We need to act now.

Mr. CONABLE. Mr. Speaker, I yield 2 minutes to the the gentleman from Minnesota (Mr. FRENZEL), a valued member of the committee.

Mr. FRENZEL. Mr. Speaker, this is a good conference report. As the two previous speakers have indicated, the House position was upheld pretty much throughout.

I happen to be one who did not find withholding offensive. On the other hand, our constituents clearly did, and we are carrying out their will as well as the will of the majority of this body in this report.

The Caribbean Basin Initiative is long overdue. It is important that we pass it promptly. I am delighted that the conference committee has chosen to include it in similar form to that which passed the House.

One part about this conference report that causes me some concern is in the reporting requirements imposed on interest and dividend payers. I think we will find smaller financial institutions and corporations considerably less pleased when they read this report than we are today.

Nevertheless, I think it is a splendid report and I believe that most Members of this body want to vote for it.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 4 minutes to the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, this is a historic moment for 23 million people who live in the Caribbean. It is a small gesture for the United States, but it is a giant stride for those people.

This is only a beginning step, however. It follows in the wake of many past efforts to improve living standards in the Caribbean.

These efforts first began back in the early 1930's under President Franklin Roosevelt when programs were initiated for Puerto Rico and the Virgin Islands that greatly assisted those sovereign entities.

In the 1960's, President Kennedy attempted to take other steps forward and some small steps were taken. Then we were caught up in the expenses of the Vietnam war and the Caribbean area was abandoned again.

During subsequent administrations, particularly that of Jimmy Carter, the initiative was revived, and our current President has followed through.

What we have here today in the Caribbean Basin Initiative is a bipartisan effort which has passed this House twice, both times by very large majorities.

I believe the Initiative will strengthen the economy of the United States, and I know that it will strengthen the economy of the Caribbean Basin. It will offer a true hand of friendship. More importantly, it will offer the most important form of assistance—private sector initiatives—to strengthen our Caribbean allies.

As we pass this legislation, I want to pay particular tribute to the gentleman from Illinois (Mr. ROSTENKOWSI), as chairman of the Ways and Means Committee. He approached this matter in his usual manner, with caution but with concern. In the end, he had the courage and the initiative to act. I would also like to pay tribute to the gentleman from New York (Mr. CONABLE) and the gentleman from Minnesota (Mr. FRENZEL) for their unfailing support, and to the many other Members whom I see here. This is, of course, a product of excellent staff work as are most good things that come out of the Ways and Means Committee, and I want to thank the staff for its excellent work.

I think we have a piece of legislation here that we can all be proud of. I hope that in the years to come we will resolve to take other steps to build peace and understanding and econom-

ic strength, not only for ourselves but for our friends and neighbors.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Speaker, I rise in support of the conference report. I am very pleased that the conference committee has finally broken the deadlock on the bill which repeals the 10-percent withholding of taxes on dividend and interest income. I am equally pleased that President Reagan has now agreed to sign the repeal into law once we pass the conference report, even though we had to push, pull, and gnaw to bring him to this point. Thank heavens he has agreed to put that veto pencil away that he kept mentioning every time this legislation was discussed.

Mr. Speaker, let me just reflect briefly on the history of this legislation. For years, members of both parties threatened to implement laws to withhold taxes on dividend and interest income. It is ironic that the Reagan administration, renowned for its reputed antitax sentiments, was the driving force behind the actual implementation of this notion. As a member of the Ways and Means Committee, I fought against withholding for years because it simply did not make much sense to me. It still does not. Not only does such a law unjustly penalize the vast majority of Americans who are honest and conscientious about paying taxes, but it is an inefficient method to improve taxpayer compliance. My constituents in Oklahoma recognized that plain truth years ago when this issue first came up; I am glad that some of my colleagues and the Reagan administration are now coming around as well to the truth on this legislation.

In summary, I am proud of several actions which have allowed us to repeal this bill. First, I am proud that the entire Oklahoma delegation has cosponsored bills to repeal the withholding tax. As dean of our delegation, it is an honor and a pleasure to work with my colleagues on such an important project which called for true teamwork. Second, I am proud that the people of Oklahoma became involved in the governmental process and made their feelings known to the Congress and the President. The President has finally started listening to the people on this issue. Third, I am proud of the conferees who broke their deadlock last night and brought this important conference report to us.

Finally, I am proud to vote against this ill-advised tax.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from New Hampshire (Mr. D'AMOURS).

Mr. D'AMOURS. Mr. Speaker, I thank the chairman of the Ways and Means Committee for yielding to me.

Having participated in attempts to repeal the interest and dividends withholding scheme, I do not want to take any time now to further delay the passage by this body of this legislation. We all know that it is going to pass rather easily here in this body and that it is going to be passed rather easily by the other body and the President has committed himself in a speech, a press conference of last Tuesday, to sign it.

I would like to take a moment to commend, as has already been done, the House conferees. I think they did a marvelous job in removing most of the irrelevant and controversial provisions that the other body had attached to this legislation. I think they did a pretty good job in clearing up some of the more confusing and cumbersome aspects of the backup withholding which the other body had already attached to this bill.

I think there still are some problems involved with backup. Hopefully we can work those out in the months and years ahead.

I intend, of course, to very strongly support this legislation the rest of the way. I believe it is a victory for the majority of the House. It is a clear victory for the overwhelming majority of the American taxpayers who are honest, who do pay their taxes on time, and who do pay them fully.

The need to improve compliance should be addressed in other legislation which I am sure the Ways and Means Committee will be considering down the road, but the backup withholding will make some beneficial improvement in overall compliance.

So, again I thank the House conferees for having done a good job, and I am very happy that the American taxpayers and grassroots America can still secure victories in this great body of ours.

● Mr. BROWN of California. Mr. Speaker, today we are about to correct an error we made nearly a year ago—we are about to repeal and improve upon the provisions of the Tax Equity and Fiscal Responsibility Act of 1982 that require financial institutions and corporations to withhold for income taxes 10 percent of all interest and dividend payments.

By repealing the withholding provision and instituting stricter compliance measures, Congress will be reinstating the Internal Revenue Services' (IRS) responsibility to collect taxes owed to the Federal Government. Included in the stricter compliance measures is backup withholding at a rate of 20 percent interest and dividend payments for all taxpayers who either have interest and dividend income and fail to file a tax return, or underreport interest and dividend income by a certain threshold amount.

IRS is to determine this secret threshold amount based on the amount of funding available to implement backup withholding. After deciding on a threshold level, the IRS would identify nonfilers and underreporters, and require financial institutions to begin backup withholding on these individuals. However, no individual would be subject to backup withholding until he or she has received four notices from the IRS soliciting an explanation. This backup withholding would remain in effect until the end of the year.

Financial institutions that file more than 50 form 1099's are required to file all such information reporting interest and dividend payments to the IRS on a magnetic tape. These institutions are also required to furnish taxpayers with the same information and inform them that these amounts are taxable and must be reported to IRS.

The tightening of compliance measures, I believe, will help to offset any revenue losses caused by the repeal of this measure. The Ways and Means Committee estimates that with an additional $300 to $600 million for IRS compliance, the deficit could be reduced by $2.4 to $3.7 billion from fiscal year 1983 to fiscal year 1988. It is an approach we should have originally initiated. I commend the Congress repeal of the well intended, but misguided, attempt to force compliance with this regulation. This new approach is a much wiser one, and should be given a chance to succeed.●

Mr. PICKLE. Mr. Speaker, I rise to urge my colleagues to support the conference report on the Caribbean Basin Initiative. It has been over 1 year since this initiative was first proposed, and the tiny Caribbean nations to the south are awaiting its fruition. There have been numerous changes in this legislation since it was first introduced. Sincere efforts have been made to address the concerns of all parties, and the conference committee went to great lengths to work out lingering differences between the House- and Senate-passed versions. All efforts were made to insure that the economies of the United States and its territories and possessions would not be destroyed as a result of our opening our markets to increased Caribbean imports.

Now some Members may still find fault with this legislations either because it does too much or because it does not do enough. I remind my colleagues, however, that this legislation does not represent the save all end all. This alone does not insure the economic future of these Caribbean nations. They, too, must pursue the goal of economic revitalization of the Caribbean region. We, Mr. Speaker, must be encouraging and supportive as they strive to make the necessary adjustments required by this legislation. The proposal for increased economic coop-

eration and improved trading relations was received enthusiastically by the Caribbean nations. Let us vote today to move forward with this initiative in the interest of future strong and viable United States-Caribbean relations.

Mr. Speaker, the withholding issue has been unsettling to the people, financial institutions, and the Congress. Although I did not favor the move to unravel TEFRA, I am glad to see the matter put to rest. I think, all things considered, that the conference report takes the right approach. It repeals the 10-percent withholding, but it also attempts to recoup some of the revenue lost as a result of that action. Most importantly, though, it addresses the compliance problem which started the withholding controversy in the first place. I am hopeful this compromise package will improve compliance with a minimum of burden on both our taxpayers and payers of interest and dividends. I urge my colleagues to support the conference report.

● Mr. BIAGGI. Mr. Speaker, as an original cosponsor of the initial bill to repeal the withholding tax on interest and dividend income, I rise in strong support of the conference report to accompany H.R. 2973. At long last the apprehensions felt by millions of Americans who would face a new and onerous tax can be put to rest for with the adoption of this conference tax, this tax will be repealed before it ever took effect.

Specifically, the conference agreement repeals the provisions of the TEFRA law that require banks, other financial institutions, and corporations to withhold for income taxes 10 percent of all interest and dividend payments. The bill also waives penalties for underpayment of estimated tax in the first two quarters of 1983 if the estimated tax payment was reduced to reflect amounts that were expected to be withheld under the withholding law.

This legislation makes great strides in trying to insure full compliance by taxpayers. The IRS together with financial institutions would embark on a new partnership to crack down on those who would underreport their tax liabilities. It is felt that giving proper resources to the IRS aimed at recouping delinquent taxes could significantly reduce the negative revenue impact which repeal of withholding might produce.

From the outset this tax was flawed policy. First it was attached to an omnibus tax bill meaning that it never really had to stand the test of individual scrutiny in a vote. There were efforts which I joined aimed at trying to have a separate recorded vote on the withholding issue but that was never permitted.

In addition the premise upon which this tax was based was inaccurate. It was based on the belief that the Government was losing large sums of money from taxpayers not fully declaring their tax obligation related to interest and dividends. However, a 1981 Internal Revenue Service study repudiated this when it revealed that 96.7 percent of all interest and dividends income reported to the IRS by financial institutions paying the interest is also reported by those taxpayers earning the interest.

It was also shown that the costs of implementing this new tax would have cut directly into whatever new revenues might have been raised. According to a survey by the U.S. Chamber of Commerce, withholding would force 50,000 lending institutions to spend $1 billion or more to implement and another $1 billion to maintain. It seems a very cost-ineffective way to do business.

From many standpoints, this was an idea whose time should not have come—and with passage of this resolution it will not come to pass. It would have imposed a new tax burden at a time when other policies were producing a lower tax burden. It would interfere with our concerted efforts to improve our Nation's woeful savings rate. It would have produced insignificant revenues compared to the administrative burdens it would have imposed.

I am pleased that we are taking this step today and I trust it will be followed posthaste by a similar vote in the Senate and the President's affixing of his signature to make it law. This is sound legislation both with respect to the repeal issue and the Caribbean Basin Initiative language in the bill.

We are doing the American working people, the elderly and any other person who is engaged in savings a tremendous service today with the passage of this legislation. We have averted a very serious mistake and one hopes we will not have to endure a similar experience again in the future.●

● Mr. MARTINEZ. Mr. Speaker, I rise today in regard to the final passage of H.R. 2973. Now that Congress has agreed on the conference report to repeal the withholding of interest on savings and dividends, I would like to say a few words in retrospect.

Those of us who have been fighting for the repeal of withholding on interest and dividends are relieved that Congress has finally passed this long overdue legislation. Thanks to the diligent efforts of many dedicated Members of Congress, we have been successful despite the threat of a Presidential veto. Every Member of Congress has listened to their constituents asking for this repeal, and I am pleased that their voices have been heard. Throughout the 30th District of California, there has been an overwhelming consensus to repeal withholding, and as the Representative of that district, it is my job to listen and act on my constituents' wishes. While Congress is often occupied with issues like unemployment, foreign affairs, and high interest rates, we cannot forget to listen to the concerns of the people who elected us. The repeal of withholding demonstrates that we in Congress have not forgotten.

The alternative backup withholding system we agreed upon today places the burden of proof where it belongs—on the small percentage of taxpayers who have demonstrated an unwillingness to comply with the law. I know that my constituents in the 30th District of California will agree with me that Congress was correct in freeing law-abiding, taxpaying citizens from the burden of withholding interest on savings and dividend income.●

● Mr. OBERSTAR. Mr. Speaker, on May 17, I joined an overwhelming majority of my colleagues to vote to repeal withholding on interest and dividend income. I had opposed the withholding provisions enacted last year because I believed that they were unfair to the taxpayer and excessively burdensome on the Nation's financial institutions.

The House vote in favor of H.R. 2973 was a sound one.

Today, I cannot, however, vote for the conference report on H.R. 2973. Regrettably, the conference report links the very much needed provisions of H.R. 2973 with the unfortunate provisions of H.R. 2769, the Caribbean Basin Initiative legislation. Two weeks ago, I led the fight to amend H.R. 2769. Our effort to secure a rule allowing amendments to H.R. 2769 fell eight votes short on a 212-204 vote. Denied the opportunity to offer amendments to H.R. 2769 and in the firm belief that the Caribbean Basin Initiative will harm American workers, I voted against H.R. 2769.

The choice today is a very difficult one. I want to see withholding repealed.

Withholding at the source would have imposed heavy burdens on many honest taxpayers, 96.7 percent of taxpayers according to the studies by the Internal Revenue Service, who report and pay taxes on their interest and dividend income. Withholding would have penalized this large majority of taxpayers to catch a few tax cheaters. Congress cannot sanction tax cheating, however, and the conference report provides for backup withholding for those identified by the IRS as nonfilers. Backup withholding, at a rate of 20 percent, will be imposed on taxpayers who fail to file tax returns on interest and dividend income, or who underreport interest and dividend income by a threshold amount, to be determined by the IRS.

Unfortunately, repeal is linked to a bad bill, the CBI. This Caribbean Basin Initiative will allow multinational corporations to take advantage of duty-free status for goods produced in part in the Caribbean. The bill, however, provides no protection for the health and safety of Caribbean workers and no protection for the jobs of American workers. The CBI is an ill-considered scheme whose principal effect would be to lay off American workers, by admitting foreign goods to the United States under preferential terms and conditions which undercut similar goods produced in this country.

When the House considered H.R. 2769, I sought to offer amendments to include human rights and worker safety conditions, to exempt certain import-sensitive items such as steel, electronics, and watches from duty-free treatment, and to stiffen the Caribbean content requirement. The rule precluded such amendments, regrettably. Without those necessary amendments, I cannot support CBI.

I will vote against the conference report with great reluctance. I do so, however, as a protest against the strategy followed here, of merging two dissimilar issues, with no intent that the popular, and needed provision—repeal of withholding on interest and dividend income—will carry this very unpopular and antiworker provision, the CBI. There two issues should be divided and voted upon separately, but, because they are joined, I must vote against the package as a protest against the process and a protest against the CBI.●

Mr. ROSTENKOWSKI. Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 392, nays 18, answered "present" 6, not voting 17, as follows:

□ 1140

Messrs. MURTHA, MARKEY, LONG of Maryland, and OBERSTAR changed their votes from "yea" to "nay."

Mr. PRITCHARD changed his vote from "yea" to "present."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. AKAKA. Mr. Speaker, I voted "present" on final passage of the conference report on H.R. 2973. I took this unusual step because the legislation contains both the repeal of the law requiring withholding of taxes on interest and dividends and the provisions contained in H.R. 2769, the Caribbean Basin Initiative.

While I strongly support the repeal of tax withholding on interest and dividends, I am just as strongly opposed to the CBI legislation. Thus, I was faced with a true dilemma and was forced to vote "present."

I feel that these two matters should have been taken up separately so that Members could have cast their vote on the merits of each. Had I been able to, I would have voted "aye" on the withholding repeal and "no" on CBI.

These votes would be consistent with my previous votes on these two issues.

PERSONAL EXPLANATION ON DEFENSE BILL VOTE

(Mr. BONKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BONKER. Mr. Speaker, on Tuesday, I reluctantly voted against the defense authorization bill. All Americans want and support a strong national security, and certainly I do. I have faithfully supported DOD authorizations and appropriations in the past. But our military budget is becoming so excessive, I can no longer justify voting for it.

The Reagan administration's $1.8 trillion 5-year arms buildup plan is not based on our traditional policy of deterrence, but upon the simplistic notion that more is better, that we must meet or beat the Soviets in every type of weapons system. The MX missile, B-1 bomber, and Pershing II are not only unnecessary to preserve an effective deterrent, but they are destabilizing and will most definitely fuel the arms race. Especially in the case of the MX combination of high threat as a counterforce weapon and its high vulnerability would make it an attrative target in time of conflict. Both sides would be tempted to use or lose such weapons.

Such hugh expenditures also impact our budget and national economy. Nearly one-third of the proposed budget for 1985 will be devoted to defense, and when we remove the social security trust funds later this decade, it will be closer to 50 percent. With projected budget deficits of $200 billion a year, we are going to be borrowing money from the private sector to sustain this budget outlay for years to come.

I am not at all pleased with voting against a defense bill, but I simply cannot in good conscience support the overall direction of this administration's military program for the future.

TRIBUTE TO JOHN J. GERMANIS

(Mr. ROSTENKOWSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROSTENKOWSKI. Mr. Speaker, I would like to pay tribute today to the late John J. Germanis, deceased staff member of the Joint Committee on Taxation, of which I am chairman.

John Germanis served with distinction as an economist and revenue estimator on the Joint Committee staff since October 1, 1968, to his death on June 30, 1983, at age 56. As you all know, the Joint Committee staff, in consultation with the Congressional Budget Office and the Treasury Department, provides the Congress with revenue estimates on all tax legislation considered by it.

John Germanis was the senior member of the revenue estimating staff on which the tax-writing committees are so dependent. He was looked up to by the other estimators as their leader, and was responsible for hiring and training many of them, who now must carry on his work.

John Germanis will be missed professionally by Members of the tax committees, congressional staff colleagues and associates from other committee staffs, as well as Treasury Department tax staff and others that John worked with during his years with the Joint Committee staff. John Germanis was the complete professional staff person, providing technical revenue cost analysis on a nonpartisan professional staff to both the majority and minority members of the tax committees and other Members of Congress as well. During congressional consideration of a tax bill, John worked long hours and weekends to make sure that his revenue estimates were the best and most adequately researched estimates that could be made in the timeframe allowed.

Moreover, John Germanis is and will be greatly missed because of his fine personal qualities. He was a true gentleman in his dealings with coworkers and others—mild mannered and patient at all times. He also always had time to give a friendly smile and a pleasant word.

Prior to joining the Joint Committee staff, John Germanis worked as a financial economist with the California State Department of Finance (1962-68), as an assistant statistician with the California State Highway Division (1960-62), and as an investment analyst with the Wells Fargo Bank in California (1957-60). John received his master of arts degree (economics) in 1957 from Harvard University (as well as completing his doctoral general exams), and his B.A. (summa cum laude) degree in 1953 from Claremont Men's College. He was a member of the American Economic Association.

John Germanis was born in 1927 in Riga, Latvia, and immigrated to the United States in 1949 at age 22, after spending 5 years in a displaced persons camp in West Germany after leaving Latvia at age 17. He served 2 years in the U.S. Army. John Germanis received appropriate military honor at his interment on July 11 at the Arlington National Cemetery. He was a member of the American Latvian Association and the Latvian Evangelical Lutheran Church of Washington, D.C.

Our sincere condolences and prayers go to his wife, Dzidra, and two sons, Peter, 25, and Martin, 23, all of McLean, Va. Peter is an economist (policy analyst) with the Heritage Foundation here in Washington, D.C., and Martin is a graduate student in information sciences at George Mason University in Fairfax, Va.

PERMISSION FOR SUBCOMMITTEE ON PUBLIC BUILDINGS AND GROUNDS OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT DURING 5-MINUTE RULE TODAY

Mr. YOUNG of Missouri. Mr. Speaker, I ask unanimous consent that the Subcommittee on Public Buildings and Grounds of the Committee on Public Works and Transportation be permitted to sit during the 5-minute rule in the House on Thursday, July 28, 1983.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

REAGAN'S CIVIL RIGHTS RECORD

(Mr. GARCIA asked and was given permission to address the House for 1 minute.)

Mr. GARCIA. Mr. Speaker, today's Washington Post quotes Attorney General William French Smith as blaming "politically motivated criticisms and irresponsible journalism" for what he calls public misconceptions about the Reagan administration's record on civil rights. This is just another astonishing misrepresentation of the Reagan administration's record on civil rights.

Such an assertion is absurd and defies the reality of the administration's dismal performance on civil rights over the past 2½ years. Indeed, a good case can be made that the administration is using these type tactics to mask the absolutely abysmal record it has compiled in virtually every area of civil rights enforcement.

Let us look at the record of this administration and how it reflects a lack of commitment to civil rights. The administration:

Led for many months the opposition to a strong and effective extension of the Voting Rights Act;

Tried to reverse the well-established Federal policy of denying tax exempt status to schools which discriminate on the basis of race;

Has opposed the equal rights amendment;

Has threatened the independence and integrity of the Federal judiciary by supporting legislation which would strip the Supreme Court's jurisdiction over certain constitutional issues;

Attempted to abolish the Legal Services Corporation;

Has jeopardized the independence of the Civil Rights Commission by trying

to fire every member of the Commission;

Has repeatedly sought to impose an "intent" test in discrimination cases;

Has refused to endorse the Women's Economic Equity Act, legislation to eliminate sex discrimination in key economic areas;

Has attempted to relax the obligations of school systems for educating handicapped children; and,

Has tried to limit the coverage of civil rights laws by narrowing the definition of "Federal financial assistance" and by prohibiting discrimination only in those programs and activities for which Federal funds are given directly.

The record is clear. Only the Reagan administration can begin to undo the perception of unfairness that best characterizes its policies regarding blacks, Hispanics, women, and other minorities.

"PIK'D CLEAN"

(Mr. LEHMAN of California asked and was given permission to address the House for 1 minute.)

Mr. LEHMAN of California. Mr. Speaker, the PIK program has now cost the American taxpayer over $12 billion and has pushed many farm-related businesses to the brink of bankruptcy. Total farm subsidies now approximate $22 billion as compared with $3.5 billion under President Carter. PIK started with great promise but has proven itself to be a costly mistake that attacks the farmer's overproduction problem from the wrong angle.

Rather than idling 80 million acres of America's fertile croplands, we should be working to increase the markets for American farm products abroad. Such a promotional program would create, not destroy, farm-related employment here in the United States, and would contribute toward the long-term health of our economy. The American taxpayer should not have to pay the price for our failure to promote an aggressive trade policy.

Even those persons administering the PIK program admit that it has been poorly administered. They had no idea of the program's long-term impacts, or costs to the Treasury. Rather than acting as the panacea the administration proposed, PIK has opened a Pandora's box of troubles for American agriculture, agricultural workers, and the American taxpayer.

It is now evident that PIK is bad public policy. It is bad farm policy, it is bad employment policy, and it is bad fiscal policy. PIK is one gift horse that should have been looked in the mouth.

THE CHARGE OF OUR MIGHT BRIGADE

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker—

Half a run, Half a run,
Half a run onward,
Out of the Dugout of Doom
Rose the mighty fourteen.
"Forward, Mighty Pachyderms!
Charge for the balls," I screamed:
Into the outfield of Death
Rode the mighty fourteen.

Theirs was not to catch the fly,
Theirs was not to tag Faunt-ry
Theirs was but to win, or tie
Back to the Dugout of Doom
Rode the mighty fourteen.

Pitchers to the right of them
Pitchers to the left of them
Pitchers right in front of them
Volleyed and beaned.

Oxley ran with might and fleet
Dan Crane's hits could not be beat
Into the jaws of victory
And out of the mouth of Defeat
Rode the mighty fourteen.

Flash! as Pursell leapt in air
Flash! as Schaefer's arm would scare
Striking out the batters fair
While Williams called the shots from there
And Chappell sat and steamed.
Ran out Ron Paul's fast ball's smoke
Through their outfield line we broke
Liberal and conservative
Reeled from that batter's stroke.
What a mighty team!
The donkeys they fell back, but not
Not the great fourteen.

Doubles to the left of them
Singles to the right of them
Triples far behind them
Volleyed and careened
Bonior's bat could feel the heat
Russo's strength was in his feet
With great pop flies by Alan Wheat
Dems, they sought the victory
From the mighty team
It would have to be hard won
From the great fourteen.

How could their great glory fade?
O, the errors that they made
A tie was unforeseen
Honor true the charge they made
Honor true our Might Brigade
Noble, great fourteen.

OUR "GOLDEN AMERICANS"

(Mr. BILIRAKIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BILIRAKIS. Mr. Speaker, I recently introduced House Joint Resolution 323, National Senior Citizens Awareness Week. This bill will draw national attention to our golden Americans who, many times are forgotten and neglected by society.

On many occasions I have said that I represent the Nation's fastest growing area of senior citizens. In one county alone, nearly 50 percent of the population is at least 60 years old. And believe me, these individuals remain active in every aspect of community life. They do not sit and let life pass them by. I did not introduce this resolution, though, to honor only those seniors in my own district. I did this, so that all America might focus its attention on this wonderful resource in our society. The value of older persons lies in their time, energies, wisdom, and experiences that they have to offer all of us. Seniors, as a whole, are interested in continuing positive involvement in society through their volunteer work, political advocacy and employment. Older persons demonstrate a sense of self-esteem and a confidence in their ability to cope with what life gives them.

They provide a continuity to family and reinforcement of generational ties. They link the past with the present and help guide us through the future. In closing, I want to leave you with this one thought: Someday, each one of us will be a part of the senior citizens group in society and I know that I will appreciate knowing that someone is thinking of me.

THE BOLAND-ZABLOCKI BILL

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, in the debate on Boland-Zablocki yesterday, most of its supporters appeared willing to admit that the Sandinistas have betrayed their revolution. They were generally willing to admit that those groups opposed to the regime in Managua were trying to regain their rightful legacy in that revolution. In sum, just about everyone seems to characterize the Sandinistas as anywhere from nogoodniks to downright despicable to those on the cutting edge of Soviet-style Communist expansion in this hemisphere. Yet these same people vigorously fight covert aid to those opposing the Sandinistas.

I questioned several colleagues who support Boland-Zablocki as to whether they would be willing to convert such covert aid to overt aid to those fighting inside Nicaragua. They avoided answering the question by describing the overt aid to friendly governments to interdict in their own countries.

The point is that those interested in cutting off covert aid are also those who would not help the opposition in Nicaragua one iota. Those well-meaning individuals then become the enforcers of the Brezhnev doctrine right here in our hemisphere. They perform the task of insuring the continuation in perpetuity of the Soviet/Cuban-style regime in Nicaragua, leaving it home free to continue its stated "revolution without frontiers."

AMNESTY LAW IN EL SALVADOR

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, last week, the constitutent assembly in El Salvador extended for an additional 30 days the amnesty law that has been in effect in that country since May 17.

The constituent assembly deputies took this action, it is reported, at the request of President Magana.

During the first 2 months of the amnesty, 540 political prisoners have been released and 218 guerrillas have laid down their arms to return to a normal life.

The extension of the amnesty is intended to provide a further opportunity for the guerrillas to lay down their guns and rejoin Salvadoran society.

REPEAL OF THE 10-PERCENT WITHHOLDING ON INTEREST AND DIVIDENDS

(Mr. HARRISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARRISON. Mr. Speaker, I am delighted that, after a very long time, the will of the people as expressed by the overwhelming majority of this House and the other body will finally be enacted into law. Today, we have repealed the 10-percent withholding on interests and dividends. It was, from the beginning, a bad idea. It was unnecessary to the enforcement of the Internal Revenue Code and was merely an effort to shift the burden of enforcement from the Internal Revenue Service, where it belongs, to the private institutions of this country. More importantly, it was an idea that would cause inconvenience and expense to millions of people. Today's repeal is a victory for the legislative process.

I very much regret that the so-called Caribbean Basin Initiative has been attached to this measure. It is certainly irrelevant to raising revenue. It is, moreover, an unwise and unfair law. I voted against it when it came before this House as a freestanding bill and I would like to have done so again. The fact is, however, that the Caribbean Basin Initiative had the votes to pass this House and the other body.

It was essential that this compromise pass today. The Secretary of the Treasury had announced that he would not further extend the effective date of the withholding provision. It would have gone into effect August 5 unless the conference report were approved. That would have required all of our financial institutions to begin withholding even though it is perfectly apparent that the withholding provision would have been repealed, in any event, within a very short time. This would have caused needless inconvenience and expense to millions of people. To avoid that, the conference report had to be approved today. And so I voted for its passage even though I very much disapprove of the Caribbean Basin Initiative which is attached to it and think it extremely unfortunate that these two unrelated matters were brought to us together.

FAIR TEXTILE IMPORT QUOTAS

(Mr. SPRATT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SPRATT. Mr. Speaker, I rise today to call for vigorous efforts by the United States in negotiating fair quotas for imports of textiles from foreign nations, and in particular the People's Republic of China. I also urge vigorous action by the United States to bring an end to unfair trade practices now employed by foreign nations, including China, in their efforts to export textiles into the United States.

So far in 1983, foreign textile exports to the United States have increased by 21 percent over the same period in 1982. This is a record rate of growth following a record rate of increase last year as well.

In bilateral negotiations now underway with China, the United States should insist on textile quotas providing for a rate of growth in imports not to exceed the rate of growth in the domestic textile market. This is simply the goal to which the President himself pledged his written commitment when he was a candidate. In the United States-China trade negotiations which resumed July 25 in Geneva, the textile industry-labor advisers to the United States left the negotiations after 1 day because of their dissatisfaction with the U.S. proposal. With the surge of imports from China and other countries, this split between the industry-labor advisers and the negotiating team raises serious questions whether the President's explicit commitment to control the rate of textile import growth is being honored and pursued.

In addition to liberal and imprecise import quotas, unfair trade practices, such as dumping, have plagued domestic textile manufacturers. Foreign government subsidies, evasion of U.S. import quotas, and foreign barriers to U.S. textile exports have made it difficult for domestic textile manufacturers to compete on an even playing field in world textile markets.

Last Friday, July 22, the International Trade Administration (ITA) validated complaints of the textile industry about foreign imports. The ITA found that China has been selling printcloth in the United States at 22 percent below fair market value. In a price-sensitive market like textiles, this is a large margin, indeed, for foreign product dumping. This finding confirms that the Chinese are shipping textiles to the United States at a loss to build market share and accumulate foreign exchange. Their strategem is not limited to printcloth. Faced with the imminence of the ITA decision, the Chinese some months ago shifted their exports of printcloth to broadcloth and batiste, which they are now selling for 15 cents per yard less than their own quoted price last year. In South Carolina, this means a loss of jobs.

The ruling by the International Trade Administration sends the right signal to foreign textile manufacturers. It proves that unfair trade practices have been used against U.S. textile manufacturers, and it shows that we will not allow these practices to continue. I urge the Reagan administration to work harder to prevent foreign abuses of the U.S. textile market. It is time to put a halt to practices that imperil this important industry and the 2 million jobs it provides.

□ 1200

AMENDMENT TO THE INTELLIGENCE AUTHORIZATION ACT FOR FISCAL YEAR 1983

The SPEAKER. Pursuant to House Resolution 261 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2760.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2760) to amend the Intelligence Authorization Act for Fiscal Year 1983 to prohibit U.S. support for military or paramilitary operations in Nicaragua and to authorize assistance, to be openly provided to governments of countries in Central America, to interdict the supply of military equipment from Nicaragua and Cuba to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America, with Mr. NATCHER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole House rose on Wednesday, July 27, 1983, all time for general debate had expired, and 9 hours and 7 minutes remained for consideration of the bill under the 5-minute rule.

Pending was an amendment offered by the gentleman from Florida (Mr. YOUNG) and an amendment offered by the gentleman from Maryland (Mr. BARNES) to the amendment.

Mr. MICA. Mr. Chairman, I have a substitute amendment for the amend-

ment offered by the gentleman from Florida (Mr. YOUNG) at the desk.

PARLIAMENTARY INQUIRY

Mr. MICA. I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MICA. A colleague would like to be recognized at this time for the purpose of a speech only. Can I, at this time, withhold my amendment so that the Chair can recognize my colleague?

The CHAIRMAN. The gentleman has the right to withhold his amendment.

Mr. DELLUMS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, since the advent of this administration we have seen a deliberate policy of confrontation, military escalation and illegal covert activity. This administration has fanned the local conflicts to the extent that we are at the brink of creating and involving ourselves in a widespread regional war.

This policy must stop. It is bound for defeat and disaster. We instead must seek to resolve differences. It should be the policy of the United States to seek, in Central America, a halt to the militarization, an end to foreign intervention, withdrawal of foreign military advisers and combat personnel, and the removal of all foreign military bases.

The premise of our policy is wrong. The seeds of the local struggles are oppression, poverty, disease and hunger. They are not Soviet bloc plots against the Americas. Because of the longstanding economic inequities of the region, there would still be revolution in Central America if the U.S.S.R. and Cuba were nonexistent. It is time for us to recognize that democracy does mean their right to decide their form or government and economy.

The Reagan administration is committed to a plan that is aimed at the overthrow, both directly and indirectly, of the Sandanista government of Nicaragua and the crushing of the guerrilla movements of El Salvador and Guatemala. I believe the President is even willing to intervene with U.S. troops if all his other options fail.

The U.S. policy is an amalgam of everything that is or has been wrong with U.S. foreign policy:

Aged anticommunism;
North American chauvinism;
Racism;
Imperialism; and
Militarism.

We cannot be and should not be the policeman of the world or the Americas. This is a world and a hemisphere of many diverse nations, and we must respect our neighbors. We must work in concert with them to solve our problems in peace.

The Reagan administration's covert war against the Government of Nicaragua is clearly illegal. It is yet another example of the cowboy mentality of the President and the CIA.

It cannot succeed. The people of Nicaragua will not support the remnants of the Somoza tyranny. In the long term we will lose a great deal as the rest of the hemisphere, particularly the democratic elements, see us again as the gun-wielding, intemperate, insensitive gringo. The Congress must stop the U.S. covert operations.

But I am not sure that stopping the covert funding will stop the covert war. Clearly, we are encouraging other governments, in Central America, in Latin America, and in the Middle East to help the "Contras." This, too, must stop so that we can achieve a peaceful settlement.

We must recognize that our willingness to support tyranny makes revolutions inevitable. Our continued political, military, and economic pressure has made political flexibility less possible.

The administration rejects such revolution. But dramatic evolution or revolution for the poor, the hungry, the sick, and the powerless is coming to Latin America and the Caribbean. We cannot nor should we stop it.

We can by example, with peaceful aid and counsel, foster democracy.

The opposition to the Sandinista government was heightened by allegations that they were assisting the rebels in El Salvador. The nature and extent of this alleged aid is still not explained. Senior U.S. advisers in El Salvador now say that weapons are coming to the rebels from U.S. supplied troops. The revolution in El Salvador continues because the Government in El Salvador, with U.S. backing, has failed to correct the inequities of that society.

The atrocities by official forces continue, while we certify progress toward human rights. Land reform has not worked, nor can it work under this regime. The elections of 1982 had little to do with the internal realities of El Salvador, but were intended to legitimize an unpopular government which the administration props up by force of arms. According to press accounts, El Salvador doubts if the elections scheduled for this year will be held. It is time for negotiations, without conditions, between all parties in El Salvador.

In the last year and a half a civilian government has emerged in Honduras. This administration has attempted to suffocate this fragile democracy. We have strengthened the military to the disadvantage of the civilian leaders. We have heightened internal political conflicts. Worse, we have pulled Honduras into conflicts with Nicaragua and the revolutionaries of El Salvador. Clearly the nation and its democratic government are in peril.

The administration is seeking a friendly relationship with a genocidal Guatemalan dictatorship. The Guatemalan military is attempting to stop broad-based opposition by systematic and widespread killing of civilians, especially indigenous populations.

The CHAIRMAN. The time of the gentleman from California (Mr. DELLUMS) has expired.

(By unanimous consent, Mr. DELLUMS was allowed to proceed for 3 additional minutes.)

Mr. DELLUMS. Mr. Chairman, besides genocide, there are no serious proposals for basic reforms, nor any coherent development strategies. If we are committed to democracy, we must continue to condemn the Rios Montt government in Guatemala.

The military aid to the junta of El Salvador, the development of Honduras as a U.S. fortress, and the not-so-secret war against Nicaragua have not accomplished President Reagan's goals. We now see a new ploy—a display of gunboat diplomacy. This is a dangerous and dubious venture. We are risking war by the provocative act of an actual blockade. The Gulf of Fonesca must not become another Tonkin Gulf.

I fear that when all other options fail, President Reagan will attempt to gain victory with air strikes from our carriers off the coast. We must say no to that option now.

The alternative to our present policy of military aid and escalation must be a political approach, but not the Kissinger Commission. This panel is a calculated public relations ploy designed to end run around Congress and to establish legitimacy for a policy of blockade, military threats and, finally, U.S. military intervention.

We must support an end to violence, repression and killing. We must assist the end of political and economic privilege and seek justice. We must assist basic economic change. We must commit ourselves to dialog and negotiation. It is time to turn toward peace.

The Congress must reject the Reagan Central America policy—

No covert war;
No gunboat diplomacy;
No increases in military aid; and
No armed intervention.

AMENDMENT OFFERED BY MR. MICA AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. MICA. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. MICA as a substitute for the amendment offered by Mr. YOUNG of Florida: On page 2, strike out line 20 and all that follows through line 10 on page 5 and insert in lieu thereof the following:

"(b) This section shall take effect upon the date prescribed in the classified annex to the report of the Permanent Select Com-

mittee on Intelligence of the House of Representatives to accompany H.R. 2760 (98th Congress), but in no event earlier than October 1, 1983, unless before that effective date the President, after consultation with the Congress, has submitted to the Speaker of the House of Representatives and the President pro tempore of the Senate in writing a new plan providing for the interdiction of arms being shipped from or through Nicaragua to forces hostile to the Government of El Salvador. In formulating such a plan, the President shall consider whether it would be useful to pursue direct bilateral negotiations between the United States and the Govenment of Nicaragua; multilateral negotiations among selected Western Hemispheric countries; involving the Organization of American States, the United Nations, or any other nation or nations in a diplomatic or peacekeeping role; involving other countries in the process of arms interdiction using United States military supplies and training; and any other policy that will stop the shipment of arms from Nicaragua to El Salvador. The plan submitted pursuant to this subsection shall cease to be implemented and the prohibition contained in subsection (a) shall take effect if—

"(1) the Government of Nicaragua has, by formal action, agreed that it will cease all its activities involving the furnishing of arms, personnel, training, command and control facilities, or logistical support for military or paramilitary operations in or against any country in Central America or the Caribbean; and

"(2) the Government of Nicaragua is taking steps to implement the commitments made by the Government of National Reconstruction of Nicaragua to the Organization of American States in July 1979; and

"(3) the cessation of such activities, and the taking of steps to implement such commitments, has been verified by the Organization of American States or the President of the United States.

Mr. MICA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

Mr. BOLAND. Mr. Chairman, reserving the right to object, I would like to have an explanation and perhaps a reading of the amendment, if the gentleman would withhold his request.

Mr. MICA. Mr. Chairman, I will withhold my request at this time.

The CHAIRMAN. The Clerk will read.

The Clerk continued the reading of the amendment.

The CHAIRMAN (during the reading). For what purpose does the gentleman from Massachusetts (Mr. BOLAND) rise?

Mr. BOLAND. Mr. Chairman, the request of the gentleman from Massachusetts, under a reservation of my right to object, is made in order that I might understand precisely what is in the Mica substitute. My understanding is that—and the gentleman can correct me if I am wrong—that there is a difference between the Mica amendment as it is printed in the RECORD and this amendment, and we would like to understand that. We are not going to be able to understand that very well unless we understand what is in the amendment offered as a substitute.

Mr. MICA. There is a difference in the substitute, Mr. Chairman.

Mr. BOLAND. All right. Is it my understanding that the gentleman is going to explain what the difference is?

Mr. MICA. I will explain the difference, Mr. Chairman.

Mr. BOLAND. Mr. Chairman, with that understanding, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida that the amendment be considered as read and printed in the RECORD.

There was no objection.

The CHAIRMAN. The gentleman from Florida (Mr. MICA) is recognized for 5 minutes in support of his amendment.

Mr. MICA. Mr. Chairman, at the onset let me say that it has not been my intention to create a confrontation in this body, but, rather, to try to bring about a unanimity. There was a working group on this subject. It was made up of the leadership of both parties. It did not achieve its task, but I would like to submit for the RECORD the names of about 50 to 60 Democrats who had worked as recently as this week and tried to continue at least one effort to see unanimity on this floor before we had to approach it in this manner.

The list of names is as follows:

Don Fuqua, Bill Nelson, Marvin Leath, Bill Chappell, Jerry Huckaby, Glenn English, Charlie Whitley, Dan Daniel, Wes Watkins, Ben Erdreich, Ike Andrews, Ronnie Flippo, Harry M. Reid, Charlie Bennett, Beverly Byron, Buddy Roemer, G. V. Montgomery, Charlie Stenholm, Kent Hance, Robin Britt, Dante Fascell, Andy Ireland, James McClure Clarke, John Murtha, Bill Hefner, Wayne Dowdy, Robert A. Young, Earl Hutto, John Breaux, J. Roy Rowland, Ike Skelton, Charles Hatcher, Roy Dyson, Dave McCurdy, Richard Ray, Tom Carper, Ralph Hull, Marilyn Lloyd, Tom Lantos, Billy Tauzin, Daniel Akaka, Richard Shelby, Ed Jenkins, Jack Hightower, Sam Hall, Norman Sisisky, Bill Nichols, Samuel Stratton, Beryl Anthony Jr., Buddy MacKay, James R. Jones, Dan Mica.

Mr. Chairman, the second point I would like to make is that our majority leader, the gentleman from Texas, Mr. JIM WRIGHT, is circulating an amendment that he intends to introduce later today, and I would like to be very direct on this and say that I would totally and completely support that amendment. I think the findings that are stated in the Wright amendment to chastise the Government of Nicaragua and indeed to direct the President to try to find some diplomatic solutions are in effect what I am hoping, and have been hoping, to do right along in working with some kind of a bipartisan group to find a solution to this most difficult problem.

Let me say first that it is a complex situation, and I see it as a very complex situation involving tens of thousands of human beings' lives in which we are trying to impose a black or white solution. It is against the law so we will not do it, or it is not against the law so we will do it; I do not see that as an appropriate resolution to this type of situation where lives are involved.

Mr. Chairman, simply stated, I think the President is probably acting in breach of American laws, and I know that is in dispute. I think that Nicaragua is acting wrongly. There is no doubt about that, and I will read from the Boland report as to what they say Nicaragua is doing. But I also think the direct action of the Boland-Zablocki amendment is not correct.

So we have three actions that this Member feels are all incorrect.

Now, what does my amendment do? Simply stated there are two parts to it. First, the President must submit a plan to the Congress. This gives the President the opportunity to set forth in writing a legal approach to that which may be, and some say is, illegal in the activities that are being conducted in Central America. Certainly a committee that has approved action after action after action prior to saying it is illegal would give the opportunity to allow for a plan to be put in compliance with American law, and I think that is important. We need to have some approach other than just the confrontation, an ability to make sure that what we do as a nation—not Democrats or not Republicans, but as a nation—is legal.

Second, and more importantly, we believe that Nicaragua should take some action in ceasing its inappropriate activities in the region. Now, I do not think that is asking too much, particularly if each and every Member reads the Boland report, and I intend to read from that report here today.

Now, I have made a change, and I directly refer these comments to the chairman of the committee, who asked about a change. My original amendment, as indicated in the RECORD, said that these actions by Nicaragua could be verified first, by the OAS, second, by the Contadora group, or third, by the President. I have been advised, and I agree, that the Contadora group, which I support because I feel it makes a good faith effort, in and of itself is not an internationally recognized body. It does have the mechanism for verification. So I have changed that section to read that it can be verified by the President of the United States for the OAS.

This is not trying to impose a solution on Nicaragua. It is not saying that "You must deal with our President."

It is saying that "You can deal with us or you can deal with your peers in the region."

So I think that minor change is appropriate, and there were some eloquent speeches made about that yesterday on the floor.

Mr. SOLARZ. Mr. Chairman, will the gentleman yield?

Mr. MICA. I will yield at the conclusion of my remarks, but I only have 5 minutes.

Let me refer to not anything that this Member of Congress feels, not to any opinion, but to the judgment of the Boland committee, and I think the Members should read this before we vote, because they say that the following judgment is made "with certainty"—not with question.

The CHAIRMAN. The time of the gentleman from Florida (Mr. MICA) has expired.

(On request of Mr. HYDE, and by unanimous consent, Mr. MICA was allowed to proceed for 5 additional minutes.)

Mr. MICA. Mr. Chairman, the Boland committee says that the following judgment is made "with certainty":

A major portion of the arms and other material sent by Cuba and other communist countries to the Salvadoran insurgents transits Nicaragua with the permission and assistance of the Sandinistas.

The Boland committee goes on to say this:

The Salvadoran insurgents rely on the use of sites in Nicaragua, some of which are located in Managua itself, for communications, command-and-control, and for the logistics to conduct their financial, material and propaganda activities.

And the Boland committee, not this Member, says this directly:

The Sandinista leadership sanctions and directly facilitates all of the above functions.

The committee also says this:

Nicaragua provides a range of other support activities, including secure transit of insurgents to and from Cuba, and assistance to the insurgents in planning their activities in El Salvador.

Here is a Congress that is concerned about sending direct aid to El Salvador, a government that we support ostensibly, and now we are saying that we will not try in any way to stop this activity.

Now, let me add from the Boland committee report. This is an item that has been raised for the last year prior to all this.

Another area of serious concern to the Committee is the significant military buildup going on within Nicaragua. The President and other executive branch officials have addressed this subject publicly and exhaustively. Considering the small population of Nicaragua—

And I am continuing to report from the Boland committee report—

two and one half million people—and its weakened economic status—such a buildup cannot be explained away as solely defensive.

The Nicaraguan Government said they would build the largest standing army in this hemisphere. They have no threatening neighbors, they have no need for such an army. At this very moment, shiploads of Soviet equipment are on their way to Nicaragua.

So what I am saying is this: The gentleman from Indiana, Mr. LEE HAMILTON, made an eloquent argument about the problem of our approach in that region. I hope I have made some argument about the problems that are going on in Nicaragua, and the conclusion is that what is going on in Nicaragua is wrong. What we are doing may be wrong and it must be corrected by our plan and by the President, and it is of such a serious nature that we should not just pick up our marbles, just stop everything, and walk away.

Finally, let me say that we are going to give $80 million in the region, and all those who feel that the overt approach is correct, but do not want to support an open war had better think about that. Honduras and Guatemala and Nicaragua went to war over a soccer game. As for that $80 million, if it is the seed money for an open war, are we prepared to vote for open funding for war in that region?

□ 1220

There is a problem. It is a legitimate problem. I feel deeply about this. There is nothing that says that, be you a Democrat or a Republican, that you do not want to sometimes stop and look at the human situation. There are tens of thousands, whether we like it or not, who have alined themselves with a cause that we have supported that they felt was for freedom, and when we leave, the Sandinistas know who every one of them are.

Mr. SOLARZ. Mr. Chairman, will the gentleman yield?

Mr. MICA. I am happy to yield to the gentleman from New York.

Mr. SOLARZ. Mr. Chairman, I thank the gentleman for yielding.

I gather that one change the gentleman has made in the substitute the gentleman has offered, in comparison to the amendment that was put in the RECORD, is that the verification of the cessation of subversion by the Government in Nicaragua now has to be done either by the OAS or the President of the United States and that the reference to the Contadora countries has been eliminated.

Mr. MICA. The gentleman made such an eloquent speech yesterday that I had to rethink my position.

Mr. SOLARZ. I thank the gentleman for his response.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. MICA. I am happy to yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman for yielding.

I take it from the gentleman's remarks that basically what he is telling us here today—and I think this is really the kernel of this whole argument—is that it should be beyond any shadow of a doubt now, there should be no argument about it any more, that Nicaragua is indeed furnishing arms and equipment to the guerrillas in El Salvador.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(At the request of Mr. LAGOMARSINO, and by unanimous consent, Mr. MICA was allowed to proceed for 2 additional minutes.)

Mr. LAGOMARSINO. Mr. Chairman, if the gentleman will yield further, there should be no argument, the issue should be laid to rest as to whether or not Nicaragua is, indeed, furnishing arms, equipment, training, logistics and so on to the guerrillas in El Salvador.

Mr. MICA. There is no question. If every Member in their offices or on the floor would get a copy of the Boland-Zablocki report, they do not make any bones about this. A great portion of that report recognizes, chastises, and condemns the activities in great detail of the activities of the Government of Nicaragua. I do not think that has been brought out. Some say maybe that is not so.

I think it needs to be put to rest. It is in the report.

I think to be fair to the committee, their argument is not that these things are not going on. Their argument is that maybe it is illegal and we should stop it.

My argument and my point here today is that I do not think a lot of people realize that this is a fact. These are judgments made with certainty by our committee in this Congress.

Mr. LAGOMARSINO. Mr. Chairman, if the gentleman will yield further, another point that is made in that report is that we should do something about it; right?

Mr. MICA. Well, the report does say that we should take some action.

I might say that my feeling is this. It is a pay now or pay later situation. There is and has been a major military buildup. I am on the Foreign Affairs Committee. We have had reports of it for over 1 year now in Nicaragua, aside from this debate, and their leaders have said that it will be the strongest military regime in the hemisphere outside the United States.

Mr. LAGOMARSINO. So the argument here today and yesterday really should be whether the remedy provided in the bill that is before us is the correct remedy or not. There should not be an argument anymore whether there should be a remedy.

Mr. MICA. I think the Boland-Zablocki resolution addresses a very salient point, a difficult problem, a very sincere effort.

I just think the way it approaches it, the final answer right now, with the situation where there are thousands who have alined themselves with this cause in Nicaragua, should be considered.

The CHAIRMAN. The time of the gentleman from Florida has again expired.

(At the request of Mr. HOPKINS, and by unanimous consent, Mr. MICA was allowed to proceed for 1 additional minute.)

Mr. HOPKINS. Mr. Chairman, will the gentleman yield?

Mr. MICA. I am happy to yield to the gentleman from Kentucky.

Mr. HOPKINS. Mr. Chairman, I thank the gentleman for yielding.

As the author of the amendment currently on the floor, is it the opinion of my colleague that if overt operations are approved by this Congress, in the gentleman's opinion, would that lead to a commitment of troops in the future in Central America?

Mr. MICA. I think there is every bit the possibility that with overt aid we could be supplying seed money for possible military actions in the region. Then those of us or those of you who supported it will have to make a judgment.

Did you give them the money to get it started and now you want to stop, do you want to pull away? That is a legitimate concern.

There are other concerns, such as immigration.

Mr. HOPKINS. Mr. Chairman, will the gentleman yield further?

Mr. MICA. I am happy to yield.

Mr. HOPKINS. Will the gentleman give me his opinion, using the reverse side of that coin? Would the approval of covert operations ultimately be more or less likely to result in the commitment of American soldiers in Central America?

Mr. MICA. I think if the covert operations meet the legal guidelines set forth in this Congress and this Committee.

The CHAIRMAN. The time of the gentleman from Florida has again expired.

(By unanimous consent, Mr. MICA was allowed to proceed for 2 additional minutes.)

Mr. MICA. Mr. Chairman, there is no doubt that the potential exists for problems, military problems, in that region right now. Either way, we are taking a risk.

I think it is difficult. I said that it was an honest effort; but if I may, because the Chairman has asked that I point out the changes in the record and I just recalled one minor change that I would like to point out. We changed the words, "affirmed its commitments" on page 2, to "is taking steps to implement the commitment." It is not a major change, but I wanted to point that out.

AMENDMENT OFFERED BY MR. BOLAND TO THE AMENDMENT OFFERED BY MR. MICA AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. BOLAND. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. BOLAND to the amendment offered by Mr. MICA as a substitute for the amendment offered by Mr. YOUNG of Florida: Strike out all that follows "On page" through the end of the amendment and insert in lieu thereof the following:

3, after line 8, insert the following:

"(c) The prohibition contained in subsection (a) shall cease to apply if, after the end of the 30-day period beginning on the effective date of that prohibition—

"(1) the President submits to the Congress a report, classified if necessary, stating that the Government of Nicaragua is continuing to support, directly or indirectly, military or paramilitary operations by antigovernment forces in El Salvador, and that the President has determined that the assistance for military or paramilitary operations prohibited by subsection (a) is necessary, such report to include an analysis of the military significance of the aid provided by Nicaragua to antigovernment forces in El Salvador, a justification for the amount and type of assistance proposed to be furnished, a description of the objectives of such assistance, and an explanation of why the proposed assistance is in the United States national interest; and

"(2) the Congress enacts a joint resolution approving the resumption of assistance for military or paramilitary operations in Nicaragua.

Mr. BOLAND. Mr. Chairman, I yield to the gentleman from New York (Mr. SOLARZ).

Mr. SOLARZ. Mr. Chairman, I thank the gentleman from Massachusetts, the distinguished chairman of the committee for yielding for the purpose of explaining this amendment to the substitute amendment offered by the gentleman from Florida (Mr. MICA).

Mr. BOLAND. Mr. Chairman, the reason I yielded to the gentleman from New York is that both the gentleman from New York and the gentleman from Georgia were cosponsors of an amendment to the substitute that was going to be offered by the gentleman from Florida (Mr. MICA).

I sought the floor because of the fact that I chair this committee and probably have seniority over the gentleman from the Foreign Affairs Committee, the gentleman from Michigan (Mr. BROOMFIELD).

I sought this time so that we would have an opportunity to put this particular amendment before the House and the committee itself could make a judgment, both on the Mica amendment and also on the amendment to the Mica substitute that is offered in my name, but in behalf of the gentleman from New York and the gentleman from Georgia.

Mr. Chairman, I yield to the gentleman from New York (Mr. SOLARZ).

Mr. SOLARZ. Mr. Chairman, I thank the gentleman for yielding once more.

Mr. Chairman, I ask unanimous consent that the gentleman from Massachusetts (Mr. BOLAND) may sit while I engage in my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SOLARZ. Mr. Chairman, my very good friend, the gentleman from Florida (Mr. MICA), described his substitute as a compromise which could hopefully provide a basis for facilitating a broad consensus within the House with respect to how we ought to be conducting ourselves toward Nicaragua.

I would submit that this amendment to his substitute, offered by the gentleman from Massachusetts (Mr. BOLAND) on behalf of the gentleman from Georgia (Mr. FOWLER) and myself, could fairly be characterized as a compromise to the compromise.

Let me try to explain exactly what the differences are between the Mica substitute and the Boland amendment. Under the Mica substitute, we would, in effect, continue our paramilitary operations against Nicaragua, unless Nicaragua first stops its efforts to destabilize the Government of El Salvador and the President or the OAS, in effect, certifies or reports to the Congress that they have, in fact, stopped these subversive activities directed toward a neighboring government.

Under the Boland amendment, we would stop upon the enactment of this legislation or paramilitary operations directed toward Nicaragua, but we would be in a position to resume those paramilitary operations if the President within 30 days after the enactment of the legislation and the cessation of our paramilitary operations reported back to the Congress that the Government of Nicaragua was continuing its efforts to destabilize other governments in the region and if, at that point, the Congress of the United States adopted a joint resolution approving the President's report.

□ 1230

What then is the fundamental difference between the Mica substitute and the Boland amendment?

Under the Boland amendment, we would take the first step. We would terminate our paramilitary operations directed against Nicaragua.

PARLIAMENTARY INQUIRY

Mr. COLEMAN of Missouri. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state this parliamentary inquiry.

Mr. COLEMAN of Missouri. Mr. Chairman, since we are playing by the strict rules here, does the gentleman have the time or does the chairman have the time?

The CHAIRMAN. The gentleman from Massachusetts (Mr. BOLAND) has the time.

Mr. BOLAND. Mr. Chairman, would the gentleman yield?

Mr. COLEMAN of Missouri. I yield.

Mr. BOLAND. My understanding is that the gentleman from New York (Mr. SOLARZ) asked unanimous consent that I be permitted to sit and there was no objection to it. So I yielded the time to the gentleman from New York so he could continue.

Mr. COLEMAN of Missouri. I think we ought to be kind to our senior citizens and if that unanimous consent has already been passed, far be it for me to object.

Mr. BOLAND. I would say to the gentleman from Missouri if sometimes he wants to go down to the gym and get involved in some kind of a little racket game, I will be delighted to accommodate him.

Mr. SOLARZ. Mr. Chairman, just for the record, so it may be understood, my unanimous consent request had absolutely nothing to do with the age or the physical capacity of the very distinguished chairman of the Intelligence Committee who could outlast all of us. It was merely a courtesy to a colleague which I would have extended even to the gentleman from Missouri if the situation had been reversed.

If I may, I would like to get back to the explanation of the differences between these two approaches. Under the Boland amendment we take the first step.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. BOLAND) has again expired.

(On request of Mr. MICA and by unanimous consent Mr. BOLAND was allowed to proceed for 5 additional minutes.)

Mr. BOLAND. I yield to the gentleman.

Mr. SOLARZ. I thank my colleague for that request.

Once we take the first step, it is then up to Nicaragua to take the second step. And if they refrain from taking the second step, then we are in a position to resume our paramilitary operations against Nicaragua merely by virtue of a Presidential report that they have not taken the second step, and through the adoption of a joint resolution approving the President's report; whereas under the Mica amendment, we insist that the Nicaraguans take the first step and that they in effect terminate their subversive efforts against El Salvador before we terminate our paramilitary operations against them.

Now, I happen to believe that the United States, a nation of over 200 million people, one of the two superpowers in the world, engaged in a tense confrontation, as it were, with a small nation of a few million people like Nicaragua, is big enough and is powerful enough to take the first step.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I will be happy to yield to the gentleman from Florida.

Mr. MICA. Just for purposes of clarification, I understand your amendment would just stop everything for 30 days and then at the end of 30 days, after we have received a report from the President, that then we could either go ahead or continue with no action; correct?

Mr. SOLARZ. Under my amendment, once the prohibition on the paramilitary assistance contained in the Boland-Zablocki bill comes into effect, we stop our paramilitary assistance directed against Nicaragua and then, 30 days after that cessation, the President is empowered to report back to the Congress, if he so chooses, that the Government of Nicaragua is continuing its subversive efforts against El Salvador or anywhere else.

Then if the Congress adopts a joint resolution approving the President's report we resume our paramilitary operations against Nicaragua.

If the President does not submit such a report or if the Congress does not adopt a joint resolution the paramilitary assistance does not continue.

Mr. MICA. If the gentleman will continue to yield, I would like a clarification on that. But let me just ask this and then I will ask for clarification.

How long will it take us to withdraw everybody that we are supporting there?

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Georgia.

Mr. FOWLER. The amendment offered by the gentleman from New York and myself preserves the classified date for cessation of hostilities contained in the classified annex of the intelligence authorization and we keep that classified date for the termination of all hostilities by the United States in the Boland-Zablocki bill.

So what the amendment offered by the gentleman from New York and myself would do would be after that date, when military activity is ceased by the United States, the President would then have 30 days from the classified date to submit this report on the cessation of Nicaraguan activities.

Mr. MICA. If the gentleman would continue to yield, my problem with this would be that if we are going to stop everything for 30 days we obviously will have those thousands that were referred to there, no one there to defend them while we are waiting on a report.

We may have to go back in 30 days to a very difficult situation.

Mr. SOLARZ. Let me say that if the groups that are now fighting against the government in Nicaragua cannot maintain themselves for at least 30 days without a continuing supply of American weaponry, given all of the assistance they have already gotten, they are not a very viable operation to begin with.

Mr. STRATTON. Would the gentleman yield?

Mr. SOLARZ. I would be happy to yield, but I wonder if the gentleman would allow me 2 minutes to conclude my remarks and then I will yield.

But if the gentleman prefers, I would ask the chairman to yield now.

Mr. BOLAND. I yield to the gentleman from New York.

Mr. STRATTON. I am interested in precisely the same point the gentleman from Florida (Mr. MICA) is making. I think the gentleman from New York (Mr. SOLARZ) is trying to deal with this thing from a legalistic point of view instead of a realistic point of view of the military situation that exists in Nicaragua.

It is not a question of whether the individuals that we are supporting can maintain themselves for 15 days, 30 days, 45 days, or even long enough for Congress to conduct another one of these debates that takes 13 or 14 hours. It is a question of whether this Congress is going to demonstrate that the United States is not willing to sustain an operation of this kind to assist those who are fighting for freedom.

You just cannot turn this thing off and on like a faucet. I think the gentleman's amendment is highly flawed in comparison with that of the gentleman from Florida.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. BOLAND) has again expired.

(On request of Mr. FASCELL and by unanimous consent Mr. BOLAND was allowed to proceed for 3 additional minutes.)

Mr. McCURDY. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I am happy to yield to the gentleman.

Mr. McCURDY. I just would like to clarify a point. I understand where the gentleman from Florida and the gentleman fron New York that just left the microphone are coming from.

But from a practical standpoint are we not saying that since this is an authorization bill for 1984, that because of the process that we are involved in here that the actual termination, if the other body even were to accept

this proposal, would not occur until October?

Mr. SOLARZ. Precisely.

Mr. McCURDY. So we are not talking about a spigot being turned off immediately.

Mr. SOLARZ. Can I say to the gentleman that he will have ample opportunity to debate the amendment but I would like to finish the explanation.

I am sure my colleagues on the other side of the aisle either have questions or want to make statements about it themselves.

But if I can try to conclude the summary and the description of what the amendment attempts to do, as I was pointing out, the big difference is that under the Mica substitute the Nicaraguans have to take the first step. Under the Boland amendment to the Mica substitute we take the first step. But if they do not reciprocate we are in a position to resume paramilitary operations against Nicaragua.

□ 1240

It seems to me the advantage of combining the Boland amendment with the Mica substitute is that it puts the Nicaraguan Government on notice that, if they want us to refrain from resuming paramilitary operations against them, all they have to do is to terminate their efforts to subvert the government in El Salvador.

Mr. COLEMAN of Missouri. Mr. Chairman, will the gentleman yield on that point?

Mr. BOLAND. I will be happy to yield.

Mr. COLEMAN of Missouri. Let me read to you from page 12 of the Intelligence Committee report. It says, "No member of the committee believes that ending support for the anti-Sandinista insurgency will by itself induce a corresponding end in Sandinista support for the Salvadoran insurgents." It flies right in the face of what the gentleman just got through saying.

Mr. SOLARZ. No.

Mr. COLEMAN of Missouri. You even put it in print, now you are backing away from that statement.

Mr. SOLARZ. Well, if I can respond to the gentleman's point, it says nothing of the sort, because if the Boland amendment to the Mica substitute is adopted, and if we take the first step, which that amendment would have us do, if we, under the terms of the Boland amendment, terminate our paramilitary assistance against Nicaragua——

Mr. COLEMAN of Missouri. Then what should——

Mr. SOLARZ. If I can complete my response to your question. If it should turn out that the Government of Nicaragua does not cease and desist from its efforts——

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. FOWLER and by unanimous consent, Mr. BOLAND was allowed to proceed for 5 additional minutes.)

Mr. BOLAND. I yield to the gentleman.

Mr. SOLARZ. I thank the gentleman for the request. And if it turns out that the Government of Nicaragua does not cease and desist from its efforts to destabilize El Salvador, then 30 days after the termination of the paramilitary operations we are directing against Nicaragua, the President would submit a report to the Congress in which he would say the Government of Nicaragua is continuing its efforts. He would describe what they are doing. Under the terms of the amendment he would be obligated to assess the military significance of what they were doing. He would also presumably request us to authorize a continuation of the paramilitary operation against them. He would describe the purposes of that operation. If necessary, his report could be classified.

Once that report was submitted to the Congress, upon the adoption of a joint resolution by both the House and the Senate the paramilitary operations would resume.

Mr. COLEMAN of Missouri. Will the gentleman yield on that point?

Mr. BOLAND. Yes; I yield to the gentleman.

Mr. COLEMAN of Missouri. The gentleman has already prejudged his argument in this committee document because you have just said and I just read it to you that nobody on the Intelligence Committee thinks that this is going to work, for 30 days or whatever. What you are saying is you are going to give them 30 days and then come back with the report that the Congress might sit on for 30, 60, 90, 120 days. Members of the Intelligence Committee already said this is an ineffective method to use because by itself the Sandinistas will not give up. It says so on page 12 of the Intelligence Committee report.

Mr. SOLARZ. Let me say that I did not write the report; I do not think that anybody can predict with absolute certainty what the Sandinistas will do.

I think if we adopt the Boland amendment we will put the onus on them; regional pressure, international pressure will be focused on the Sandinistas. I think our political position will be enormously enhanced both within the region and around the world and, if it should turn out that the prediction contained in the committee report is accurate, and the Sandinistas continue their efforts to destablize El Salvador anyway, we are in a position to resume. I can assure you that there is no intention here to bottle up joint resolutions of approval.

Mr. COLEMAN of Missouri. The gentleman cannot give that assurance.

Mr. SOLARZ. I have not yielded. I am sure before this debate is over, I do not want to speak for them, but I believe that the chairmen of the relevant committees would be prepared to offer assurance that this legislation would be considered in a timely and expeditious fashion, and that the Congress would be given an opportunity to work its will. Let me say to the gentleman, if you want to offer an amendment to the amendment providing for expedited procedures, I personally have no problem with that.

The whole point is, however, that if the amendment is adopted and the Government of Nicaragua does not cease and desist from its efforts to destabilize El Salvador, we are in a position to resume.

Now, the advantages of the approach are twofold. From the point of view of those who believe that so long as Nicaragua continues to subvert El Salvador, we should continue our paramilitary operations against Nicaragua, the advantage is that the amendment provides for a mechanism for resuming the paramilitary operations if they do not cease and desist. Whereas, from the point of view of those Members who believe that even if Nicaragua does not cease and desist from its efforts to destabilize El Salvador, it is not in the interest of the United States to continue what we are doing, the Boland amendment provides for the termination of our paramilitary assistance toward Nicaragua and gives the Congress of the United States the right to prevent the resumption of a paramilitary assistance program directed against Nicaragua, if the Congress does not pass a joint resolution approving the President's report.

The fundamental difference between the Mica substitute and the Boland amendment, in addition to the fact that the Mica amendment would require them to go first whereas the Boland amendment would have us go first, is that under the Mica amendment there is no continuing congressional control, whereas under the Boland amendment the Congress remains in a position to prevent a resumption of this program in the event it decides that is not in our interest.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MICA. I ask unanimous consent that the gentleman be given 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

Mr. BROOMFIELD. Reserving the right to object and I shall not object to it, but I think it is about time we get a balance in this debate here. I would like to see someone on this side recognized to answer the comments

made by the gentleman from New York.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The CHAIRMAN. The gentleman from Massachusetts (Mr. BOLAND) is recognized for 1 additional minute.

Mr. BOLAND. I yield to the gentleman (Mr. MICA).

Mr. MICA. I would like to clarify one statement that the gentleman made when he said that with the Mica amendment there is no continuing congressional oversight.

At any time this body can stop everything. All we have to do is come together like we are right now here and act on an appropriations bill or a limitation. So, there is always control.

Mr. SOLARZ. If the gentleman from Massachusetts will yield, the gentleman's point is well taken, but I am sure the gentleman would also agree that the provision requiring the adoption of a joint resolution of approval contained in the Boland amendment to your substitute gives the Congress a greater degree of control over what we are doing with respect to Nicaragua than it would have without such an arrangement.

Mr. MICA. If the gentleman from Massachusetts will yield, I would agree it would give some other type of control, but we already have control.

Mr. LAGOMARSINO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Solarz amendment.

Mr. SOLARZ says that we, the United States, should take the first step. I really do not know why we should. Nicaragua is the one that took the first step in the first place, they are the ones who started support for the guerrillas in El Salvador.

They are the ones who are supporting, according to the Intelligence Committee report and something we all know, line 5, it says:

> Such judgments nonetheless constitute a clear picture of active promotion for revolution without frontiers throughout Central America by Cuba and Nicaragua.

In the gentleman's remarks about his amendment, in speaking about the guerrillas in El Salvador, he added the words, "or anywhere else." But that is not what his amendment says. The amendment only speaks to the support of the guerrillas in El Salvador. I submit to you that you could have a situation where it might be that the guerrillas in El Salvador could survive for 30 days without the kind of activities that are proscribed in the bill. But there is nothing in the amendment that would prohibit the Government of Nicaragua from continuing to supply subversive elements in Costa Rica, in Honduras, Guatemala or in any place else in the Caribbean. So there is a big difference between the gentleman's amendment with respect to that and the Mica amendment and others before us.

I would suggest, also, that even if there is an expedited procedure added to this amendment, that does not do very much good if the Congress is not in session when it comes before us.

What happens to the Contras who are in Nicaragua and more importantly, perhaps, what happens to the people who have attached themselves to their cause, the civilians in the highland, the Miskito and other Indians on the east coast? What happens to them? Are they supposed to go out and then come back later if that is indeed what happens?

I think the gentleman's amendment should be defeated.

Mr. SOLARZ. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman.

□ 1250

Mr. SOLARZ. I thank the gentleman for yielding.

Just for the purposes of clarification, the gentleman is quite right in saying that the amendment offered by the gentleman from Massachusetts (Mr. BOLAND) refers only to activities underway on the part of Nicaragua with respect to El Salvador, and not the other countries in the region, but I would point out to the gentleman that that is equally true of the substitute offered by the gentleman from Florida (Mr. MICA), which if the gentleman reads it, clearly applies only to the provision of arms from or through Nicaragua to forces hostile to the Government of El Salvador.

Mr. GRAMM. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from Texas.

Mr. GRAMM. I thank the gentleman for yielding.

Mr. Chairman, I would like to clarify exactly what these amendments do. The Mica amendment sets out a reciprocity formula that basically says that if the Government of Nicaragua stops its actions against its neighbor, if it fulfills the commitments it made to OAS and if a third party verifies that action, that we will cut off aid to the anti-Sandinista freedom fighters.

Now, compare that to the Boland amendment, which is a gutting amendment. The Boland amendment says, let us cut off aid to those who are fighting for freedom, fighting to achieve important American objectives. Let us end arms assistance for 30 days with no guaranteed response. After 30 days, let us call on the President to send evidence to the Congress that Nicaraguan subversion and arms shipments to El Salvador has not stopped and then let us ask the Congress to assess that information and if the Congress chooses to act favorably, then we will resume support for those fighters within Nicaragua.

Now, how can we believe that this Congress will be objective when the committee has already voted, on a straight partyline vote, to cut off aid even through there is total agreement here that the evidence is overwhelming that the Nicaraguan Government is currently engaged in subversion in El Salvador and elsewhere in Central America.

Now if we all agree on the facts today, agree that Nicaragua is attempting to overthrow the Government of El Salvador and install a Marxist dictatorship, and yet we are voting to cut off aid how can we believe the Congress is going to be a neutral arbiter of any evidence submitted by the President? I think there is a legitimate reason to believe it will not. I think we are seeing rank partisanship here which does disservice to the American people, which threatens us in Central America and which some day may bring the rifle shots to our doorstep.

The CHAIRMAN. The time of the gentleman grom California (Mr. LAGOMARSINO) has expired.

(At the request of Mr. GRAMM and by unanimous consent, Mr. LAGOMARSINO was allowed to proceed for 5 additional minutes.)

Mr. GRAMM. If the gentleman will continue to yield, we are planting the seeds today for a conflict that could bring the rifle shots to our hearing range, at least within our hearing range in Texas.

Mr. Chairman, what we have here is an effort to simply grant a 30-day cessation of aid, call on the President to present evidence to a committee that agrees on the evidence—there is no disagreement here that subversion and arms shipments, are continuing on a massive scale—but yet in spite of the evidence the committee voted on a straight party line to cut off aid. How are we to believe that this committee or the Congress is going to be more receptive to evidence in the future than it is today? I submit that they will not.

The Mica amendment is a logical approach to the problem. It sets out an evidence test. It sets up a third party as an arbiter and basically creates a system of reciprocity.

If the Nicaraguans want peace, if they are willing to stop their aggression against their neighbor, then we will stop our support for the fighters within their borders. If they do not, we will not.

I would like to make one additional point, Mr. Chairman, and that is we have a proposal from this committee that says let us not repeat the errors of Vietnam, but let us repeat the methods of Vietnam.

How are we going to throw up walls on the borders of all of Nicaragua's neighbors? I repeat a point I made yesterday: With tens of billions of dollars, with 600,000 combat troops, with absolute mastery of the air and the sea and the land, we never shut down the Ho Chi Minh Trail and we never stopped the shipment of arms and the movement of men and materials into South Vietnam.

How can we believe that we can be successful in that activity in Central America when it did not work in Vietnam?

It seems to me that we are following the same path of blunting our own effort, granting a sanctuary, which is going to allow communism to succeed again. I think it is critical that we defeat the Boland amendment and then we move forward with the reciprocity proposal, as proposed by the gentleman from Florida.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, I just wanted to say to the gentleman from Texas (Mr. GRAMM) that I subscribe to his analogy with Vietnam. The Solarz amendment would be precisely the same thing we did with all those bombing halts that we put through in Vietnam. They certainly did not solve the problem. They just made it worse.

Mr. GRAMM. If the gentleman will continue to yield.

The result would be exactly the same: The end of the conflict with a clear-cut defeat for freedom and democracy and for the United States. There is no doubt that the Boland amendment would produce exactly that result. It is a policy of retreat, it is a policy of abrogation of our responsibility, and it is a policy of surrender.

Mr. STRATTON. And also a policy unilateral disarmament.

Mr. LAGOMARSINO. Mr. Chairman, to clarify the issue, the gentleman from New York (Mr. SOLARZ) tried to imply or did imply that the Mica amendment was the same as his with regard to the support by Nicaragua of other groups in Central America.

If one reads the Mica amendment, on page 2, line 7:

> The Government of Nicaragua has by formal action agreed that it will cease all its activities involving the furnishing of arms, personnel, training, command and control facilities, or logistical support for military or para-military operations in or against any country in Central America or the Caribbean.

So, quite different from the Solarz amendment.

Mr. HYDE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think this is very significant. The Solarz-Boland amendment is a significant retreat from the Boland-Zablocki that we started out with yesterday.

Now yesterday we were told that the right thing to do in our national interest was to cut off all covert aid to the Contras fighting in Nicaragua to recapture their own country, let the Indians go, let Commander Zero fend for himself and let the FMN do the best they can, but we are going to pour in $80 million for overt aid, sea, air, and land overt interdiction of these subversive arms.

Now today the unwisdom of that position has obviously been seen by the chief sponsor of that legislation because we have moved now a position of tolerating aid to the paramilitary forces inside Nicaragua, but first we have to stop for 30 days. We tell the Miskito Indians, "Hang in there. We may be back. Keep fighting. We just may come back if we can get a joint resolution through Congress."

Now if Congress has adjourned, the President can call a special session, we can then return from wherever we are on the globe, we can come in here and then have a secret session in the Senate and in the House and just maybe through this labyrinthine process get a joint resolution. Then we will let you go back in, and I hope there are some Indians left, and I hope there are some Contras left, so we can give them some aid.

Now this 30-day sanctuary, this free sanctuary that we give the great Sandinistas, those people of conscience and compassion and concern, while they have that 30 days, even if they step up the export of subversion, we are impotent. We are impotent spectators, paralyzed by the need to produce a joint resolution to give the President the right to do what the Constitution says he has already and the War Powers Act says he has already. We are abrogating all that with the Solarz-Boland amendment.

I see the gentleman from Wisconsin (Mr. ZABLOCKI) is not a part of this, but I can only speculate why.

Now, why do you limit it to El Salvador? What if they export revolution to Honduras? Or Costa Rica?

□ 1300

You are more familiar with that map than I am. I do not know anyone who knows the map of Central America as well as you do. Both of the gentlemen, the Solarz-Boland sponsorship, why do you say if they export subversion to El Salvador? What if they tried Costa Rica, with their 7,000 police force and a few mailmen who are aggressive and might help defend the country?

Honduras, we just do not care about exporting revolution to Honduras?

Now, this is an interesting retreat, but it goes in the wrong direction. So I hope the Solarz amendment will be defeated. And ultimately we get to the Mica amendment, which makes eminent commonsense.

Mr. COLEMAN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Missouri.

Mr. COLEMAN of Missouri. We keep repeating the same error and compounding it. It is not 30 days we are talking about. The minimum is 30 days. As the gentleman said, it very well could be 60 to 90 days on top of that until the Congress acts.

I might remind the gentleman that we just passed, finally today, the repeal of the withholding of interest bill which everybody here but a couple of Members voted for. How many months was that in the making? With all of the mail we got, the most mail we have ever gotten on any subject in Congress, and it took us 3 months to get that little bill passed.

Mr. HYDE. Is the gentleman saying that we did not respond to public pressure quickly on that?

Mr. COLEMAN of Missouri. I am saying that if it took us that long to respond to the issue that we have received the most mail on in the history of Congress, how long would it take to respond to the situation in Central America.

Mr. HYDE. Well, this is known as the Trust Nicaragua Amendment, trust them, work with them on this, when there is absolutely nothing in the record to indicate that they are worthy of any trust.

I would hate to be telling those Miskito Indians, "See you later; we may be back."

Mr. FOWLER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

My friends in the Congress, if this is to be known by any label, I hope this amendment offered by the chairman will be known as the trust our allies amendment, because that is actually what it is designed to do.

Let me lay some facts out on the table that I do not believe are in dispute. There is nothing covert about this war anymore. That is all the term covert action means. It means a secret military or paramilitary action. We do not have that anymore. We have an open war that the United States is unilaterally financing within Nicaragua. The only thing secret left about it is the funding mechanism. If we refuse to adopt this amendment, we will have countenanced an undeclared war by the United States in Nicaragua and violated our own responsibility to exercise congressional oversight over the funding of a war.

And that is why I say to the gentleman from Texas, who has criticized the U.S. Congress as being an unneutral arbiter of the evidence.

Quite the contrary. The U.S. Constitution gives us exclusive authority to declare war.

Second, the simple question is: What will we do about it?

Well, the Mexicans have said, "Please stop it"; the Colombians have said, "Please stop it"—largest democracy; the Venezuelans have said, "Please stop it."

Why have they said, "Stop this military operation"?

Because, our allies have said, "your military operation is actually attracting, rather than containing, these hostile influences. By you, the United States, trying to go it alone, you are causing the opposite effect of what we all want to happen. You are solidifying the Sandinista regime, you are unifying the Nicaraguan people against the U.S.-sponsored invasion, and you are forcing the Sandinista government to ask for more help from Cuba, and the Soviet Union. We want to help you eliminate all hostile influences and military personnel. But you cannot do it alone."

Can we not seize this moment and accept our allies offer of help in Central America?

The United States has demanded, through the Reagan administration, for a year and a half that Nicaragua agree to multilateral negotiations. That has been the sine qua non of any cessation of our paramilitary behavior. Ten days ago the Nicaraguans said "We accept multilateral negotiations, we are ready to negotiate. Your interdiction program has seized no arms going from our territory into El Salvador, but we are willing to sit down and talk about how we reach a negotiated solution to this problem."

And I say to my friend from Missouri: I signed that report that he read, but let me read the whole paragraph and try to discuss the point he raised, which was a good one.

This is the report of the Intelligence Committee:

> No member of the committee believes that ending support for the anti-Sandinista insurgency will by itself induce a corresponding end in Sandinista support for the Salvadoran insurgents. The committee does not wish to impose a unilateral restriction on U.S. policy. Rather, it seeks to end an ineffective program which does real harm to the image of the United States as a defender of democratic, peaceful change. That ineffective program must be replaced by a scheme of security assistance with direct U.S. participation, openly offered and received, that aims to create a capability among friendly nations where none now exists.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. FOWLER) has expired.

(By unanimous consent, Mr. FOWLER was allowed to proceed for 5 additional minutes.)

Mr. FOWLER. Mr. Chairman, that report was written on May 13, 1983, 2½ months ago. And we stand by it. We will not get reciprocity by itself. Things have changed now. What has changed?

Well, first of all, we have forced through this paramilitary action the Sandinistas to request multilateral or bilateral negotiations. They have succumbed to our demand.

Second, there is no by itself. We are not now alone. Our allies, the democratic nations in Central America are saying, "We want to help; but we cannot help, we cannot develop a scheme of security assistance, of arms interdiction, of the containment of communism in our Hemisphere unless you let us help."

And the only thing they have requested of us is to cease this military operation and give us 30 days to work together in our hemisphere to remove the impression of the great gringo nation of the north trying to dictate by the use of American military power what the United States will tolerate and what it will not tolerate.

This amendment presents to us for the first time the opportunity to let our allies in on the action to try to stop this war on our own democratic terms.

□ 1310

All that this amendment is trying to say is that, as the most powerful nation on Earth, we, the United States of America, call Nicaragua's bluff. We are great enough to act as a powerful nation and say that we will accept the recommendations to work with our allies, cease this military intervention in a sovereign nation for at least 30 days and see whether or not this matter can be settled by the cessation of Nicaraguan hostilities toward El Salvador.

If that is too great a risk for the most powerful nation on this Earth to take, then, my friends, we ought to reconsider the innumerable missiles and security systems and military might of this country and whether our Nation's security is adequate.

Mr. GRAMM. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Texas.

Mr. GRAMM. I thank the gentleman for yielding.

Mr. Chairman, I would like to make three quick points. I am sure the gentleman will want to correct his statement concerning the United States unilaterally financing the war. The gentleman obviously does not deny, since he signed the report, that the Soviet Union, Cuba, the Eastern bloc and the Palestinian Liberation Organization are all providing funding and assistance for Nicaragua and El Salvador.

Mr. FOWLER. I would be delighted, if that was the interpretation of the gentleman from Texas. What I said, but I appreciate the opportunity to reiterate, is that the United States is unilaterally financing the counterrevolution against the Sandinista government who, certainly, yes, have logistical and financial support from the government that the gentleman mentioned.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. FOWLER) has expired.

(On request of Mr. GRAMM and by unanimous consent, Mr. FOWLER was allowed to proceed for 2 additional minutes.)

Mr. GRAMM. If the gentleman will yield further, making my two other points very quickly, all the Mica amendment asks is not that the Communists talk; it asks that they act. If they want to end this war, they can do it very quickly by simply cutting off their assistance to those who are trying to overthrow the government of their neighbor.

Mr. FOWLER. I agree that that is what the Mica amendment asks, but unfortunately, over 2 years of this war that we are participating in, and all of the negotiating process that we have attempted, has not accomplished that fact. The reason that our allies in Central America tell us that it is impossible to accomplish by the Mica approach is because of U.S. unilateral military intervention. If that is ceased, we have a chance.

Mr. GRAMM. If the gentleman would continue to yield, it has not succeeded because the Nicaraguans have refused to act. They have been perfectly willing to talk; but they have refused to act.

Finally, it is hard for me to take this amendment as credible from those who have voted, in the face of overwhelming evidence of Nicaraguan involvement in El Salvador, to cut off aid today. When you are ready to move today, in the face of overwhelming evidence, to deny aid how am I to believe that you would move, in the face of additional evidence, to support aid.

That credibility factor is what I think destroys this amendment. It is not a question of Congress not being in session, when the President asks for aid. It is not even a question of the whole revolt inside of Nicaragua being killed off while we talk. But it is a question of credibility. Will we act even if there is more evidence, even if there is greater danger.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. FOWLER) has again expired.

(On request of Mr. MILLER of California and by unanimous consent, Mr. FOWLER was allowed to proceed for 4 additional minutes.)

Mr. FOWLER. First of all, although no one is denying the support by the Government of Nicaragua for the insurgents in El Salvador, I must remind

all of us that the Salvadoran insurgency and the war there did predate Nicaraguan involvement, and has its roots, as I know the gentleman would agree, in social, economic, and political factors as well as outside military intervention from many sides.

Mr. GRAMM. That is true of every conflict in history.

Mr. FOWLER. So the fact that if the Nicaraguans do completely cease and desist, we still have a serious problem in El Salvador. But more importantly, and I must correct the record on this, there is no massive evidence that has been established of the extent of arms flow from Nicaragua into El Salvador. We believe it is taking place, but we have not captured a shipment by land or sea or mule train. Lacking that evidence, should we not take a chance, for a 30-day period, to show that the United States can call the bluff of the Nicaraguans?

Mr. MILLER of California. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to my friend, the gentleman from California.

Mr. MILLER of California. I thank the gentleman for yielding.

Mr. Chairman, I would just like to commend the gentleman for his statement and point out to Members of the House who are both uneasy with this administration and uneasy with the Sandinistas that this amendment is really, in fact, the best compromise. Because of the fact that the cut-off date is classified and the time at which the 30-day period would begin to run is classified for that reason, the Sandinistas will get an opportunity to prove to the President of the United States, to prove to the Contadoras, to prove to the OAS that, in fact, they are serious about what they said on the fourth anniversary, on the 19th, last week, that they are willing to engage in efforts to secure the borders, to engage in nonaggression pacts, to engage in stopping the flow of arms through Latin America. If they are not, during the time in which they are mulling this over, there will be 4,000 troops placed on the Honduran border, there will be two of these carrier task forces steaming on the Atlantic and Pacific coasts, and I think they can start to appreciate how serious this administration is, how serious this Congress is, about this effort.

Now, we also appreciate, because it has been cited, the ability of the Intelligence Committee and the intelligence community to monitor their activities. The pictures were here, and we have all heard in the secret session of our ability to know what is going on. If they fail to meet that test, I expect what they will find is a finding by the President of the United States and/or the position that is allowed in this amendment, because let us not forget, there is nothing in this amendment, there is nothing in Boland-Zablocki, that prevents the President of the United States from coming back to the Intelligence Committee, laying a finding on the table, and commencing the actions that he thinks are desirable under the conditions of that finding.

So, in fact, this is truly the compromise between those individuals who are uneasy about the posturing of this administration and who are uneasy about the actions of the Sandinistas, because this does not say that tommorrow, starting 30 days, there is an opening. What it says is there is going to be, for an unspecified time in the period, not to exceed a great deal of time; there is going to be a window by which the Sandinistas can either perform concrete acts to stop actions that are bothering this administration, or the actions of this administration that we are currently debating will resume. They will not resume in an illegal fashion. They will resume in a legal fashion, not in violation of the Boland amendment.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. FOWLER) has again expired.

(On request of Mr. SOLARZ and by unanimous consent, Mr. FOWLER was allowed to proceed for 3 additional minutes.)

Mr. SOLARZ. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from New York.

Mr. SOLARZ. I thank the gentleman for yielding.

Mr. Chairman, I will be very brief. A little bit earlier in the debate, my very good friend from Illinois (Mr. HYDE) and my good friend from California (Mr. LAGOMARSINO) made what I thought was a good point. They referred to the fact that, whereas the Mica amendment would permit a continuation of paramilitary operations against Nicaragua, so long as they attempted to subvert any country in the region, the Boland amendment would, in effect, require a termination of the paramilitary assistance against Nicaragua even if they were attempting to subvert other countries in the region other than El Salvador, even if they had stopped in El Salvador itself.

Consequently, to rectify that omission, Mr. Chairman, I would like to ask unanimous consent that the amendment offered by the gentleman from Massachusetts (Mr. BOLAND) to the substitute offered by the gentleman from Florida (Mr. MICA) be amended by striking our "El Salvador" both places it appears in the amendment and inserting in lieu thereof, "any country in Central America or the Caribbean."

The CHAIRMAN. Does the gentleman from Georgia (Mr. FOWLER) yield for that request?

Mr. FOWLER. I yield for that request.

The CHAIRMAN. Is there objection to the request of the gentleman from New York (Mr. SOLARZ)?

□ 1320

Mr. BROOMFIELD. Mr. Chairman, reserving the right to object, I do so for the purpose of trying to get a limitation on the amendment before us at the present time, the Solarz amendment, so we can start getting some votes here.

I am not opposed to the amendment the gentleman wants to put to his original amendment, but I would like to get a limitation on time to the Mica amendment amended by the Solarz amendment.

Mr. Chairman, how about 1:45?

Mr. BOLAND. Mr. Chairman, how about 2 o'clock?

The CHAIRMAN. Does the Chair understand the request is for 2 o'clock now?

Mr. BOLAND. Mr. Chairman, reserving the right to object, the reason I say that is because, as we know, under the rules we have 9 hours. We had 9 hours left, and we have started this, so we have about 8 hours or a little less than 8 hours left. I do not know what is going to happen to the amendment.

As we know, there were 106 amendments printed in the RECORD, and I do not know how many of those are going to be offered. I do not know how many we will be offering. We may offer one or two on this side at the appropriate time. But the problem of how long we stay here really will be controlled by that side. These are the most important amendments, the Barnes amendment and whatever other amendments may be offered. The Mica amendment is obviously one of the most important ones.

Mr. BROOMFIELD. Mr. Chairman, will the gentleman agree that the Young amendment, plus all amendments thereto, end at 2 o'clock so then we can at least have a vote on the Barnes amendment?

Mr. BOLAND. Mr. Chairman, there is some concern on this side that that is a little bit too early. Let us make it 2:15.

We have the time. That will eat up some time, which will guarantee us that we will get out at the right time.

Mr. STRATTON. Reserving the right to object, Mr. Chairman, what is the procedure for allocating the time under this proposal? Are those Members standing to be recognized for an appropriate number of minutes?

The CHAIRMAN. It will be up to the Chair to allocate the time among the Members standing or between the two sides.

Will the gentleman from Michigan (Mr. BROOMFIELD) restate his request?

Mr. BOLAND. Mr. Chairman, first, under my reservation of objection, let me ask, in order to balance the time,

can we split it up 30 minutes on each side? Would that be agreeable?

Mr. BROOMFIELD. That will be fine.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. LIVINGSTON. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Is there objection to the request that is pending from the gentleman from New York (Mr. SOLARZ)?

Mr. WEISS. Reserving the right to object, Mr. Chairman, I reserve the right to object only to state that by not objecting certainly this gentleman does not intend to indicate support of the thrust either of the unanimous consent request or indeed the amendment offered by the gentleman from Massachusetts, which I consider to be leading us in exactly the opposite direction from where we started out in the first place.

The CHAIRMAN. The reservation of objection is withdrawn.

Is there objection to the request of the gentleman from New York?

Mr. GRAMM. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. GRAMM. The gentleman can state it again, when we have worked out the time.

Mr. FOWLER. Mr. Chairman, I trust that my time has expired.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. FOWLER) has expired.

PARLIAMENTARY INQUIRY

Mr. SOLARZ. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. SOLARZ. Mr. Chairman, it is not clear to me what the gentleman from Texas objected to.

Mr. Chairman, my impression was that the minority would not have an objection to this unanimous consent request to amend the Boland amendment to meet some of the concerns they express.

The CHAIRMAN. The Chair would like to inquire of the gentleman from Texas (Mr. GRAMM), was the objection of the gentleman from Texas to both the unanimous consent request to modify the amendment and to the fixing of time?

Mr. GRAMM. Mr. Chairman, if the gentleman will yield, if the gentleman would restate his request, including in that request a limitation on debate to include debate on the Boland amendment and on the Barnes amendment, then this gentleman will not object.

Mr. BOLAND. Mr. Chairman, will the gentleman from Texas restate that? I was preoccupied here.

Mr. GRAMM. Mr. Chairman, if the gentleman will restate his unanimous-consent request to include something concerning the altering of the Boland amendment, with the inclusion of a limitation of debate on the Boland amendment to the Mica amendment and the Barnes amendment to the Young amendment, then this gentleman will not object. And as to the 2:15 time limitation——

Mr. BOLAND. Mr. Chairman, if the gentleman will yield, what about a reference to the Mica amendment? Was that included?

Mr. GRAMM. At this point the Mica amendment is a major instrument of debate, and I do not feel that we should limit the ability of Members to speak on it, but I think we need to move ahead on these amendments substantially.

Mr. MICA. Mr. Chairman, if the gentleman will yield, as the author of the amendment, I would like to see us move on this. I think it is appropriate. There has been a day and a half of debate. I would support the chairman of the committee and ask the gentleman to support him.

Mr. GRAMM. Mr. Chairman, I certainly would defer to my friend, the gentleman from Florida, who has the right to object himself.

Mr. MICA. Mr. Chairman, I thank the gentleman. I appreciate that.

Mr. BOLAND. Mr. Chairman, I ask unanimous consent that all debate on the Boland amendment and to the Young amendment, and also any amendments to the Barnes amendment, and the Boland to the Mica amendment, and all pending amendments, cease at 2:30, with the time to be evenly divided.

Mr. HYDE. Mr. Chairman, reserving the right to object, does the gentleman mean the Young amendment and all amendments thereto?

Mr. BOLAND. Yes; the gentleman states it precisely.

Mr. HYDE. Mr. Chairman, I thank the gentleman, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. WEISS. Mr. Chairman, I object.

The CHAIRMAN. Does the Chair understand that the gentleman objects?

Mr. WEISS. Mr. Chairman, let me reserve the right to object.

Reserving the right to object, Mr. Chairman, the original request, as I understood it, was to have a time limit on everything except Young. I would have no problem with that, but Young has a portion which has not even been addressed yet in the course of debate. There will be amendments which will be pending to that, so if we in fact dispose of that by 2:30, we will be foreclosing all amendments to the first part of it. So it seems to me that Young should not be included in this.

That is my reservation, Mr. Chairman.

The CHAIRMAN. Does the gentleman object?

Mr. SOLARZ. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am pleased to yield to the gentleman from New York.

Mr. SOLARZ. Mr. Chairman, would it satisfactorily address the concerns of the gentleman and the concerns of the Members on the other side if the unanimous-consent request to limit debate would apply to all pending amendments? It would apply, in other words, to the pending amendments, which leaves the gentleman free to offer subsequent amendments to Young after the pending amendments are resolved. So the gentleman's right to amend those provisions of the Young amendment which he finds objectionable would be preserved.

Mr. WEISS. Mr. Chairman, with that explanation or that understanding, I have no objection.

The CHAIRMAN. Will the gentleman from Massachusetts (Mr. BOLAND) restate his request?

Mr. BOLAND. Mr. Chairman, as I understand it now, we have agreed to limit debate to 2:30 on all pending amendments, designed to be equally divided on both sides.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. The gentleman from Massachusetts (Mr. BOLAND) will be recognized for 30 minutes, and the gentleman from Michigan (Mr. BROOMFIELD) will be recognized for 30 minutes.

PARLIAMENTARY INQUIRY

Mr. SOLARZ. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. SOLARZ. Mr. Chairman, I assume that the unanimous-consent request which was just approved also included the unanimous consent request I had offered amending the Boland amendment to the Mica substitute?

The CHAIRMAN. The Chair would state to the gentleman from New York that it did not include the gentleman's request. Is there objection to the request of the gentleman from New York (Mr. SOLARZ) to modify the amendment?

There was no objection.

□ 1330

PARLIAMENTARY INQUIRY

Mr. SMITH of Flordia. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. SMITH of Florida. Mr. Chairman, does the Chair intend the motion made by the gentleman from Massa-

chusetts (Mr. BOLAND) and now accepted and consented to, to include the Mica substitute, which would not be included under the pending amendments provision?

The CHAIRMAN. The gentleman is correct, the Mica substitute is a pending amendment.

Mr. BOLAND. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. MRAZEK).

Mr. MRAZEK. Mr. Chairman, I thank the gentleman from Massachusetts for giving me 3 minutes.

I was listening with mounting interest a little earlier when the gentleman from Texas was talking about our policy in Vietnam and how he described our efforts in Vietnam as halfhearted and how this contributed to the failure of our policy in Vietnam.

Well, we all know how gallantly the gentleman from Texas fought for this country during those years and how so many other Americans fought to stay on campuses in this country or went to Canada. Some of us enlisted in the service during those years because we accepted what our national leaders told us we were fighting for.

Some of us saw some bad things in the service, and I am sure the gentleman from Texas saw some bad things on his campus. But I can remember an August day in 1964 when we Americans watched on television as the President of the United States described an unprovoked attack against our destroyers, the *Mattox* and the *Turner Joy*, by North Vietnamese gunboats near Hainan Island. It was not until many years later that we found out there was no such unprovoked attack.

Now in the debate we have heard in the last couple days, it is fair to say there is room for honest disagreement, and I can only say that it is not easy to make foreign policy decisions on behalf of this Nation in the face of Soviet and Cuban aggression; but one thing we do not need as we listen in this debate is to hear from another crop of armchair warriors.

Mr. McCAIN. Mr. Chairman, will the gentleman yield?

Mr. MRAZEK. Yes; I will yield to the distinguished gentleman from Arizona.

Mr. McCAIN. I hope the gentleman is not referring to some of us who were there as armchair warriors.

Mr. MRAZEK. I am not referring to the distinguished gentleman from Arizona. I only referred to the gentleman from Texas.

Mr. McCAIN. Well, since the gentleman from Texas and I, if the gentleman will yield further, are in total agreement, then I think the gentleman should direct his remarks at those of us who served there also.

Mr. MRAZEK. Well, the gentleman has every right to speak.

Mr. McCAIN. I will be glad to respond. Our involvement in Vietnam was exactly only more particularly described as the gentleman from Texas did and there is an exact parallel between what is happening now and what happened there.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BOLAND. Mr. Chairman, I yield 1 additional minute to the gentleman from New York.

Mr. McCAIN. Mr. Chairman, will the gentleman yield further?

Mr. MRAZEK. No, I will not yield further at this time to the gentleman from Arizona (Mr. McCAIN). I would simply like to say that we are in a very similar position to the one we were in back in those early 1960's. A lot of us at that time took at face value what our national leaders told us were the reasons for their foreign policy decisions in this country.

I think the chairman of the Intelligence Committee has pointed out very, very effectively, that we are heading down a similar road.

The President of the United States has acted illegally in contradiction to a law, the Boland amendment, passed by this House last December.

The more troops we send down to Central and South America, the better the chances that some night the same thing will happen to American soldiers that happens every night to four or five Camposinos who are taken out in the jungle and tortured.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. BOLAND. Mr. Chairman, I yield 1 additional minute to the gentleman.

Mr. MRAZEK. All it is going to take, Mr. Chairman, are a few of our troops or advisers to be taken out some night in the jungle where they will have hand grenades strapped on to their arms, as was the case with a journalist from New Jersey who made the mistake of going down to El Salvador, and when that happens, the rage of the American people is going to be uncontrollable.

We are literally playing with dynamite when it comes to the lives of another generation of young Americans.

I would only ask that this Congress act as responsibly as I am confident we will act today.

Mr. BROOMFIELD. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Chairman, this is my first time to take the well on the resolution, although I am a member of the Western Hemisphere subcommittee.

We are talking about a very serious matter, of course. I think there is perhaps a more important matter that ought to be discussed at least briefly; that is, the failure of the Intelligence Committee. It concerns me greatly that the process has become so politicized that we have straight line partisan votes coming from that committee. It places this body in great jeopardy and all of us not serving on the Select Committee on Intelligence. If that body does not have credibility, where are we Members to turn?

I might also say as a former counterintelligence officer concerned with security matters that I am very concerned by the way classified information is handled by Congress. Perhaps I come to this task with a little different orientation, coming out of the only nonpartisan legislature in the country. Perhaps I still believe that the civics book discussion about foreign policy is correct, that we should at least aim for bipartisanship in our foreign policy.

Now, let us take a look at the Boland-Zablocki bill that was presented to us. In section 802, the dollar amounts in that are as phony as a three-dollar bill. Furthermore, the totally inadequate $80 million over a 2-year period creates great danger for the surrounding nations of Honduras and Costa Rica and it certainly places larger requirements upon this country in terms of our own military personnel.

I think it is very counterproductive and unfair for a member of the Intelligence Committee to come up here and look at the minority side of the aisle and say, "Your covert aid programs are counterproductive and not working."

I too happen to think that covert aid is probably counterproductive, but those activities were approved about 19 months ago by the Intelligence Committee of which he is a member. Those operations were approved as suggested by the Intelligence Committee.

Now the question is, What should replace covert operations? Well, I am suggesting to you that if you put aside your partisanship, you have already been presented with an alternative that is a reasonable step, and it is the Mica amendment.

□ 1340

That amendment would bring results. It places verification in the hands of the OAS or the President of the United States.

I think those of you who might be concerned about the latter realize that you would not have that concern as long as the Organization of American States is involved, and they ought to be. The OAS ought to be strengthened. That is one of its purposes.

Verification is placed in that respect.

I think the majority of the Members in this body are willing to accept a situation where we say to Nicaragua we are no longer going to try to influence

what happens inside of your country. In turn, we expect the same kind of reaction from you and we expect it to be demonstrated. We expect you to keep yourself out of Costa Rica, out of El Salvador, and out of all the countries of Central America and the Caribbean.

That is a reasonable expectation. That is what the Mica amendment now does.

I think we ought to move to the Mica amendment. We should quit trying to be cute about it and come up with a variety of reasons why we are not voting on this issue. Now is the time to take that action. That country is watching to see if we are going to approach this in some kind of an even-handed fashion and set-aside partisanship.

This body has not conducted itself very well; it has been far too partisan on this matter. I think we are particularly crippled when we have had the kind of partisan demonstration from the Intelligence Committee and the House.

If we cannot receive unbiased information, where are we going to get it?

PARLIAMENTARY INQUIRY

Mr. BROOMFIELD. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. BROOMFIELD. Mr. Chairman, I wonder if you could take a moment to outline to the Members the procedure that we will be following after the termination of our debate in this particular segment.

The CHAIRMAN. The Chair would like to advise the gentleman from Michigan (Mr. BROOMFIELD) that following the vote on the Barnes amendment, amendments would still be in order at that time, that is perfecting amendments to the Young amendment.

If no amendments were offered at that time, the sequence would then be a vote next on the Boland amendment; then, following that, a vote on the Mica substitute; following that, a vote on the Young amendment as or as not amended.

That would be the procedure we would follow.

Mr. COLEMAN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Missouri.

Mr. COLEMAN of Missouri. Does that mean one would be precluded from offering an amendment to the Mica amendment if the Boland amendment does not pass?

The CHAIRMAN. The Chair would advise the gentleman that would not be the situation.

Mr. COLEMAN of Missouri. I thank the gentleman.

Mr. BROOMFIELD. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. ZSCHAU).

Mr. ZSCHAU. Mr. Chairman, I would like to compliment my friend, the gentleman from Florida (Mr. MICA) for offering his amendment in the form of a substitute. I would also like to thank him, not only for me, but for many others in this body because I think his amendment gets many of us off the horns of a difficult dilemma.

All of us agree there is a problem in Nicaragua. Nicaragua's support for the insurgents in El Salvador is destabilizing to that country. The question is: What do we do about it?

Like many of my colleagues, I am troubled by our covert operations. Like many of my colleagues, I am even more troubled by the proposed $80 million overt interdiction program that is in H.R. 2760.

I have come to the conclusion that there must be a better way. Why is it that we always pursue military solutions only? Why do we not consider more seriously diplomatic approaches?

What we need is new thinking. We need new approaches to these vexing problems. What we need is a new plan, a new plan that is based on the whole range of alternatives. That is precisely what is mandated by the Mica substitute.

The Mica substitute requires the President to explore a whole range of alternatives—bilateral and multilateral negotiations, the involvement of the OAS or the United Nations, and whatever might be effective in ceasing the activities of Nicaragua in the destabilization of El Salvador.

In addition to insisting on a new approach, the Mica amendment also defines the criteria for success—our objectives. I am one of many who have been frustrated by the fact that we lack clarity in our objectives in Central America and for our actions in Nicaragua. Those objectives are clearly defined in the Mica amendment. There are two.

First, we are seeking a cessation of those activities by Nicaragua in support of the insurgents in El Salvador. Second, we want Nicaragua to begin taking steps to implement those commitments that the Sandinistas made to the Organization of American States. Those are the two objectives that the new plan would be designed to achieve.

Because it both clarifies our objectives and because it mandates a new plan for achieving them, I strongly support the Mica amendment.

What would happen if the Mica amendment were adopted?

No. 1, after the effective date that is contained in the confidential appendix to the Intelligence Committee report, covert aid would be cut off.

In the interim, the President would be required to submit a new plan based on the whole range of diplomatic as well as military alternatives. That plan would be implemented, but only until such time as success is achieved; that is when criteria are met. Under the Mica amendment, whether or not the criteria are met would be judged by the Organization of American States or the President of the United States.

Mr. Chairman, the approach of the Mica amendment is a breath of fresh air in addressing this problem. It suggests that we should develop a new plan—a plan based on diplomacy as well as military solutions, a plan which would only be implemented until its objectives are achieved in the judgment of an outside organization, the Organization of American States.

The Mica amendment is a responsible and an effective response to a very vexing problem that we have in Central America.

I urge adoption of the Mica amendment.

Mr. BOLAND. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Chairman, as I have listened to the debate yesterday and today on the Boland-Zablocki bill, I have heard Members of the party on the other side of the aisle defend Mr. Reagan's war in Central America. I could not help but be impressed by the perception that the ghost of Somoza walks very heavily in this Chamber.

For 50 years, this Nation supported the policy in Nicaragua of supporting a corrupt dictatorship that oppressed the people of his country. Today we are paying the price for that policy and today we are trying to repeat a similar policy of militarism that would impress upon a people the will of the United States.

Last weekend, I visited the 200th anniversary of Simon Bolivar, the great liberator of Latin America, and had occasion to talk to many Latin American leaders at this celebration, men of peace, and I asked one leader in particular, Senator Tejera-Paris, who is a peace-loving man, what is your recommendation of the best action of the United States in helping to bring about peace in Central America.

His response was as follows: "Please leave us alone. Please allow the Latin Americans to resolve these problems with democratic, bipartisan political solutions. Please send your Navy back to the Atlantic. Please let Latins resolve their own problems."

I was ashamed of our policy in Central America because our allies in Central America are being united against us. Only Honduras, El Salvador, and our friend, Great Britain, support this policy.

The Latin Americans are placing the United States in the same category as the Soviet Union. The Venezuelan Congress passed a resolution while I was there which asked the Latin

people to unite to rid this hemisphere of all traces of colonialism. They are talking about us and the Soviet Union.

□ 1350

What good it would do us in this Congress to see ourselves as others see us.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BOLAND. I yield the gentleman from Arkansas 1 additional minute.

Mr. ALEXANDER. We have a tendency to be inward in this country. People in the East look to Western Europe and to the Middle East, the people in the West look to the Orient, the people in the North to Canada and those of us from the South look to Latin America as our foreign interests.

Our foreign allies in Central America are alienated by President Reagan's policy and we are losing our traditional role of leadership. The Contadora countries are saying, "We cannot depend upon the United States for leadership for peace. We have to seize the initiative ourselves."

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman.

Mr. HYDE. I thank the gentleman.

Will he tell me when and where the Contadora group said what he just said they said?

Mr. ALEXANDER. They said it over and over and over at Cancun.

Mr. HYDE. Where do I find that?

Mr. ALEXANDER. I will present you a resolution, I will make it part of the RECORD. I will make a part of this RECORD the resolution of the Congress of Venezuela, the Bolivarian manifesto.

(Text of "declaration of Cancun concerning peace in Central America", July 18, 1983)

In view of the worsened conflicts in Central America, the presidents of Colombia, Belisario Betancur; Mexico, Miguel de la Madrid; Panama, Ricardo de la Espriella; and Venezuela, Luis Herrera Campins, decided to meet in Cancun, Mexico, today July 17, 1983.

We analyzed the critical Central American situation and agreed on our deep concern over its quick deterioration, and the increase in violence, the progressive increase in tension, the border incidents, and the threat of a war confrontation that might become generalized. To this we must add the rash arms buildup and foreign intervention, to comprise a dramatic picture that affects the political stability of the region, which does not allow the advance and consolidation of institutions that answer to the democratic desire for liberty social justice, and economic development.

The Central American conflicts provide to the international community the alternative decidedly supporting and strengthening a political agreement, contributing with constructive solutions, or passively accepting the worsening of factors that might lead to even more dangerous armed confrontations.

The use of force as an alternative solution does not solve, but worsens the underlying tensions. Central American peace will only become a reality to the degree that the fundamental principles for coexistence between nations are respected: non-intervention, self-determination, the sovereign equality of States, cooperation for social and economic development, peaceful solution to controversies, as well as free and authentic expression of the people's will.

The creation of favorable conditions for peace in the region depends mainly on the attitude and genuine willingness to establish a dialogue by the Central American countries, who have the foremost responsibility and greatest effort in the search for agreements that assure their coexistence.

In this sense, it is necessary that the political will for understanding, already states since the early negotiations by the Contadora group, is clearly expressed again in the prosecution of peace efforts, so that they may become specific actions and pledges.

It is likewise necessary that other states with interests and links in the region contribute with their political influence to strengthen the means for an understanding and pledge themselves, without reservations, to a diplomatic option for peace.

The efforts by the contadora group have made it possible, so far, to start a dialogue with the participation of all the governments in Central America, the establishment of a mechanism for consultations, and the unanimous definition of an agenda that includes the most relevant aspects of regional problems.

These achievements, even though still insufficient, have been encouraged by support from many countries, several organizations, and the most assorted groups at international level. They all agree that the Contadora group's efforts have helped moderate the dangers and reduce the risks of a generalized confrontation. Their actions have allowed the identification of problems and causes of an scenario that today is expressed in conflicts and fear.

This generous support from the international community pledges us to persist in our endeavors and make all the necessary efforts for a cause whose noble goals more than compensate for any possible misunderstanding.

Encouraged by the broad spirit of solidarity of our countries with the brother peoples of Central America. We deem it necessary to hasten the processes that interpret the will for peace into proposals that, only developed, may efficiently contribute to the solution of these conflicts.

In this concern, we have agreed on the general guidelines of a program that will be proposed to the Central American countries, which represents strict compliance with the essential principles that underlie international relations and comprises: approval of political agreements and pledges that lead to effective control of the rash arms buildup in the region; the withdrawal of foreign advisors; the creation of demilitarized zones; a ban on the use the territory of any state to carry out political and military destabilization actions against other states; the eradication of trafficking and transfer of weapons; and a ban on other forms of aggression or interference in the internal affairs of any country in the area.

In order to render this general program effective, we need to reach agreements establishing political commitments aimed at guaranteeing regional peace. These agreements could cover:

The commitment to put an end to all existing warlike situations.

The commitment for a top-level freeze on existing offensive weapons.

The commitment for a start on talks on agreements to control and reduce the present inventory of armament, with adequate supervisory mechanisms.

The commitment to prohibit the existence of foreign military installations in their territories.

The commitment to give previous notice of troop movements near the border, whenever these contingents are in excess of the number stated in the agreement.

The commitment to carry out, as needed, joint border patrols or international supervision of borders, by observers chosen by common agreement by the interested parties.

The commitment to form joint security commissions in order to prevent, and if necessary to settle border incidents.

The commitment to establish internal control mechanisms to prevent the supplying of arms from the territory of any country in the area to another country.

The commitment to promote a climate of detente and trust in the area, avoiding declarations which might endanger the indispensable climate of political confidence required.

The commitment to coordinate systems of direct communications among the governments, in order to prevent armed conflicts and to generate an atmosphere of reciprocal political trust.

We also believe, that, simultaneously with the carrying out of this general program, the task of settling specific differences among countries should start with the signing of memoranda of understanding and the creation of mixed commissions that will allow the parties to develop joint actions and guarantee the effective control of their territories, especially along border areas.

These measures, aimed at eliminating the factors that disturb regional peace, should be accompanied by a great effort to strengthen democratic institutions and guarantee the observance of human rights.

To this end, we must perfect the methods of popular consultation, guarantee free access of the different currents of opinion to the electoral process, and promote the full participation of citizens in their country's political life.

The strengthening of democratic political institutions is closely tied to the evolution and progress made in the matter of economic development and social justice. We are therefore dealing with two dimensions of the same process, which is ultimately aimed at the achievements of man's basic values.

Within this viewpoint, economic backwardness must be curbed, because it is the root of regional instability and is the main cause of many of the area's conflicts.

The strengthening of integrational mechanisms, an increase in inter-zone trade, and use of the possibilities of industrial complementation, are among the most urgent actions needed to neutralize the effects of the world economic crisis.

Local efforts, however, must be complemented with help from the international community, especially the industrialized countries, through development credits, cooperation programs, and the access of Central American products to their markets.

The governments of the Contadora group countries reiterate their determination to continue with the cooperation programs in favor of the sub-region; and to offer their help to channel international support toward these economic reactivation programs.

Within these general guidelines, we have entrusted to our foreign ministers the drafting of specific proposals to be presented for the perusal of the Central American countries at the next foreign ministers meeting.

We call on all the members of the international community, especially those who have expressed sympathy with the efforts being carried out by the Contadora group, as well as on UN Secretary General and President of the OAS Permanent Council, to contribute their experience and diplomatic ability to help in the peaceful solution of Central American problems.

For all these reasons, we have called on all the rulers of the American continent in the quest of the solidarity that we need.

The Chiefs of State of Colombia, Mexico, Panama, and Venezuela reaffirm the aims which have united our governments in this task of building the just and lasting peace cherished by the peoples of Central America.

Dated: Cancun, Mexico, 17 July 1983.

Signed: Belisario Betancur, President of Colombia; Miguel de la Madrid, President of Mexico; Ricardo de la Espriella, President of Panama; Luis Herrera Campins, President of Venezuela.

Mr. HYDE. The Contadora group, the gentleman said.

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Wisconsin (Mr. ROTH).

Mr. ROTH. I thank the gentleman for yielding.

Mr. Chairman, we have heard many analogies here in the last couple of days in this debate about Vietnam.

I would like to have you, if you are really concerned about that point, have you join me in opposing the Boland and Zablocki amendment. I think adoption of this amendment unamended would lead to another Vietnam. If we elect to accept covert aid rather than overt aid we are going to be setting countries like Honduras and Costa Rica, against Nicaragua. Costa Rica has no armed force right now. Honduras does not have a force that can stand up to Nicaragua's 75,000 troops. But what concerns me even more is that even if the Boland-Zablocki amendment were followed, that if we go the overt route that we are, possibly going to involve U.S. troops.

We do not have any fighting U.S. troops in Central America now. However, if we switch to covert aid then U.S. troops would likely be involved. To quote the committee:

The committee expects that much of the assistance particularly training, technical assistance or advice provided under the authority of this section, could involve the use of U.S. military personnel.

And it goes on to say that with regard to restrictions to the number of U.S. military advisers, that this restriction would have to be considered and the efficacy of this program, as set forth in Boland-Zablocki, would not be viable if we did not allow U.S. troops to be involved. Acordingly, any such restriction should be reviewed by the Committee on Foreign Affairs with this in mind. Now is this the route we want to take? Do we want to go the route of another Vietnam? I do not think so. That is why I think the President is right in this particular program. There are many analogies to a Vietnam if we chose the Boland-Zablocki alternative. But if we side with continued covert aid, i.e. the alternative that we have today I think we can eliminate that possibility.

So, for that particular reason I think it is important that we oppose the Boland-Zablocki amendment.

Mr. BOLAND. Mr. Chairman, I yield 3 minutes to the gentleman from Maryland (Mr. BARNES).

Mr. BARNES. Mr. Chairman, my colleagues in the committee. This past week the President of the United States sent a letter to the Presidents of the four so-called Contadora countries, Panama, Colombia, Mexico, and Venezuela. It is an excellent letter, a very positive letter, a positive initiative by President Reagan.

I would like to read just a couple of sentences from the President's letter which are extremely relevant to the discussion we are engaged in this afternoon.

President Reagan said to his fellow Presidents in the hemisphere:

There must be respect for the principle of nonintervention, including a ban on support for subversive elements that seek to destabilize other countries.

That is a quote, not from Mr. BOLAND, the chairman of the Intelligence Committee who has brought such a ban before the House today, but a quote from President Reagan. President Reagan goes on to say in his letter:

The Charter of the Organization of American States makes clear that it should be the purpose of the OAS to either prevent unjust acts committed by one state against another or to provide for common action on the part of members in the event of difficulties.

President Reagan said:

I believe the OAS, as this hemisphere's regional forum, is the appropriate mechanism to make sure that those who make commitments comply with them.

President Reagan did not say in his letter to the four Presidents that the appropriate mechanism is for one country to invade another in order to get them to keep their commitments. He said the appropriate mechanism is to go to the Organization of American States. That is not what the United States has done; as everybody in this room knows, as everybody in the world knows, what the United States decided to do was to unilaterally hire 10,000, 12,000 maybe in the future 20,000, 50,000, we do not know how many people, to invade Nicaragua, not to use the OAS as he said.

I would like to briefly address those who have some self-doubt about this policy. I know there are some committed solidly on both sides, but those wondering what we should do, what is the right thing to do, I ask you to act on the side of restraint.

We are financing a war. There are 10,000, 12,000 guerrillas engaged in fighting right now on behalf of the United States in Nicaragua.

It is a war. If you have any doubt as to whether or not this is the right policy, act on the side of restraint, show some caution, and you will not be acting just because a lot of left-leaning liberals have said this is the way to do it, you will be getting support in your view of restraint and caution from some of the most responsible former leaders of our Nation. I urge you to take a look at the statement put out by former Secretary of Defense Robert McNamara, three former Secretaries of State, Secretary Muskie, Secretary Rusk, Secretary Vance, and former Special Assistant to the President of the United States for National Security Affairs, McGeorge Bundy, who urged the passage of the Boland-Zablocki amendment and the amendments we have before us this afternoon.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, I rise in strong support of the Mica amendment and I also rise in strong opposition to the Solarz-Boland substitute.

The Mica amendment is a realistic amendment. If the Nicaraguans, as the gentleman from Georgia (Mr. FOWLER) has indicated, are really interested in negotiations, are really interested in stopping their intervention in El Salvador, the Mica amendment certainly will give them an opportunity to prove it; not just by words but by action. And if they desist, we, too, will desist.

But the Solarz-Boland-Fowler amendment is just a legalistic gimmick without any appreciation of what goes on in a real military situation.

We are asked to be the first ones to exercise unilateral restraint. Well, we had unilateral restraint in the Carter administration when we gave up the B-1, when we gave up the neutron bomb. But it did not stop that relentless military buildup by the Soviet Union. Unilateral restraint, with an endless series of bombing halts did not produce any results for us in Vietnam. Instead it increased the losses of our men because of that off-and-on procedure.

It was George Santayana who said those who are unable to profit from the mistakes of the past, are going to be condemned to repeat them.

I do hope we will not repeat those mistakes now in dealing with the Soviet and the Cuban threat that we are facing in the Caribbean. And let us make no mistake about who started

this illegal aggression in the first place. It was not the United States; it was the Soviets and their surrogates in the Caribbean: Cuba and Nicaragua.

□ 1400

Mr. BOLAND. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. McHUGH).

Mr. McHUGH. Mr. Chairman, in judging the pending amendments and any other amendments that may be offered later, I think it is terribly important to keep in mind the fundamental question before this House.

The fundamental question is whether the House of Representatives is prepared to terminate an activity which is illegal under U.S. law or, in the alternative, whether the House of Representatives is prepared to condone an activity which is illegal under U.S. law.

We can stipulate in this argument to a number of facts. First, that in December of last year we enacted a law, the Boland amendment, which precludes the use of U.S. funds for the purpose of overthrowing the government of Nicaragua.

Second, we can stipulate that U.S. funds are now being used to support counterrevolutionary activities in Nicaragua.

The administration and some others in the House have argued that the activities of the counterrevolutionaries are not for the purpose of overthrowing the Government, but rather for the purpose of interdicting arms going into El Salvador or perhaps for the purpose of putting some pressure on the Nicaraguan Government. On this basis, they then conclude that the administration is doing nothing illegal.

The facts are clearly to the contrary. The facts establish that the purpose of the counterrevolutionary activities is to overthrow the Sandinista government. The counterrevolutionaries say so themselves and commonsense dictates the same conclusion. For the most part the counterrevolutionaries are former Somozistas; some are Miskito Indians. Their grievance is against the Sandinista government. They are not risking their lives to stop a flow of arms into El Salvador or to put a bit of pressure on the Sandinistas. They are risking their lives, as they themselves admit, to secure a fundamental change in Nicaragua, to secure political power.

Accordingly, Mr. Chairman, I believe that if we are serious about the rule of law, if we are concerned that this administration act within the law, we have no alternative but to vote for the resolution before us and to reject any amendments which would condone the illegal activity which the Reagan administration is now engaged in.

For these reasons, Mr. Chairman, I urge my colleagues to support the Boland and the Barnes amendments both of which would stop the illegal activity. The Mica amendment and the Young amendment should be rejected on the ground that they would permit the illegal activity to continue.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, I rise because I am distressed by what I think is a wrong picture or message being conveyed to our fellow citizens.

I have heard words that add up to the theme that a powerful United States of America is attacking a defenseless Nicaragua, in fact, waging war against Nicaragua, and that is a wrong impression. It is not true.

The other wrong impression conveyed by those words is that we as Americans are ashamed that the United States of America is powerful, that perhaps we might wish to see it reduced to impotence so that we could experience the misery of slavery under the Soviet Union from Moscow through Havana, Cuba, through Managua, Nicaragua. America doesn't want this.

The other point that I would like to make is that the Contadora group is being mentioned frequently here and I will tell my colleagues that the citizens of El Salvador and that the Government of El Salvador do not wish for the Contadora group's decisions to be imposed upon them, a decision for unilaterial withdrawal of U.S. aid from Honduras and El Salvador. A decision which would permit that we can give them sympathy, but no aid. El Salvador and Honduras do need our aid. Not troops, not men and arms, but aid. Aid that they survive. Aid that we survive. Aid that America may survive.

Mr. BOLAND. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, if Ronald Reagan is listening I would expect that he would turn to his staff and say, "That Boland amendment sounds pretty good to me."

And I am surprised that Members on the minority side of the aisle have not caught the drift of the Boland amendment. What in essence Boland, as explained by my dear friend from New York, does is to go against, to undercut, the original Zablocki-Boland amendment which said that covert activities are illegal; instead it says that covert activities will be illegal for 30 days. But if Ronald Reagan comes along and gives us a report which spells out why covert aid ought to be continued and if the two Houses, which in that kind of situation would be expected to go along with him, then all of a sudden this illegal covert action which we say, in Boland-Zablocki itself in the absence of a state of declared war is in fact in violation of the Charter of the United Nations, the Charter of the OAS, the Rio Treaty, it becomes transformed into something legal.

I would hope that we would not be adopting another Gulf of Tonkin resolution. I urge that we vote down the Boland-Solarz amendment, that we vote down the Mica amendment, that we adopt the Barnes amendment and adopt Boland-Zablocki as it came out of the Intelligence and Foreign Affairs Committees.

I can assure my colleagues that many of us who voted for Boland-Zablocki in the form in which it came out of committee would not have voted for it if it incorporated Boland-Solarz as it will if this is adopted.

I think that this is indeed an historical time. The then Members of Congress when they voted for the Gulf of Tonkin resolution had no idea of the repercussions of what they were doing. We have no idea either, but I am forewarning the Members that in fact we are sending a message that covert action is OK so long as Ronald Reagan and the Congress say it is OK. I think it would be a terrible mistake.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from Washington (Mr. CHANDLER).

Mr. CHANDLER. Mr. Chairman, the historic secret debate on the question of covert aid to rebels in Nicaragua last week, raised a number of questions in my mind about our policy in Central America.

One question was, Do we have a right to interfere in the internal affairs of another country? Are we guilty of doing in Nicaragua what we accuse the Nicaraguans, the Cubans, and the Soviets of doing in El Salvador?

And then I had to ask myself, after I had heard that debate, what is the aim of our current policy? What is it we are trying to accomplish? Are we trying to interdict the flow of arms into El Salvador? Are we trying to overthrow the government in Managua?

If those are indeed our aims, it became clear in that debate that neither is succeeding. And if we were, in fact, successful in overthrowing the Nicaraguan Government, I became convinced that we would not bring peace to the region, and in fact what we are doing may well be creating more, rather than less, popular support for the Sandinistas.

But it is not just that simple, it is not just our policy that is at play here. We know that the Sandinistas in Nicaragua are creating a haven for the guerrillas operating in El Salvador. We know that it is a conduit for Cuban and Soviet support for the revolution that is going on there. For that reason, it is clearly too extreme to cut off the aid as would be the case with the Boland-Zablocki amendment.

I stand here today to support the Mica amendment, as my good friend and colleague, the gentleman from

California (Mr. ZSCHAU) described it earlier, as a midground, an acceptable way to find our way to a new policy, one that will answer the kinds of questions that I have raised here satisfactorily.

I urge my colleagues to pursue a middle course. Do not put blinders on to the reality of Nicaraguan, Cuban, and Soviet interference in the internal affairs of Central American countries. At the same time, let us not kid ourselves that U.S. armed surrogates will ever bring about peace in that troubled region. Let us provide the Nicaraguans an incentive to act and act now for peace in Central America.

Mr. BOLAND. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. SOLARZ).

Mr. SOLARZ. Mr. Chairman, I would like to concentrate on the difference between the Mica substitute and the Boland amendment.

The fundamental difference is that under the Mica substitute our paramilitary operations against Nicaragua would continue unless and until the Nicaraguans cease their efforts to destabilize El Salvador or other countries in Central America.

Under the terms of the Boland amendment to the Mica substitute, however, the original prohibitions contained in the Zablocki-Boland legislation would remain intact. Our paramilitary operations against Nicaragua would be terminated and they could only be resumed if the President submitted a report to the Congress that the Nicaraguans were continuing their efforts to destabilize the region and if the Congress of the United States adopted a joint resolution providing for the resumption of that paramilitary assistance to groups acting against Nicaragua.

□ 1410

I say to my good friend from New York (Mr. WEISS) that the very last thing the Boland amendment to the MICA substitute is, is another Gulf of Tonkin resolution. If the Boland amendment is adopted, our paramilitary assistance against Nicaragua is terminated. Of course, if the Congress subsequently adopted a joint resolution approving the resumption of paramilitary assistance, it would be resumed. But the answer to that is, even without the Boland amendment to the Mica substitute, if the Boland-Zablocki bill, as originally reported out of committee, was adopted and we flatly terminated our paramilitary operations against Nicaragua, the Congress would be free the very next day to adopt legislation providing for a resumption of aid.

So this is no Gulf of Tonkin resolution. This is a way to bring to an end our operations against Nicaragua but to give the Congress the right to decide what to do in the future.

Mr. BROOMFIELD. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Chairman, those of us in the House today are going to make a very major decision and one that, if it goes through the entire legislative process and becomes a part of our law, is going to be with us and with our friends in Central America for a long, long time.

If the Castro-Sandinista movement that is underway in Central America is allowed to continue, and if Central America comes under this Castro-Sandinista jurisdiction, influence and control, we have serious problems, and years from now we are going to be sitting around wishing that we had done something different. Much as we do today, wishing we had done something different when Fidel Castro was just a blip on the TV screen many years ago.

The Sandinistas in connection with their Castro friends are Marxists, they are Leninists, they are Communists. And this is their revolution. And make no mistake about it. In fact, they have said that to some of us very personally, that that is the type of revolution they have and that it goes beyond any borders. It is not limited to their own country.

They have direct association with the PLO, they are receiving considerable support from Libya, they have supported terrorist-type raids into friendly Honduras, their neighbor. We know exactly what they are doing in El Salvador in supporting that insurgency. The headquarters, the command and control headquarters for the Salvadoran insurgency, make no mistake about it, it in Nicaragua. The Sandinistas know about it and they know where it is.

The Sandinistas have practiced a policy of near genocide to the Miskito Indians, who are Nicaraguans. Their treatment of the Jewish community cannot be excused. Those few Jews who were able to stay in Nicaragua have been expelled. Others who were expelled have had their property confiscated. They have been thrown out of the country with nothing.

Many of the original Sandinista leaders who were involved in the original revolution are no longer part of the junta. They have either left or they have been thrown out by the Marxist group of the junta. In fact, many of those original Sandinista leaders are now the leaders of the activity against the Sandinistas in Nicaragua because they reneged on the promises of freedom, of free elections, of free speech, of free press, of free religion, and so on and so forth.

H.R. 2760 allows the Sandinistas to roam freely because it stops any covert activity that we might be involved with in Nicaragua.

The amendment offered by the gentleman from Florida (Mr. YOUNG) and the substitute to that amendment offered by the gentleman from Florida (Mr. MICA) are good amendments, and I strongly support either or both, because they make us all play by the same rules. They suggest that whatever rules are going to apply to us by this Congress should also apply to the Sandinista. And what is wrong with all of the players playing by the same rules?

The amendment offered by my friend, the gentleman from Maryland (Mr. BARNES), takes the heart out of the Young amendment. It no longer makes it a mutual rule. What it does, in very nice language, it says that the Sandinistas ought to be good, but it does nothing to make them be good. It does nothing to support any effort or any of our friends in the region to help convince the Sandinistas that we ought to talk about our problems and we ought to solve them.

My friends, we are going to make that major decision today, and I really think if you search your heart and if you search your soul and if you search your conscience, you are going to find it difficult to vote for the Barnes amendment to gut the Young amendment. I think you can conscientiously vote for the Mica substitute or you can conscientiously vote for the original Young amendment because all it does is establish fair play, establish that we are going to abide by the same rules. And I see nothing wrong with that. I do not want a communistic or a Marxist or a Leninist Central America under the control of Fidel Castro today and turned over to Ortega or Ramirez, or someone like that, tomorrow when Castro eventually fades away from the picture.

Mr. PRITCHARD. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Washington.

Mr. PRITCHARD. I thank the gentleman for yielding.

Mr. Chairman, I am one on this side of the aisle who has some serious problems about the covert approach in Central America. I have looked carefully at the different amendments that have been brought up, and I do not dispute the meaning or the effort of the Boland-Solarz approach on this, attempting to get some kind of middle ground here, but I just do not think it is practical. I think the Mica approach does give us middle ground and is effective, and I hope we follow it.

The CHAIRMAN. The Chair will state that the gentleman from Massachusetts (Mr. BOLAND) has 10 minutes remaining, and the gentleman from Michigan (Mr. BROOMFIELD) has 7 minutes remaining.

Mr. BOLAND. Mr. Chairman, I yield 30 seconds to the gentleman from Florida (Mr. MICA).

Mr. MICA. Mr. Chairman, I would just like to conclude with my 30 seconds by saying that I would like to see the Barnes amendment defeated, the Solarz-Boland amendment defeated, the Mica amendment approved, and the Wright amendment after that approved. I recognize none of these people support my amendment. But that is what this author of this legislation would like to see done. I would appreciate your support on the Mica amendment.

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. I thank the gentleman for yielding.

Mr. Chairman, since we are going to be voting first on the Barnes amendment, I think it useful to focus on the Barnes amendment, because the Barnes amendment really poses the fundamental question of U.S. foreign policy in the 1980's. It poses that question squarely between radicals who favor unilateral disarmament and the rest of us.

We have heard a lot of rhetoric, but let us look at the words, the precise words, of this amendment. It says that we would substitute a negotiated agreement involving Nicaragua where they had to agree to quit trying to fight and destroy their neighbors, it would substitute for it the sense of Congress that the Government of Nicaragua should enter into an agreement.

Now, let me suggest that the gentleman from Washington (Mr. PRITCHARD) was exactly right in focusing on practicality. If we are serious about bringing peace to Central America, if we are serious about stopping the Soviet KGB, the Cuban Communists and their Nicaraguan allies from subverting a neighbor, then we have to stop this effort in the Barnes amendment for preemptive self-disarmament by the United States. We have to stop this effort in the Barnes amendment for self-imposed impotence which would strip our diplomats of any effect.

Can you imagine negotiating and saying, "By the way, it is the sense of Congress that you should quit doing what 9,000 Soviet advisers are encouraging"?

Imagine that today, tonight, in Castro's Cuba, in Nicaragua, in Moscow, that the people who have planned the guerrilla war in El Salvador sit and watch C-span and they watch today's results. If those Cuban Communists and Soviet advisers see this Congress tie up the United States in impotence, if they see us unilaterally disarm—and the Barnes amendment is in effect a vote to unilaterally disarm—then they will say to the Nicaraguan dictatorship, "Go full-steam ahead, the United States is helpless, the Congress has once again gutted the American Nation's ability to do anything."

□ 1420

But if we vote "no" on Barnes, if we defeat Barnes, then we send a signal to every Communist agent, we send a signal to every Nicaraguan dictator. We say clearly, "You have to negotiate. You have to come to the table. You have to deal with the American Nation, which is capable of moving decisively, and which is capable of protecting its friends and neighbors."

Franklin Delano Roosevelt created the Good Neighbor Policy. He did not say. "Why do we not send a message to Adolph Hitler and tell him it is the sense of Congress." We did not say, "Let us react to Pearl Harbor by sending a note saying it is the sense of Congress."

This is a clear, decisive step on the radical part of this Congress to say, "Let us unilaterally disarm."

Mr. BOLAND. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. BONIOR).

Mr. BONIOR of Michigan. I thank the gentleman for yielding me this time.

Mr. Chairman, the central question that we face here today is whether or not this country is a country of laws or is not a country of laws.

Since coming into office, from the very early days, this administration has failed to adhere to international obligations and to domestic statutes. I refer specifically to the early days of the administration when they blindly turned their heads to the activities that were going on in camps in Florida and California, camps that were supporting the revolutions that we are now having to debate on this floor.

I testified before Mr. BARNES' committee early in 1981, after having visited these areas, and it was clear to me then and it is clear to me now that this administration failed to take into account the laws of this country prohibiting any support for expeditions against foreign nations, a clear violation of U.S. law, prohibiting conspiracy to injure the property of a foreign nation, prohibiting the export of war materials and, of course, violating our own Neutrality Act, which is clearly as old as the Nation itself.

That was the first phase. The second phase was in this Congress during the last lame duck session when we unanimously adopted in this body the Boland amendment.

Now we are at a third stage, whether we will continue to ignore the laws of this country and the international laws under which we have hopefully and will hopefully operate under in the coming years.

I urge you to vote for the Boland amendment. I urge you to reject those amendments which seek to move us away from law.

Mr. BROOMFIELD. Mr. Chairman, may I inquire of the chairman of the Intelligence Committee how many speakers he has left? We have just one.

Mr. BOLAND. We have one speaker left.

Mr. BROOMFIELD. Mr. Speaker, I yield the balance of my time to the gentleman from Illinois (Mr. HYDE).

Mr. HUNTER. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

Mr. Chairman, I would like to simply say that several colleagues have argued to the effect that somehow the Contadoras are going to restrain the Nicaraguans. I think it is important for us to realize that the Contadora group is scared stiff at this point. They are going to be able to enforce no restraint on the part of the radical leaders of Nicaragua. They are in essentially the same position that Saudi Arabia is in in the Middle East. Saudi Arabia is not going to restrain the PLO because they are intimidated by the PLO. That is why they pay them money. That is why they pay them lipservice.

That is the reason the Contadora group has said nothing about Fidel Castro's excursions in Africa or any of the other aggressive actions that he has taken, and that is the reason they are not going to do anything effective that would, in fact restrain the Nicaraguans.

I think we have to realize there is one nation in this Hemisphere that can prevent a Marxist takeover in Central America. That nation is the United States.

Mr. HYDE. I thank the gentleman for his contribution.

Very briefly, we are confronted with a Barnes amendment, with a Solarz-Boland amendment, with a Mica amendment, and then a Young amendment.

The Barnes amendment is paper chase. It is no solution. It is more paralysis. It is words, words, designed to bring the Sandinistas to their knees. It informs them in no uncertain terms that it is the sense of Congress that they should reach an agreement with their neighbors to be decent members of the human family down there. It will be about as effective as a butterfly's hiccup.

The Solarz-Boland puts the cart before the horse. The Solarz-Boland says, based on a phantasy, that we are going to stop covert aid and that will induce, if not seduce, the Sandinistas to stop exporting revolution to their neighbors. But if they do not, and if we find out, we may be back if we can get a joint resolution through Congress some year.

Then we move to the Mica amendment, which is a compromise, which involves the Organization of American States in a very important function. Mica says, "We will stop when you stop." That is all. It makes some sense.

One other thing that I would like to say, I listened to Mr. ALEXANDER, a gentleman whom I admire and whose knowledge of Central America is unequaled, and he said "Let the Latins solve their own problems." Well, Cuba is a Latin power, and I would just as soon they did not have too much influence in settling the problems of Central America.

I have said before, and I say again, Cuba is the largest country in the world. Their administration is in Havana, their government is in Moscow, their army is in Africa, and their population is in Miami.

Support Mica.

Mr. BOLAND. Mr. Chairman, I yield myself such time as I may consume, and then I will yield some time to the majority leader.

The pending vote at 2:30 or a little thereafter will be on the Barnes amendment. That preserves a cutoff, of course, of the secret war, and the Young amendment does. Like the Young amendment, the Barnes amendment puts the Congress on record as opposing Nicaraguan support for the Salvadoran insurgency, and all of us agree to that.

Like the Young amendment, it emphasizes that the solution to the conflict in Central America is a negotiated solution based on the principles of the San Jose Conference and Nicaragua's pledges to the OAS in July 1979, and we all agree to that.

Mr. Chairman, I yield the remainder of my time to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Chairman, first I want to congratulate all those who have taken part in this debate, and particularly those who have taken part in the very arduous effort that has been underway to strike some semblance of a reasonable compromise.

I want to congratulate Mr. MICA, Mr. BOLAND, Mr. SOLARZ, Mr. YOUNG, Mr. BARNES, Mr. FASCELL, Mr. BROOMFIELD, Mr. MCCURDY, and all those with whom I have worked for several weeks in that yet unavailing effort to find a magic formula that will be satisfactory to everybody. I think everyone involved has acted in good faith. I think Mr. YOUNG acted in good faith. I think Mr. MICA has acted in good faith, and Mr. BARNES and Mr. SOLARZ, all of those who have participated in this search.

The difficulty is that while we all agree on certain things, we come to one unbridgeable gulf. I believe all of us who participated in this agree that what the Sandinistas are doing in attempting to subvert the government of their neighboring country is fundamentally wrong. It is a violation of the Organization of American States charter, and it is a violation of the common rules of decency among humankind. All of us want to see that come to an end.

On the other hand, I think all of us who have been involved in this are more than just a little bit nervous and apprehensive and uneasy, and frankly a bit embarrassed that our country is pretending it is not doing something when in reality we know that it is. I do not think any of us wants to engage in subterfuge or a deception, and I think all of us know that there has been some deception in this matter.

All of us want to put an end to this covert financing of an invasion of Nicaragua, and we recognize that its purpose really is to overthrow the Government of Nicaragua contrary to the provision of law approved unanimously by the House last December. Certainly that has been the purpose of those who have been the recipients of our aid. Those whom we have recruited, trained, financed, equipped, and sent into that country state unequivocally that their purpose is to overthrow the government of that country. For us to say that it is otherwise really is to evade the fact and to render ourselves subject to the censure of our friends and colleagues throughout the hemisphere who see our denial of that purpose lacking in credibility.

We want to put a stop to that U.S.-financed military intervention, and we want to put a stop to what the Sandinistas are doing. But the question always comes down to this: Who goes first? That is really what we have to resolve in these amendments: Who goes first?

Is that not the fundamental flaw in human character that has always led to war? Is that not the fundamental question that always stands in the way of peace? Every page of history is stained with the blood of common people who have died while national leaders on both sides insist that the other one go first.

Yesterday Armenians bombed and killed people in a Turkish Embassy because of sins that were committed by the Turks against Armenians before most of us were born. Who goes first in seeking peace?

□ 1430

We are not able to get the Palestinian Arabs and the Israelis to sit down and talk together because each says the other must go first in recognizing the legitimacy of the other, and we have not been able to get them both simultaneously to sit down and do it.

Who goes first? In the meantime, men go on dying, and infants crying at mothers' breasts, and blood comes instead of milk because the statesmen of the world are insisting that "no, you go first, and then we will follow suit."

What the Nicaraguans are doing is a violation of the OAS Charter, and what we are doing is a violation of the OAS Charter, let there be no doubt about it. We are signatories to article 18 of the charter that says that no state has a right to intervene, directly or indirectly, for any reason whatsoever, in the internal or external affairs of any other state.

We are in violation of the President's own suggestions in a letter he released only the night before last over his signature to the Presidents of the four countries which make up the Contadora group.

Ronald Reagan, in writing to those Presidents, said:

> Second, there must be respect for the principle of nonintervention, including a ban on support for subversive elements that seek to destabilize other countries.

How else, I ask my colleagues, could we honestly describe what we are financing at this moment?

So let us wash our hands clean, come into the court with clean hands, expunged of our own sin, and then say to the court, "require the same compliance from Nicaragua." That, it seems to me, is the rightful order of events.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland (Mr. BARNES) to the amendment offered by the gentleman from Florida (Mr. YOUNG).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. BROOMFIELD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 213, noes 214, not voting 7, as follows:

[Roll No. 279]

AYES—213

NOT VOTING—7

Chappie	Foley	Jones (TN)
Dixon	Forsythe	
Dowdy	Heftel	

□ 1440

The Clerk announced the following pair:

On this vote:

Mr. Dixon for, with Mr. Chappie against.

Messrs. McKAY, VANDER JAGT, CARNEY, JENKINS, and BOEHLERT changed their votes from "aye" to "no."

Messrs. BIAGGI, MOLLOHAN, and ANNUNZIO changed their votes from "no" to "aye."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1450

AMENDMENT OFFERED BY MR. BROOMFIELD TO THE AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. BROOMFIELD. Mr. Chairman, I offer an amendment to the amendment.

PARLIAMENTARY INQUIRY

Mr. MICA. Mr. Chairman, I have a parliamentary inquiry.

Mr. CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. MICA. Mr. Chairman, I would like a clarification on the procedure from this point.

It is my understanding that we can take one amendment, then take the Solarz-Boland, and then the Mica amendment. Is that correct?

The CHAIRMAN. The Chair would like to advise the gentleman from Florida that further amendments to the Young amendment are in order one at a time and are debatable.

The Clerk read as follows:

Amendment offered by Mr. BROOMFIELD to the amendment offered by Mr. YOUNG of Florida: After the last line of the text of the proposed amendment insert the following new section 3:

"SEC. 3. The President shall commission a study to assess the potential consequences of a failure to halt Cuban and Nicaraguan directed revolution and subversion in Central America. Such study shall include but not be limited to the issues of refugee patterns and U.S. dollar outlays which may be necessary.".

Mr. BROOMFIELD. Mr. Chairman, this is a noncontroversial amendment.

Mr. COLEMAN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I would like at this time to yield to the gentleman from Missouri (Mr. COLEMAN).

Mr. COLEMAN of Missouri. Mr. Chairman, this may be characterized as a noncontroversial amendment, but I am going to take some time, since we have 12 hours of debate, to talk about it.

We have not talked about the problems of refugees coming into the United States from Central America and it is an important topic on all of these amendments that we have before us.

We have talked about national security and security issues but I want to focus for just a minute on the social-economic issues.

□ 1500

Mr. Chairman, if Communist governments indeed come to power in Central America, we can expect to see a massive influx of refugees into the United States. If the historical experience bears this out certainly the cost in both dollars and social and economic terms would be tremendous.

In my few moments, I would like to tell a little bit of what I see the social and economic consequences to be.

Mr. BROOMFIELD. Mr. Chairman, I am finding it almost impossible to hear the gentleman. I am just a few feet away from him.

The CHAIRMAN. The gentleman's point of order is well taken. We will not proceed until we have better order.

The gentleman may proceed.

Mr. COLEMAN of Missouri. If one looks at recent refugee trends it is clear that the United States is almost invariably the preferred destination.

Furthermore, it appears that a general rule of thumb can be established regarding the percentage of a nation's population which, in the final analysis, ends up in the United States.

For example, since Cuba fell to the Communist revolutionaries over a million Cubans have come to the United States. This represents over 10 percent of the Cuban population.

If one wanted to use this as a baseline you could say 10 percent, but even if you use a conservative baseline of 8 percent it would seem a normal refugee pattern.

Because of the varying proximity of the Central American countries to the United States——

Mr. MARTIN of North Carolina. Mr. Chairman, it sounds as noisy as if there are already about 8 million refugees in this Chamber. If we could have it quiet down a little bit we might be able to hear the gentleman.

The CHAIRMAN. The Committee will be in order.

The gentleman may proceed.

Mr. COLEMAN of Missouri. If you took——

Mr. DELLUMS. Mr. Chairman, would the gentleman yield to me briefly?

Mr. COLEMAN of Missouri. Listen, I have not even had a chance to open my mouth on this amendment. We have 12 hours of debate. I am offering a little amendment.

Mr. DELLUMS. If the gentleman would not yield, I would appreciate the gentleman telling me whether he will yield or not.

The gentleman said there were 8,000 refugees here. I want to know is that a racist statement?

The CHAIRMAN. The gentleman from Michigan has the time.

Mr. MARTIN of North Carolina. He could not hear this gentleman. I said there are 8 million. There is too much noise.

Mr. DELLUMS. I wanted to ask a question: Will the gentleman yield briefly?

Mr. COLEMAN of Missouri. Give me 5 additional minutes.

Mr. DELLUMS. I ask unanimous consent the gentleman may have 6 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. COLEMAN of Missouri. Mr. Chairman, I yield for a minute.

Mr. DELLUMS. I am certainly not trying to harass the gentleman. I was sitting here trying to hear my colleague. What I asked the gentleman to yield for was my distinguished colleague on the other side of the aisle made the statement that it sounded as if there were 8,000 refugees in this room. There are black refugees, brown refugees, yellow refugees, and white refugees.

Is the gentleman suggesting that refugees by definition are rowdy human beings? And if that is the statement of the gentleman, I hope he will withdraw it.

Mr. MARTIN of North Carolina. I will not withdraw the statement that I actually stated. I did not refer to the race of any refugees, which as the gentleman from California himself acknowledged, is a desperate condition affecting all races.

If the gentleman will yield, I would be pleased to correct the gentleman. He could not hear what I was saying because it was so noisy. What I said was it sounds as noisy as if there are 8,000,000 refugees here, million. I said 8,000,000 refugees, not 8,000.

Mr. DELLUMS. That makes the point even worse. I thank my colleague.

Mr. COLEMAN of Missouri. If you take a conservative estimate of just 8 percent as the normal refugee pattern from these countries and apply it to the populations of Central America, and if you took just the Central American countries it is a potential of 2.3 million refugees. If you take into consideration the population of Mexico, a country which many analysts see as vulnerable to leftist insurgency then the numbers are even more imposing and astronomical.

In the case of Mexico, the figures may be very conservative because as you know, people are already crossing the Mexico-Texas land bridge today.

How many of them would pass through if they were fleeing communist persecution? Our present experience indicates that the Rio Grande River is hardly an imposing obstacle to determined people attempting to get into the United States. Thus, if you take a look at the figures, a number of disturbing possibilities emerge. For example, if one looks at just the country of El Salvador, with a population of 4.7 million people, if that government were to totally fall to the leftist government patterned on the Cuban model which we see developing, you could probably have 300,000 to 400,000 Salvadorans immediately trying to gain access and entry into the United States.

If you proceed one step further and look at the consequences of the region as a whole including Mexico, with a combined population of 90 million people, then the total figure becomes staggering, perhaps as high as 7 to 9 million refugees.

If you want to put this into perspective you are talking about the combined populations of 10 States in the United States. The number of refugees could potentially equal the population of Alaska, Wyoming, Vermont, Delaware, North Dakota, South Dakota, Montana, Nevada, New Hampshire and Idaho and if you take the less conservative figure you could add the States of Rhode Island and Hawaii's population in there to total 9 million people trying to gain access to the United States.

Mr. SKELTON. Will the gentleman yield.

Mr. COLEMAN of Missouri. How would we cope financially? Let me finish and I will yield to my friend.

How will our Nation cope financially with supporting 7 to 9 million potential refugees? What would the cost be? The State Department says that the average cost to support an individual refugee is $3,500 to $4,500. Some of them get on their feet financially, others do not. But the average is $3,500 to $4,500. This includes living, eating, and medical expenses and it includes revenues from State as well as Federal sources.

The possible costs are astronomical and if you take the figures of $3,500, a conservative figure, per refugee and multiply it times the conservative 8 percent normal refugee pattern, you would have a refugee price tag for the American taxpayer if the country of El Salvador fell could total a $1 billion expenditure.

And if one uses the higher estimates of 10 percent normal refugee pattern, and a $4,500 per refugee then you are talking about a potential $40 billion expenditure for all of these refugees coming into the country. The point of all this is, and I will yield when I am through here, the point of it is there are a lot of questions left unanswered, a lot of consideration we have not given to the refugee problem. And I think it goes to the heart of many of the amendments we have pending.

The Boland-Solarz amendment would encourage refugees fleeing this area. Now the only sensible amendment that would, I think, recognize the refugee issue are the various symmetry amendments, Mr. MICA and Mr. YOUNG's amendments, because they say we will not cut off this aid unless they cut off their aid and we are not going to see this massive migration pattern develop. But we need to ask ourselves as we debate the issues of Central America, are the taxpayers of the United States willing to spend $25 to $40 billion to support 7 to 9 million refugees that would be fleeing into our country? That is a question we have to concentrate on and the consequences of that have never really been discussed.

Who is to pay the bill? Can we cope with such a large influx of refugees?

I think these are issues that are serious and need to be debated and discussed as we talk about the entire Central American area.

This is not an amendment or suggestion that refugees are good or bad people or what part of the country they come from, or the color of their skin; the question is 7 to 9 million people coming into the United States as a consequence of our action or inaction dealing with this particular bill here on the floor of the House.

□ 1510

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman for yielding.

I want to commend the gentleman in the well for offering this amendment. This is one of the critical issues that we should all be considering very carefully, because if Communist governments do take over in Central America, there undoubtedly will be a great flood of refugees. There is absolutely no question about it.

When we consider that we have over 640,000 Indochinese in the United

States who were brought across the Pacific Ocean, many of whom had already gone across oceans themselves to get to their original, safe havens, I think there is no doubt at all that we would have the numbers that the gentleman is talking about when you consider that they would be, for the most part, foot people.

I might point out this is not just something that the gentleman in the well has calculated himself. Our U.S. Coordinator for Refugee Affairs has said exactly the same thing.

So I commend the gentleman and hope his amendment is adopted.

Mr. COLEMAN of Missouri. We have a land bridge between this area to the United States and we have never recognized this consequence of our actions here today.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. I thank the gentleman for yielding.

Mr. Chairman, I want to compliment the gentleman in the well, the gentleman from Missouri (Mr. COLEMAN). He has worked long and hard on this entire issue, not only on refugees but the entire Central American problem. He has given it great study, great detail and he has been very, very patient, waiting for his opportunity to offer this amendment. And I compliment the gentleman.

As the Member who introduced the basic amendment that he wishes to amend and as the Member from Florida who recently received some 130,000 Cubans during the recent Mariel boat lift, I can say to the gentleman that his amendment is extremely important because the issue of refugees, Mr. Chairman, is real.

And I would hope the House would adopt this amendment. And again, I want to compliment my colleague for the outstanding work and leadership that he has exhibited in this matter.

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I think that my colleague from Missouri has hit the nail on the head in this particular instance. Quite a few people in our district back home in Missouri ask about this very subject. What about the influx of people coming in from Latin America with the fact that there are some 450,000, the statistics tells us, undocumented workers coming from Mexico each year. I can imagine what tremendous problems would arise in the relation to the job problems that we have in this country should the gentleman's prediction come to pass.

I think a study such as the gentleman proposes is very much on point and I compliment the gentleman on pointing it out.

I hope that we will make the decision in this body today so that we can head this problem off in the future.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. BROOMFIELD) has expired.

(At the request of Mr. MITCHELL and by unanimous consent, Mr. BROOMFIELD was allowed to proceed for 1 additional minute.)

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Maryland.

Mr. MITCHELL. I thank the gentleman for yielding.

Mr. Chairman, I heard the gentleman talking in general about a refugee-immigration problem, but honestly, I missed hearing what the gentleman's amendment does.

Would the gentleman tell me.

Mr. COLEMAN of Missouri, I would love to tell the getleman again. The Members feel that we are going to have a serious vote here pretty soon and that is not necessarily the case, on some of these other amendments, but I would be glad to explain it.

It requires the President to commission a study of refugees and the potential of refugees, the economic ramifications of a number of refugees coming into our country as a consequence of Nicaraguan/Cuban involvement in Central America.

Mr. MITCHELL. A study commission.

I thank the gentleman.

Mr. MARTIN of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from North Carolina.

Mr. MARTIN of North Carolina. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman from Missouri for the work that he has already done on this question. He has pursued it in a very sensitive way in which I think all Members would be very pleased and very proud.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. BROOMFIELD) has expired.

(At the request of Mr. MARTIN of North Carolina and by unanimous consent, Mr. BROOMFIELD was allowed to proceed for 1 additional minute.)

Mr. MARTIN of North Carolina. If the gentleman will yield further, I would say that the point here is for this government to recognize that its inaction or its faulty action in this case could very well produce a crisis in Central America which would have a devastating effect on the people of those countries and which would force them to be and to become refugees from their own country.

If we are going to be sensitive to the plight of those potential refugees, as my colleague from California I think was seeking to raise the point earlier, we must be very attentive to actions which if faultily taken in this Congress will force them to become refugees from their land and force us to find some way to accommodate them within this country. We need to decide how we are going to share that accommodation throughout all regions of this country.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. BROOMFIELD) has expired.

(By unanimous consent, Mr. BROOMFIELD was allowed to proceed for 2 additional minutes.)

Mr. SILJANDER. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Michigan.

Mr. SILJANDER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, the point needs to be made here in the House and to the gentleman from California, that refugees are not bad people. They are men, women of all colors, all races, all peoples that are fleeing tyranny in many, many cases. We have been blessed in this country as a melting pot, and people from all cultures and all backgrounds have helped expand the intellect and the capabilities of our great Nation.

Over the years we have had:

	Total refugees	Refugees entering the United States
East Europe:		
Poland	700,000	176,000
Romania	75,000	36,000
Bulgaria	200,000	4,000
Czechoslovakia	110,000	30,000
Hungary	600,000	71,000
Yugoslavia	275,000	85,000
Subtotal	1,960,000	402,000
East Germany	6,500,000	100,000
Soviet Union	400,000	100,000
Baltic Nations	200,000	80,000
China	4,000,000	43,000
Tibet	60,000	5,000
Cuba	1,250,000	970,000
Vietnam	1,000,000	425,000
Laos	282,000	135,000
Cambodia	224,000	83,000
Afghanistan	3,300,000	6,000
Nicaragua	100,000	60,000
Ethiopia	1,000,000	8,000
Angola	200,000	120
Total	20,476,000	2,417,120

We have had millions of refugees who have come to this Nation because they are seeking freedom and opportunity.

The point of the gentleman in the well is that our Nation is now under a terrible burden of unemployment, social and economic readjustment. And it is just an issue of how many people this country can absorb and handle, especially with the major influx of the potential of Central America, anywhere from 7 to 12 million.

That is the issue. Can we handle adequately the influx of many peoples

from all over the world, especially the potential crisis that could occur in Central America.

Can we handle the economic and social needs of people fleeing from tyranny.

The bottom line, if I may say to the gentleman from California, is how can we assist them in maintaining stability and prosperity in their own nations, as they probably would rather remain in their own countries to begin with.

Mr. GARCIA. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from New York.

□ 1520

Mr. GARCIA. I thank my colleague for yielding.

Mr. Chairman, if I may, I would like to ask the sponsor of the amendment a question or two.

Is this amendment that the gentleman is putting forth an amendment based on Boland-Zablocki? Is it part of what we are discussing right now?

Mr. COLEMAN of Missouri. It is an amendment to the Young amendment.

Mr. GARCIA. An amendment to the Young amendment to the Boland-Zablocki. Yes.

I want my colleague, who sponsored this amendment, to know that right now in the city of Washington, D.C., there are at least 100,000 Salvadorans at this moment. In the city of New York, I am certain an equal number, as well as from Honduras, from El Salvador, from Nicaragua and from many of those countries that we are now talking about.

Why are they there?

The CHAIRMAN. The time of the gentleman from Michigan (Mr. BROOMFIELD) has expired.

(On request of Mr. GARCIA and by unanimous consent, Mr. BROOMFIELD was allowed to proceed for 2 additional minutes.)

Mr. GARCIA. I really do not have a problem with the gentleman's amendment. I think it is important. But I really do not know of its usefulness at this point, because by the escalation and our intervention in Central America, many of these people already have fled.

Mr. COLEMAN of Missouri. If the gentleman will yield, I think the point has got to be made that we do not want to create refugees by our actions today. We happen to have a difference of opinion as to what policy creates refugees. We want to provide stable governments down there for these people to stay at home, to have their own country, to be their own leadership, and not have to flee to the United States. That would be the best possible scenario. The only thing that this amendment does is to study the ramifications if we do not act properly, and that is a matter of decision today and difference of opinion. But if we do not act, or whatever our resultant act is, that the President study this thing, report back here so we know how to deal with 7 million to 9 million additional people coming to the United States seeking jobs, seeking public assistance payments of $25 billion to $40 billion additional payments from the taxpayers. We have to know this. We have to plan for it.

Mr. GARCIA. I do not know whose time it is, but if I may, I think the gentleman from Michigan yielded to me.

The difference between Vietnam and Central America is that the people in Vietnam could not cross the Pacific to get here. I assure you that the moment we escalate and we start to send military forces into these countries, those people will head north. And I will tell you how they will get here. They will come up through Mexico, through Tijuana, through Juarez, and they will find themselves here, or they will find themselves in one of the Caribbean nations and then come up here. It is happening every day right now. And your amendment is not going to do anything as it relates to the study of what is happening because it is already happening.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. BROOMFIELD) has again expired.

(On request of Mr. COLEMAN of Missouri and by unanimous consent, Mr. BROOMFIELD was allowed to proceed for 2 additional minutes.)

Mr. COLEMAN of Missouri. If the gentleman will yield further, this is a fundamental problem with this legislation. It says on page 13 of the report that they reject the fact that if we end our support for the anti-Sandinistas, that these people will not be fleeing into the United States. That is a difference of opinion. But the gentleman makes an excellent point why we ought to have the amendment adopted. We may differ on the reasons, but I do not think people are going to flee their homeland, their own country, if they are not being pushed out by a Communist-Marxist people coming out of Nicaragua and Cuba. Now, that is the essence of these people's problem. They are being pushed, as the gentleman says, through Mexico and into the United States.

Mr. GARCIA. If the gentleman will yield, we, the United States, with our intervention at this very moment are pushing those people out. It is not the Marxists. It is not the Soviets. We are the ones who are pushing them out.

Mr. COLEMAN of Missouri. They are not coming to the United States because we are pushing them out. Why would they come to the United States if we are pushing them out of their own country? They would want to go to another country if we were pushing them out of their homeland. That is not an argument that holds water. They would go to the Soviet Union if they wanted to do that.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentleman from Oregon (Mr. AUCOIN).

Mr. AUCOIN. Mr. Chairman, I would like to tell my colleagues what offends me about the amendment.

What offends me is that it calls for the President to commission a study of any refugee problems that would be created by Cuban- and Nicaraguan-directed subversion in Central America.

I am sure that there would be immigration problems and refugee problems caused by such subversion. But what this amendment leaves out completely is the much greater refugee problem as a direct consequence of bombs bursting, borders flaring in a full-scale regional war which the covert war is leading to.

It is a one-sided amendment. But worse, I have listened carefully to this debate over the last several days. I have listened to the administration subtly change its rationale for the purpose of the not-too-secret war in Nicaragua. It has changed its rationale from arms interdiction.

Of late what we have begun to hear is a subtle reference to "feet people." There are those who are now telling us that we had better not stop this war in Nicaragua, because if we do we are going to have feet people coming in by the millions into the United States.

I would say to my colleagues that when you have a bankrupt case—and the policy that the administration is following in Nicaragua is an illegal war, illegal by U.S. law and international law, is a bankrupt case—when you have a bankrupt case you reach for other arguments to defend that bankrupt case. And you play to emotions and frighten people.

To this end, I have heard subtle suggestions that those who oppose the war are soft on communism. I actually heard the word appeasement used on the floor.

But lately I have begun to hear the argument, If we do not support the President in this covert war in Nicaragua, we are going to have millions of feet people—refugees—swarming into the United States.

You know what this is. This is an attempt to raise dark fears on the part of the American people that millions of little brown people are going to be coming into the United States. I resent that argument. I resent it very much. I do not care if it was intended by the author of the amendment or not. This element is creeping into the debate on this issue, and I resent it very, very deeply. And I believe every minority group in this country will.

Mr. COLEMAN of Missouri. Mr. Chairman, will the gentleman yield, since he has questioned my integrity and intention?

Mr. AUCOIN. I will yield in a minute.

The CHAIRMAN. The gentleman from Massachusetts (Mr. BOLAND) has the time.

Mr. COLEMAN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. AUCOIN. I will yield to the gentleman in a minute because he is the author of the amendment.

I indicated to the gentleman that this may not be his intention, but the gentleman has listened to the arguments in the news, in the media, and here on the floor for the last several days, as have I. He knows that this argument has been introduced into this debate. I resent it very much.

We ought to decide this question on the basis of international law and domestic law. We ought to decide whether we are doing what is in the ultimate best interests of the United States on the merit of the question, not on the side issues that are being introduced.

Now, the gentleman may not have intended that, and I am sure he does not, but this has been introduced, and this is one reason why I fault his amendment.

I will yield to the gentleman, or perhaps the gentleman from Massachusetts will yield to him, as soon as I say this: If this is not what is intended by the gentleman's amendment, then I think he really ought to withdraw it and draft it in a way that would call upon the President to do a refugee analysis, not only as a result of any subversion that is started by Cuba or Nicaragua, but any refugee problems that might come to this country on the basis of a full-scale regional war that could explode and escalate from our current covert war in Nicaragua. If he is willing to do that, then I think we might have a fair amendment. But I resent those arguments, and I hope my colleagues do, as well.

Mr. COLEMAN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Missouri.

Mr. COLEMAN of Missouri. Mr. Chairman, not only did I not have the courtesy of being heard on the amendment, I now have to fight and have to get time from the Chairman to defend my integrity.

Of course, it is not my intention, and I want the record straight. Why would the gentleman even raise the question unless he wanted to put me in a position of having to defend myself? That is a very basic type of argument that you can make to make someone look bad. Talk about the amendment, the gentleman from Massachusetts just indicated to me that he would accept the amendment.

□ 1530

I ask the gentleman, because it is a good amendment, and there is no intention or hidden agenda or anything else, he can question the amendment, but do not question why I introduced it. I think the taxpayers, I think the citizens of this country, have got to recognize the consequences of what we do.

Now, we may disagree on how we accomplish this, but we do not have to question the integrity of people who offer amendments here on the floor.

Mr. BOLAND. Mr. Chairman, in response to the gentleman from Missouri, let me say that the gentleman from Oregon has some very deep reservations about it, and I am delighted to have given him some time.

My own judgment on the matter is that I can accept the amendment because I think the administration would like another commission, and on that basis, I have no objection.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. BOLAND) has expired.

(By unanimous consent, Mr. BOLAND was allowed to proceed for 3 additional minutes.)

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Oregon.

Mr. AUCOIN. I thank the gentleman for yielding.

Mr. Chairman, I will say to the gentleman over here who seems to be offended by the remarks I made that I do not call into question his motives in offering this amendment. I find fault in his amendment because it is one-sided.

But this is the time to focus the light of day on a regrettable element in the national debate on this issue. My effort was to do so.

Ms. MIKULSKI. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentlewoman from Maryland.

Ms. MIKULSKI. I thank the gentleman for yielding.

Mr. Chairman, I wish to associate myself with the remarks of the gentleman from Oregon.

I understand the gentleman from Massachusetts is going to accept the suggestion of this commission. I would just hope there would be a few components to this so-called commission.

No. 1, I would like us to include in there the question: Why are the people refugees?

No. 2, who are the refugees? The gentlewoman from Maryland has gone to the border of El Salvador and Honduras and personally talked to the refugees and found that 95 percent of them were women and children who had no intention of coming to the United States but were just waiting for the Salvadoran Government to stop burning their crops so they could return home.

So I would like to know who are the refugees, why are they refugees, and what can be done to prevent people from being refugees, one being no civil war.

The gentlewoman feels that if you practice gunboat diplomacy, you have to be prepared for the lifeboats and your shore.

Mr. LIVINGSTON. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Louisiana.

Mr. LIVINGSTON. I thank the gentleman for yielding.

Mr. Chairman, I would simply respond to the previous speaker by saying that I think that is the purpose that the author of the amendment wishes to accomplish, to find out exactly who will be the refugees and where the impact of those refugees will find itself.

I would say further that I appreciate the gentleman's lofty idealism and resentment of some ramifications of the amendment, but I would point out to the gentleman that he lives in Oregon. He is probably the least likely individual Congressman in this whole Chamber to be affected by the inflow of refugees when and if there is an inflow, when and if those 8 million to 10 million people start coming across the border.

I happen to be from the city of New Orleans. I can tell the gentleman that the Congressmen from Texas, from Louisiana, from Florida, and from California are going to be the ones who are most impacted, and I doubt that they have any right or any inclination to exhibit such righteous indignation at a simple request for the President to appraise the type of impact that this country is going to suffer as a result of such a massive inflow of refugees.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. Mr. Chairman, I yield for a response to the gentleman from Oregon (Mr. AUCOIN).

Mr. AUCOIN. I thank the gentleman for yielding.

Mr. Chairman, I just want to tell the gentleman from Louisiana that in the State of Oregon we have done more than most States in the Nation to take in boat people from Southeast Asia as a result of the misbegotten adventure over there, and we have accepted refugees from Central America. We are not unaffected.

I understand what I am talking about. The gentleman does, too. And the gentlewoman from Maryland said it very well.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. BOLAND) has again expired.

(By unanimous consent, Mr. BOLAND was allowed to proceed for 3 additional minutes.)

Mr. MAZZOLI. Mr. Chairman will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Kentucky who chairs the Immigration Subcommittee of the Committee on the Judiciary.

Mr. MAZZOLI. I thank my distinguished chairman for yielding.

Mr. Chairman, I would like to respond very briefly to some of the debate that has gone on today. I would yield to my friend from Massachusetts if he feels that this amendment ought to be accepted, but there are some problems I find in accepting this additional commission.

I do share the observations of my friend from Oregon in saying that this amendment tends to be a one-sided proposition, because there are right now tens and scores and hundreds and thousands of people who are the so-called feet people already coming into the United States as a result of the problems in Central America.

So it is not what will go on thereafter, but what is happening in Central America right today.

Second, if I might also beg the gentleman's approval for further time, I believe this debate points out the very strong need for this House to deal with the immigration reform issue. The immigration reform bill was brought before the House last year; it is before the House again this year, before the Committee on Rules. It deals with the subject of immigration on a comprehensive basis, but it deals with it in one specific area: how you determine who is a refugee and who is an asylee.

The problem that we have now is that there are political decisions being made about who can be clothed with the status and sanction of being a refugee and, therefore, entitled to stay in the United States, and which people are summarily to be sent back to their homes. Our bill changes that. It separates the question of enforcement of the immigration law and puts the question of asylum before separate and independent arbiters.

Let me also say that unless we deal with this subject in a comprehensive way, we will have this kind of ad hoc treatment, and again, the refugee issue really should have come before the Committee on the Judiciary. This kind of an amendment really ought to come before the Immigration Subcommittee. I wish it had.

Again, I defer to the gentleman from Massachusetts if he wishes to accept the amendment, but I personally have some misgivings about this whole commission approach.

Mr. BOLAND. Mr. Chairman, let me say that I might have misspoken when I said I would accept it. I do not have any particular problem with it. That puts it in a better perspective from the point of view of others on this side of the aisle.

Mr. MAZZOLI. If the gentleman will yield further, I think it also brings out the question of what to do with the Salvadorans and the Guatemalans and others from Central America who are already here in the United States.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BROOMFIELD) to the amendment offered by the gentleman from Florida (Mr. YOUNG).

The question was taken; and the Chairman being in doubt, the committee divided, and there were—ayes 69, noes 29.

So the amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. BOLAND) as modified, to the amendment offered by the gentleman from Florida (Mr. MICA) as a substitute for the amendment offered by the gentleman from Florida (Mr. YOUNG), as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. BOLAND. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 221, noes 205, not voting 7, as follows

[Roll No. 280]

NOT VOTING—7

Andrews (NC)	Dowdy	Jones (TN)
Chappie	Foley	
Dixon	Heftel	

□ 1550

The Clerk announced the following pair:

On this vote:

Mr. Dixon for, with Mr. Chappie against.

Mr. McDADE changed his vote from "aye" to "no."

Mr. WHITLEY changed his vote from "no" to "aye."

So the amendment, as modified to the amendment offered as a substitute for the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. BROOMFIELD TO THE AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA, AS AMENDED

Mr. BROOMFIELD. Mr. Chairman, I offer an amendment to the amendment, as amended.

The Clerk read as follows:

Amendment offered by Mr. BROOMFIELD to the amendment offered by Mr. YOUNG of Florida, as amended: strike out all that follows page 2, and insert in lieu thereof the following:

Strike out line 20 and all that follows through line 10 page 5 and insert in lieu thereof the following:

"(b) This section shall take effect upon the date prescribed in the classified annex to the report of the Permanent Select Committee on Intelligence of the House of Representatives to accompany H.R. 2760 (98th Congress), but in no event earlier than October 1, 1983, unless before that effective date the President, after consultation with the Congress, has submitted to the Speaker of the House of Representatives and the President pro tempore of the Senate in writing a new plan providing for the interdiction of arms being shipped from or through Nicaragua to forces hostile to the Government of El Salvador. In formulating such a plan, the President shall consider whether it would be useful to pursue direct bilateral negotiations between the United States and the Government of Nicaragua; multilateral negotiations among selected Western Hemispheric countries; involving the Organization of American States, the United Nations, or any other nation or nations in a diplomatic or peacekeeping role; involving other countries in the process of arms interdiction using United States military supplies and training; and any other policy that will stop the shipment of arms from Nicaragua to El Salvador. The plan submitted pursuant to this subsection shall cease to be implemented and the prohibition contained in subsection (a) shall take effect If—

"(1) the Government of Nicaragua has, by formal action, agreed that it will cease all its activities involving the furnishing of arms, personnel, training, command and control facilities, or logistical support for military or paramilitary operations in or against any country in Central America or the Caribbean; and

"(2) the Government of Nicaragua is taking steps to implement the made by the Government of National Reconstruction of Nicaragua to the Organization of American States in July 1979; and

"(3) the cessation of such activities, and the taking of steps to implement such commitments, has been verified by the Organization of American States or the President of the United States.

Mr. BROOMFIELD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

(By unanimous consent, Mr. BROOMFIELD was allowed to proceed for an additional 5 minutes.)

The CHAIRMAN. The gentleman from Michigan (Mr. BROOMFIELD) is recognized for 10 minutes.

Mr. BROOMFIELD. Mr. Chairman, the amendment I am offering is a bipartisan amendment representing the views of Mr. MICA and myself. It offers a creative solution to our dilemma. It not only forgoes the overt program idea, but it also sets a date to end the present covert program. Under this amendment, the current covert efforts will cease unless the President, after consulting with all of us here in Congress, submits a new arms interdiction plan.

For those of us concerned about negotiations, the President's plan must consider the usefulness of bilateral negotiations with Nicaragua and multilateral talks with other nations in this hemisphere.

Most importantly, this approach calls for ending any covert program should the Sandinistas agree to halt their various subversive activities and reaffirm their commitments to the OAS.

An important facet of this amendment is verification. Any agreement that is worth its salt must be verifiable. To guard against the possibility of cheating, this amendment also requires that a verification procedure be established to insure the Sandinistas are in full compliance with their agreement to cease all their subversive activities.

Finally, the Broomfield-Mica amendment gives all of us in the House the opportunity to march together. Through this bipartisan approach to this complex issue, we can work as a team to solve this vital foreign policy challenge.

We owe this to our institution, to our country, and to future generations of Americans.

I strongly urge you to support this effort.

□ 1600

Mr. MICA. Will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Florida, the original sponsor of the amendment.

Mr. MICA. Mr. Chairman, we have come to a point where we are going to have a straight up-or-down vote on the Mica amendment. I have made the plea that I thought was appropriate before this body. I had earlier made the plea that I thought was appropriate before this body and I would be very concise. There is no need to go through the debate again.

But I simply feel very strongly and personally that the way the President is handling this may, indeed, be inappropriate if not illegal. It would take a court decision to render that judgment. I do not want to wait.

My amendment would call for the President to submit a plan. I think the President is acting improperly, if not directly, but possibly in the spirit of the law.

I know, and the Boland report has said repeatedly that the Nicaraguans are acting improperly and in violation of a half a dozen treaties that we all are signatories to. There is no doubt.

So there is one improper action.

A second improper action, and I personally think that the Boland-Zablocki approach to just walk away from it on the basis that we are acting improper is incorrect. It is a black and white solution to a very complex problem. The problem is very difficult.

I have studied this. I have been on the Foreign Affairs Committee for over 5 years now. It is not easy and I am not saying that the Boland committee has not done its job. They have done a magificent job in pointing out problems both from our administration and our activities and also what is happening in Nicaragua. There is no doubt.

But to say we are going to now stop covert activity, and I say this to my colleagues who have had troubles over the last few years with direct aid, military aid to El Salvador, we are going to give $80 million to an unstable region of the world, open, above board. Is that your commitment that that seed money, if it turns into an open conflict, that we indeed will support that war?

There is a problem I think the committee approved in increments. Mr. President, administration, you may do this. You may do this. You may do this. And at a point they said, you have gone too far.

What I am saying they did not say is come back to here or back to here or back to here. They said no, nothing.

Now we have thousands of people in that region of the world, thousands who have aligned themselves with the people we are supporting, whether you agree with them or not. What do we do with those people when we withdraw? What would be our excuse to

people who have stepped forward to fight for what they thought was democracy?

So I will not belabor the point. I simply think there are three improper actions.

I think my amendment would allow the President to submit a plan, to put into appropriate context what is legal, what is the action and the intent of the present administration, and we can make judgments on a legal document.

Second, that we will stop and the Nicaraguans will stop, and I do not even say you have to have it verified by our President. It can be verified by the President of the United States or it can be verified by the Organization of American States, either one.

So we have had the debate. I appreciate the up or down opportunity.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Georgia.

Mr. FOWLER. It is my understanding, and I am inquiring, that the amendment now being offered by the gentleman from Michigan (Mr. BROOMFIELD) to the amendment offered by the gentleman from Florida (Mr. YOUNG) is the Mica amendment?

Mr. MICA. Straight up or down.

Mr. FOWLER. The same amendment that this House just rejected?

Mr. MICA. No, sir.

Mr. FOWLER. I am sorry.

Mr. MICA. Did you vote for or against it?

Mr. FOWLER. Let me clarify. I am the one that is confused. I am trying to get us out of this and I am the one confused.

The amendment that was just adopted by this House was the Boland amendment which amended Mica. Now the amendment offered by Mr. BROOMFIELD is the Mica amendment again in its pure form?

Mr. MICA. Yes.

Mr. FOWLER. Despite the fact that this body just amended the pure Mica form by Boland; is that not correct?

Mr. MICA. That is correct.

Let me just state this: I think from this author's standpoint that it would frankly be better to vote straight out for Boland-Zablocki or straight out for the Mica amendment than do what we have just done on the floor of this House, to leave this situation where we cut off for 30 days, tell them all down there just hold on to everything for 30 days until you see if a joint resolution of Congress is passed to continue.

I personally think I could live more, sleep better with a straight vote just in favor of Boland-Zablocki.

But I think what we have done now, we say to them for 30 days we are going to cut it off and you wait, all the troops and all of those who support it, everybody that is down there, you wait until the Congress passes the resolution. I think that is worse.

Mr. FOWLER. If the gentleman would continue to yield, if you could persuade your friend from Michigan to withdraw this amendment then we could have a clean vote on Boland-Zablocki. That is what we have been trying to get all along.

But if we are going to have a revote on Mica and continue this process we will never get to the major part of the bill.

Mr. MICA. This will be the only clean vote we will have, as I understand, this opportunity, on the Mica amendment.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I will be happy to yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, I hope everyone paid close attention to what our colleague from Florida (Mr. MICA) had to say because I agree with the position he has taken. What he does is amend my amendment and I am willing to do that and I am willing to support his amendment to my amendment because they embrace the same basic fundamental concept.

But the gentleman is exactly correct. Rather than play games with the Solarz-Boland language and expect people in Central America to stop what they are doing and hang it up for 30 days just is not realistic and is not practical.

We ought to either get a straight vote on the Mica amendment or Mica as a substitute or the Young amendment or Boland-Zablocki as a bill, but let us not confuse the issue and make the people in Central America think we are any more strange than they think we are today after some of the things they have heard said during this debate.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Florida.

Mr. FASCELL. I thank the gentleman for yielding.

The issue is not 30 days from now, it is not 6 months from now and it is not a year from now. The decision that has to be made has to be made today. It confronts the Congress today.

I do not care what kind of an amendment you write that says put it off, and I have great respect for my colleague on the Foreign Affairs Committee who authored the last amendment, and was successful in this House in getting that amendment passed, but what it does is put off the vote until some other time. The vote is now and the issue is now. You either want to cut off the covert aid or you want to go for a proposition that says we have to put some pressure not only on our own Government but we have to put some pressure on the Nicaraguan Government.

The issues are quite clear and there is no point in putting it off.

If we go the Solarz route as the proposition in this House we defer until another time the issue of what we are going to do with respect to our policy in Latin America. I think, therefore, my colleague from Florida is right. We can decide right now one way or the other. You have the two issues before you. I see no other issue.

Mr. BROOMFIELD. Mr. Chairman, I would like to take just a moment to congratulate the gentleman from Florida (Mr. MICA). He has worked very, very hard. He has been very sincere in trying to develop a bipartisan approach and I really think the stakes are as the gentleman from Florida (Mr. FASCELL) has pointed out.

The bottom line is right now. Either you are for or you are against the policy that we have as representing the U.S. Government, or are you going to have more confidence in the Sandinistas.

I think the issue is extremely clear. That is why I think it is vital to have an up or down vote on the Mica amendment without any other amendments added to it.

So I, therefore, urge everybody in a bipartisan effort to support our Government and to vote for this amendment.

Mr. PAUL. Mr. Chairman, will the gentleman yield?

Mr. BROOMFIELD. I yield to the gentleman from Texas.

Mr. PAUL. Mr. Chairman, H.R. 2760 presents Members with only two options: Covert aid or overt assistance to Central America. The bill fails to address the fundamental question of whether or not we should be sending any assistance to Central America. Throwing U.S. tax dollars at Central America is a shortsighted, regional response to the global problem of Soviet aggression.

I believe that aid to the region, which is supposedly designed to stop the spread of communism, would be unnecessary if the United States would quit subsidizing communism at its source—the Soviet Union and the Eastern bloc. At the present time, the Soviets and other Comcon nations owe almost $100 billion to Western nations, particularly the United States; $100 billion buys a lot of arms for insurgents.

Many proponents of aid to Communist nations claim that the funds we give them are used only for peaceful purposes. However, funds are fungible. The grants, credits, and below-market loans the United States gives Communist nations for so-called peaceful reasons free up their own limited capital for fomenting revolution abroad.

All of us are concerned about the flow of arms from Cuba to Marxist rebels in Central America. Unfortunately, Congress has failed to examine the extent to which the Soviet Union is subsidizing Cuba. The amounts are staggering. In recent years, the Soviet Union has been spending over $10 million a day on Cuba. Soviet economic assistance to Cuba in 1982 amounted to $4.7 billion, accounting for almost 25 percent of Cuba's GNP. Further, Soviet military assistance to Cuba since 1961 is estimated at $10 billion. This massive flow of rubles into the Caribbean is being supported by the U.S. Government's credit policies.

The Soviets are not foolhardy. They are actually cautious and quite calculating in their foreign policy. They have, however, reached the stage in their empire building where they are having trouble controlling their subjugated nations.

The point I am making is this: The Central American region is peripheral to Soviet interests. If the United States would cut off aid to the Eastern bloc, the resultant belt tightening would probably force the Soviets to end their military adventurism in the Caribbean and Central America in order to maintain control over the Warsaw Pact nations and Afghanistan.

While I would prefer an entirely different course of action to the one proposed in H.R. 2760, let me state that in the context of the bill I am opposed to any covert military actions by the U.S. Government. Such actions have no place in a free society. Any action the Government takes must be open to examination by all.

Beyond the ethical questions involved, there are practical considerations. Covert actions in the past have usually failed. And when these failures have been uncovered, they have been used against us by our enemies. In the struggle between freedom and tyranny in the Third World, the United States, as the freest nation in the world, is losing the battle of ideas. This loss of stature is not for objective reasons. Our capitalist economy still provides the best model for development. Our largess has resulted in $2 trillion worth of foreign aid programs since the end of World War II. Yet we are viewed as an imperialist power by many wary, if not hostile, Third World nations. This is largely the result of effective Communist propaganda, and our own clumsy attempts at covert actions designed to bring about U.S. objectives.

While overt aid is always preferable to covert aid, the so-called interdiction assistance proposed in H.R. 2760 has many drawbacks. Many foreign policy experts believe that the $80 million called for in the bill is far too low to end the flow of arms to El Salvador. Further, the program's success rests completely on the cooperation of our Central American neighbors. I am also concerned because the bill would actually deepen U.S. involvement in the region. Covert assistance is currently going only to the rebels in Nicaragua. The interdiction assistance would be spread among friendly nations in the region.

The time has come to end the vicious cycle of funding communism and then funding those fighting communism. Instead of paying other nations to cut off the flow of arms into El Salvador, as H.R. 2760 proposes, let us simply stop paying for the arms.

Mr. BOLAND. Mr. Chairman, I withdraw my reservation on the point of order.

The CHAIRMAN. Does the gentleman from Massachusetts insist upon his reservation?

Mr. BOLAND. The gentleman from Massachusetts does not insist upon his reservation.

Mr. HAMILTON. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Florida (Mr. MICA) as offered by the gentleman from Michigan (Mr. BROOMFIELD).

The important thing for Members to understand here is that we are just voting again on the same issue we just voted on. Those who voted yes last time on the Boland amendment should vote no now.

The key issue is exactly as it has been described. Do you or do you not want the covert action to continue?

□ 1610

That is the key issue. If you want that covert action to continue, then you will vote for Mr. MICA's amendment. If you oppose that covert action, then you will vote no. This is the heart of the issue. We all understand that now. Our position here is that it is a mistake for U.S. policy to permit that covert action to continue. It is therefore, a mistake to adopt the Mica amendment. The Mica amendment requires Nicaragua to do certain things which Nicaragua will not be able to do and in effect that means the covert action continues. The covert action is not in the American national interest, for all of the reasons that we have cited here again and again. It is not working, it has not accomplished its purposes, it risks a wider war, it is illegal, it diminishes the chance for negotiations, it damages, the U.S. image abroad, it is opposed by the American people, it holds us up to ridicule for doing that which we claim we are not doing, it is not in keeping with the American character.

I strongly urge a vote against the Mica amendment.

Mr. HYDE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Mica amendment.

Mr. HYDE. Mr. Chairman, I have heard the American character described, very interestingly, by several people in this Chamber. I have my own view of the American character. That view encompasses the notion that we fight for freedom, we fight for the underdog, we help people defend themselves when they are attacked by a vicious aggressor. We have done it in every world war, we did it in Vietnam. We did not get anything out of that war but death, destruction and a national guilt complex. I know that. They say "learn the lessons of Vietnam in Central America." The lesson of Vietnam is that you have to be behind your troops when they are fighting in combat. You have to have the will, the will to assert your national interest. And communism means refugees. I have heard the argument made that we are trying to inject racism into this argument. There was no bombing in Cuba when 1 million of them, 1 million Cuban refugees swam across the sea to get here. We have 500,000 Salvadorans here now. And I am suggesting to you that if we turn Central America over to become a Soviet beachhead through Cuba, through Nicaragua and then El Salvador, then Honduras, then Costa Rica, then Guatemala, you have not dreamed of the refugee problem that you will have in this country from, not illegal aliens, not undocumented workers, but refugees by definition who are entitled to all of the welfare benefits that this country bestows, as rightly they should, on refugees. Now we have a choice. We are either going to continue covert aid until the Nicaraguans stop exporting subversion, killing, ammunition, weapons, training, subversive command and control to bleeding El Salvador; we are going to extract a price from them by saying "the Contras are still going to give you trouble in your own country unless you stop exporting trouble to your neighbors." But once Nicaragua stops exporting subversion, the President or the OAS, Organization of American States, can certify that they have stopped exporting revolution and we still stop supporting the Contras.

Now that seems to me to be equity and justice and fully in keeping with the American character. On the other hand we have the Solarz-Boland amendment which we have just adopted which says we stop, right now, we pull out, we cut and run, we withhold any further aid to the three groups of insurgents that are fighting in their own country for their own revolution, fighting for freedom, fighting for freedom of religion, freedom of speech, freedom of assembly, political pluralism; we are going to say, "stay there, ladies and gentlemen, children, women and men, we are pulling out." But if Nicaragua continues to do what it has done since 6 weeks after they took over in 1979, exporting their revolu-

tion without frontiers, then the President comes in with a long petition setting out a lot of things and then maybe a joint resolution by both Houses and then we will restore covert aid to whom? There will not be anybody left there to aid. They will have been cut to ribbons.

Is that in keeping with the American character? I do not think it is.

So, I suggest, and do not tell me that the covert action has not worked, because Eden Pastora has been there for only 3 months, April 15 is when he got in there, and he is the one that can do the job, if anyone can, harass, pressure the Sandinistas to live up to the promises they made in 1979 to the Organization of American States. Do not say that we are alone and isolated down there. We have allies.

Mr. BARNES. Mr. Chairman, will the gentleman yield?

Mr. HYDE. No.

Honduras wants us down there, Costa Rica wants us down there, El Salvador wants us down there and do not think that the other countries are not concerned about what is happening.

I will yield to my friend from Maryland.

Mr. BARNES. I thank the gentleman.

Yesterday the Wall Street Journal had, I thought, a fascinating article about the Contras the United States is supporting. You mentioned Eden Pastora; the front page of the Wall Street Journal yesterday noted that Mr. Pastora, who you just cited with great praise for what he is doing, has gone on clandestine radio to urge the Nicaraguan Army to fight harder against the forces that the United States has been supporting, the Contras, because if they win, he says, things will be worse off than they are now under the Sandinistas.

So the man that you say we ought to be helping, and as you know we have not been, has been urging the Sandinistas to fight hard against the people we are helping.

Mr. FOWLER. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the amendment.

My colleagues, I want to apologize to this body. I have spoken more today than I have spoken in the 7 years that I have been in the U.S. Congress. Now I will be very brief.

The issue now, after much debate, is clear: Are we or are we not going to continue covert paramilitary operations in Nicaragua.

Many people have asked—and it is a legitimate question—what is a covert action? Let me read you the definition out of one of our unclassified reports in the Intelligence Committee.

Covert activities are efforts to influence foreign governments, organizations or events which are planned and executed so that the role of the United States is not apparent. They may include political, economic, propaganda and/or paramilitary activities.

Now, my colleagues in the Congress, though some facts are in dispute, the following facts are not in dispute: This covert activity, covert simply means secret, is not secret any longer. It is a paramilitary operation of thousands of people that we are unilaterally supporting inside Nicaragua. Against the existing Government of Nicaragua which we all find repulsive.

Our democratic allies in Central America have said that the major impediment to ceasing the violence is the U.S. unilateral military operation, and urged us to stop it, so that we can all bring pressure together in our hemisphere to act to contain these hostile influences. Colombia, the largest democracy in our hemisphere after the United States of America, Venezuela, another democracy, Mexico, Costa Rica—these friends do not want Soviet masters or Cuban masters. These countries want to be regional powers, to retain their own influence, and they want to pursue democratic means and democratic institutions to contain Marxism in concert with the United States of America.

And they have said this publicly. The Presidents of the Contadora group, as well as many of our Western European allies, have urged us to cease financing an effort to overthrow the Government of Nicaragua in violation of our treaty obligations—at least for 30 days—and act as a great power and a great nation who could squash in 30 seconds the 2½ million people in Nicaragua or in Cuba if we choose to do so. Will you stop it long enough for us to work with you in the United States to develop a security strategy that will work to eliminate these hostile influences. That is the vote that is coming up right now.

There is nothing secret, there is nothing covert about the U.S. operation in Nicaragua except the under-the-table funding and the under-the-table numbers that continue to grow because we do not have the courage to exercise our constitutional responsibility for congressional oversight in the midst of a war that the United States is financing.

□ 1620

This vote is a rerun of Mica. I urge my colleagues to exercise our constitutional responsibility, our exclusive authority under our Constitution in matters where the forces of the United States or the proxies of the United States are being used militarily, to bring this matter before the American people and reject the continuation of this illegal war by preserving the 30-day cessation of hostilities which we just voted. Then, and only then, can we accept the offer of our allies in Central America and bring this matter to the negotiating table where a final resolution that will eliminate this cancer of communism can have a chance of attainment.

Mr. YOUNG of Florida. Mr. Chairman, I move to strike the requisite number of words and in support of the Broomfield-Mica amendment to the Young amendment.

Mr. Chairman, our colleague from Georgia has just made a very impassioned plea mentioning the names of some of our best allies who do not want us to be involved in Central America.

And I would respond to that gentleman that we came to the aid of those allies on numerous occasions at the great loss of American lives and expenditures of American dollars. They certainly have a right to their opinion, but I have listened very closely in the seven times that I have stood on the floor of this House and taken the oath of office, when the Speaker read my oath, where I swore to defend the United States. I am here to help those other nations that the gentleman from Georgia (Mr. FOWLER) mentioned, but I came here first and foremost swearing my allegiance to the United States and to what is in the best interest of my country, not some other country that I want to help, but my first allegiance is to the United States.

Now the gentleman from Georgia said those other countries he mentioned did not want to live under the yoke of communism. Well neither did the people of the Balkan nations, neither did the people of Poland or Hungary or Czechoslovakia and neither do the people of Afghanistan today want to live under the yoke of the Soviet Communists or any other form of communism.

Now, Mr. Chairman, we are a great and a powerful nation and there is no question about that. I do not believe that anyone in this world can match the industrial might of the United States. We can build almost anything better, more effective and if we have enough time, in larger numbers than any other nation in the world. But, Mr. Chairman, most of the raw materials that we will use in this great industry of ours comes to us from somewhere else because: First, we either do not have them in the United States; or, second, we are not allowed to get them because the lands have been set aside for other than commercial exploitation.

So, all of a sudden we become very dependent upon other parts of the world for raw materials we use in our industry.

And, Mr. Chairman, most of those materials that come to the United States and most of the products that we build and ship out, that includes

our energy, come in through the Caribbean and the Gulf of Mexico and our gulf ports. That part of the world is very important to our Nation's economy.

In World War II, Hitler's submarines sank more tonnage in the Gulf of Mexico than all of the North and South Atlantic.

Now, can the Members imagine what the Soviets could do in a case like that with all of their sophisticated war machine? Imagine how many more times effective the Soviets can be when they have the Soviet Union and Cuba for a base? Imagine how much more effective the Soviets can be when they have the Soviet Union, Cuba, Nicaragua, and Granada and possibly eventually El Salvador. What about the Panama Canal? How important does all this become to the great industrial might of the United States if we cannot get the raw materials that we need through the Panama Canal, through the Caribbean, through the Gulf of Mexico into the United States.

Considering all of this then, those countries of Central America become even more important to us, not just the politics of Central America, not just the politics of El Salvador and Nicaragua, but the security of the industrial capability of the United States which is essential, without which we could never defend the United States against the Soviet Union or any other industrial power. A nation dependent upon that type of shipping, that type of commerce, that could easily be disrupted by any major power, if they have bases all over the Caribbean for their submarines, for their ships, for their airplanes and for their rockets is at risk.

Mr. Chairman, I think we make a grave mistake allowing the Sandinistas, directed by Fidel Castro, to roam throughout the region to plant the seeds of Marxism or communism or call it what you will. It is time for we here in the Congress as Representatives of those American people who believe in and who have died for freedom and liberty against nazism and communism. I think it is time for Congress to establish that position solid today. We are going to make a decision and we are going to live with it for a long, long time.

So, my friends, lay aside the partisanship. Lay aside the little games we might seek to play from time to time and let us vote, as we pledged to do when we all took the oath of office in the well of this House, let us vote what is best for the United States of America.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, there is only one reason why we are here today and that is to consider the bill which stops covert action in Nicaragua. For more than 1 year and one-half the Intelligence Committee has struggled with this problem. It has not been an easy task.

I know that there has been a split within the committee. Because of the attitude of the administration this particular problem has deteriorated at this moment into one of partisanship.

I have made a real effort in that committee to get away from partisanship and I think we have been greatly successful. And I would say that we have won from the intelligence community, whether it is the DIA or the National Security Agency or the CIA, you name it, I think one could say that this committee has won the respect of the intelligence community and has won, the respect of this House.

Now this House has a judgment to make with respect to a problem the Intelligence Committee has had to deal with.

The credo that I have tried to follow—and I think other members of this committee have tried to follow—is that we recognize that, "Among the increasingly intricate arsenals across the world intelligence is an essential weapon, perhaps the most important, but it is, being sacred, the most dangerous. Safeguards to prevent its abuse must be devised, revised, and rigidly applied. But, as in all enterprise, the character and wisdom of those to whom it is entrusted will be decisive. In the integrity of that guardianship, lies the hopes of free people to endure and prevail."

That is a quote that was taken from "The Man Called Intrepid". It is a credo that was established by William Stevenson, who was the chief intelligence officer for the British in World War II.

We have tried to adhere to that credo. I think it is an important one.

I said the other day that there must be Members within this body who were here when the Tonkin Gulf resolution was up and I am sure there are Members who are here today, who were here at that time, who would like to have that vote back.

Oftentimes in these matters we vote in the dark. The Intelligence Committee has a responsibility to be sure that those who are in this Chamber know what is going on if a particular covert action program is one that deserves to be changed.

□ 1630

That is the particular position to which we came. As I said the other day, we had a couple findings in this matter, one in March 1981, with which we did not disagree. It was a covert action, to do certain things in that part of the world. And we agreed to it. Along comes December of 1981, and the ball game has changed: A paramilitary operation, but a paramilitary operation that was going to be controlled, they tell us—controlled—and we believed them. And because it was so serious, we asked that we would be updated every 2 months in this area, and we were. And over that period of time, some 12 or 14 briefings were held on this matter because it was our responsibility to be sure that whatever the finding was, that it was being adhered to. And eventually we decided that it was not. And in May of this year, we took this decision. It was split vote, a partisan split, 9 to 5.

Yet we also had earlier made a decision in the budget conference report for fiscal year 1983, which specifically limited the funds to the interdiction of arms, and the Boland amendment, to which we agreed to back in December of 1982. That amendment specifically forbade the effort to overthrow the Nicaraguan Government or to provoke a military exchange between Honduras and Nicaragua.

That is where we are headed. Believe me, that is where we are headed. So that is the reason why this committee acted.

Do not get away from the basic purpose of this bill. The basic purpose of this bill is to stop covert operation. If you vote for the Mica amendment, you are reversing yourself on the last vote. I ask you not to do it.

Mr. ROBINSON. Mr. Speaker, I move to strike the requisite number of words, and I rise in support of the Mica amendment.

My colleagues, my chairman, the gentleman from Massachusetts, has just made a very wonderful appeal on behalf of bipartisanship with regard to his opening remarks, suggesting that he has tried to keep us moving in that direction, when, throughout the total debate that we have had with regard to this particular subject, there has been nothing but partisanship.

Now, I say to you here this afternoon, the first time that I have been on my feet today, that this is our last chance for a reasonable bipartisan effort that protects our allies and friends and the best interests of the United States.

This is the compromise amendment that is the product of the only bipartisan effort that has gone on with regard to this whole matter. And that was the effort that began at the White House, moved to the majority leader's office, and has continued more or less since that time.

There are more things at stake here than whether or not we cut off covert activity. The gentleman from Florida suggests how important it is that we look at the best interest of the United States and the way that the United States is perceived in other countries with regard to its ability to stand as the best friend that freedom has in the free world. And indeed we can do

that only if we are able to keep on helping those people down there.

Now, something has been made on more than one occasion of the prospective deployment of additional troops down there in that part of the world. Let me quote for you not something from the administration, not something from the Republican Caucus, but something from the majority committee report that accompanies this bill. This is with regard to the overt action, the overt assistance that is suggested by the Boland-Zablocki bill.

The Committee expects that much of the assistance—particularly training, technical assistance or advice—provided under the authority of this subsection could involve the use of U.S. military personnel. It should be emphasized that, since the program of assistance envisioned by this subsection is intended to supplement other types of security assistance, any outstanding restrictions on the numbers of U.S. military advisors permitted within a recipient country would constrain significantly the efficacy of that program. Accordingly, any such restrictions should be reviewed by the Committee on Foreign Affairs with this in mind.

Which, of course, endorses indeed the matter that we will be committing additional troops down there and have them in a position where they can certainly be in danger in more ways than one.

The Mica amendment does indeed go beyond just the matter of cutting off covert aid. It reflects the reciprocity and symmetry concept which has been accepted as the reasonable way to go, I think, by a majority of my colleagues here. It rejects, as proper, the putting off of a decision on U.S. policy in Central America that leaves our allies hanging as to what the United States is going to do. It forgoes the overt program but stipulates covert programs cannot continue unless the President submits a new and acceptable plan. And first and foremost, when the Sandinistas halt support for the insurgents in Central America, the covert program is terminated.

Is that not what we want to bring about? I ask for your support for the Mica amendment as the last chance for a reasonable bipartisan approach to the whole problem.

Mr. YATRON. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong support of the Boland-Zablocki alternative. I strongly believe this bill will provide for a legal and more effective interdiction policy. I will not waste the time of my colleagues elaborating on the various reasons I support this bill. Most of them have already been discussed before this body, so I will confine my remarks to one aspect of this debate which I feel warrants closer attention.

As chairman of the Subcommittee on Human Rights, I have studied in detail the death tolls of innocent people throughout Central America, and especially in El Salvador. Any time you have a major guerrilla insurrection innocent lives are lost. If we continue to pursue a covert aid program supporting groups actively seeking to overthrow the Nicaraguan Government, we risk initiating a major conflict within that country. A full scale guerrilla war in Nicaragua would inevitably lead to a bloodbath which could result in the deaths of thousands of innocent people. Mr. Chairman, I have, and will continue to be, an outspoken critic of the Sandinista Government and its repressive policies. To this end, the Human Rights Subcommittee will conduct a full-scale review of human rights in Nicaragua in the near future. However, if we continue to support guerrilla groups within Nicaragua, the Sandinistas will tighten their grip on the Nicaraguan people, the conflict will escalate and thousands will die.

The Boland-Zablocki alternative would terminate support for these guerrilla groups thereby absolvng us of responsibility for what might become a crisis of epic proportions. In the final analysis, while it is absolutely essential to interdict arms shipments to the insurgents in El Salvador, we cannot continue to sponsor a policy which disregards the human rights of the Nicaraguan people. The Boland-Zablocki alternative seeks to secure our national interests and, at the same time, to uphold the U.S. commitment to the human rights of all peoples.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. YATRON. I yield to the gentleman from Florida.

Mr. MICA. First, I would like to point out that the gentleman says he opposes all covert aid. This committee consistently has approved covert aid. There is an appropriate place in the report of the committee.

And, second, with regard to human rights, I ask all of my colleagues, before you go home and try to discuss this issue, read the Boland-Zablocki report, because that is the most devastating document with regard to what is going on in Nicaragua and their military buildup in this region of any document I have ever seen.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. YATRON. I yield to the gentleman from Minnesota.

□ 1640

Mr. VENTO. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman for his statement with regard to human rights because frequently the view has been that if you can mouth U.S. slogans on democracy, free elections, and a variety of other values, that somehow the U.S. Government is going to be there ready to fund and assist you no matter your true motives.

Indeed, all of us have serious questions with regard to what is going on specifically in Honduras and in Nicaragua and in El Salvador today. The fact of the matter is, on government-to-government basis, we are dealing largely if not exclusively with the military; we are not even dealing with the freely elected governments in these countries that we profess to support.

The real question is whether Congress is going to assert itself; whether we are going to have an effective voice in terms of the Central American foreign policy issue. Some raise the fact that we took an oath of office to support our country, but the question is the character of that support. Are we going to do it under the table or over the table? We should be doing it out front. We should be proud of what we are doing. I am certainly not very proud of the actions of the Reagan administration in Central America.

Mr. Chairman, I am very concerned that we are involved with illegal covert activities in Honduras, Nicaragua, and Central America.

I am very concerned about the direction of our foreign policy, we are at a crossroad, either we can continue as a nation to pursue questionable covert U.S. activities or seek a path of overt actions which I hope would be a U.S. role as a negotiator, and arbitrator not primarily a military role.

The United States, the past 3 years, this Congress specifically has provided the administration what it wanted. Certainly not without dissent, not without debate, but the Reagan administration has by and large received economic and military assistance sought. However, one important limitation, the Boland amendment, in December 1982 was written into law. The Boland provision permitted the use of funds for interdiction of arms going to El Salvador, but very specifically prohibited any U.S. support or aid for any covert activities with the expressed intention of overthrowing the Nicaraguan Government.

Today it is clear that the Reagan administration and some House Members want to rewrite the meaning of the law. They would reinterpret and torture its meaning to accommodate the current administration's actions and apparently future intent rather than be limited by the law.

It is imperative that the Congress maintain an effective voice and establish better accountability concerning the law and the conduct of foreign policy.

The essence of the debate today is whether this House is going to permit the law as manifest in the Boland promise to be stretched and tore into something never intended or are we going to stand up and tell the Reagan

administration they are wrong, that these covert activities are inappropriate and illegal.

Whether the U.S. Government is going to pursue sneak and covert activities under the table, shielded from view or review of the Congress and the American people or can we pursue foreign policy in the full light of U.S. and world opinion with the U.S. Congress participating in a balanced manner as is envisioned in the Constitution.

I am concerned that only after we read in the media about secret wars is the Congress informed.

Mr. Chairman, Marxism has existed for 50 years in Central America; communism is not new to the Western Hemisphere.

It is an appropriate concern of the U.S. people and their elected officials.

But let us not be indifferent to the many other problems of that region. Few nations in that area of the world could ever have been pointed to as ideal democracies. Frankly economic, political, or social justice is simply not a reality for most people in Central America. The United States, of course, supports correcting these inequities, proding these nations into action, addressing these serious shortcomings.

But our covert and overt military support deal most often not with elected leadership, the products of the process we sponsored in many instances, but rather with the self-appointed Central American military leadership, the repressive powers, the tools of the wealthy landowners, and the remnants of military governments that so long have denied the basic human rights to the people of Central America.

We must move U.S. policy away from the covert action and simplistic military support for anyone who waves an anti-Communist banner.

This Congress must not act blindly in support of any and all means to an end, no matter how much we believe in the goal, the objective, our actions to attain the outcome are very important. In the final analysis inappropriate covert actions, actions which say democracy is only important at home in the U.S.A. will be self-defeating.

No one can beat us, but surely we can beat ourselves, if we sacrifice our values and compromise our system of decisionmaking in the heat of pursuing an objective or political support of the Reagan administration we will lose much more than the issue before us today.

It is clear that President Reagan believes that some expansion of the current conflicts in Central America are desirable. I strongly disagree with this view and the President's actions.

Our allies in Central America and Europe differ with this view as well.

I hope that President Reagan will reconsider his announced intentions. The massive naval training deployment off the coast of Honduras and Nicaragua, the intent to send 4,000 so-called military advisers to assist the insurgents in Honduras, all spell trouble and an uncertain future.

When confronted by questions from the media or Members of Congress the insurgents unabashedly report their objective to overthrow the Nicaraguan Government, in spite of the President's assurances to the contrary.

We do not need more military presence, or more arms in this part of the world. No; rather we urgently need a new, a tempered policy for Central America.

The appointment of a commission maybe a good diversion, but that provide no answers for today or in the near future.

There is no framework or symmetry to the current policy in this region or logical consequence as to where we will come out.

It is a jump into the dark and so far has resulted in blackened eyes for the United States and far worse for the people of Central America.

Mr. Chairman, the legislation before us will serve to send a much needed message to President Reagan from the American people. This Congress represents the people and if we do our job right we will hold the administration accountable to the law for its actions and inept policy in Central America.

It is of paramount importance that we defeat the Young and Mica amendments and similar efforts that either shrink from expressing a view or worse yet attempt to legitimize the illegitimate Reagan administration policies in Central America.

Mr. RITTER. Mr. Chairman, will the gentleman yield for a question to the last speaker?

Mr. YATRON. I yield to the gentleman from Pennsylvania.

Mr. RITTER. I thank the gentleman for yielding.

Mr. Chairman, I would like to ask the gentleman from Minnesota, since he is interested in up front rather than under the table, overt rather than covert, would he support covert aid and assistance to the Miskito Indians fighting against genocide inside of Nicaragua, to the Eden Pastora group and to the FEN? It is ironic that the gentleman is now the fourth Member of the other side who has neglected to respond to that question.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. YATRON) has expired.

Mr. ZSCHAU. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman I rise in support of the Broomfield-Mica amendment.

Mr. Chairman and Members of the committee, in a few minutes we are going to be voting on the Broomfield-Mica amendment. It will be one of the most important votes that we are going to have on this issue. Therefore, I think it is appropriate to understand why this amendment was introduced and what it will actually do. We have heard a lot of rhetoric today focusing on generalities, but I think it is important to understand the details of the amendment and its rationale.

It was proposed because there are many of us in this body, including myself, who are not supporters of covert aid but, on the other hand, are troubled by the prospect of an $80 million overt military program involving the "friendly countries" around Nicaragua to interdict arms shipments been Nicaragua and the insurgents in El Salvador.

The Intelligence Committee report clearly states we have a problem there. It's a problem we can't ignore. The Sandinistas are attempting to overthrow the government of El Salvador by providing assistance to the insurgents there. The Boland-Zablocki amendment would cut off covert aid but it would substitute an overt military program which I think would be both ineffective and dangerous. That puts many of us in the body on the horns of a dilemma.

Many of us are troubled by the use of covert operations but many of us are also troubled by the prospect of a new $80 million military extravaganza. We must look to other alternatives. We cannot keep looking to the same old, tired military solutions. Why not look at other alternatives—diplomatic approaches and other ways of solving this problem that do not involve reliance strictly on military solutions.

We need a new plan for dealing with this problem, a plan that is based upon considering bilateral and multilateral negotiations, involvement of the OAS or the United Nations, and any other approach that would stop the actions of Nicaragua against the Government of El Salvador. That is precisely what the Mica amendment proposes. It proposes a cutoff of the covert aid and in its place mandates the administration to prepare a new plan, a plan based on wider set of alternatives.

How will we know whether that plan should be continued or terminated? The Mica amendment proposes some very specific objectives. When the Sandinistas have stopped their activities against El Salvador and when the Sandinistas have started to take steps to implement their commitment to the OAS, then the plan would be terminated.

How would that be determined? It would be determined by the OAS or by the President of the United States.

We have with the Mica amendment a proposal that gets us off the horns of the dilemma. It does not just ignore the problem. Rather in supporting it you would saying, "I do not like to

covert aid and I do not like the overt program in the Boland-Zablocki bill. Let us charge the administration to formulate a better plan. Let us have specific objectives for that plan and let us have outside, third party; namely, the OAS, determine when those objectives have been achieved."

Mr. Chairman, I urge my colleagues to support the Broomfield-Mica amendment.

Mr. ROBINSON. Mr. Chairman, will the gentleman yield?

Mr. ZSCHAU. I yield to the gentleman from Virginia.

Mr. ROBINSON. I thank the gentleman for yielding.

Mr. Chairman, the gentleman refers to an $80 million extravaganza in terms of the overt program. I would like to read from a letter to me from the Secretary of Defense dated the 23d of June. A paragraph reads as follows:

> An interdiction program which treats Nicaragua as a sanctuary would be prohibitively expensive. For example, interdiction against ground supply flow alone could cost upwards of $300 million the first year, and at least $100 million for each subsequent year. Even at these levels, little interdiction could be achieved against air or waterborne infiltration.

So the $80 million that is suggested is a drop in the bucket.

Mr. ZSCHAU. Mr. Chairman, if I may reclaim my time, let me just once again urge my colleagues: Let us look beyond the tired, old military approaches. Let us expand the scope of our planning to include diplomacy in order to stop the actions of the Sandinista government that are destabilizing the country of El Salvador.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. ZSCHAU. I yield to the gentleman from California.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman on his statement and for his very hard and sincere work on this issue.

He makes a couple of very good points.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. LAGOMARSINO and by unanimous consent, Mr. ZSCHAU was allowed to proceed for 2 additional minutes.)

Mr. LAGOMARSINO. If the gentleman will yield further, one of the points is, of course, is that we should not be looking to purely military solutions. However, I think the Boland-Zablocki bill that is before us would lead to more, not less, military intervention.

For example, Costa Rica, a long-time democracy, has no army. How are they going to take part in any kind of interdiction program? The only way would be by some type of militarization of that country.

You make the point, and the gentleman from Virginia makes the point, that the money in the bill is not sufficient to do the job anyway. The report of the Intelligence Committee also points out very clearly that it would take additional American service personnel to carry this out.

So I think the Boland-Zablocki thing will lead to more military activity, not less. I support the gentleman's statements.

I hope the amendment is adopted.

Mr. ZSCHAU. I agree with the statements of the gentleman from California.

The fact that the military program proposed in the Boland-Zablocki amendment would be both ineffective and dangerous is the reason why we have to consider other alternatives. The Broomfield-Mica amendment requires the administration to consider such alternatives. That is why I urge its adoption.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. ZSCHAU. I yield to the gentleman from Nebraska.

Mr. BEREUTER. I thank the gentleman for yielding.

Mr. Chairman, I commend the gentleman's analysis of exactly what the Broomfield-Boland amendment does. I certainly support it.

On the reverse, I think we ought to take a look at what the Solarz-Boland proposal, in fact, which is on the board right now, on the table, does.

For one thing, we are not talking about a 30-day period, an impossible, impractical 30-day period of time when we are going to stop covert action.

□ 1650

It is 30 days, I would say to all my colleagues, and then the President may seek a joint resolution from the Congress and you know how long that would take.

And what would we be starting if in fact it was approved by the Congress?

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. BEREUTER, and by unanimous consent, Mr. ZSCHAU was allowed to proceed for 1 additional minute.)

Mr. ZSCHAU. Mr. Chairman, I yield to the gentleman from Nebraska.

Mr. BEREUTER. Mr. Chairman, what would we be starting under a joint resolution by the Congress? We would be returning to covert aid—bear that in mind, covert assistance, and I thought that is what we were trying to get rid of here. You know, when we started some 19 months ago going down this process of covert assistance, you ought to have been able to predict what was going to happen. We might have been talking about interdiction, but the people affected were interested in the overthrow of the Sandinista government, and all of us have the responsibility. We have left the people sitting in Nicaragua out on a limb.

This is not the appropriate approach. The appropriate approach, Mr. Chairman, is the Broomfield amendment now before us, offered originally by the gentleman from Florida (Mr. MICA).

Mr. DOWNEY of New York. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, I have not spoken on this matter, but I have listened very carefully to the debate, and without attempting to characterize part of the debate, it appears as though some of my colleagues have transited the last 30 years without learning very much about American diplomatic history or the history of Central America.

I do not think it is worth debating again the lessons that we should have learned in this country. Some of the blackest pages of American history have been written in that portion of the world. We have talked over and over again about the fact that American troops have been there twice in this century. The only thing that is different is that no longer are we interested in directly sending in American troops, although that is not yet completely resolved; we are prepared to do a land version of the Bay of Pigs, with the 10,000 thugs, brigands and thieves. We are prepared to finance an overthrow, since that is what they are interested in doing, the Government of Nicaragua.

The gentleman from Indiana (Mr. HAMILTON) and the majority leader have talked eloquently to the issue that this is a policy that will not work. First, it is not working now; and second, there is little support politically in Nicaragua for the group that we are financing.

What we are saying, and it is remarkable that we are even having this debate, that in El Salvador we will not allow the guerrillas to shoot their way into the Government, so do not negotiate with them; but in Nicaragua we are prepared to force the Government to the bargaining table or force the Government to have elections or attempt to interdict arms by the financing of a rebellion from the United States; so what is not good in El Salvador, our country says, is perfectly acceptable in Nicaragua—preposterous, preposterous.

We can get out of this if we seize the golden moment that has presented itself to us. The countries of this region want to resolve this dispute peacefully.

To those of my colleagues whose myopia on viewing the Red menace obscures the enormous suffering of the people in this region, I say this to

them. Is our arrogance so infinite that we can suggest that these countries are ours to lose? That presupposes that they are ours to begin with. It is the millions of poor, innocent people who would like to live in peace, have something for their families, that should concern us first, not whether we lose or win Nicaragua, but whether or not these people can live a life of hope and opportunity. They can live a life of hope and opportunity, Mr. Chairman, if we stop the killing. We can stop the killing by negotiating. We can stop the killing by pursuing policies that are not wrong and we can start it by voting against the Mica amendment.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, in the 7 years that I have been in the Congress I have been faced, as we all have, with issues that are simple and clear and with issues that are very confusing and very complex.

Mr. Chairman, this amendment that we are about to vote on is as clear and as unambiguous as any we have ever considered on the floor of the House. We will stop our aid to the Contras in Nicaragua when Nicaragua stops exporting death and revolution to its neighbors in Central America.

Now, there are those in this Chamber who will say they are for the Mica amendment, who will say they are for symmetry, and yet they voted for the Boland-Solarz amendment.

Well, that option, that shelter, is not going to be available on this next vote. The choices are very, very simple. If you vote yes on the Mica amendment, you vote for a plan to stop the fighting and the death in Nicaragua. If you vote no on the Mica amendment, you vote to cut the ground out from under the people who are fighting for the right to live in a free society, the right to have free elections, the right to have a free press.

If you vote no on the Mica amendment, you vote to give a free hand for the next 30 days to those who believe in seizing power by killing and bombing and burning, who seized power in Nicaragua that way and who are trying to seize power in El Salvador that way.

What is wrong with us that we sit here in this Chamber using subterfuge and semantics and partisan politics to help pound the nails into the lid on the coffin of freedom in Central America?

We are all politicians, all of us want to win our elections; but are our elections so important to us and our values so mixed up that we are going to sit here and play partisan politics with the freedoms and the lives of millions of people in Central America?

When Europeans, white Europeans were threatened with the loss of freedom in World War II, Americans went to their aid with men and money and guns, and now millions of dark-skinned Latins and Indians are being deprived of freedom and we make excuses why we cannot help them.

A nation is like a person. We, too, as a nation, can lose our soul. We, as a nation, can hide our face and pretend not to see, while neighbors lost their lives and their freedoms. We must not hide our faces from those who need our help, not because we are big, not because we are strong, but because we care about our neighbors. That is the character and the strength of the American people.

Mr. WRIGHT. Mr. Chairman, I move to strike the requisite number of words. I had not intended to speak on this amendment, but something was said that surprised me.

I had been looking for my friend, the gentleman from Florida (DAN MICA) and I have not been able to find him. I just wonder if the gentleman is in the chamber?

If not, let me then address this to the gentleman from Michigan (Mr. BROOMFIELD), who is ostensibly the author of this amendment.

Some of the debate leads me to the belief, heretofore unexpected, that the Mica amendment as it is now offered would strike out that provision in the bill which provides $80 million for assistance to friendly governments in the hemisphere who want to seal off and sanitize their borders from the intrusion of arms.

Does it do that? Does it strip the bill of that?

I yield to the gentleman from Michigan.

Mr. BROOMFIELD. I would answer the majority leader, that is very true, for two reasons. First of all, many of us on this side, at least, and I think many on the Democrats' side feel that covert aid is not the way to deal with arms control down there.

Mr. WRIGHT. I thank the gentleman for his answer. I must say I am surprised and disappointed if you do not want to provide anything on top of the table, you just want to do it all under the table. I was not feeling too bad about the Mica amendment, and I thought it was done in good faith. But now I must express my concern over the deletion of this provision.

□ 1700

When I was involved in the effort to try to achieve some compromise, and I do not want to criticize anybody on the grounds of bad faith, we were never contemplating striking from the bill the very thing that makes us honorable and aboveboard and straightforward.

If we are going to be believed in this hemisphere, if we expect anybody to have any confidence at all in the promises that we make, the first thing we have to do is be honest. Renounce deception, be straightforward, be open and aboveboard.

Mr. HYDE. Will the gentleman yield?

Mr. WRIGHT. I may yield a little bit later. I just cannot yield at this time to the gentleman. He believes what we are doing in Nicaragua is self-defense. In my opinions it is not self-defense to invade another country. That is just not my view of things, and I cannot yield to the gentleman right now.

I want to make this one point. I was not prepared to be involved in this particular debate over this particular amendment.

I thought Mr. MICA simply allowed the continuance of the covert, so-called covert aid until certains findings were made. We know it is not covert. It is sneaky. We pretend we are not doing it and we know we are doing it. The whole world knows we doing it. Our enemies know we are doing it and our friends know we are doing it. The Mica amendment permits us to continue it until the Sandinistas have been found either by our President or by the OAS to have ceased and desisted from what they are doing. We all understood that. But I did not realize that this amendment strips from the bill the one straightforward thing that the bill permits and that is help, help for those who need help. That is true self-defense, for goodness sake.

When other people invade your country with arms and you ask the United States for help, that is the kind of help we ought to be able to give when we are invited in by a friendly government that wants to protect its borders from the intrusion of arms.

That is what this bill permits. But it is on top of the table. It is only where invited, and it is not to be used for invading another country. It is not going in uninvited with military and paramilitary forces that we have paid for, that we recruited, equipped, armed, trained, and sent into the borders of a sovereign nation while pretending that we are not doing it.

That is the kind of thing that I discover the amendment would permit to continue. But it would disallow the very honorable, straightforward and decent thing that the bill does permit, and that is $80 million on top of the table to friendly governments who want to protect their borders from the intrusion of arms.

Why in the name of reason do you cut that out? If you really believe what you are saying, that we have a responsibility to help countries defend and maintain their freedom, then is this not precisely the kind of thing we ought to be doing? Surely we should not be saying that the only thing we permit is the sneaky thing that Congress does not know about, that Con-

gress has no control over, that Congress has already forbidden by a unanimous vote in this House as recently as last December.

You want to permit that to continue, behind our backs, under the table, but you do not want to permit us to help countries that come to us and ask for assistance in the way of money that they themselves might defend their borders within their countries from intrusion of the flow of arms from outside. That seems inconsistent in the extreme.

Mr. GINGRICH. Mr. Chairman, I move to strike the requisite number of words.

Mr. HYDE. Mr. Chairman, will the gentleman yield to me?

Mr. GINGRICH. I yield to the gentleman from Illinois.

Mr. HYDE. I thank my friend for yielding.

I would just like to tell this body that the gentleman who was just in the well who made his usual marvelous speech, I asked him one time at a committee hearing how do you then characterize aiding the Afghan rebels who are fighting against a Soviet puppet regime in their own country? How do you deny aid to the insurgents in Nicaragua and at the same time think it is moral and good and not sneaky to help the rebels in Afghanistan?

After a slight pause, after a slight pause, the gentleman said, "I have no answer to that."

I thank the gentleman for yielding.

Mr. GINGRICH. Mr. Chairman, I rise frankly to respond to the last two speakers on this side of the aisle because I think they put it pretty clearly. This is the day before the 150th anniversary of the death of William Wilberforce. Most of you do not know who William Wilberforce was, or he is not a big factor in your lives. But William Wilberforce was the man who led the crusade that ended slavery in the British Empire, a convert to Methodism, a man who spent his lifetime dedicated to the idea that the abolition of slavery was worthwhile.

It is interesting to vote the day before the anniversary of his death and to think about William Wilberforce would have voted—he was a member of Parliament—had he been a Member of this Congress.

The gentleman from Texas just said and I quote: "You think you don't want to do it on top of the table, you just want to do it under the table." And he said, "It is not self-defense to invade another country."

But, of course, he will vote for aid to Israel despite the invasion of Lebanon. He will even, in fact, break precisely the principles he establishes when it is politically appropriate.

This is not a vote on morality. This is not a vote on whether this country is pure and is doing everything aboveboard.

This is a vote on whether or not we are going to cripple the forces of freedom. This is a vote on whether we are going to help the Soviet Union and the Cubans and the 9,000 Communist bloc advisers who are in Nicaragua. This is what this is a vote about.

The gentleman from New York articulated brilliantly the radical doctrine of his wing of his party. He said at one point we support, and I quote: "10,000 thugs, brigands and thieves"; strong, harsh language.

He did not say anything about the Soviets who are in fact arming people, trying to kill innocent folks in El Salvador. He did not say anything about the nature of reality in Central America.

If you are for America, what he said was, across this planet, on this floor, if you are for America you can expect an American Congressman to call you a thug, brigand, or thief. But if you are in fact willing to subvert El Salvador, if you are in fact willing to support a dictatorship in Nicaragua, it is not worth mentioning. That is not a bad thing to do.

He said are we so arrogant and so infinite that we can suppose we have this land to lose? Well, I think that a number of people in this body would say over and over again about Israel, about Germany, about France, about England, yes, as a free people we Americans do have an obligation to help our neighbors; yes, in Japan, there is a country that we would help.

But El Salvador is different. For some reason that is not as important.

It is reasonable to doubt that.

He says people who would like to live in peace, and I think that is true. I say to you if you honestly believe the war in El Salvador was started in Washington, then you ought to vote against the Broomfield-Mica amendment. If you honestly believe that the CIA is more dangerous than the KGB, then you ought to vote against Broomfield-Mica. If you honestly believe that the people who want to live in peace—let the gentlemen hiss. That is a useful game—I think it reasonable that people who would describe our allies as thugs, brigands, and thieves would hiss.

But the fact is that if you vote against Broomfield-Mica, what you are voting for is not peace; you are voting for slavery.

Why do we do it under the table, and it is not under the table, it is not covert. There has not been anything covert in this city since the Watergate era and since the publication of the Pentagon Papers. This is the most open circus on the planet.

We do it without legally defining it because weaker countries cannot possible police their borders overtly. Have we learned none of the lessons of the last 30 years, as the gentleman from New York said?

Do you honestly believe that those of you who are going to vote against Broomfield-Mica would vote for the kind of overt actions that are necessary? Do you want to vote for a blockade? No.

Do you want to vote for adequate forces in the field to stop this? No.

If you want to be moral about this, and you want to talk about being above the table, why do you not stand up and tell the American people that in fact if El Salvador goes down the drain that is the breaks, that it is not worth in fact trying to do realistic things that are necessary.

Mr. McCURDY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I am somewhat amazed by the comments that have been voiced today from the other side of the aisle.

□ 1710

Some Members have said that if opponents of this covert action are on-the-table action, if we truly believe in support for the governments in the region, then why does one of us not stand up and say so? Well, Mr. Chairman, I am standing up today and telling you just that. I voted the other day not to cap the number of advisors in El Salvador; I voted not to put prohibitions on the use of military exercises in the region and I will match my national security voting record with Members on either side of the aisle. I am one that will proudly stand up and make that statement anywhere in this country or elsewhere in the world.

Other Members have come today and said it is not the American character, it is not mainstream America what we are doing today. But, I would submit to you that the American character, and mainstream America will support honest, well thought out, clearly enunciated policies.

The beauty of this country and institution is that we do have the opportunity to debate and to inform our constituents on the issues of the day.

The Intelligence Committee performs a very, very important function. One of our important responsibilities is to excercise oversight and to inform this body on U.S. foreign and intelligence policy. What we have today is a substitute for policy, because the administration has not sufficiently articulated a policy for Central America.

It is a lack, it is the very absence of that clear policy, ladies and gentlemen that brings us here today.

This is no longer a secret war. Members, many Members will use the covert action, the unlimited, uncontrolled covert action as something, as a cover to hide behind.

This Member stands up today and says we have a stake in Central America, but I plead with you, let us do it based on sound, clearly enunciated policy, not five or six different directions at once, not voices coming from every direction, but one strong clear policy.

Mr. ENGLISH. Would the gentleman yield to me?

Mr. McCURDY. I yield to my colleague from Oklahoma.

Mr. ENGLISH. I would like to commend the gentleman for his statement, particularly in behalf of those of us who certainly would be willing to support an open effort to cease the arms flow from Nicaragua into El Salvador, but who raise serious questions about the wisdom of following a covert policy that is no longer covert and has not been for some time. So, I want to thank the gentleman for his statement and I think that he speaks for far more than just himself with those eloquent words.

Mr. McCURDY. I thank the gentleman.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. McCURDY. I yield.

Mr. STRATTON. I want to commend the gentleman because he has been a very responsible member of the Armed Services Committee and he has voted for a strong defense. And it is quite true that he is prepared to support whatever might be required in an overt operation. But I was a little disturbed when I heard the majority leader say that one of the reasons he was going to vote against the Broomfield-Mica bill was that it eliminated $80 million that could be supplied for overt activities that would do the same job with respect to Central America as the covert operations are doing.

(On request of Mr. STRATTON and by unanimous consent, Mr. McCURDY was allowed to proceed for 5 additional minutes.)

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. McCURDY. I yield to the gentleman.

Mr. STRATTON. The gentleman from Oklahoma, as a member of the committee, is well aware, I am sure, that $80 million is only a drop in the bucket for what would be required to do the same job on interdicting arms to El Salvador on an overt basis.

The committee, I think, has already been advised that to do the same job being done now covertly, it would cost some $300 million for the first year and at least $100 million for every year thereafter. And if a quarantine were required that would cost $1.2 billion for a single year.

Now, surely the gentleman from Texas (Mr. WRIGHT) realizes that the House is certainly not prepared to support that kind of money. And to suggest that we are undermining the future of the Costa Rica and Honduras and El Salvador because we are rejecting $80 million is simply not realistic. The job will cost a great deal more, and this Congress would never approve that kind of military expenditure.

Mr. WRIGHT. I wonder if the gentleman would yield to me so I can respond to what my friend from New York has just said.

Mr. McCURDY. I yield to the majority leader.

Mr. WRIGHT. It was not my suggestion that the $80 million in overt and open assistance for countries who want to seal their borders from the intrusion of outside arms would do the same thing that we are doing, supposedly, covertly. That was not my suggestion. I did not mean to leave that implication. What the $80 million does is quite honorable and quite fully accepted in the family of nations.

It helps nations who ask for that help to perform within their own borders thoroughly legitimate activities in self-defense and self-protection. But this $80 million of overt aid which is stricken, I discover, by the Mica amendment, was not intended to finance an invasion of Nicaragua; that is not what that was for. It was to be held within the borders of countries that ask for it, that seek our aid and who want to monitor and control and stop the flow of armaments into their own country. And I think that is thoroughly legitimate. Maybe $80 million is not enough; I do not know how much it will take. But it is more than they have now.

Mr. STRATTON. If the gentleman would yield to me, if we stop the present covert aid, Honduras and Costa Rica are going to be very much concerned about their future and about their borders $80 million is not going to do anything substantial to protect the borders of Honduras and certainly not the borders of Costa Rica. We are just kidding ourselves on that.

Mr. WEISS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do not intend to take my 5 minutes. I rise really only to call attention again to the tone and the path which debates on this floor on this and related issues have a tendency to take.

The gentleman from Georgia (Mr. GINGRICH) in the statement that he just made indulged himself in some rhetorical excesses which I would hope that he would want to reconsider and withdraw.

I would like to think that those Members on his side of the aisle who applauded those statements would also want to rethink and reconsider. Does anybody, does the gentleman from Georgia really believe that there is any Member in this body on either side of the aisle who really prefers and thinks better of the KGB than of the CIA? The gentleman from South Carolina (Mr. HARTNETT) indicates that he does. So there are a couple of people who really question the loyalty and the motivation of other Members of the House of Representatives of the United States of America.

I think that that is reprehensible, shameful, despicable, and has no place in this body.

I yield back the balance of my time.

□ 1720

Mr. ROTH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I, too, would hope that we would not question the motivations of our fellow Members. But when we review these issues realistically, I think, both sides of the aisle have to question the double standard that is so evident here in this Chamber.

For example, when we in the Foreign Affairs Committee debated the foreign aid authorization bill, we had all kinds of restrictions, all kinds of demands, all types of criteria that El Salvador had to follow. Free elections, human rights, all things that we applaud, unconditional dialog with the rebels and all those other high sounding goals we invoke here in this House.

And yet, when it comes to Nicaragua, a country whose government repeatedly has said that they live according to the Marxist-Leninist philosophy, a government like that, we in this House will do nothing to impede their aggression, we have to keep our hands off.

We hear that we have inflamed the rhetoric in this House today. I disagree. When I review the rhetoric of the leaders on your side of the aisle—I find that historically they have spoken in the tone and content of the rhetoric on this side of the aisle today.

For example, this side the Democrat side had a President some 23 years ago, he in his inaugural address spoke in determined tone and rhetoric about Central America. What did he say?

He said:

To our sister republics south of the border we offer a special pledge, to convert our good words into good deeds, to assist free men and free governments in casting off the chains of poverty, but this peaceful revolution cannot become the prey of hostile powers.

President Kennedy has a message for us today. In his inaugural address John Kennedy went on to say:

Let all our neighbors know that we shall join with them to oppose oppression and subversion anywhere in the Americas and let every other power know that this hemisphere intends to remain the master of its own house.

That was a Democratic President, from your side of the aisle, John Kennedy.

And I am proud of the Members on our side of the aisle because I think that the speeches they have made have had a historical perspective.

If I had to judge about where the Members on this side of the aisle, are coming from, I would conclude they are carrying on the traditions, they are carrying on the philosophy and the principles set forth by our leaders for the last 200 years.

We have debated here for 2 days. Seldom is the Monroe Doctrine invoked. I think we have to take a look at our principles, our heritage, our roots and debate from an historical perspective.

I am proud of the statements that were made on this side of the aisle because they have been in historical perspective, which I am thankful we have not lost on this side of the aisle.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from California.

Mr. DELLUMS. I thank the gentleman for yielding.

I accept the thrust of the gentleman's argument and that is that oftentimes we do engage in a dual standard in terms of how we evaluate the conduct of other nations.

And let us accept, for example, the gentleman's criticism of Nicaragua. This gentleman's basic question is do we move Nicaragua closer to our definition of democracy through threatening war or do we move them closer to our definition of democracy by advocating peaceful solutions and political solutions to the problems. That is this gentleman's concern.

If you want to move Nicaragua in that direction, do we have to do it with gunboat diplomacy and the deployment of 20,000 troops or do we use the magnificent power of this Nation to advocate peace. That is what the guts of this whole issue is all about.

Mr. ROTH. I appreciate the gentleman's comments, but we talked about symmetry. Well, why do we not apply the same standards to Nicaragua that we are applying to El Salvador? Why do we not do that, Then we would have real symmetry.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. I thank the gentleman for yielding.

I think the gentleman from California raises a good point. Which is the better way to go? And I would remind the gentleman and our colleagues that we helped install the Sandinista government based on the promises that they made to us and our neighbors in the Organization of American States.

I would also remined the gentleman that the American taxpayer gave the Sandinista government $125 million to help them get started with their promised program of peace, along with the program of freedom, free speech, free elections, free press. All of these things they reneged on.

We tried what the gentleman is suggesting and we tried hard.

Now what we are trying to do is to defend our other friends in the region from these very people who went back on specific promises.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ROTH) has expired.

(At the request of Mr. DELLUMS and by unanimous consent, Mr. ROTH was allowed to proceed for 3 additional minutes.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from California.

Mr. DELLUMS. I thank the gentleman for yielding.

Mr. Chairman, let us accept that the statement of my colleague is fact. I still—and even the gentleman's response to my question—I ask the question again. Even if we establish the same criteria for El Salvador as we do for Nicaragua, the gut question that we still must ask, even if we have used some time, does that mean we use the awesome power of the United States to engage in war? That is my concern. What split this country apart in the 1970's was our preoccupation with killing and death in Vietnam and what American people are talking about is peace.

And what I am saying to my colleague is: Can we move Nicaragua closer to our concept of democracy through advocating peace as opposed to this insanity, this insane preoccupation with war?

Mr. ROTH. If I may reclaim my time, I think the gentleman from California makes a good statement, but I hope that the gentleman is as impassioned in his pleas when we debate the foreign aid authorization bill and when we debate and weigh the stipulations for El Salvador.

I hope the gentleman will come to the floor and support me in that effort. And if we have a chance to introduce an amendment to apply the same standards to Nicaragua as we have applied to El Salvador, I hope my good friend will come to the floor and help me.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman from Wisconsin has put his finger on the real issues and I think the gentleman from California has responded to it earnestly even though I disagree completely with his conclusion.

This business about secret or covert aid versus open or overt aid is nonsense. The phony business about some aid being sneaky or under the table or over the table, it is just a lot of hot air. Everybody in the world, who cares, knows about the aid and the operations, and it is absurd to talk about one type being bad or another being good. After all should we, and, indeed, are we supporting the insurgency in Afghanistan? Should we abandon those freedom fighters because of some covert aid rhetoric?

Everybody knows the issue is: Are we going to continue to supply aid and assistance to people who are fighting against the Government in Nicaragua, the insurgents. It is no secret. Everybody knows about it. So that is not the question. Should we or should we not provide this aid?

Now the real question is this, it seems to me. Since we know that Nicaragua and Cuba and Russia are supplying the insurgents in El Salvador for the purpose of overthrowing the Government of El Salvador, is it appropriate and is it justifiable for the allies of El Salvador, including the United States, to provide aid to people who are trying to change, or change the conduct of, the Government of Nicaragua. That is the question. As long as Nicaragua is aiding foreign insurgency, is it justifiable for the United States to do so as well, in response to the Nicaraguan action?

And it seems to me that the amendment of the gentleman from Florida (Mr. MICA)—regardless of how one votes on the final outcome of this bill—addresses that question.

When Nicaragua, Cuba, and Russia stop supplying the insurgents in El Salvador to overthrow that Government, then the United States certainly ought to stop supplying insurgents in Nicaragua.

What we really need is a political and nonviolent resolution of the problems in Central America. We need negotiation. We need the help of our Latin American allies as mediators. We need an end to oppression and the denial of human rights and the killing of innocent people. We should let the Central Americans solve their own problems without outside intervention of military power and we should support the tender buds of emerging democracy.

But, in order to do this we must not let Cuba and Russia have a free hand to support exported violent revolution and military assassins to be used against friendly regimes. When they stop aiding insurgency, then we should too—at once.

Let us help bring peace, justice, stability, democracy and economic well-being to this region.

Mr. ROTH. I thank the gentleman from Georgia for making that statement.

Again I think the gentleman from Georgia has demonstrated that he can put into a nutshell of 2 minutes what it takes us 10 hours to debate here on the floor.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. ROTH) has again expired.

(At the request of Mr. WALKER and by unanimous consent, Mr. ROTH was allowed to proceed for 1 additional minute.)

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, I think there is one other point that does answer the very legitimate points made by the gentleman from California and that is that covert aid is at least going to people who are fighting within their own country. We are not adopting a policy of militarism. If you go to overt aid, you are very definitely to a policy of militarism in that part of the world. And that is specifically why the covert aid type of policy is preferable to overt aid.

□ 1730

Mr. GARCIA. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I have sat here for the last 3 or 4 hours and I have heard us talk about Nicaragua and Central America, that we are in danger of losing Central America.

I just wonder who gives us the right to tell the people of Central America what to do and what not to do. It is not ours to win or lose. Central America belongs to the Central Americans. Who in God's name gives us the right to stand up here and decide the fate of millions of people who live in Central America, as if we are all-powerful and God. We are not God.

Let me tell you something about Central America; 50 years ago, we sent our soldiers into Nicaragua. I want to remind you that Somoza, who created these problems we are in today, was a West Point graduate. Has anybody brought that up?

We have been in Nicaragua for 50 years. And in this debate here, before the world, once again we are telling them what they should do. And every time we do, what we are really saying to them is, "Get closer to the Soviets, move closer to the Soviets."

They have enough problems in Nicaragua today. If we stepped aside, there is no doubt in my mind, the people of Nicaragua themselves would rise up and say, "We want democracy, we have had enough of Somoza, we have had enough of the other, of the Soviet-led Sandinistas."

I just want to make it very clear to all of you, we have sat around here and made it very clear that we are the big macho. And you know, the saddest part of all in our decisions today, is not going to affect the young people in many of your districts. They will find a way to get out of it. I will tell you who is going to fight this war. It is going to be a lot of young Hispanics and blacks from the Southwest and from the Northeast who will go in there. Others will find a way to make certain that they are not participants in a shooting war.

I say that to my colleagues because if you look up the number of your people who have died in Vietnam and look at it and analyze it, most of those were poor young men and women who grew up in the ghettoes of America.

The Contadora group. For the first time Hispanics in Central and South America are trying to work together. Why are we forcing their hand? Why are we telling them that we as Americans know better? For the first time they are uniting and joining together in a common cause to stop tyranny. Why can we not listen to them? Why can we not give them an opportunity to say to themselves, "Hey, we are doing something for our own hemisphere."

It is important that we understand that. I do not question the morality of any Member of this Congress. I think this is a partisan issue.

The President said at his Tuesday night press conference that it would be a "very grave mistake if the legislature interfered with what we're trying to do" with covert aid. Are we interfering, either Republican or Democrat, by deciding whether or not we will authorize or appropriate funds for these operations? It is not only our right to do so, it is our responsibility.

I think it is important that we do debate this issue, because today we may just be starting the next world war.

In this hemisphere we have long neglected Central and South America. We have long said to them south of our borders and in Central America, "Tomorrow, manana, manana we will get together with you." And now it has all come to roost.

And I say that to my colleagues because I think it is important that you understand that as Hispanics—and, yes, I am an American, I am proud to be an American, I was born in this country and I love this country and I fought for this country in Korea. But I am going to say something to you: Please give us a chance to discover for ourselves that we can stand up.

The CHAIRMAN. The time of the gentleman from New York (Mr. GARCIA) has expired.

(On request of Mr. WOLPE and by unanimous consent, Mr. GARCIA was allowed to proceed for 3 additional minutes.)

Mr. WOLPE. Mr. Chairman, will the gentleman yield?

Mr. GARCIA. I yield to the gentleman from Michigan.

Mr. WOLPE. I thank the gentleman for yielding.

Mr. Chairman, I want to congratulate the gentleman on the eloquence of the statement he just made.

As we reflect upon the debate that is taking place today, probably one of the most extraordinary aspects of that debate is that there are probably no more than a dozen Members of this Chamber who could identify on a map, if they were given that map, the countries of Central America.

It is a harsh reality, but it is the truth. There are very few Members of this body, just as there are very few of our constituents, who know much about any of the societies within Central America.

So what is happening is that this entire debate is turning not upon our knowledge of those societies, because that is not what is really at issue. Rather, the debate is turning on labels and slogans with which we are familiar, and we are responding to lots of labels and slogans without understanding the reality behind either in Central America. When that happens, we get suckered.

Time and time again there have been governments that have arisen in Central America, or Latin America more generally, that have taken upon themselves the label of anti-Communist. And the moment they have done that, knowing in advance that that was a sure-fire means of guaranteeing an American response, we have come trotting to their assistance. And in the name of anticommunism, we have supported time and time again rightwing dictatorships that have been violative of the rights of the people, that have been protective of a few land-owning families who are maintained in power with the support of rightwing military groups.

In Chile, in Guatemala, in El Salvador, in Nicaragua, that has been the pattern of American response to the region.

So the point the gentleman from New York (Mr. GARCIA) makes has two sides to it. One side is that we do not understand and do not identify with the human reality of the countries themselves. And when we respond on the basis of labels and stereotypes, what we do is to compromise the interests of the countries involved and the peoples in those countries. And the other side of the coin is that we compromise our own interests as well, because at that point we play directly into the hands of those who want to portray the United States as the imperialist, as the intervenor.

We have an opportunity now, as the gentleman has noted so eloquently, to ally ourselves with our key friends and allies within the region who do share our values, the Mexicans, the Venezuelans, the Colombians, the Panamanians, who are trying to mediate, to bring about a lasting political solution. Instead, here we are, in the midst of their peace initiative, sending new military forces into the region. That has been our response to their initiative.

That is silly. It is silly in terms of our goal of long-term stability in the region, and it is counterproductive in terms of our interests in resisting the expansion of communism.

I thank the gentleman from New York for his contribution.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Mica amendment.

Mr. Chairman, I, too, have been sitting and listening to this debate, and I have made some notes as it went along, because it seems to me that we are engaged in a very important discussion that goes to the heart of what the foreign policy of this country may be, not only toward Central America in the future, but toward the world in the future.

And what I have heard is a debate that borders upon disinformation. I have heard a human rights argument made to defend a government that even the committee report that we have before us says is an abuser of human rights.

I have heard the Government of Nicaragua referred to as a freely elected government.

I heard the majority leader disparage covert aid and leave us with the idea that we probably should not even be supporting the rebels in Afghanistan.

Now, that kind of criticism I understand comes from deep feeling. I understand that the critics are obviously concerned about the covert aid in Nicaragua and Central America. But as I sat here and listened, I have come to the question of: What is it they are really concerned about? Are they concerned about what we are doing? Or are they concerned about the fact that we may be winning?

It sounds to me like the critics of our Nicaraguan policy are most upset about the fact that it has been somewhat successful. Let us look at the record. What we have heard said here on the floor by the critics is that the interdiction of supplies has not worked. And yet there has been evidence presented that it has worked, that it has been somewhat successful. It has not been perfect, it has not done everything we would want it to do. It has not even done all of the things that we would hope that a modestly successful program would do. But it has done some things well. It has stopped the flow of some arms, it has made them go to smaller caches of arms in terms of their shipments. It has done some good.

□ 1740

The critics have also said that the fact that the freedom fighters within Nicaragua are beginning to worry the Sandinista government some is a sign that we are wrong. They have also said that because there are now thousands of freedom fighters in Nicaragua rather than the hundreds that started out, that that that is somehow a reason why we ought to abandon the fight.

In my book, those are arguments that add up to trying to stop something that we are winning. If you look at it another way, we heard talk about a double standard here a few minutes ago. Let us look at it another way. Let us look at what these same critics would be saying if there were similar Communist successes taking place in El Salvador.

Suppose, for example, that the stated goals of a Communist action in El Salvador were being achieved with even modest success. The critics would then point to such successes as a reason to force our ally to accommodate those Communists. If the Government in El Salvador were being thrown into turmoil by Communist guerrilla activities, these critics, the same critics, would be out here saying that that is a sure sign of the failure of that society.

If the Communist guerrilla movement had increased in size by 10 or 20 fold in a period of just a few months, the liberal critics here would tell us the whole country was doomed and that we ought to beat a hasty retreat.

In other words, what the critics will accept as success in terms of Communist activity they are prepared to deny to our own policies. By the standards used by our own foreign policy critics to tell us whether the Communists are winning or losing when they are battling our friends, by those standards we seem to be winning in Nicaragua and that is what seems to upset the critics the most. They are prepared to accept and accommodate Communist successes. They are unprepared and unwilling to accept successful activities by pro-Western freedom fighters.

Now, that is a double standard with tragic consequences for now and for the future. Let us end that kind of double standard. Let us vote for the Broomfield-Mica amendment and permit us to get on with the job of making Central America safe for freedom.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has expired.

(On request of Mr. LAGOMARSINO and by unanimous consent, Mr. WALKER was allowed to proceed for 1 additional minute.)

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from California.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

Mr. Chairman, I would like to commend the gentleman's statement. It seems to me that he is right on target; that the interdiction is showing some signs of success, and the ultimate interdiction of all would be for Nicaragua to stop exporting arms and revolution. That is exactly what the amendment before us would call for.

It is interesting although this activity goes on, for the first time, as it continues, that Nicaragua is now starting to talk about knocking off the supplying of arms to guerrilla groups in Central America. I think the gentleman is right on target.

Mr. WALKER. I think the gentleman makes an excellent point, and, of course, that is precisely what we could achieve through the Broomfield-Mica amendment.

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I would be glad to yield to the gentleman from California.

Mr. DELLUMS. I thank my colleague for yielding.

Mr. Chairman, I would ask my colleague the same question I just asked the other gentleman because no one gave me a satisfactory answer.

The gentleman spoke articulately about a double standard. Let us accept the premise of your argument. I ask you to answer this question:

Do we move beyond the double standard by moving hastily and aggressively toward the principles of war or do we better accomplish that by attempting negotiation, political solution, and a peaceful orientation to the problem? Why such great haste to move toward war that may ultimately end up in tragic death of not only people in Central America, but some of our own young people in this country?

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has again expired.

(On request of Mr. DELLUMS and by unanimous consent, Mr. WALKER was allowed to proceed for 2 additional minutes.)

Mr. DELLUMS. If the gentleman will yield further, I ask this question very sincerely, because I think that is an issue that has to be faced here.

Mr. WALKER. I thank the gentleman and I agree with him. I would say to the gentleman that we should be moving toward peace, and what we ought to be doing is making certain that we are not the only ones trying to move toward peace, but that our ad-

versaries in that area of the world also have some stimulation to move toward peace.

That is what Broomfield-Mica is all about. It says that we will end the covert aid as soon as the Sandinista government ends its subversion of other governments in that area. So I would say to the gentleman that his point is spoken to well by the Broomfield-Mica approach. It is precisely the kind of thing that will get us to the symmetry—that is the argument that is being used—that may bring peace to the area.

No one wants to put us on a war footing. Everyone wants to move toward peace, and it seems to me that peace is best achieved when you take actions that force both sides to accept human rights, that force both sides to accept peaceful settlement of the conflicts of that area.

Mr. SMITH of Florida. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I would be glad to yield to the gentleman from Florida.

Mr. SMITH of Florida. I thank the gentleman for yielding.

Mr. Chairman, would the gentleman just answer a question for me? I have been here a short time, and I have found a great deal to disagree with the gentleman about, but in this case I can agree with his statement that we have really brought them to the point where it looks like we are winning to some degree.

That is the very point, however, that I wish to query the gentleman on. Last week the Sandinista government, through Mr. Ortega, made the statement that they would be willing to accept multilateral negotiations. Does the gentleman have any reason why since that time no mention of that has been made by the administration, no one has done anything to move forward from this point now and move on to those negotiations?

Why do we have to continue with the covert aid when it has, in fact, achieved its desired result and now we need to take the diplomatic channel and show them that we really mean what we say?

Mr. WALKER. I thank the gentleman for his statement. I am not a spokesman for the administration. I think that we ought to have negotiations toward that end.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has again expired.

(On request of Mr. KEMP and by unanimous consent, Mr. WALKER was allowed to proceed for 2 additional minutes.)

Mr. WALKER. I would say to the gentleman that we ought not cut off the option of covert aid which has seemed to have brought us to this situation where the Nicaraguan Government would begin to make those kinds of concessions.

What we are debating on the floor here today is whether or not we cut off that option.

Mr. SMITH of Florida. Is it not a fact that with the Boland amendment to the Mica substitute, we have not cut off that aid, we have not cut off the option? We are merely for terminating for a 30-day period, which almost everyone agrees will not harm the troops in the field.

Mr. WALKER. I would disagree with the gentleman absolutely on that, because it would take a joint resolution to get back the aid, and that could take months, as the gentleman knows, the way this body works.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I would be glad to yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman for yielding.

Mr. Chairman, the gentleman makes an outstanding point. And to my colleagues who just made mention of the fact that Ortega had suggested that maybe diplomacy was a way of bringing this crisis to some resolution, does anyone rationally think that Ortega would have made that statement had it not been for the impact of some of the events of the past few weeks?

Now, to shut off our assistance midstream seems to me to preclude the success of that opportunity. The President has expressed strong support for a diplomatic resolution of the crisis, and Ambassador Stone is working right now throughout Central America to that end; and to suggest that we are just going to cut off our efforts unilaterally seems to me to vitiate all of the good impact our efforts have had on Ortega and other Sandinistas over the past few months.

So I would beg the House to support the Mica amendment. If this bill should pass without the Mica amendment at this point would simply vitiate the progress that has taken place which is persuading General Ortega to seek a peaceful settlement of the conflict.

So if you are for peaceful resolution of these disputes, you should be for the Mica-Broomfield substitute. If you are for retreat and retrenchment in the face of Marxist advances, then you should shut off U.S. assistance and vote for Solarz.

Let me elaborate, at this point Mr. Chairman,

The overall purpose of the Boland-Zablocki bill is to limit the options available to the President of the United States to combat hostile activities directed at peaceful American States and friends.

It seems to me that if we are to take such an unprecedented step, we should be bluntly honest about what we are doing, and why, and the international ramifications of such a move toward isolationism.

It is an established fact by even the critics that the Government of Nicaragua is actively engaged in an effort to destabilize the governments of its neighbors in Central America. It is an established fact that Cuba, supported by the Soviet Union, is providing military arms and equipment and support personnel to sustain guerrilla forces in Central America. These facts are not disputed even by the Intelligence Committee.

In other words, it is an established fact that for the first time in our history, there is a clear and present danger to the security and territorial integrity of Latin American allies, resulting from the deliberate actions of nonhemispheric outside forces to undermine the stability of Central America.

This is a stunning alteration in the global strategic setting. In the past, our hemisphere has been characterized by the absence of international conflict. Today, we are faced with the realization that that era has passed, and we must confront the extension of hostile power into our hemisphere. Should that hostile presence continue to grow, we would be forced into a radical reorientation of our defense posture, and our ability to protect our vital interests elsewhere in the world would erode.

These facts do not come as news to anyone in this Chamber. Only last week, we gathered here to listen to classified briefings on developments in Central America, in which all this was discussed at length. Frankly, I came away from that session puzzled as to why we needed a secret session at all. There was nothing new or startling presented at that meeting, nothing we had not heard before, publicly. I only wish the American people could have listened in.

The point is that no one can say that the Members of this House are unaware of the magnitude of the threat to Central America, and to our own security. No one can say that the Members of this House are not intimately acquainted with the forces at work in the region. And no one can say that the Members of this House do not understand the implications of our vote here today.

For the question before us is a simple one. Are we, as a nation, committed to maintaining the peace and integrity and security of our hemisphere, or are we not? If we are not, then let us say so publicly. If we do not believe that the security of Central America merits the commitment of our resources, then let us so declare. But if we are determined to preserve the peace and stability of our hemisphere, if this is a worthy goal of our national policy, if these are vital inter-

ests of the United States, then it makes no sense whatsoever for us to tie the President's hands in effecting our purpose.

But it has to be one way or the other. There may be Members of this House who believe that we should refrain from military involvement, covert or overt, in Central America, even if it means the expansion of Marxist power in the region. If so, let them come forward, and state their position clearly, so that we may debate the issue. But it is a blatant abdication of our responsibility as legislators to enact piecemeal legislation, in a policy fog, that chips away at the President's ability to act without offering a substitute goal.

From my perspective, this legislation is incomprehensible. It does not proscribe U.S. efforts to interdict arms intended for leftist guerrillas. On the contrary, it would set up a specific fund for such a program, so long as it is an overt program.

So apparently the objection is not to the goal of the program, but only the means. OK. How does an overt program differ from a covert program? Well, for one thing, it would insure that our assistance did not accidentally help the democratic forces in Nicaragua. It would tell the world that this country is no closet supporter of democracy; that we will not let our funds be used to aid and abet peoples fighting against totalitarian injustice.

What is happening here? Why are some Members of this body so anxious to dissociate U.S. support from people fighting to reclaim their just rights? If Members of this Chamber believe that covert assistance is inherently bad, then why do we not pass a law prohibiting covert assistance to freedom fighters in Afghanistan? And if covert assistance is not inherently bad, then what is the policy rationale explaining why we should not use it in Central America against forces threatening the security of our friends and allies?

What is the policy behind this legislation? Is there one?

Let me be clear. There are many questions left unanswered to date about the President's policy in Central America, questions we have every right to expect the President to answer. For example, what are we willing to do in order to keep Central America out of the Soviet-Cuban sphere of influence?

People in the region, friend and foe alike, are constantly looking for signs to indicate whether the situation is moving in our favor or in favor of the Soviet Union. How do we make sure that friend and foe alike come to believe that the situation will go our way?

Some very different groups are contending for power in the region. Whom do we recognize as the best representatives of the cause of freedom? Since somebody will triumph in Central America, what are we going to do to see to it that the right people do?

I do not pretend to have all the answers to these questions. I do not believe that the President has given us answers to all these questions but I know that the sponsors of this legislation have not provided any answers at all to these questions.

But at present, at least we have a direction. The President is determined that the United States will not allow Soviet/Cuban expansion in our hemisphere. He is determined that the Soviet Union and its client states understand that their drive in Central America will not succeed and I support him.

The Boland-Zablocki bill is flatly inconsistent with that policy direction. Its purpose is to prohibit funding for military or paramilitary operations in Nicaragua that oppose the spread of Soviet/Cuban influence and control. If it passes, whatever the intent of its sponsors, it would signal a change in direction in U.S. policy. Both friends and enemies alike would perceive that the U.S. Congress is pulling American power out of the region and leaving a vacuum that our adversaries would be encouraged to redouble their efforts to fill. And sooner or later, we could well be forced to act militarily, on a large scale, under adverse circumstances, to keep from losing Central America. Is that not the lesson of the thirties?

Is this the same direction we will follow? I hope not.

I urge support for the Mica bipartisan effort as the best compromise possible on behalf of our Nation and our friends in Central America.

The fundamental question facing us as a nation is how to meet the challenge of aggression in this hemisphere. Never before has our country faced the threat of international instability on our very borders. Never before have our neighbors so needed our support and that is why I urge support for Mica-Broomfield and defeat of Boland-Zablocki.

What we need are initiatives that restrict the ability of our adversaries to succeed. What we have is a partisan attempt that restricts our own country.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. WALKER) has again expired.

Mr. BEDELL. Mr. Chairman, I ask unanimous consent that the gentleman have 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. HARKIN. Mr. Chairman, reserving the right to object, some of us have been sitting here for many, many hours waiting to make our statements not only on this bill but on one or more of the amendments that have been offered. I know myself I have been here for several hours and some of my colleagues sitting by me have been here for 2 hours waiting to speak.

I do not want to cut off any debat at all, but I have a feeling that as the hour gets later that those of us who have been waiting a long time to speak will be precluded from making our statements.

So I will not object, but I just hope that those who have the well and who go beyond the 5 minutes will accord us the same kind of courtesy when our time comes to speak.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. WALKER) is recognized for 1 additional minute.

□ 1750

Mr. BEDELL. Mr. Chairman, I thank the gentleman from Pennsylvania.

To clear the record, I am one of those who have been waiting for a long time to speak. I would not have asked this if I did not think it should be pointed out; but I would like to inform all the Members that this gentleman was in Nicaragua several weeks ago and they literally were pleading with this gentleman to let our people know that they wanted to negotiate at that time. I hope our people will understand that very clearly as we debate this issue.

Mr. WALKER. Mr. Chairman, I thank the gentleman. I think our point is that one of the reasons why they may be pleading to negotiate is because we have had some successes in our policy, which is the statement I made in my original presentation.

Mr. BOLAND. Mr. Chairman, I ask unanimous consent that all debate on the Young amendment and all amendments thereto close at 10 minutes to 7 and that that time be split, one-half hour on the minority side and one-half hour on the majority side.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. YOUNG of Florida. Reserving the right to object, Mr. Chairman, I do so to inquire if the chairman, if he intends that the time for a vote on either the Mica amendment or the time for a vote on the Boland-Solarz amendment would be included in that time, or would the time be in excess of that?

Mr. BOLAND. Well, I would expect that it would not be included because I do not know how many votes are going to come in that period of time but I am sure it would prevent that side and this side from expressing their views

on whatever we are expressing our views on here.

The CHAIRMAN. The Chair would like to inquire of the gentleman from Massachusetts, was the time 10 minutes to 7?

Mr. BOLAND. One hour, that all debate on the Young amendment and all amendments thereto close in 1 hour, with one-half hour reserved to the minority side and one-half hour reserved to the majority side.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. HARTNETT. Reserving the right to object, Mr. Chairman, I feel that the Broomfield-Mica amendment is really the entire issue. I mean, this is really an up or down vote on covert aid or no covert aid to Nicaragua.

Now, it is my understanding, Mr. Chairman, and I would inquire of the Chair if this is not correct, that we had 9 hours of debate scheduled on all these amendments, which began at approximately 12 o'clock and which therefore should expire at approximately 9 o'clock this evening, which is only 2 hours past the time which the distinguished chairman wishes to cut off debate on this amendment; is that correct?

The CHAIRMAN. The gentleman is correct.

Mr. HARTNETT. Mr. Chairman, in view of that and because I think this Broomfield-Mica amendment is the entire issue, I think all the other amendments are just window dressing, that this is the entire issue, the Broomfield-Mica amendment. I would object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the only reason I made that unanimous-consent request is perhaps there was some indication there would be accommodation on the other side. Since there is no accommodation on the unanimous-consent request and I recognize the fact that we would be closing at 9 o'clock under the rule, then I guess that is what a lot of the Members on that side and this side want, and so be it.

Mr. SMITH of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me say this before I yield to the gentleman from Iowa. In response to the gentleman from New York who said that we should continue to keep up the pressure, is there anyone who really believes that with two carrier task forces now in place in South America or about to be there around Central America, with somewhere between 3,000 to 5,000 and maybe 6,000 troops being deployed overall on those ships, plus the troops in Honduras, that we are not going to keep up the pressure?

There is, in fact, no way to withdraw those by a sense of Congress resolution at this moment.

I would suggest very strongly that what we have here is a situation where we have accomplished some of the goals that we have set out to accomplish. The President took the well of this House and spoke about wanting to have an interdiction policy and to force Nicaragua to come to multilateral negotiations. The stage has been set for that. We have effectively shown them that the power that we wish to exercise can be exercised. We are deploying troops. We are deploying boats. We are deploying our Navy, our Marines, et cetera.

Does that mean that if we now remove covert aid for a period of 30 days, as is called for in the Boland amendment to the Mica substitute, that we are removing the pressure? I think not. I think that pressure is very evident. It will continue to stay where it is in place because Congress cannot remove it early on.

So I would suggest that the Boland substitute is the way to go, show them that we will deal from both sides.

I would urge my colleagues to remember that. We are not removing pressure. We are removing an obstacle to proper, legitimate negotiations, that may arrive at a good conclusion.

Mr. Chairman, I yield to the gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. Mr. Chairman, I thank the gentleman for yielding, and I appreciate his giving me his time.

Mr. Chairman, I have been waiting to focus a little bit of attention outside of some of the things we have been talking about. I think it is important that the House focus a little bit on just who is being aided by the covert training and supplies that we are giving to the Nicaraguans who are attacking the Sandinista government, the so-called freedom fighters that we hear so much about.

I do not intend to quote from press releases or even from what we have heard in our various sessions. Rather, I will take my lead from other Nicaraguan exiles, including those who are grouped around Eden Pastora.

Most U.S. covert aid, as we know, goes to the group fighting from the base in Honduras, the FDN. Arturo Cruz, a former member of the junta, former director of the Central Bank of Nicaragua, former Nicaraguan Ambassador to the United States until he became what he calls a dissident, wrote just recently in Foreign Affairs:

> The fact remains, however, that most of those persons in positions of military authority within the FDN are ex-members of the national guard who unconditionally supported Somoza until the end, against the will of the Nicaraguan people.

Arturo Cruz went on to write that in the event of a complete FDN victory, there might well be a "reinitiation of the vicious cycle of extreme rightwing oppression and exploitation." He continued:

> Backing the "Contra" indiscriminately could prove self-defeating to the United States. It weakens the moderating forces and sanctions the rule of the extremists in Nicaragua.

Or listen to the words of Alfonso Robelo, also a former member of the junta, now allied with Eden Pastora:

> * * * the military leadership (of the FDN) is made up of former members of the National Guard. This poses a problem for the return to power of the guard as a military institution.

Or listen to Eden Pastora himself, responding to a question from an Honduran journalist:

Pastora:

> They (the FDN) are the objectives of a general staff of former Somozan guardsmen. For example, their staff includes Captain Lagos, the feared member of the National Security Office, lieutenant colonels and captains of the Somozan guard. In other words, I don't think that they want a revolution full of love. They have lists of the people they kill. They have not even presented a single prisoner that they have taken.

□ 1800

I continue to quote from Eden Pastora:

> The people will not help the National Guard. The National Guard killed our people for 45 years. The guardsmen killed this guy's brother. They killed my father. Everybody in Nicaragua has a relative killed by the National Guard. Therefore, the Nicaraguan people will not support the National Guard. So they—[the United States, he refers to] are doing the National Directorate a big favor by trying to win through a general staff of former Somozan guardsmen. This must be clearly stated and understood.

The CHAIRMAN. The time of the gentleman from Florida (Mr. SMITH) has again expired.

(By unanimous consent Mr. SMITH of Florida was allowed to proceed for 2 additional minutes.)

Mr. SMITH of Florida. I yield to the gentleman.

Mr. HARKIN. These are descriptions of the Nicaraguan freedom fighters by exiles from Nicaragua. These are the so-called freedom fighters.

But let us look at other instances.

How many here remember that day on June 20, 1979, when Bill Stewart, an ABC newsman, walked up to a national guard checkpoint and they told him to lie down and he lay down in the street, totally unarmed, and one of the national guardsmen came up to him and very methodically blew his brains out. You all saw it on television.

That was not unique. That was not different. What was unique about it was that it was captured on film.

Again, this is the kind of thing we are dealing with in the so-called freedom fighters.

But there is even more. From 1974 to 1978, the national guard was engaged in a massive counterinsurgency campaign in the rural areas. Amnesty International, in its 1978 annual report, said that up to 3,000 peasants either disappeared after arrest or were killed outright by the national guard during this campaign.

In September 1978 there was an uprising by the Tercistas group of the Sandinistas. Very quickly the national guard regained control. The Tercistas left the cities, but did the national guard stop?

For 19 days starting on September 9, 1978, there was a massive and deliberate effort in five Nicaraguan cities where the national guard went on a terrorist campaign, not combat because the Sandinistas had already left, but a terrorist operation.

The CHAIRMAN. The time of the gentleman from Florida (Mr. SMITH) has again expired.

(On request of Mr. GARCIA and by unanimous consent Mr. SMITH of Florida was allowed to proceed for 2 additional minutes.)

Mr. HARKIN. Over 3,000 people were killed. Who were the targets? Not the Sandinistas but any young man between the age of 12 and 25.

The standard procedure for the national guard was to go into a city, round up the families, separate the young men out, and take them out back and blow their brains out.

Three thousand were killed in 19 days in September 1978 by the national guard.

During those years Amnesty International, church sources, and others pointed out what the national guard was doing but do not take my word for it. Again, listen to the words of Arturo Cruz writing in a recent issue of Foreign Affairs Quarterly. Listen to what he says:

> Carrying perhaps an even greater responsibility, those who sustain the forces inimical to the Sandinistas, and he is talking about the ex-Guardsmen, must not ignore the fact that idealistic young boys and girls constitute the revolution's rank and file. Therefore those who aid insurrection in my country—whose disenchantment with the revolution's course, and concern for the security of their own country I do not dispute—should be aware of the risk they take of bearing a historical responsibility for contributing, albeit indirectly and unintentionally, to a possible mass execution of the flower of our youth. A line of distinction should be drawn, now more than ever, between Contras' and armed dissidents.

Now, those who say the Sandinistas are not Boy Scouts, I agree, they are not Boy Scouts. But compared to the Contras, whom we are supporting with this covert aid, they are Eagle Scouts.

Let me point out one thing. In July 1979, within a few days after the Sandinistas had taken over, after they had won the revolution, do you know what their first act was? Was it to go out and round up the guardsmen and kill them? No. Their first act was to abolish the death penalty.

Now, understand that. Their first act, to abolish the death penalty. Who here could argue with any substance, that if the Contras were to succeed in overthrowing the Sandinista government, that they would abolish the death penalty? The fact is, if the Contras, the old national guardsmen whom Mr. Reagan is supporting, were to succeed with U.S. backing, there would be a bloodbath against the young people of Nicaragua.

The CHAIRMAN. The time of the gentleman from Florida (Mr. SMITH) has again expired.

Mr. HARKIN. Mr. Chairman, I ask unanimous consent that the gentleman have 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. HUCKABY. Mr. Chairman, reserving the right to object, I would like to point out to the gentleman in the well that he has now consumed 13 minutes, and 19 minutes ago he reserved the right to object because a Member asked for an extension of 2 minutes.

I shall not object this time, but I will the next time.

Mr. Chairman, I withdraw my reservation of objection.

Mr. HARKIN. I only asked for the same courtesy to be extended here, Mr. Chairman.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. RITTER. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. RITTER. Mr. Chairman, I rise in support of the Mica amendment.

The hour is late and I doubt if many votes are going to be changed, certainly not from my speech. But I must say that for the gentleman from Iowa to equate the Sandinistas with Eagle Scouts is the height of the ridiculous. To say that the Sandinistas did away with the death penalty is the height of the ridiculous.

About 4,000, to 5,000 of the national guardsmen were executed by the Sandinistas who did away with the death penalty; 7,000 of the national guardsmen are still in prisons, which leaves a couple or 3,000 guardsmen, which even if every single one of them was in the Contras, which they are not, they would still constitute a small minority of those opposing the Sandinistas.

Adolfo Colero, who happens to be the leader of the FDN, was himself imprisoned by Somoza. Testimony that we have heard from Miguel Bolanos, a senior officer in the Nicaraguan State Security Apparatus stated that there are very, very few former Somocistas involved in the FDN, and I can tell you there are virtually zero involved in the Pastora group or in the Miskito Indian group. Those opposing the Sandinistas are Miskito Indians.

Now I would like to share with my colleagues a conversation which I had with one of the Miskito Indians not long ago, the leader of the major Miskito Indian movement, the Masurisata Steadman Fagoth, who personally told me that whether or not the aid continues, his people will continue to fight. They will continue to fight for their homeland because they feel that genocide is being perpetrated against them and that under presently constituted Sandinista rule they are doomed.

I had a variety of pictures blown up for a particular amendment relating to the Miskitos but I felt that I had better give this speech tonight because this is certainly the key vote. I do not have the pictures with me but what they show is the systematic destruction of an entire people.

A report written by Berkeley professor, Bernard Nietschmann, recently said that:

> The Sandinista invasion and occupation of eastern Nicaragua has turned into an outright war against all ethnic minority groups. Misquito, Sumo, and Rama Indians, Creoles, and Black Caribs have been killed, imprisoned, relocated by force.

The tales of torture, and I will share them with my colleagues if they are interested, the tales of torture documented by the Masurisata are inches thick.

Now, if our help is cut off, these people will continue to fight. They will fight and die because the Sandinista offer them only destruction of their culture and "relocation."

But why, I ask, why brand them Somocistas? Why equate them with the national guard as the gentleman from Iowa has done and why, if they are going to fight and die, should they not have a chance to succeed in preventing their own genocide?

That is what this bill, if the Boland-Zablocki or its sister, Solarz-Boland, prevails, genocide is what these people face; genocide without ability to resist.

□ 1810

Out of 240 churches, 162 have been shut down. These are basically of the Moravian faith, about 90 percent of them; 57 churches have been burned to the ground. Six communities of the Miskitos have been completely destroyed in the last 15 days. These people are fighting the Sandinistas for their very existence.

Mr. KEMP. Will the gentleman yield?

Mr. RITTER. Let me add one comment.

Mr. KEMP. On that point would the gentleman yield?

Mr. RITTER. I did not yield to the gentleman from the other side (Mr. McCLOSKEY) and I do not want to appear to be partisan in this discussion.

Mr. KEMP. I was not going to make a partisan statement, just praise the gentleman for his statement.

Mr. RITTER. I think in all fairness I would wait until the end of my speech. On the 8th of February in jail No. 3 of the state security prison in Managua at 7 p.m., Tomas Borge, the Minister of the Interior told then-captured Miskito leader Stedman Fagoth that "to bring Sandinista ideology to the Atlantic coast and to the Indians, if need be, they would kill the last Indian."

(By unanimous consent, Mr. RITTER was allowed to proceed for 3 additional minutes.)

Mr. RITTER. There are three witnesses, and if my colleagues in this Chamber wish the documentation of those witnesses I will provide it to them.

Stedman Fagoth said that if the aid is cut there will be a holocaust, there will be dying in jail, dying in concentration camps and dying from starvation and exposure in the mountains.

He said, "The fight is not because the CIA is involved, the fight is to prevent the genocide of our people."

If anyone thinks that 10,000 to 15,000 Nicaraguans have been recruited by the CIA which would be equivalent to an army in the United States if we take equal proportions, which would be equivalent to an army of 1.5 million. Does anybody think that our CIA are such good recruiters?

Mr. McCLOSKEY. Mr. Chairman, will the gentleman yield for a question?

I think you made the point very well.

Mr. RITTER. I want to make an observation on people who have said today, indeed the majority leader said it is "sneaky." Well, if we are going to resign from doing covert aid all over the world, we had better invite the KGB here today, because they are not resigning; they have stepped up their active measures, they have expanded their horizons and, indeed, the leader of the Soviet Union is himself a 15-year veteran of KGB leadership.

We have many covert operations; should we gut them all? Why not cut off our limited help to Afghanistan if the mentality prevails that all covert aid "is sneaky, under the table," and so forth.

Mr. KEMP. Will the gentleman yield?

Mr. RITTER. I will yield to the gentleman from Indiana (Mr. McCLOSKEY) first since he was the first to ask and I will then reclaim my time and yield to my colleague.

Mr. McCLOSKEY. I thank the gentleman very much.

Two brief questions and I think it goes to the heart of the gentleman's argument. Would you say Eden Pastora is a reasonably informed observer of the Nicaraguan problems?

Mr. RITTER. I would say that Eden Pastora as the leading commander of the taking of Managua, as having had family killed and going out there with 2,000 supporters is accepting our aid in spite of his anti-American rhetoric, is accepting cooperation with other opposition groups.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. RITTER was allowed to proceed for 2 additional minutes.)

Mr. RITTER. Mr. Chairman, I yield to the gentleman from New York.

Mr. KEMP. I appreciate my friend yielding.

I tried to get some time earlier to stand up and congratulate him for his statement concerning those people who are fighting not on behalf of the United States of America, but on their own behalf. He eloquently testified to the fact that the native Miskito Indians are the victims of a true genocide that has begun already and may become even more extensive unless we can bring pressure on the Sandinista govenment to stop. Just a few minutes ago, someone stood up on the other side of the aisle and labeled the people resisting that totalitarian government "thugs, thieves and brigands."

But to speak of these people who are fighting for their own just rights, and as the gentleman testified, on their own behalf, in such disdainful and pejorative terms as pirates and thugs and thieves does a great disservice to this great deliberative body, but even more, a disservice to some very decent and courageous people. Consider the parallel situation in Afghanistan. I do not think there is a Member in this body who would stand up and say the Mujahadin who are taking on the whole totalitarian machinery of the imperialistic Soviet Union are thugs and thieves.

The anti-Sandinistas in Nicaragua are the very same types of people who are fighting in their own country as are fighting in Afghanistan. It does a great disservice to this body to employ derogatory language to describe their courageous efforts. I would be glad to yield to the gentleman from California to help explain Mr. DOWNEY's use of the English language.

Mr. RITTER. Mr. Chairman, I have the time.

Mr. KEMP. That is an outrage; words become meaningless unless we keep our language consistent with the truth and the merits of the case.

Mr. MILLER of California. Will the gentleman yield?

Mr. RITTER. I yield to my colleague from California.

Mr. MILLER of California. Mr. Chairman, I would assume that if we are helping the people in Afghanistan who are fighting the occupation of the Soviet Union and we are doing it in a covert fashion, that we are doing it in compliance with the law, that there must have been a finding of some type.

I do not know this to be the fact but I assume there is a finding and the Intelligence Committee reviewed it and they determined that it makes sense.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. MILLER of California and by unanimous consent, Mr. RITTER was allowed to proceed for 1 additional minute.)

Mr. RITTER. I yield to the gentleman.

Mr. MILLER of California. Mr. Chairman, we are doing that. That is how this operation started out. There was a determination and a finding. Now 18 months later what we have found out is that because of the imposition—let me just finish—because of the imposition of the Boland amendment this particular covert action, corresponding to the Intelligence Committee is now illegal.

That says nothing about any other covert action.

Mr. RITTER. If I might reclaim my time, I think the gentleman has made a good point. If I might reclaim my time and ask the gentleman from California before he leaves whether or not he would transfer that covert aid to the Miskitos, to the Epadayans, to Borge and Pastora, whether he would transfer that into a kitty called overt aid to aid the freedom fighters in Nicaragua?

Mr. MILLER of California. Your definition of freedom fighters and again the history of the Miskito Indians at the particular time where the base was established in Honduras on the Miskitos in 1981, with American money which instigated the Miskito Indians and in fact started shutting off Miskito, so there is a difference.

The CHAIRMAN. The time of the gentleman has expired.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I ask unanimous consent that the gentleman be permitted 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

Mr. HARKIN. Reserving the right to object, Mr. Chairman, when I was in the well, I spoke for 7 minutes. I asked for 2 additional minutes. The gentleman in the well objected.

Therefore, Mr. Chairman, he has had 9 minutes. Mr. Chairman, I therefore object.

The CHAIRMAN. Objection is heard.

Mr OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

I thank the Chairman.

I think it is time to refocus this debate back to the original purpose of the covert aid program. The alleged purpose of the covert aid sought by the administration is to interdict the supposed arms flow from Nicaragua to El Salvador, in order to protect what is alleged to be a democracy, a so-called democratic government in El Salvador.

There are perhaps a handful of democracies in Central America and South America. El Salvador is not among them. The colonels in El Salvador have no idea of what the word "democracy" means. I have been twice in that country. I have lived in the Caribbean for 3½ years, in Haiti, under a dictatorship.

□ 1820

I know what repression means in the daily lives of innocent and decent people.

In El Salvador the colonels have killed or jailed labor leaders. They have closed the national university, closed its medical school and jailed the intellectuals or put them to death. They have closed the two independent newspapers in that country. They jailed two American journalists while we were there just earlier this year. They killed four Dutch reporters. They smashed the radio transmitter of the Catholic Church in the city of San Salvador. They have persecuted charismatic Christian communities. They murdered Archbishop Romero and four American churchwomen. They have massacred members of the Salvadoran Indian population, working in a native Indian cooperative in Sonsonati Province. They have put land reform in the hands of the land-grabbing oligarchy. And they have dispossessed peasants of the land that is rightfully theirs. They have made a mockery of civil and criminal justice. And they have made homicide the leading cause of death in El Salvador.

That is not a concept of democracy, not one by which I swear.

If ever interdiction of arms flow were the goal of our covert operation, it is no longer. I would remind my colleagues that 30 years ago this year, 30 years ago this spring, Honduras was the launching pad for an invasion of Guatemala, of the reformist-minded Arbenz government. Honduras is again the launching pad for invasion, only the target is different. This time the target is Nicaragua.

After 30 years of our reliance in Central and South America, essentially upon the CIA and other conspiratorial agencies for undercover activities against friendly governments with whom we have diplomatic relations, it is difficult to see what gains we have made in that region. If anything, on the balance sheet, we find peoples turned off and turned against the United States.

Let us not give a blank check—which this administration wants—with which to underwrite activities by the CIA or any other organization to subvert, to overthrow an established government by armed invasion.

Vote no on the Mica amendment.

Vote yes on the Boland amendment.

That is the way to bring peace in this region, end the covert action, and get us out of the business of subverting our Latin American nations.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. I thank the gentleman for yielding.

I just want to see if I understand thoroughly what the gentleman is saying.

Is the gentleman suggesting that the reason for the gentleman voting the way he is is that the gentleman does not want to have the supply of arms cut off from Nicaragua——

Mr. OBERSTAR. Make it very clear what I said that the stated purpose of the administration's policy is interdiction of arms flow. That is not the real purpose of the administration's policy, it is the invasion of Nicaragua. That is why the troops are massed. That is why this side of the aisle is fighting, clawing, and scratching to pass this legislation. It is dead wrong.

I yield no further. I reclaim my time.

I have made my point and the point is simply that the purpose of administration policy is no longer—if it ever was—interdiction of arms flow. It is the invasion of Nicaragua. That policy and that invasion must be stopped.

Mr. LIVINGSTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, in response to the last speaker I would simply point out that this whole discussion is intended to center around Nicaragua, not El Salvador. Having been an observer to the elections in El Salvador, I grant him that there have been excesses on behalf of the Army in that country. But despite those excesses there is a duly elected government in existence in El Salvador. Eighty percent of the people trooped out to the polls on that hot day to declare their distaste, distrust, lack of desire for the alternative offered by the guerrillas, supplied by the Nicaraguan-Soviet-Cuba-Eastern bloc coalition.

And I submit to the gentleman if there is a launching pad of any sort in Central America, that he need look no further than to Nicaragua which now has currently approximately 100,000 troops under arms compared to the some 15,000 troops which were under arms under the Somoza government, which was described in so eloquent terms by the gentleman from Iowa (Mr. HARKIN).

Mr. Chairman, how many angels can dance on the head of a pin? What should be the size or the shape of the negotiating tables in Vietnam? And how many meaningless speeches and amendments should we address on H.R. 2760 to make it less unacceptable than it already is?

These are rhetorical questions that will go down in history as being interesting to think about, but totally worthless in substance. No one cares what the answers are to these questions; but if we care to indulge in matters of substance, then I suggest we direct our attention to other questions instead.

Where are those freedoms that were promised by the Sandinista government in Nicaragua only a few years ago, that Sandinista group of Eagle Scouts, which the gentleman from Iowa described?

Why is there no freedom of press in Nicaragua?

Why are they repressing the church?

How many Miskito Indians have been uprooted from their homes? Had their property pillaged? Their villages burned? How many have been forced into relocation camps or just plain killed?

Why have Nicaraguan Jews been forced to emigrate from their homeland? And their property confiscated?

Why are not Sandinista leaders content with improving the standard of living of their own people instead of fomenting revolution and spreading communism throughout Central America?

Why are 2,000 Cuban military advisers and 6,000 more Cubans in high executive offices in Nicaragua?

Why are PLO permeating Nicaragua's military as advisers and pilots?

Why are Libyans flying arms and ammunition to Nicaragua under the guise of medical supplies?

Why do the Sandinistas not grant free elections to their people as we have seen occur in El Salvador?

And why indeed has a motley group of 500 Nicaraguan nationals now grown to a ground swell of some 10,000 to 15,000 people, complained of by some people in this Chamber, a number admittedly getting larger every day? Why does it grow?

Why are such people prepared to gamble their lives and the lives of their families to rise up against the Sandinista regime?

And most importantly, why are a vast number of Members in this body turning their backs, covering their eyes and ears, and ignoring their cries and pleas for freedom in Central America?

Is it naivete? Is it isolationism? Is it partisan politics? Or is it worse?

Yesterday, I read the comments of the leaders of the Sandinista move-

ment. There can be no question about the motivation of those people. They are hellbent on the total subversion, conquest, and domination of all Central America, and ultimately North America, by the Communist movement. They are supplied by the Soviet-Eastern bloc-Cuban coalition, and their primary focus at this time is solidifying their hold in Nicaragua and eventually overthrowing El Salvador.

And then there is Honduras, and Costa Rica, Belize, Panama, Guatemala, Mexico, and so forth.

□ 1830

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. LIVINGSTON) has expired.

(By unanimous consent, Mr. LIVINGSTON was allowed to proceed for 3 additional minutes.)

Mr. LIVINGSTON. Mr. Chairman, yet we continue to engage in rhetorical excesses which blind us to the truth and divert our attention away from what we really should be about.

Contrary to most of the speakers in this well, Mr. Chairman, I believe that we should be standing up to the Sandinistas, like the major power that we are, rather than imitating the three China monkeys, "Hear no evil, see no evil, speak no evil."

We should be standing strong and dealing firmly with any government or any individuals who are overtly or covertly supplying arms and munitions to Marxist-oriented insurgents who would topple governments of otherwise peaceful neighbors.

We should be assisting Nicaraguan nationals who want freedom for their country and who are trying to bring forth the pluralistic benefits of democracy promised, but not delivered, by the Sandinistas.

We should reject the entire context, intent and philosophy of H.R. 2760.

Some of my colleagues have been reluctant to say it, but I am not. A vote for this ill-advised and wrongful bill is a vote to pave the lanes of Central America for the Communist movement. If this bill is successful—and I suspect it will be—if it were passed and signed into law, this Congress will be writing off the futures of countless millions of Central American citizens, insuring economic chaos throughout the United States by inviting additional millions of Latin Americans to stampede into this country in flight from Communist oppressors, and threatening the very security of this Nation and all her citizens by giving the Soviets a launch pad from our own doorstep.

This bill would have us turn our backs on a few brave people who dare to stand up to the Soviet empire and thereby spare us from those disastrous consequences.

Is that what you want on your conscience? If not, I urge you to first support the Mica amendment, if necessary, but then vote against H.R. 2760, regardless of any amendments, no matter how beneficial they may be.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. LIVINGSTON. I yield to the gentleman from Iowa.

Mr. HARKIN. Mr. Chairman, I just wonder how the gentleman will explain this one small point, that in El Salvador, where they had this so-called election that the gentleman observed, in El Salvador today there is no opposition newspaper, but in Nicaragua there is still one newspaper operating, functioning, opposed to the Sandinista government. And in El Salvador there is no opposition press. How does the gentleman explain that?

Mr. LIVINGSTON. I would be delighted to tell the gentleman that there is plenty of opposition in El Salvador, and they are expressing themselves constantly up here and down there.

Mr. HARKIN. The gentleman discussed free press, and I am just telling the gentleman that in El Salvador there is no newspaper operating today that is opposed to the government.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I have been listening to the debate, and I know a lot of our Members are listening in their offices and watching, and I have heard all of these comments about the morality issue, that this was not a moral issue, that really we are going at halt progress if we do not support convert action. And I also heard some of my fellow Members impugn reputations by suggesting that those who do not agree with the administration somehow are members of the KGB, and so on. I also heard Members whom I consider very knowledgeable, like Congressman GARCIA, himself Hispanic, talk about the superficiality with which Americans act sometimes in areas of the world that they are not particularly as familiar about as they should be, and the loss of good will that we have in those areas of the world.

But somehow nothing was more poignant to me, in focusing in on this issue and how I would vote, than a phone call that I received last night from my nephew, Jeff, who is going to be 18 in about 2 months. Now, he is what I have always considered—and I have 23 nieces and nephews—of all of them he is kind of the all-American kid. He is a graduate of a very fine catholic boys high school and he loves sports and he is bright and he is good looking and he is proud to be American; to Members on the other side, he is not a Communist, his father served in the Korean war and his grandfather served in World War II, and he has always been raised to be very patriotic. And he called me last night and he said, "What's happening?" And I thought maybe he wanted to ask my advice about what college he should go to, or maybe he needed a few dollars to borrow. But my nephew wanted to know what is happening in terms of our Government's covert activities and how that would affect him. He wanted to know if it was really true that in an undercover way, without telling the American people, our Government indeed was financing more than 10,000 insurgents, and he wanted to know whether or not I felt the President was being totally forthright with the American people during his press conference. He wanted to know why we are sending thousands of combat troops to Honduras and why are we sending these carriers and are we indeed, as some journalists were suggesting in terms of the point of view of some Members of Congress, in terms of our covert action, was our Government breaking its own law and was our Government breaking international law. Almost within hours this young boy had very serious adult considerations.

I think this young man put it right on the line. Are we breaking the law by our very, very secretive—or as the majority leader called it sneaky—activities in the area of Central America?

And do you know what? I heard one Member say our bombs and our bullets and our boys, will be ready, as they have been ready in the past, for war. And I say to you Members here, most of whom are over 40 and will not be drafted, will not be called upon to serve our country, that my nephew and the other young people in this country and those who will be called upon to serve, such as the ones BOB GARCIA described, he has a right to know, my nephew has a right to know whether our Government is breaking the law and why we are engaging in such secretive actions and whom we are really supporting and what the issue is.

Now, he cannot wait until 1984 because he is probably going to be among the group that is the first to be sent to Central America if there is a war. And before all this activity, his focus was on going to college and engaging in subjects like computer technology and perhaps less sophisticated issues. Now his focus is on whether or not he will go to war and why he does not know about our Government's covert activities.

Now, he has a right to know whether or not we are breaking the law, and that is what this bill is all about, whether or not we want to be forthright—yes, my friends, and moral—about our activities. I think we are going to be judged morally and historically by our actions.

The CHAIRMAN. The time of the gentlewoman from Ohio has expired.

(By unanimous consent, Ms. OAKAR was allowed to proceed for 1 additional minute.)

Ms. OAKAR. I say, with all of this pompous discussion about who is right and who is wrong, as if we could judge all individuals and put them in nice neat categories, when most of those people are interested in the same things we are interested in, survival and food on the table and education and health care, and work—all this superficial phony baloney talk about who is who, I say think of the young people and what we are getting them into. We are getting them and our country into a war, and it is wrong and shameful and outrageous, and I urge defeat of the Mica amendment because my nephew and other young people and indeed all Americans have a right to know for what our Government stands and in what covert activities our Government is engaged.

Mr. MARTIN of North Carolina. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do not know that I have heard any more absurd contention than we have heard just recently which maintains that what we are doing is deciding to get the United States and our people into war.

Whether we provide covert aid to the Nicaraguan insurgents or overt aid to the Hondurans and Costa Ricans, to try to contain Communist expansion in that area, we are not talking in either case about committing our own forces to war there. In fact, it may well be that if we fail in striking the correct policy at this time, if we put such limits on aid, if we so constrain it that it cannot succeed, that will pose the greatest risk leading out of desperation, to later on having to face that kind of choice.

□ 1840

Earlier, one of our most respected Members, himself with a proud Hispanic ancestry and surname, the gentleman from New York, said to us, "Central America belongs to Central Americans." Exactly so. It does not belong to us. But neither does it belong to Cuba and the Soviet Union. It is not ours to lose. Indeed not.

We have heard that over and over. It is not ours to lose; but neither is it theirs to take.

Our purpose is to find some way to help Central Americans to solve their own problems without being overpowered by outside-directed Communist aggression. That is the nub of it; to help them to solve those problems and to resist that effort, not to send the nephew of the gentlewoman from Ohio.

The reason we have to help—the reason we have to help—is because there is no one else who can provide the resources to counter the Cubans and the Soviets and the Nicaraguans from spreading their venom, their revolution without borders, in this hemisphere.

This so-called covert aid program is covert only in the sense that it is not announced in advance; it is always suddenly announced by leaks after the fact. It is working partially, at least, because it forces the Nicaraguan surrogates of the Soviet Union to devote much of their resources against the insurgency in their own country.

Miguel Bolaños, a Sandinista intelligence official who defected just recently, in May, told me 2 days ago that the Contras, that is, the Nicaraguans who are against the Sandinista government, have reduced covert Nicaraguan access across the Honduran borders. That is what we were seeking to do under the terms worked out with the Intelligence Committee, and those who believe that what has been going on amounts to something which has been proven illegal ought to go back to the debates we have had here in open session involving the gentleman from Florida (Mr. YOUNG).

Miguel Bolaños said that we have reduced their access, their control, of the Honduran borders. Now, many ask why cannot our aid be overt? Despite what they are doing covertly, why, they ask, cannot our aid be overt? Well, it could be overt or it could be covert, but the real test is whether it can be adequate to do the job.

In the first place, the bill, in its present and original form as well, bars all aid to the Nicaraguan rebels. It bars covert aid; it bars overt aid to the Nicaraguan rebels, the Contras, the only people who are willing to take on the massive Soviet arms that dominate their country. They would be abandoned by this bill. The bill in its present form would abandon them. Only other governments like Honduras and Costa Rica would be eligible, yet they may not be able, they may not be willing, they may not be a match for taking sole responsibility for containing the export of this revolution without borders.

What will they say in Honduras and Costa Rica when they are asked to take on the much greater power of Nicaragua all alone, with only the $50 million a year, plus $30 million in the first half of the year that this bill allows them, to counter the $500 million in Soviet weapons? That is the minimum estimate.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. MARTIN) has expired.

(By unanimous consent, Mr. MARTIN of North Carolina was allowed to proceed for 2 additional minutes.)

Mr. MARTIN of North Carolina. $500 million is the estimate of Miguel Bolaños, defector from the Nicaraguan Sandinista Security Agency. That is what he says is the minimum of his estimate of what the Soviets have sent into Nicaragua. He ought to know.

What will Honduras say to us when they are handed responsibility, that we do not want, to challenge all that violence alone? They may not want to carry that responsibility. They are brave people, but if they see that we lack courage, they, too, will lack a feeling of responsibility for El Salvador, even though they know they will be next. They should not be given that burden alone.

Finally, the Nicaraguans and the Cubans, as detailed in the report of the House Intelligence Committee, have exported their Communist revolution into El Salvador, giving extensive support to the Salvadoran guerrillas. Yet this bill tells us no one should be enabled to reply in kind.

Honduras would not be allowed by this bill to move into Nicaragua. It provides that only Communist guerrillas should be armed in this world. But why should only Communist rebels be entitled to covert support? Why must only Communist rebels be guaranteed sanctuary? Why must we enforce the Brezhnev doctrine of one-way subversion? Yet that is what this bill does, and it ought to be defeated.

If you really want to avoid sending our forces and our young people from Ohio, and Pennsylvania, and North Carolina, to wage war, then you should support the Broomfield-Mica amendment to insure that we will stop arming insurgents against Nicaragua just as soon as Nicaragua leaves its neighbors alone. When they leave El Salvador to El Salvadorans, when Nicaragua leaves Honduras to Hondurans, when Nicaragua leaves Guatemala to Guatemalans, when Nicaragua leaves Costa Rica to Costa Ricans, when Nicaragua leaves Panama to Panamanians, when Nicaragua leaves Central America of the other countries to Central Americans in the other countries, then we can reply in kind. Until they do, then we must reply, again, in kind.

Mr. NELSON of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I appreciate the quality of this debate, and I appreciate the opportunity to engage in it. I must say that I think there are merits to the arguments from both sides as expressed here, but I would like to share with you why I support the Mica amendment.

Seven weeks ago, while in Managua, Nicaragua, the delegation that I headed received a number of signals that the Sandinistas wanted to talk, talk about a regional peace plan. In the morning, a Comandante Torres went to elaborate lengths to explain to us why Nicaragua considered it an offense that counterrevolutionaries were

engaged in activities throughout the country. He pointed out certain activities near the Honduran border. He brushed over the fact that Comandante Zero, Eden Pastora, was leading a guerrilla band to the south near the Costa Rican border. And he did not mention the Miskito Indians and their revolt against the Sandinistas.

The long and short of it is that they were recognizing that heat is being applied to the Nicaraguan Sandinista government. Now, I simply support the Mica amendment for this reason: That the timing is absolutely wrong to cut off the covert aid at this point if, as there obviously has been, some fruit born as a result of the heat that has been applied. Just within the past week we have heard the public announcement of the Sandinista change in policy—calling for talks about regional peace.

Comments that have been made here about the sins of the past. It is true, we need a more enlightened foreign policy so that we do not cozy to regimes the likes of Somoza.

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. NELSON of Florida. Sir, I have been waiting for 3 hours to speak, and I must continue my statement since I have only 5 minutes allotted. Then, if I have time, I will be glad to yield to the gentleman.

Mr. Chairman, it is true that we have sins of the past, but I cannot do anything about that. The issue here before us is the question of whether or not we are going to cut off the covert aid at this time. And my conclusion simply is that the timing is wrong.

□ 1850

We may want to cut covert aid in the future, but the timing is wrong right now particularly since we see some progress of movement toward the table to talk peace.

Now I will yield to the gentleman from Georgia.

Mr. FOWLER. Mr. Chairman, I thank the gentleman for yielding. I appreciate the frustration of the long day which we all share.

I do want to say to the gentleman that, as he knows, the administration has been demanding, I think I use the correct word, that the Nicaraguan Government accept multilateral negotiations on our conflict in Nicaragua.

As the gentleman said last week, after 2 years of demands and 2 years of considerable pressure by the United States, which we have supported, they accepted and agreed upon multilateral negotiations.

Now, the problem was that we rejected it. Why have we rejected it? That is why we are here today. If they would accept that which they have agreed to accept, we might not be here today, but our country after demanding it and bringing this pressure now refuses to talk.

Mr. NELSON of Florida. The gentleman makes his point and let me respond.

Mr. FOWLER. Yes. I just say, that is why we are offering the amendments that we are offering to the Mica amendment.

Mr. NELSON of Florida. Mr. Chairman, let me share with the gentleman, there is a lot that this administration has done with which I do not agree in handling Central American policy. But that is not the issue before us tonight. The question before us tonight is whether or not we do something that would hinder the progress toward regional peace talks.

There is an issue raised by the gentleman from Massachusetts, the distinguished chairman of the committee, that he feels the committee has been misled by the CIA.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. NELSON of Florida was allowed to proceed for 1 additional minute.)

Mr. NELSON of Florida. Mr. Chairman, I would feel very upset, as the gentleman from Massachusetts and his committee members must feel, that they have been misled; but that is not the main issue before us tonight.

Mr. FOWLER. We agree with that.

Mr. NELSON of Florida. The issue is, can we continue the progress to the peace table. I support the Mica amendment because I think it would be counterproductive for us to cut that aid. It would give all the wrong signals about the necessity of the Sandinistas moving to the peace table.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. NELSON of Florida. I will yield to the gentleman from Florida and then to the gentleman from New York.

Mr. MICA. Mr. Chairman, I would just like to take a moment and thank the gentleman for raising a very critical issue, that of timing.

I might say that if our colleagues had been following the issue, just last week, as the gentleman indicated, a six-point plan has been put forth by the Sandinista regime. The heat, the pressure being applied, is working, and this would probably be the worst time to make the change.

The CHAIRMAN. The time of the gentleman from Florida has again expired.

(At the request of Mr. KEMP, and by unanimous consent, Mr. NELSON of Florida was allowed to proceed for 1 additional minute.)

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. NELSON of Florida. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I just wanted to say that I want to congratulate the gentleman from Florida for his statement and particularly for bringing a very thoughtful measure of objectivity and bipartisanship to this debate: That the timing could not be worse. The progress that has been made in terms of eliciting that six-point plan would be vitiated by us unilaterally removing an advantage that should figure into the process of negotiation.

To impart, the gentleman from Florida has made an extremely important point in that not only would the timing be bad, but to terminate our assistance would be a very bad signal to send to those with whom we would negotiate, should we preemptionally concede a major advantage as potential negotiations near, it might very well allow for talks to take place that would go on and on, indefinitely, and probably, as I said earlier, foreclose a resolution of this very serious conflict. So thanks to the gentleman from Florida for bringing a note of bipartisanship and reason to this debate.

AMENDMENT OFFERED BY MR. WRIGHT TO THE AMENDMENT OFFERED BY MR. MICA, AS AMENDED, AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA, AS AMENDED

Mr. WRIGHT. Mr. Chairman, I offer an amendment to the amendment, as amended, offered as a substitute for the amendment, as amended.

The Clerk read as follows:

Amendment offered by Mr. WRIGHT to the amendment offered by Mr. MICA, as amended, as a substitute for the amendment offered by Mr. YOUNG of Florida, as amended: At the end of the Mica substitute, as amended, insert the following:

Page 5, after line 10, insert the following new section:

SEC. 2. (a) The Congress finds that—

(1) the Government of National Reconstruction of Nicaragua has failed to keep solemn promises, made to the Organization of American States in July 1979, to establish full respect for human rights and political liberties, hold early elections, preserve a private sector, permit political pluralism, and pursue a foreign policy of non-aggression and non-intervention;

(2) by providing military support (including arms, training, and logistical, command and control, and communications facilities) to groups seeking to overthrow the Government of El Salvador and other Central American governments, the Government of National Reconstruction of Nicaragua has violated article 18 of the Charter of the Organization of American States which declares that no state has the right to intervene, directly or indirectly, for any reason whatsoever, in the internal or external affairs of any other state;

(3) the Government of Nicaragua should be held accountable before the Organization of American States for activities violative of promises made to the Organization and for violations of the Charter of that Organization; and

(4) working through the Organization of American States is the proper and the most effective means of dealing with threats to the peace in Central America, of providing for common action in the event of aggres-

sion, and of providing the mechanisms for peaceful resolution of disputes among the countries of Central America.

(b) The President shall seek a prompt reconvening of the Seventeenth Meeting of Consultation of Ministers of Foreign Affairs of the Organization of American States for the purpose of reevaluating the compliance by the Government of National Reconstruction of Nicaragua—

(1) with the commitments made by the leaders of that Government in July 1979 to the Organization of American States; and

(2) with the Charter of the Organization of American States.

(c) The President shall vigorously seek prompt actions by the Organization of American States that would provide for a full range of effective measures by the member states to bring about compliance by the Government of National Reconstruction of Nicaragua with those obligations, including verifiable agreements to halt the transfer of military equipment and to cease furnishing of military support facilities to groups seeking the violent overthrow of governments of countries in Central America.

(d) The President shall use all diplomatic means at his disposal to encourage the Organization of American States to seek resolution of the conflicts in Central America based on the provisions of the Final Act of the San Jose Conference of October 1982, especially principles (d), (e), and (g), relating to non-intervention in the internal affairs of other countries, denying support for terrorist and subversive elements in other states, and international supervision of fully verifiable arrangements.

(e) The United States shall support measures at the Organization of American States, as well as efforts of the Contadora Group, which seek to end support for terrorist, subversive, or other activities aimed at the violent overthrow of the governments of countries in Central America. Funds authorized to be appropriated by this Act may be used to provide United States support for activities with respect to Nicaragua which are designed to end the conflict in the region and which are approved by the Organization of American States, including international surveillance and supervision activities, peacekeeping forces, border patrols, and election supervisors.

(f) Not later than March 15, 1984, the President shall report to the Congress on the results of his efforts pursuant to this Act to achieve peace in Central America and to end the flow of arms to Central America. Such report may include such recommendations as the President may consider appropriate for further United States actions to achieve these objectives, including requests for the authorization and appropriation of additional funds to carry out the purposes of this Act.

Mr. WRIGHT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. MICA. Reserving the right to object, Mr. Chairman, I would like to ask the majority leader if this amendment is an addition to the Mica amendment?

Mr. WRIGHT. Mr. Chairman, if the gentleman will yield, it is an addition to the Mica amendment, as amended by the Boland amendment, and it would simply add additional language thereto.

Mr. MICA. To the original Mica amendment?

Mr. WRIGHT. To the Mica substitute, that is correct. It does not have anything to do with the pending Broomfield amendment.

Mr. MICA. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas that the amendment be considered as read and printed in the RECORD?

Mr. BROOMFIELD. Reserving the right to object, Mr. Chairman, I wonder if I could ask a question of the majority leader.

Mr. WRIGHT. By all means.

Mr. BROOMFIELD. I would like to ask if by unanimous consent we could incorporate this amendment—as I understand, this is the original Wright amendment that the gentleman wanted to sponsor, anyway, to the Mica amendment why we cannot put it on the pending one that I have offered.

Mr. WRIGHT. Well, the gentleman can be free to do that at his own option, but I am offering it at this point, because if I understand the parliamentary situation, I am privileged only at this point to offer an amendment to the Mica substitute, as amended by the Boland amendment.

The other pending amendment and the amendment pending thereto are not available for further amendment, and therefore I could not offer it at this time.

Mr. BROOMFIELD. My question was, By unanimous consent could the gentleman do it and would the gentleman do it?

Mr. WRIGHT. Well, I, of course, have no objection whatever to its being offered at any point, but I would like to have it considered as read, so that I could explain it, and then after I have explained the amendment, if the gentleman wants to ask unanimous consent, I would have no objection to that.

Mr. BROOMFIELD. Well, we accept it.

I ask unanimous consent, Mr. Chairman, that the Wright amendment be put on the Broomfield-Mica amendment at this time.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

Mr. MILLER of California. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Is there objection to the request of the gentleman from Texas (Mr. WRIGHT) that the amendment be considered as read and printed in the RECORD?

There was no objection.

The gentleman from Texas (Mr. WRIGHT) is recognized.

Mr. WRIGHT. Mr. Chairman, I want to make it clear that I do not have any objection to its being added at any point, because I think it is really what we need to be doing.

Let me explain what this does. This amendment makes a formal finding of the Congress to precisely the effect that many Members on both sides have been discussing all evening, and that is that the Nicaraguan Government under the present Sandinista rule has grossly violated the charter of the Organization of American States and have violated its formal commitments to the Organization of American States made in 1979.

It further calls on the President to use all of his diplomatic offices in an effort to prevail upon the Organization of American States to reconvene the foreign ministers of that organization for the purpose of assuming a position of reexamining and monitoring the compliance by or noncompliance by the Government of Nicaragua with its solemn pledge to the Organization of American States on the basis of which that organization took formal action in 1979 to withdraw its recognization from the Somoza government and instead to confer legitimacy upon this junta.

□ 1900

It seems that the Organization of American States is the very entity which has the initial responsibility to command compliance with those promises.

What were those promises? They were the very same that were made to some of us, including the gentleman from North Carolina (Mr. NEAL), who is sitting here in front of me, and the gentleman from Arkansas (Mr. ALEXANDER), and the gentleman from Texas (Mr. HANCE), and certain others.

We asked them, can we tell our colleagues in the Congress that you will assiduously observe the political rights, free speech, free press, free assembly? Yes, they said, you may.

They have not done that.

We said can we tell our colleagues in the Congress that you will observe a pluralistic political system in which you honor the rights of other political parties to participate. They said yes, you may.

They have not done that.

And we asked if they would observe the rights of private property, refusing to confiscate such property except by due process of law, and they said, yes, you may, indeed.

We asked if we might report that they would have early, free elections to ratify by the vote of the people the government by which they would be

governed. They said yes, we intend to do that very soon.

They have not really obeyed the spirit or, I am convinced, the letter of those commitments.

In addition to that, they have violated article 18 of the Organization of American States Charter.

The truth of it is I am afraid we too are in violation.

When we do come to the Organization of American States and ask them to command compliance, if we still are involved in financing an invasion of another country, then the Sandinistas and Nicaraguans will say, we will talk to you about compliance when first you make the Yankee behemoth comply.

We can quarrel about whether or not this invasion is having a benign effect. I do not know whether it is or not. Those who talk with me from friendly countries in Latin America tell me that they believe the inclination recently exhibited on the part of the Sandinistas to sit down and engage in some form of dialog toward negotiations has been brought about more by the pressures of disapproval on the part of their fellow Latin American countries than by intimidation from the United States.

I do not know whether that is true or not.

I do know, however, that people like Arturo Cruz and Alfonso Robelo, who were two of the initial members of the junta, after this pluralistic group from private as well as public and church organizations has gathered and overthrown the Somoza regime, these people believe in democracy. Arturo Cruz and Alfonso Robelo, who were thrown out of the junta because they did not embrace the Marxist views of those who now control the governing junta of Nicaragua, those people have come to us and suggested this very thing. They have said that the Organization of American States is the entity.

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(By unanimous consent Mr. WRIGHT was allowed to proceed for 5 additional minutes.)

Mr. WRIGHT. These people who were freedom fighters, and who feel that the goals of the revolution have been crassly betrayed by the Sandinista Marxists, suggest that the Organization of American States is the proper custodian of the liberties of the hemisphere.

We require in this amendment that the President shall vigorously seek prompt action by the Organization of American States that would provide for a full range of effective measures by the member states to bring about compliance of Nicaragua with those obligations, including verifiable agreements to halt the transfer of military equipment and to cease furnishing of military support facilities to groups seeking the violent overthrow of governments of countries in Central America.

The question is this: Do we go it alone? Do we postulate ourselves as a sort of hemispheric Lone Ranger riding throughout the hemisphere shooting silver bullets at people who misbehave from our point of view, or do we call upon that organization which has been created for that express purpose to exercise its authority, as it did in the case of the Dominican Republic in 1965, if my memory serves right?

I believe we should do the latter. Our friends in the hemisphere believe we should do the latter, that we should not attempt to be the exclusive custodian of right and peace but, rather, that we should call upon all of the hemisphere, the free, democratic governments in the hemisphere, represented in the Organization of American States, to apply the moral sanction which I believe will be far more embarrassing to the rulers of Nicaragua than we are intimidating to them.

There was a statesman in Brazil whose name I cannot recall, but may be able to find and supply for the record, a democratic statesman who a few years ago said, "God bless the Communists. Let us keep them well, for without them we would never get any attention from the United States."

Unfortunately, that is the view of many in Central and South America, that we rush down to put out fires, and then once the fire is out, retire to look upon them in benign neglect until another fire erupts.

They are desperately afraid that in this vigilantism by which we have recruited and trained and armed and sent into Nicaragua from outside, an invading force, we are courting an explosion which will send shock waves all the way from the Rio Grande River to the Andes in the South.

That is their apprehension.

I would recite to you only one other authority, one other person who believes that this is the place in which to repose the sanctions that ought to be imposed, and that is President Ronald Reagan in his letter to the four Presidents of the Contadora nations.

This statement is contained in the letter written by President Reagan, and I am quoting:

> I believe the OAS, as the hemisphere's regional forum, is the appropriate mechanism to insure that those who make commitments comply with them.

This is precisely what we would do by the adoption of this amendment. We would place it in the forum that has been established, in a democratic way, and in which all the member governments of the hemisphere participate freely and openly.

We would call upon the other freedom loving people in this hemisphere to join in a concerted effort, a multinational effort to require compliance on the part of Nicaragua or any other vagabond adventurer who would enter into war on others soil.

But in order to do that it seems to me that we really must come into that court with clean hands, having expunged ourselves of that which the Organization of American States would rightly regard as a violation on our behalf of its charter.

Mr. EDWARDS of Oklahoma. Will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. I just want to ask the gentleman a question. I commend him on a very good statement and a very good amendment.

I wanted to ask the gentleman whether in the case of the Broomfield-Mica amendment prevailing the gentleman from Texas would support having the same language then added to that amendment.

Mr. WRIGHT. I would have no objection to that. I have no objection to that at all.

I really prefer, I must say in all candor——

The CHAIRMAN. The time of the gentleman from Texas (Mr. WRIGHT) has again expired.

(On request of Mr. HUCKABY and by unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

Mr. WRIGHT. Permit me to continue to respond to the gentleman from Oklahoma.

I must say in all honesty I really would prefer to have this kind of an approach in lieu of the so-called covert action by which the U.S. Government somewhat unilaterally has been financing the military, paramilitary activities in Nicaragua.

□ 1910

Mr. EDWARDS of Oklahoma. I just want to say so that it is very clear that the purpose is to make these statements about Nicaragua and not merely to enhance the other version of the legislation that is before us, to remove that political connotation from it, that is why I asked the gentleman if he indeed would support putting the same language into Broomfield-Mica.

Mr. WRIGHT. I would support this language as a helpful addition to any of the alternatives before us this evening. But again, I must say my preference is to have it added to Mica as amended by Boland in order that we would shut off the covert aid and this would supplant and substitute for it.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Louisiana.

Mr. HUCKABY. The intent of a statement that says:

> Seek to end support for terrorist, subversive, or other activities aimed at the violent overthrow of the governments of countries in Central America.

Does that mean that the United States can no longer support the rebels in Nicaragua?

(By unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

Mr. WRIGHT. This language in and of itself does not preclude that. However, if it is read in context with the original Boland-Zablocki bill to which it would be amendatory, then that Boland-Zablocki bill does shut off such covert aid.

And even in the amendment to which it would be amendatory, that is to say the Mica amendment as now amended by the Boland amendment, covert aid would be shut off for a period of time and it could be resumed under that language.

This does not affect that one way or the other, except that this language seeks to slant such unilateral action on the part of the United States by a multinational action and it says that funds authorized to be appropriated by this act may be used to provide U.S. support for activities with respect to Nicaragua which are designed to end the conflict in the region and which are approved by the Organization of American States, including international surveillance and supervision activities, peacekeeping forces, border patrols and election supervisors. In the case that we obtain agreement which I should hope that we would achieve, to have all parties participate in free elections in El Salvador, and let us hope some day soon in Nicaragua, if the OAS were to sponsor some form of supervision of those elections to guarantee all sides that they are fair and they are free and that everybody is given an opportunity to participate in safety, then we would participate in those supervisory forces if asked to do so by the Organization of American States.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. WRIGHT. I would be glad to yield to my friend, the gentleman from Florida (Mr. MICA).

Mr. MICA. I would just like to say as the author of the original unamended Mica amendment I appreciate your offer if that amendment passes this House to attach that amendment to it, I think it would immensely strengthen my legislation and I say not only do I appreciate the offer but I would insist that the right language be part of the unamended Mica provision if it passes the House.

Mr. CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. ROEMER and by unanimous consent, Mr. WRIGHT was allowed to proceed for 2 additional minutes.)

Mr. ROEMER. Will the gentleman yield for a brief question?

Mr. WRIGHT. Yes, I gladly yield.

Mr. ROEMER. I thank the majority leader for yielding.

In reading his amendment earlier today and again the last few minutes, at the heart of it seems to be whether we are talking covert or overt aid.

The removal of the United States from unilateral action, substituting in its place the language in paragraph G which says that:

> Funds authorized to be appropriated by this act may be used to provide U.S. support for activities with respect to Nicaragua which are designed to end the conflict in the region and which are approved by the Organization of American States.

Does the majority leader feel that in any way compromises or enhances the foreign policy position of the United States in regard to Central America?

Mr. WRIGHT. I think it enhances that position. It does not diminish nor in any other way limit any authority or power we would possess other than this. It simply gives us an additional direction and an additional layer of strength, it would seem to me, if indeed we can work harmoniously hand in glove with the other democracies in the hemisphere, all jointly seeking to achieve this same objective of peace and free elections and governments that will respect the borders of other nations so that there need not be a continual conflagration throughout Latin America.

Mr. ROEMER. If you will yield for one final question, I do not think it does affect, but confirm that feeling on my part, it does not affect, it seems to me, anything we do with El Salvador.

Mr. WRIGHT. Absolutely not.

Mr. ROEMER. It relates specifically to Nicaragua?

Mr. WRIGHT. Absolutely not. Nothing in this language would diminish in any respect our rights to continue to assist the Government of El Salvador to defend itself against external and internal foes that are supported by external people and to provide for that embryonic democracy an opportunity to attain stability and give those people, who have been so long denied, the opportunities of freedom, the privileges of a free nation. It does not in any way diminish that. I support what we are doing in El Salvador and would not participate in stopping it.

Mr. COLEMAN of Missouri. Mr. Chairman, I move to strike the requisite number of words.

Mr. COLEMAN of Missouri. Mr. Chairman, I would like to say a few words about the plight of Nicaraguan Jews.

The fact of the matter is there are few, if any, Nicaraguan Jews left in their country because of the harassment by the Sandinistas in that country.

The main reason why most of the Nicaraguan Jews have left their homeland was the discriminatory manner in which the revolutionary government treated them. Their properties were the first to be confiscated. Jews who owned factories and stores were summarily ejected from their homes and places of business, their properties were turned over to workers. Many accusations were made against them without proof and often their individual safety was threatened.

In September 1978, the doors of the synagogue were torched by Sandinista supporters while the congregation was actually inside the synagogue worshiping.

Now the synagogue is a Sandinista building with propaganda posters covering the religious symbols at the front entrance and anti-Zionist posters are on the walls. This is the Government of Nicaragua that I am talking about, the Sandinista government.

The Government of Nicaragua refused to respond to actions taken by Nicaraguan Jews within the Nicaraguan legal system seeking to recover their properties.

More than 2 years ago, the Government of Nicaragua was asked by the Anti-Defamation League of B'nai B'rith to explain the status of the synagogue in Managua, list conditions under which Nicaraguan Jews could return to their country, and review the status of claims against the Government filed by Nicaraguan Jews.

The Nicaraguan Government—the Sandinista Government—despite promises to the contrary, has not responded to the Anti-Defamation League.

Last week, Mr. Isaac Stavisky, a member of the Nicaraguan Jewish community now forced into exile in the United States, speaking on behalf of that community, asserted that the Nicaraguan Jews had no anti-Semitic problems until the Sandinistas started their revolution.

He said that a favorite tactic was to anonymously telephone Jewish homes with warnings that, "We are going to get you Jews."

The clandestine Sandinista radio announced that the Honorary Counsel of Israel would be executed forcing him to flee 1 year before the Sandinistas came to power.

The clearest message of Sandinista intentions against the Jewish community, Mr. Stavisky says, was the arson attack on the synagogue in 1978.

I would like to quote this leader of exiled Nicaraguan Jews, verbatim, and I quote:

This was an especially traumatic experience for members of the Jewish community who were survivors because it evoked terrible memories they thought they had put behind them when they fled from Nazi terror and found refuge in Nicaragua.

I further would like to quote Mr. Isaac Stavisky, the exiled Jewish leader in the United States:

The Sandinistas threatened to take our property and they did. They threatened our lives and for that reason we left our country. We want to return to Nicaragua and live with our fellow countrymen under a democratic government which respects human rights. We hope that we will be able to do that soon.

□ 1920

And his closing two sentences add impact to his statement.

Permit me a final word of warning to Jews and other people of Central America. Beware of the Sandinista threat.

Mr. Chairman, I am not sure that we are aware of the Sandinista threat, but the words of this exiled member of the Jewish community ought to ring in our ears as we are called upon to vote in the next hour and a half, and that is why the only way to vote is to vote for the Broomfield-Mica amendment.

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take this time not to debate the substance of the issue except in passing, but I do want to take just a moment to address the quality and character of some of the debate of the last 2 hours.

I regret that I do not see—I am sorry, he is here. I am glad he is here.

I just want to say that I think a number of speeches earlier this evening, particularly those by the gentleman from Pennsylvania (Mr. WALKER), the gentleman from Florida (Mr. YOUNG), and to a lesser extent several other speeches, have bordered on the outrageous, not in terms of their content, but because they have at least indirectly called into question, in my judgment, the motives and the patriotism of a number of Members of this House.

Mr. YOUNG of Florida. Would the gentleman be willing to yield and suggest exactly what words of the gentleman from Florida he is concerned about. Who questioned any motives?

Mr. OBEY. Just let me finish my statement, then I will. That is what I am about to say. That is why I asked the gentleman from Pennsylvania to come to the floor so that I would not say it without his being here.

What I find outrageous in the remarks of the gentleman from Pennsylvania—and perhaps he did not mean it, if he did not, I am happy about that—but I do find outrageous even the suggestion that perhaps the reason some Members of this House are opposed to the covert activities and want to see them cutoff is precisely because they appear to be working.

I do not know if I am quoting directly, but I am certainly characterizing or paraphrasing——

Mr. YOUNG of Florida. I think it is important that the gentleman quote directly.

Mr. OBEY. I do not have a text of the gentleman's remarks, so it is impossible for me to do. I will stand by what is in the RECORD.

Mr. WALKER. Will the gentleman yield to me, because I do remember what I said.

Mr. OBEY. Not unitl I finish my statement, Mr. Chairman.

I sat for 3 hours listening to everybody talk here. I want my 5 minutes and I will be happy to answer any questions after that.

My objection to Mr. YOUNG's speech is that after Mr. FOWLER observed that a number of our allies were begging us to stop this covert operaton that Mr. YOUNG indicated in his later remarks that that was fine but that our first allegiance was to our own Government.

Mr. YOUNG of Florida. If the gentleman will yield, I plead guilty to that.

Mr. OBEY. Well, let me finish.

Mr. Chairman, I would appreciate not being interrupted. I did not yield.

The Chairman. The gentleman refuses to yield. The gentleman from Wisconsin has the floor. The gentleman refuses to yield.

The gentleman is recognized.

Mr. OBEY. To imply, Mr. Chairman, that listening to the advice of close allies is something akin to substituting primary allegiance to another country for allegiance to your own is, I think, a little bit out of line on this House floor.

The question that opponents of the covert operation are trying to address is this: It is not a question of whether we ought to fight the Marxists. It is a question of how. It is a question of whether we fight them dumb, or whether we fight them smart.

I personally do not know—and that does not mean that people have to agree with me—but I personally do not know how anyone who sat through the closed session last week and heard Mr. HAMILTON review the combined intelligence estimates of this administration, not of anybody else, but of this administration, I do not know how anybody who listened to that speech can say that this covert operation does serve our national interests. But there can be honest debate about that and honest disagreement about that.

We happen to think that this policy makes it easier for Marxists to make us the issue, rather than to make their conduct the issue in Central America.

We question whether we and our allies—following this policy—can win.

The question is not whether we like or dislike the Sandinistas. The question is how best we can contain their influence throughout Central America.

And as I say, we ought to be able to have honest disagreement without having implications, intentional or otherwise, that somehow if you do not support this specific policy, that somehow your patriotism is defective and somehow—at least some Members of the House might be a little glad if they can stop a policy which some people seem to think is working to contain the Sandinista influence.

I have been frankly disturbed on the floor, very disturbed.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. OBEY) has expired.

(At the request of Mr. WALKER and by unanimous consent, Mr. OBEY was allowed to proceed for 2 additional minutes.)

Mr. OBEY. I am concerned, as I said, about the statements that I have heard on the floor today, because I believe that what they have a tendency to do, even though that may not be the intention, I think they have the tendency to try to assassinate the character of the person making the statement rather than to effectively assassinate the argument.

Mr. YOUNG of Florida. Mr. Chairman, I demand that the gentleman's words be taken down.

□ 1930

The CHAIRMAN. Words will be taken down.

PARLIAMENTARY INQUIRY

Mr. MICHEL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. MICHEL. Mr. Chairman, why could we not have the words read back promptly?

The CHAIRMAN. That action is taking place at this time.

Mr. MICHEL. Excuse me?

The CHAIRMAN. They are being taken down, the words are.

Mr. MICHEL. Mr. Chairman, are we not taking down the proceedings of the House verbatim?

The CHAIRMAN. As soon as the words can be transcribed, as the gentleman knows, the Speaker will then pass upon the words that are being taken down.

The Clerk will report the words.

The Clerk read as follows:

I am concerned, as I said, about the statements that I have heard on the floor today, because I believe that what they have a tendency to do, even though that may not be the intention, I think they have the tendency to try to assassinate the character of the person making the statement rather than to effectively assassinate the argument.

The CHAIRMAN. The Committee will rise.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that committee, having had under consideration the bill (H.R. 2760) to amend the Intelligence Authorization Act for fiscal year 1983 to prohibit U.S. support for military or paramilitary operations in Nicaragua and to authorize assistance, to be openly provided to governments of countries in Central America, to interdict the supply of military equipment from Nicaragua and Cuba to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America, certain words used in debate were objected to and on request were taken down and read at the Clerk's desk, and he herewith reported the same to the House.

The SPEAKER. The Chairman of the Committee of the Whole House on the State of the Union reports that during the consideration of the bill, H.R. 2760, certain words used in the debate were objected to and on request were taken down and read at the Clerk's desk and does now report the words objected to the House.

The Clerk will report the words objected to in the Committee of the Whole House on the State of the Union.

The Clerk read as follows:

I am concerned, as I said, about the statements that I have heard on the floor today, because I believe that what they have a tendency to do, even though that may not be the intention, I think they have the tendency to try to assassinate the character of the person making the statement rather than to effectively assassinate the argument.

The SPEAKER. The words having been read, and the gentleman from Wisconsin having very definitely included in his statement a disclaimer that he does not impugn the motives or intentions of any Member of the House, in the opinion of the Chair, in his legislative argument the words of the gentleman from Wisconsin are not unparliamentary and the gentleman may proceed.

The committee will resume its sitting.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2760, with Mr. NATCHER in the chair.

The CHAIRMAN. The gentleman from Wisconsin (Mr. OBEY) has 1½ minutes remaining.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The gentleman may proceed.

Mr. WALKER. That last sentence turned out to be a pretty long one. Could he yield?

Mr. OBEY. Yes; let me simply say, before I do, that I think, to be perfectly clear, I should say that my sentence would have been better if I had not included the two words "to try." I think the gentleman knows what I mean.

The only reason I made that statement is because we know each other here. I just got back from an 11-day trip to the Soviet Union, where Members on both sides of the aisle dealt with the Soviets in a very hard-nosed fashion. You would not have seen partisanship on either side of the aisle. And I think it is regrettable, when that spirit seems to be eroded, when we come here, and in the heat of debate start to indicate in any way that a Member's position on this very crucial item is not motivated by anything except the highest patriotism, and that is the reason that I made the statement, and I would urge Members of this House tonight, if they want to strongly disagree on the merits, at least grant the right that what we are both talking about is not whether we defend this country but how.

Mr. WALKER. Would the gentleman now yield?

Mr. OBEY. Absolutely.

Mr. WALKER. I thank the gentleman for yielding, finally, and I would say to him that, No. 1, this gentleman impugned the motives of no one. My statement was quite clear. I said that what bothered me in the debate I had heard up until now was the fact that the policy that was being criticized seemed to be one that was successful and, therefore, the critics of the policy seemed to be arguing with success.

I went on to define exactly what I meant by that, and I pointed out that what we regard as success when the Communists are doing it was also a case——

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. OBEY) has expired.

(On request of Mr. WALKER and by unanimous consent, Mr. OBEY was allowed to proceed for 2 additional minutes.)

Mr. WALKER. Will the gentleman continue to yield?

I thank the gentleman for yielding.

And I went on to point out that what we often refer to as Communist success we will not grant as success when our own policies appear to be doing the same thing.

That was the point of my statement, that impugned nothing on the part of the critics. It simply——

Mr. OBEY. If I can take back——

Mr. WALKER. Well, the gentleman has attacked me personally. He might at least let me make my statement.

Mr. OBEY. I would like some of the time the gentleman got simply to make the point that I am sure that is what the gentleman thinks his statement said, but I invite him to simply reread it carefully when he gets the transcript, and I think you will see why some Members of the House were upset with the statement.

Mr. WALKER. If the gentleman would yield, if the gentleman would yield further——

Mr. OBEY. Sure.

Mr. WALKER. I have reread the statement. I got it back from the reporter. It said precisely what I am saying it said here, and it seems to me that the gentleman throughout his remarks, in attacking both Mr. YOUNG and me personally, said he drew those inferences. It was not in our statement. He said he drew those inferences. That is a pretty thin reed upon which to launch a personal attack.

Mr. OBEY. Could I ask the gentleman, did the gentleman edit the text of his statement tonight, or did he leave it unedited?

Mr. WALKER. Will the gentleman yield?

Mr. OBEY. Yes, if you will answer the question I will yield.

Mr. WALKER. Yes, I will answer the question.

Mr. OBEY. I yield.

Mr. WALKER. No, I did not edit one word of the statement.

Mr. OBEY. All right. Then why do we not just let the House decide tomorrow——

Mr. WALKER. It seems to me the altering of records around here is on the other side.

Mr. OBEY. Then just let the Members of the House decide tomorrow whether your statement was fair or not, OK?

Mr. WALKER. Well, if the gentleman will yield, I think the gentleman does owe me an apology, from the standpoint of whether or not I impugned the motives of any Member, because the gentleman said he drew that by inference.

Mr. OBEY. No.

Mr. WALKER. He did not give us one direct quote.

Mr. OBEY. No; I do not owe the gentleman an apology. Let me say, however, that I would have been shocked had any other Member but the gentleman made that statement earlier.

Mr. WALKER. Well, if the gentleman will yield further——

Mr. OBEY. I would yield to the gentleman from Florida.

Mr. WALKER. Will the gentleman yield further? The gentleman will not yield further?

Mr. OBEY. I have two people who have asked me to yield.

Mr. YOUNG of Florida. No, no. I am going to ask for my own time. Thank you very much.

Mr. OBEY. Because I mentioned his name also.

Mr. WALKER. The gentleman will not yield further?

Mr. OBEY. I said I had mentioned two people's names. I am trying to yield to both of them.

Mr. WALKER. The gentleman will not yield further.

Mr. OBEY. The gentleman is welcome to his interpretation.

Mr. YOUNG of Florida. I appreciate the gentleman's offer to yield. I would prefer to ask for my own time.

Mr. OBEY. Fine. Thank you.

The CHAIRMAN. The time of the gentleman has expired.

□ 1940

Mr. YOUNG of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we have just witnessed an unfortunate turn of events in this debate. It has been heated at times, and there is no question about that. There have been some people who have waved their arms and made accusations about racist amendments and racist statements, and those things have taken place in here today and no one raised any points of order or accused anybody of being out of order or questioned their motives or accused them of character assassination.

In hearing a rereading of the gentleman's words on character assassination, I could agree with the speaker and I could have easily ruled the other way as well, because there is no question that what the gentleman from Wisconsin's words were was a strong inference and a strong innuendo that one of the two or both of these gentlemen had in fact attempted to assassinate someone's character.

Now, I have been involved in this House for a number of years in some very heated debates. Dr. LONG and I have presided over the debates on the foreign aid bills for a number of years, and they got very heated, and I just would find it hard for even Mr. OBEY to think that during any of those discussions that this gentleman had ever offended anyone, questioned anyone's motives, or attemped to assassinate character.

I wonder if Mr. OBEY would yield to a question, because I have in my very hands here the transcript, and he is free to look at it, the transcript of the remarks that he apparently objected to, and I would ask Mr. OBEY what words or what sentences or what phrases he found that would come anywhere near the suggestion he has made that someone's character was assassinated.

Mr. OBEY. If the gentleman would yield, at this point the gentleman has the text. I still do not. I will simply say that since I have been trying to get the floor for an hour, I do not recall with the exact clarity that I did an hour ago what the words were, but I do know that—I assume you are talking about the gentleman from Florida, at this point, his remarks.

Mr. YOUNG of Florida. Exactly. Of course I am talking about the gentleman from Florida. In fact, I intend to read the language that you are talking about so that we can have a discussion, you and I, as to whether or not that attacked anyone's character.

Mr. OBEY. As I explained in my previous remarks, what bothered me about the gentleman's speech, very frankly, was the reference after Mr. FOWLER's speech.

Mr. YOUNG of Florida. I would say to my friend, and he is my friend, that because the gentleman did not like what this gentleman might have said or might have felt some pang of conscience or something, does not give him, unless he can specifically point out some language or some words that this gentleman used, I think the gentleman is really off base to suggest that anyone's motives were questioned or that anyone's character was assassinated.

I invite the gentleman to read this and then to tell me and all of our colleagues who have heard this colloquy now to tell us which of those words would be found offensive to anyone in this Chamber.

Mr. GORE. Regular order, Mr. Chairman.

The CHAIRMAN. Regular order. The gentleman from Florida (Mr. YOUNG) and the gentleman from Wisconsin (Mr. OBEY) know the rules of the House. These two gentlemen are well acquainted with the rules. The debate will be on the pending amendment.

Mr. OBEY. Mr. Chairman, will the gentleman yield for a response?

Mr. YOUNG of Florida. I would be happy to yield to the gentleman.

Mr. OBEY. As I said, what I objected to is the even indirect suggestion——

Mr. GORE. Regular order, Mr. Chairman.

The CHAIRMAN. Regular order will be maintained. The gentleman from Florida (Mr. YOUNG) and the gentleman from Wisconsin (Mr. OBEY) know the rules of the House. The debate will be on the amendment pending before the Committee.

Mr. YOUNG of Florida. Mr. Chairman, I rise to seek recognition on a point of personal privilege.

The CHAIRMAN. The Chair would advise the gentleman that would not be in order in the Committee of the Whole.

Mr. YOUNG of Florida. Mr. Chairman, it has become very obvious that the accusation side is going to have all the time it needs and the defense side is not going to be entitled to its 5 minutes. I am not going to make the case any further. I think the case has been made very well, No. 1, by Mr. OBEY's lack of ability to mention the language directly, and Mr. GORE's unwillingness to allow the accused to have his day in court.

I yield back the balance of my time.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

Obviously, we have departed far from the amendment offered by Mr. WRIGHT to the substitute offered to the Mica amendment by SOLARZ, BOLAND, and FOWLER.

We have now been on the Broomfield amendment for 4 hours and 15 minutes. I have been around here long enough to know that the clock means an awful lot at a particular time. I am also conscious of the procedure under which this bill was brought to the floor and the particular amendments that will be voted on before 9 o'clock, and also the possibility of additional amendments.

So, Mr. Chairman, I move that all debate on the Young amendment and all amendments thereto close in 5 minutes.

The CHAIRMAN. The question is on the motion offered by the gentleman from Massachusetts (Mr. BOLAND).

The motion was agreed to.

The CHAIRMAN. The Chair will divide the debate time 2½ minutes on each side. The gentleman from Massachusetts (Mr. BOLAND) will receive 2½ minutes, and the gentleman from Michigan (Mr. BROOMFIELD) will be allotted 2½ minutes.

The Chair now recognizes the gentleman from Michigan (Mr. BROOMFIELD).

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. HYDE).

Mr. HYDE. Mr. Chairman, this has been one of the more interesting days in Capitol history, but once in awhile we must return to reality. We are going to have an opportunity shortly to vote on the only amendment that has been offered in this body that is bipartisan in nature.

We are dealing with an enormously important issue. We are dealing with matters of life and death. I must take some exception to the term that the majority leader uses when he refers to an "invasion" of Nicaragua. It would seem to me when people who live in Nicaragua, such as Miskito Indians, people who were born and raised and who were citizens of Nicaragua, are trying to fight within the confines of their own country, it is hardly an invasion.

But nevertheless, the Mica amendment is truly bipartisan. The Mica amendment recognizes that the Sandinista government is exporting the cancer of revolution throughout Central America, and it seeks to extract through symmetry a penalty. By aiding the Contras who are fighting within their own country, they will

put pressure, they will harass, they will interdict the Sandinistas, and just maybe get them to stop exporting revolution to democratic El Salvador.

□ 1950

Now, if you reject that, we are left with the Solarz-Boland amendment, which says we stop aiding the Contras, we stop the covert aid for a period of 30 days, which is just enough time to cut them to ribbons and then maybe we will come back if symmetry is violated by the Nicaraguans and we get both Houses of Congress to agree. It trusts the Nicaraguans, the Sandinistas, for 30 days.

I say to you that this is a very important amendment. The gentleman from Michigan (Mr. BROOMFIELD) and the gentleman from Florida (Mr. MICA) are offering it as a bipartisan amendment.

We are so close in our decision, with 10 votes give or take.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. BROOMFIELD. Mr. Chairman, I yield the balance of my time to the gentleman from Illinois.

Mr. HYDE. I just simply want to say, Mr. Chairman, that we fancy ourselves as chairmen of the Joint Chiefs of Staff, Directors of the CIA, Secretarys of State and even clergy, making decisions on the future of the lives and freedom of people in Central America.

I suggest we are so divided among ourselves that it would be helpful if we could depoliticize this for a little bit and let the professionals, the military, let the State Department, let the people who are also most knowledgeable and equally committed to a solution, solve this problem.

The CHAIRMAN. The Chair now recognizes the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Chairman, I yield to the gentleman from Louisiana (Mr. HUCKABY).

Mr. HUCKABY. Mr. Chairman, I thank the gentleman for yielding.

I rise in support of the Mica amendment. I regret I have only 2½ minutes.

I would like to relate a story. I spoke last month to a lady who had just arrived in the United States from Cuba. We spoke into the late hours of the night. We talked about the tragic economic experiences that are happening there. I said to her, "Well, can't we get together again. Can't our countries, our governments, get together?"

She said, "You don't understand. It's too late. It's too late. Those people that are under 30 years of age who have grown up under the Castro government, they hate Americans. Their mission is to spread Marxism throughout the Caribbean."

I thank the Chairman for yielding.

Mr. BOLAND. I thank the gentleman from Louisiana.

Mr. Chairman, let me indicate what the scenario is going to be over the next hour or so.

First of all, there will be a vote on the Broomfield amendment. I would hope that amendment would be voted down.

I would ask for a no vote on the Broomfield amendment.

The second vote will come on the Wright amendment to the Mica substitute, as amended by Boland. That substitute has been amended in a way which apparently meets the approval of both sides of the aisle. We should vote yes on the Wright amendment.

The third vote will be on the Mica amendment, as amended by the Boland amendment. I would ask for a yes vote on that.

I presume there will be three rollcall votes in addition to a rollcall perhaps on the motion to close debate.

So, Mr. Chairman, I just say that I appreciate the tolerance of everybody here. I hope that any Members who are a little disappointed will go to lunch tomorrow with each other. They can probably clear up some of the problems that have developed on this floor.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BROOMFIELD) to the amendment offered by the gentleman from Florida (Mr. YOUNG), as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. BROOMFIELD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 203, noes 223, not voting 7, as follows:

[Roll No. 281]

AYES—203

NOT VOTING—7

Chappie	Guarini	McDade
Dowdy	Heftel	
Florio	Jones (TN)	

□ 2000

The Clerk announced the following pairs:

On this vote:

Mr. Dowdy of Mississippi for, with Mr. Guarini against.

Mr. McDade for, with Mr. Florio against.

Mr. FORD of Tennessee changed his vote from "aye" to "no."

So the amendment to the amendment, as amended, was rejected.

The result of the vote was announced as above recorded.

□ 2010

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. WRIGHT) to the amendment offered by the gentleman from Florida (Mr. MICA), as amended, as a substitute for the amendment offered by the gentleman from Florida (Mr. YOUNG), as amended.

The amendment to the amendment, as amended, offered as a substitute for the amendment, as amended, was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. MICA) as amended, as a substitute for the amendment offered by the gentleman from Florida (Mr. YOUNG) as amended.

The question was taken; and the Chairman announced that the ayes appeared to have it.

The CHAIRMAN. The Mica substitute, as amended, is agreed to.

So the amendment, as amended, offered as a substitute for the amendment, as amended, was agreed to.

The CHAIRMAN. For what purpose does the gentleman from New York (Mr. SOLARZ) rise?

Mr. SOLARZ. Mr. Chairman, on that I ask for a recorded vote.

The CHAIRMAN. The request of the gentleman comes too late.

The question is on the amendment offered by the gentleman from Florida (Mr. YOUNG) as amended.

The amendment, as amended, was agreed to.

● Mr. WIRTH. Mr. Chairman, recently our Ambassador to Nicaragua, Anthony Quainton, described the goals of the Reagan administration's policy toward that nation. "Our policy," he said, "is to try and modify the Sandinista government's behavior in some substantial ways which are consistent with our interests." This followed by 1 day the suggestion by U.N. Ambassador Jeane Kirkpatrick that U.S. military interdiction of arms shipments on the high seas would have a positive effect.

Taken together, the import of these statements is chilling, as it signals nothing less than a return to the bad old days of gunboat diplomacy. Had the year been 1903, and the administration been Theodore Roosevelt's, one could understand the quiet acceptance of such crude foreign policy by the Congress. But the year is 1983, and if we have learned anything about mature international relations in the intervening four generations, it is incumbent upon us to speak out now.

We should be basing our policy toward Central America on our country's best values: Respect for human rights, the peaceful settlement of conflict through negotiation, and adherence to the principles of self-determination. Instead, the administration is emphasizing a policy reliant on some of our sorriest mistakes of the past: Support for oppressive regimes, covert action, and heavyhanded military posturing. Our country does have a legitimate role to play in the region, but our efforts should focus on facilitating peaceful solutions to conflict, not on measures which increase the risk on new bloodshed. Unfortunately, the recent actions of the Reagan administration unequivocally endorse the latter course.

Currently taking up positions off the east and west coasts of the region are two U.S. Navy aircraft carrier groups. Plans are also underway for a major United States-Honduran military "exercise" which administration officials have said could involve up to 5,000 military personnel. And Pentagon officials have recently made a request to more than double the amount of U.S. military advisers in El Salvador. This is in addition to the seemingly endless requests for more and more military aid for that nation.

The destructive effects of such a course are twofold. A progressively increasing U.S. military commitment to Central America not only escalates and broadens the scope of the violence now, but it also makes the prospects for a negotiated and equitable solution ever more dim. Each new military step that we take in the region may perhaps buy more strength in the short run, but in the long run it will irreparably weaken the bonds of faith that must exist between truly cooperative nations. At best, it would be an understatement to say that the saber-rattling politics of the Reagan administration is counterproductive.

In the case of Nicaragua, no one can argue with the administration's assessment of the deplorable political turn that the Sandinista regime has taken since assuming power in 1979. But the argument that this gives the United States the right to intervene is counter to both our long-range interests and our principles. Our hostile policy toward Nicaragua is increasing that country's tendency toward authoritarian rule and reliance on Soviet aid.

It is time to bring our Central American policy out into the open and assure that it is consistent with our real aims and ideals. To establish a farsighted policy, we first need to take Central America out of the cold war framework and recognize that change—brought on by the genuine aspirations of the people of the region—is a fact. We must then recognize in our actions the sovereignty of Central American nations, and the right of the peoples of the region to peaceful self-determination. Accommodating the change sweeping through Central America, while protecting legitimate American interests in the region, is the challenge facing our policy. It is a challenge that the Reagan administration has so far refused to recognize, much less taken steps to meet.

The United States should have grown beyond the paternalistic and insensitive policies which have so seriously damaged our Nation in the eyes of our Latin American neighbors for the past 50 years. Instead of pursuing those outworn policies, we should be working to increase our cooperation and partnership with our neighbors to support security and self-determination in our hemisphere.●

● Mr. COYNE. Mr. Chairman, I rise in support of H.R. 2760 and urge my colleagues to reject all weakening amendments which would place conditions on the prohibition of covert activities against Nicaragua.

H.R. 2760 would halt the funding of the counterproductive paramilitary operations within Nicaragua, while authorizing overt security assistance to friendly countries in Central America to use to interdict arms transfers from Nicaragua and Cuba.

The covert military operations have not achieved their intended goal of interdicting arms supplies to the guerrillas in El Salvador. Worse, these activities have added to the tensions in the area and have greatly increased the likelihood of expanded conflict in Central America and more extensive U.S. involvement.

The Reagan administration's policies toward Central America indicate a fundamental misunderstanding of the social, economic, and political forces at work in that region of the world. Instead, the administration continues to insist on portraying the situation as

strictly a West versus East conflict and to pursue a policy of military buildup. None of us is under the delusion that the goal of the Sandinistas is a free democratic society, but covert military aid to insurgents simply cannot provide the basis for democractic rule in that country. Such a policy only plays into the hands of those who are prepared to take advantage of the turmoil in Central America.

Virtually no friend or ally of the United States supports our present policy in Central America. I find this very disturbing. The Contadora Group consisting of Mexico, Venezuela, Colombia, and Panama have, for some time, been urging the United States to support regionwide negotiations to end the conflict in Central America. Later this week the Contadora Group along with the Foreign Ministers of El Salvador, Nicaragua, Costa Rica, Guatemala, and Honduras will meet to begin talks aimed at resolving the problems and lessening the tensions in the area. The Reagan administration has said that it welcomes and supports these efforts, yet at the same time has ordered the deployment of a large naval battle group off the coast of Central America and has announced plans to send between 3,000 and 4,000 battle troops to Honduras to participate in joint exercise.

When questioned about the increased U.S. military presence in the region at his press conference last night, President Reagan stated that these maneuvers had been planned for some time and were nothing more than regularly scheduled exercises. If that is indeed the case, it seems to me that these maneuvers should have been delayed. To say that you support negotiations in one breath and then order up an increased military presence in the next, not only leads to further doubts about our goals in the area, but also further increases tensions.

Once again I urge the Reagan administration to commit our considerable resources to regionwide negotiations. National opinion is growing daily in opposition to U.S. military intervention in Central America. Passage of H.R. 2760 will send a clear signal to our democratic partners around the world and to our Latin American neighbors that the American people have said "enough is enough." It is time to bring an end to this military adventurism.

I urge my colleagues to vote in favor of H.R. 2760.●

● Mr. BENNETT. Mr. Chairman, I support this legislation as a means of attempting to secure democracy and peace in Central America. However well intentioned, the current covert activity in Nicaragua no longer serves the cause of democracy and peace in that area, nor of our own national security. Henceforth, we should attempt to work in concert with our friendly allies in this area for our mutual security and the principles of democracy and freedom.●

● Mr. MINETA. Mr. Chairman, today we have an opportunity to cut off U.S. involvement in the secret war in Nicaragua. The covert action we are sponsoring in that country is contrary to U.S. and international law, unwise, unproductive, and harmful to our national interests. The operation in Nicaragua has not stopped the civil war in El Salvador, it has just opened up a new civil war. With the scope of war in the region expanded, the possibility of general regional war has increased drastically along with the increased likelihood of direct U.S. military involvement.

Mr. Chairman, we must decide whether we want the United States to support a war in which thousands of people, including innocent civilians, may be killed. The decision to support a war and sacrifice human lives should only be taken after a painstaking examination of the motives for that war and after thorough examination of the possible alternatives to war. The United States should only be directly involved in the initiation of a war when the security of the United States or the lives of U.S. citizens depend on that extreme action. Unfortunately, this administration has ignored these basic principles.

Perhaps the most frightening aspect of this covert operation in Nicaragua is that it is only one part of this administration's overall military approach to Central America. The most recent example of that approach was the dispatching of an armada to Central America. It is apparent to me that we are witnessing a repetition of the incremental escalation of military involvement that characterized our involvement in Vietnam.

How did we get so enmeshed in the Vietnam war? The answer is that the political leadership of both parties failed this country. Let us not fail the American people again. If Congress again fails to stop the President, we will share responsibility for this new, open-ended, and unnecessary war. Let us avoid deceiving ourselves again. We must not hide from the fact that the unchecked continuation of President Reagan's current policies in Central America will lead to the direct involvement of U.S forces.

If we fail as we did in the case of Vietnam, and American lives are needlessly sacrificed, our children will wonder how we let the same tragedy occur twice within one generation. They will look at votes such as the one we face today and ask how Members could have supported the current administration's approach. Members may answer that they were voting for democracy or voting to stop communism, but in reality a vote against H.R. 2760 or a vote to gut it through amendments is a vote to allow the President to continue to draw our country toward war.

Mr. Chairman, today the Members of this House are faced with a grave choice. Will we allow the President to continue our Nation on a path toward war in Central America or will we take a step toward peace?

The question before us is not whether the United States condones the policies of the Nicaraguan Government but whether we want to commit the United States to supporting war in an attempt to change those polices or to overthrow that Government.

It is now clear that unless we prevent the President from continuing his open-ended military commitment, citizens of this Nation may end up fighting and dying in Central America for a policy doomed to failure. In order to help avoid that outcome I urge my colleagues to support H.R. 2760 and oppose all amendments that remove the basic prohibition on U.S. support for the war in Nicaragua. We must take this opportunity before it is too late, take it before our country pays the tragic price of another war.●

● Mr. BONKER. Mr. Chairman, the reason there is so much debate on this issue and division in the country, is that many of us in Congress and American public do not really understand, let alone support, our policies there.

The President has not come before the Nation with a clearly enunciated policy; our activities, covert and overt, do not give us clear direction in Central America.

Once again, we are forming policies along East-West lines not unlike the 1960's and our deepening entanglement in Southeast Asia.

I have always felt we need to have at least four fundamental policy guidelines: First, what are the U.S. political and security interests; second, to what extent are we willing to commit ourselves in the internal political and security problems of these unstable countries; third, what price are we willing to pay for the cost of military involvement and possible use of U.S. personnel; and fourth, are U.S. policies and actions compatible with our own values and beliefs?

Earlier this week, the President sent a letter to the Contadora Group. The President wrote in this letter that: "A solution to the crisis in Central America must encompass four basic principles"

First, the establishment and strengthening of democratic institutions;

Second, respect for the principle of nonintervention;

Third, removal of the conflict in Central America from the context of East-West confrontation; and

Fourth; cooperation among the countries of Central America to achieve and sustain a level of economic growth that will guarantee the basic needs of their people.

In practice, however, the administration is pursuing actions toward and in this region which are not only in direct contradiction to the words of the President, but which undermine the Contadora Group process and which threaten the legitimate foreign policy and national security interests which I believe we have in the region.

The President endorses strengthening democratic institutions—yet he continues to bolster the regimes of Salvador and Guatemala.

The President endorses respect for the principle of nonintervention—yet he is fighting to continue covert aid to overthrow the Government of Nicaragua, he is contemplating an increase in the number of U.S. military advisers in Salvador, and intends to send 4,000 combat troops to Honduras and a major naval detachment to the surrounding seas.

The President endorses removing the Central American conflict from an East-West context—yet he first chose this context for describing the nature of our interests in the crisis there.

And finally, the President urges the countries of Central America to boost their economic growth to guarantee the basic needs of their people. Yet, the President has drastically skewed the balance of our aid to the region in favor of military assistance.

In short, the President is fooling no one, least of all the American people, when he says he is working for peace and at the same time pursuing military objectives.

The President has consistently referred to our security interests in the region. But what are those interests if they are the basis for our political and military involvement in Central America?

Twenty-five years ago, we Americans experienced considerable discomfort with Castro coming to power and the installation of a Communist government next to our borders. Did that in itself threaten our security? Castro has failed miserably in seeking to export his revolution in the intervening years. President Kennedy attempted to overthrow that regime, which resulted in a fiasco known as the Bay of Pigs. However, when the Soviet Union attempted to plant missiles in Cuba, there was no question about our security being threatened. President Kennedy drew the line and everybody knew exactly where it was, including the Russians.

The American public fully understood and supported that policy. Today, we do not know where that line is being drawn. The President has neither enunciated our policy, nor clearly established what our security interests are in Central America. Until he does, this administration's policies will only bring further confusion and uncertainty to the American people, not only about America's interests in the region, but about our resolve as well.

We must, I believe, redouble our diplomatic efforts in pursuit of a peaceful, negotiated settlement in Nicaragua and elsewhere in Central America. We must give the Contadora process support in deed as well as in word. The Boland-Zablocki bill is intended to be one important step toward erasing the administration's double standard, toward restoring American credibility in Central America, and toward correcting the balance in favor of a peaceful solution to the conflict there.

We are condemned to failure in Central America unless our policy exemplifies what we stand for as a Nation. We cannot succeed in combating endemic poverty, or in bringing an end to social injustices and gross violations of human rights by blindly lending our overt support to those who brandish an anti-Communist flag and at the same time funnel covert support to forces committed to overthrowing a neighboring government. The Reagan administration's double standard is glaring, and certainly does not encourage any country in the region to opt for a peaceful solution to its problems.●

● Mr. MARRIOTT. Mr. Chairman, I rise in opposition of H.R. 2760, the Boland-Zablocki bill, which would prohibit all covert assistance to groups attempting to overthrow the Sandinista junta in Nicaragua. Quite simply, Mr. Chairman, this measure cuts off U.S. aid to the freedom fighters rebelling against the Sandinista dictatorship which is disrupting peace in the region by exporting weapons, violence, and terror to surrounding nations; namely, to the insurgents in El Salvador and Honduras.

My opposition to this measure centers around the following points:

This measure unilaterally restricts U.S. conduct without regard to Nicaraguan behavior in Central America;

This measure authorizes an overt interdiction fund which has not been requested by our friends or allies in Central America;

This measure makes it more difficult to negotiate a peaceful verifiable resolution of the conflicts in Central America;

This measure provides a type of sanctuary for Nicaraguan/Cuban-based guerrillas who strike out with impunity against their neighbors without fear of retaliation behind their own borders; and

This measure deprives the United States of an important tool to thwart Nicaraguan/Cuban-based insurgency in Central America.

In addition to these negatives, the bill does not:

Deter the massive arms buildup in Nicaragua;

Request Nicaragua to cease the export of arms and revolution to other Central American countries;

Halt Nicaraguan efforts to overthrow the Government of El Salvador;

Provide any incentive for Nicaraguan Government to negotiate to end hostilities; and

Protect any of our friends in Central America against Nicaraguan/Cuban-backed insurgencies in their countries.

During the Carter administration, shortly after Sandinista assumed power in Nicaragua, the United States attempted to develop normal relations with this country following Somoza's ouster. But what has occurred are flagrant violations of human rights and the export of revolution to its next door neighbor, El Salvador. Passage of the bill on the floor today, H.R. 2760, could subject not just those directly involved, but also anti-Sandinista sympathizers to reprisals by the Nicaraguan army, initiate an influx of refugees into the United States, trigger a military clash between Honduras and Nicaragus and indicate a lack of resolve that would have grave repercussions not only in Central America, but to U.S. allies throughout the world.

I am pleased that the Intelligence Committee will be providing the Members with a documented closed-door briefing on activities in Central America so that the full House of Representatives can understand all the ramifications of pulling out our covert aid at this time. It is important that we repudiate this dangerous legislation and help our President resolve the serious problems in Central America.

In conclusion, Mr. Chairman, I have to ask this question: Why should the United States arm every friendly Central American country, including Costa Rica, which by law has no standing army, instead of disarming Nicaragua? Given the high stakes involved and the lack of resolve that would be demonstrated by the United States deserting the anti-Sandinistas, I doubt Central American governments will be willing to work with the United States in the overt interdiction program. In effect, Mr. Chairman, we are handing to Nicaragua a victory on a silver platter, but it is a victory at the price of increased human suffering and loss of lives in Central America and a greatly expanded immigration to the United States.

The current program is consistent with U.S. law, is wise, will help to end all the fighting in Central America by "forcing the Nicaraguans to the conference table to solve the problems of the region"—Mr. BILL YOUNG of Florida in his dissenting views—and is ef-

fective in the interdicting arms supplies from Nicaragua.

Mr. Chairman, I stand in opposition to the measure and I urge my colleagues to vote this ill-timed bill down. The United States cannot turn its back on the encroaching Marxist control in our southern neighboring countries.●

● Mr. RATCHFORD. Mr. Chairman, the President told us clearly this week that he has bigger fish to fry in sending 4,000 U.S. military personnel to Honduras. This reckless military buildup makes the CIA covert operation against Nicaragua seem pale by comparison. Mr. Chairman, I rise to urge the swift and decisive approval of H.R. 2760 by my colleagues. The administration's policy in Central America is a bankrupt one. Putting an end to the covert operation must be only a beginning. There are now bigger fires to put out, but let's be sure to take care of this one.

This policy is wrong morally. It is wrong legally. It hasn't achieved its objectives. In fact, it is wreaking havoc where it is supposed to be sowing the seeds of peace. It is time for a change, and time for this body to exercise some leadership in an area we can all agree is critical to our interests.

I am somewhat bemused that this measure has become so controversial. It in no way attempts to usurp the President's prerogatives in the foreign policy arena. It upholds his goal of helping to foster democratic, pluralistic, responsive governments in the region. Who could differ with that goal? The President is right. Central America is central to our security interests. We must demonstrate our understanding that our interests are synonomous with those of the people of the region. This measure seeks only to change the means of achieving the President's goals, acknowledging the fact of Cuban and Nicaraguan aggression, but calling a halt to U.S. policy failures in Nicaragua.

Every legislative body has a love of semantics, of the richness of words, the endless possibilities of interpretation. But let us not kid ourselves. The letter and the spirit of American and international law are being broken in Nicaragua. The CIA must cringe every time the antigovernment forces it is aiding assert that they are waging war on the Sandinista regime. This does not stop the President, however. He has publicly expressed support for their objectives. Not surprisingly, the Nicaraguan Government has protested that this is tantamount to a declaration of war. One need not love the Sandinistas to see that they have a point. I have little doubt that Jeanne Kirkpatrick would make the same point were the roles reversed.

If the legality of this policy is a matter of indifference, consider the fact that it is not working. In 18 months there has been no slowdown in the arms flow to the Salvadoran rebels. If anything, the Sandinista commitment to the insurgency has strengthened. U.S. hostility has thus had a disastrous threefold effect. It has strengthened Nicaraguan resolve to aid the leftists in El Salvador. It has contributed to a corresponding increase in repressive measures by the Sandinistas internally, in an effort to consolidate their hold on the country. And it has escalated the intensity and scope of violence in the region, threatening the fragile 2-year-old Honduran Government. It would be difficult to construct a policy which could produce results more destructive of the interests of all concerned.

My colleagues, all this measure will do is redirect U.S. policy away from a purely military solution—how many times must we learn this lesson—and toward support for regional negotiations for an end to the bloodshed. Democratic institutions cannot grow in an atmosphere of violence. We can continue to provide money to stop the arms flows. We can encourage the recent peace initiatives of the Sandinistas. And we can enlist the goodwill and aid of our European allies, and the members of the Contadora group and the Organization of American States for peaceful settlements of the conflicts. The situation is not hopeless unless we make it so. The structure of regional cooperation exists now in fledgling form. Let us seize this opportunity to change directions and help it grow. Strong support for H.R. 2760 will demonstrate our resolve, and I urge my colleagues to give this measure their support.●

● Mr. MATSUI. Mr. Chairman, I rise today in support of the legislation we are debating, H.R. 2760, which would cut off aid to rebels fighting in Nicaragua. I believe approval of this bill will send a clear message to the President that the American people do not support covert action against the Government of Nicaragua and do not support escalation of U.S. military involvement in the region.

As we are all aware, administration officials have justified support of the guerrillas on the basis that they would force the Sandinista government to "turn inward" and curtail its efforts to support rebel forces in El Salvador. But the administration and its critics alike agree this policy has not worked.

Rather than reducing Nicaragua's military activity, covert action has turned the border of Nicaragua and Honduras into a battle zone, where hundreds of people have lost their lives and many more have lost their homes and property. The conflict threatens to turn into a full-scale war, with the result of wider instability in the region and the temptation for a direct U.S. role.

Rather than threatening the Sandinista government, U.S. policy has given it a political shot in the arm. It has galvanized the Nicaraguan people behind the government and turned their attention away from the daily shortages of bread and gasoline toward the alarming threat of Yankee intervention. The Sandinistas have been able to blame their failed economic policies on the United States, and at the same time, set themselves up as heroes and freedom fighters.

Instead of looking for an alternative to its failed policy, the administration decided to raise the military stakes. It developed secret plans for nearly doubling the level of covert activity and is now undertaking a massive show of force in Honduras and off the coast of Nicaragua. I believe this will only exacerbate the conflict and lead the United States ever closer to direct intervention. But the administration continues to be deluded by the myth that military force can remedy the region's political problems.

Recently Nicaraguan leader Daniel Ortega Saavedra called for regionwide negotiations, a mutual ban on arms shipments to El Salvador and a nonaggression pact between Honduras and Nicaragua. Although Saavedra's statement was considered a diplomatic breakthrough, President Reagan coolly dismissed it by asserting that Nicaragua must agree to implement internal political reforms before talks could be started. The President went so far as to say that as long as the current junta was in power, it would be "extremely difficult" to make peace with Nicaragua. The President clearly prefers big stick diplomacy to negotiations.

I believe it is imperative that we in the Congress approve this legislation, H.R. 2760, in order to convince the President he must call a halt to covert activity and reduce the threat of direct U.S. military intervention. We must also encourage him to take the Sandinistas at their word and challenge them publicly before the world to engage in serious negotiations. Therefore, I urge my colleagues to join me in support of this important measure.●

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WRIGHT

Mr. WRIGHT. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. WRIGHT: Strike out all after the enacting clause and insert in lieu thereof the following:

That the Intelligence Authorization Act for Fiscal Year 1983 is amended by adding at the end thereof the following new title:

"TITLE VIII—PROHIBITION ON COVERT ASSISTANCE FOR MILITARY OPERATIONS IN NICARAGUA; AUTHORIZATION OF OVERT INTERDICTION ASSISTANCE

"PROHIBITION ON COVERT ASSISTANCE FOR MILITARY OPERATIONS IN NICARAGUA

"SEC. 801. (a) None of the funds appropriated for fiscal year 1983 or 1984 for the Central Intelligence Agency or any other department, agency, or entity of the United States involved in intelligence activities may be obligated or expended for the purpose or which would have the effect of supporting, directly or indirectly, military or paramilitary operations in Nicaragua by any nation, group, organization, movement, or individual.

"(b) This section shall take effect upon the date prescribed in the classified annex to the report of the Permanent Select Committee on Intelligence of the House of Representatives to accompany the bill H.R. 2760 (98th Congress).

"AUTHORIZATION OF OVERT INTERDICTION ASSISTANCE

"SEC. 802. (a) The Congress finds that—

"(1) in the absence of a state of declared war, the provision of military equipment to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America violates international treaty obligations, including the Charter of the United Nations, the Charter of the Organization of American States, and the Rio Treaty of 1949; and

"(2) such activities by the Governments of Cuba and Nicaragua threaten the independence of El Salvador and threaten to destabilize the entire Central American region, and the Governments of Cuba and Nicaragua refuse to cease those activities.

"(b) The President is authorized to furnish assistance, on such terms and conditions as he may determine, to the government of any friendly country in Central America in order to provide such country with the ability to prevent use of its territory, or to prevent to the extent permitted by international law the use of international territory, for the transfer of military equipment from or through Cuba or Nicaragua or any other country or agents of that country to any individual, group, organization, or movement which the President determines seeks to overthrow the government of such friendly country or the government of any other country in Central America. Assistance under this section shall be provided openly, and shall not be provided in a manner which attempts to conceal United States involvement in the provision of such assistance.

"(c) Assistance may be provided to a friendly foreign country under this section only if that country has agreed that it will not use any assistance provided by the United States under this section, the Foreign Assistance Act of 1961, or the Arms Export Control Act to destabilize or overthrow the government of any country in Central America and will not make any such assistance available to any nation, individual, group, organization, or movement which seeks to destabilize or overthrow any such government.

"(d) At least 15 days before providing assistance to a foreign country under this section, the President shall submit an unclassified report which describes the proposed assistance to the Speaker of the House of Representatives and to the chairman of the appropriate committees of the Senate.

"(e) There is authorized to be appropriated to the President to carry out this section $30,000,000 for the fiscal year 1983 and $50,000,000 for the fiscal year 1984.

"(f) Funds to carry out this section shall be made available for any friendly country in Central America only for the purpose of interdicting the transfer of military equipment to any country in Central America.".

SEC. 2. (a) The Congress finds that—

(1) the Government of National Reconstruction of Nicaragua has failed to keep solemn promises, made to the Organization of American States in July 1979, to establish full respect for human rights and political liberties, hold early elections, preserve a private sector, permit political pluralism, and pursue a foreign policy of non-aggression and non-intervention;

(2) by providing military support (including arms, training, and logistical, command and control, and communications facilities) to groups seeking to overthrow the Government of El Salvador and other Central American governments, the Government of National Reconstruction of Nicaragua has violated article 18 of the Charter of the Organization of American States which declares that no state has the right to intervene, directly or indirectly, for any reason whatsoever, in the internal or external affairs of any other state;

(3) the Government of Nicaragua should be held accountable before the Organization of American States for activities violative of promises made to the Organization and for violations of the Charter of that Organization; and

(4) working through the Organization of American States is the proper and the most effective means of dealing with threats to the peace in Central America, of providing for common action in the event of aggression, and of providing the mechanisms for peaceful resolution of disputes among the countries of Central America.

(b) The President shall seek a prompt reconvening of the Seventeenth Meeting of Consultation of Ministers of Foreign Affairs of the Organization of American States for the purpose of re-evaluating the compliance by the Government of National Reconstruction of Nicaragua—

(1) with the commitments made by the leaders of that Government in July 1979 to the Organization of American States; and

(2) with the Charter of the Organization of American States.

(c) The President shall vigorously seek prompt actions by the Organization of American States that would provide for a full range of effective measures by the member states to bring about compliance by the Government of National Reconstruction of Nicaragua with those obligations, including verifiable agreements to halt the transfer of military equipment and to cease furnishing of military support facilities to groups seeking the violent overthrow of governments of countries in Central America.

(d) The President shall use all diplomatic means at his disposal to encourage the Organization of American States to seek resolution of the conflicts in Central America based on the provisions of the Final Act of the San Jose Conference of October 1982, especially principles (d), (e), and (g), relating to non-intervention in the internal affairs of other countries, denying support for terrorist and subversive elements in other states, and international supervision of fully verifiable arrangements.

(e) The United States shall support measures at the Organization of American States, as well as efforts of the Contadora Group, which seek to end support for terrorist, subversive, or other activities aimed at the violent overthrow of the governments of countries in Central America. Funds authorized to be appropriated by this Act may be used to provide United States support for activities with respect to Nicaragua which are designed to end the conflict in the region and which are approved by the Organization of American States, including international surveillance and supervision activities, peacekeeping forces, border patrols, and election supervisors.

(f) Not later than March 15, 1984, the President shall report to the Congress on the results of his efforts pursuant to this Act to achieve peace in Central America and to end the flow of arms to Central America. Such report may include such recommendations as the President may consider appropriate for further United States actions to achieve these objectives, including requests for the authorization and appropriation of additional funds to carry out the purposes of this Act.

POINT OF ORDER

Mr. HYDE (during the reading). Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. HYDE. Mr. Chairman, I make a point of order that the amendment now being offered was not printed in the RECORD.

The CHAIRMAN. The Chair would advise the gentleman from Illinois that that is not necessary. It is offered by the majority leader, and it is permitted in the rule.

PARLIAMENTARY INQUIRY

Mr. HYDE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HYDE. I have an amendment that was printed in the RECORD. Will I be given an opportunity to offer it?

The CHAIRMAN. The Chair will advise the gentleman that a printed perfecting amendment to the bill can be offered before the vote on the Wright amendment in the nature of a substitute.

Mr. HYDE. I thank the Chair.

The CHAIRMAN. The Clerk will read.

The Clerk continued the reading of the amendment.

Mr. HYDE. (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

Mr. VOLKMER. Mr. Chairman, I object.

Mr. BONIOR of Michigan. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk continued the reading of the amendment.

Mr. THOMAS of California (during the reading). Mr. Chairman, I ask

unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. VOLKMER. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk continued the reading of the amendment.

□ 2020

PARLIAMENTARY INQUIRY

Mr. EDWARDS of Oklahoma. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman from Oklahoma will state his parliamentary inquiry.

Mr. EDWARDS of Oklahoma. I wonder if the Chairman can tell us if copies of that amendment are available to Members of the House.

The CHAIRMAN. That question can be answered by the gentleman from Texas (Mr. WRIGHT).

Mr. EDWARDS of Oklahoma. I thank the Chairman.

The CHAIRMAN. The Clerk will continue to read.

The Clerk continued the reading of the amendment.

Mr. COURTER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

Mr. FOWLER. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. COURTER. Mr. Chairman, I move that the amendment be considered as read.

The CHAIRMAN. The Chair will advise the gentleman that would not be a proper motion, since the amendment has not been printed in the RECORD.

The Clerk will continue to read.

The Clerk continued the reading of the amendment.

Mr. MARTIN of North Carolina (during the reading). Mr. Chairman, I ask unanimous consent that if we are going to hear the reading of this amendment that we have the unanimous courtesy to be quiet so that we can hear it. It is impossible to tell what the amendment is from the reading.

The CHAIRMAN. The Clerk will continue to read.

The Clerk continued the reading of the amendment.

Mr. LOTT (during the reading). I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

Mr. FOWLER. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

The Clerk will continue to read.

The Clerk continued the reading of the amendment.

Mr. LAGOMARSINO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. FOWLER. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will continue to read.

The Clerk continued the reading of the amendment.

Mr. MARTIN of North Carolina (during the reading). Mr. Chairman, I ask unanimous consent that the Clerk read faster since we cannot hear anyway.

The CHAIRMAN. The Chair would advise the gentleman there are only four more lines.

The Clerk will continue to read.

The Clerk concluded reading of the amendment.

The CHAIRMAN. The gentleman from Texas (Mr. WRIGHT) is recognized for 5 minutes in support of his amendment.

Mr. WRIGHT. Mr. Chairman, this has been, for the most part, I think, a high level, enlightening and elevated debate on a subject of the very highest possible importance to our Nation and to the peace of the hemisphere in which we live.

Tempers have grown short at times. The hour has grown late. Members have been sorely strained to speak in terms less temperate than normal on only rare occasions today.

For the most part I believe Members on both sides have conducted and demeaned themselves in a manner that reflects credit upon the finest traditions of this institution of ours. I want to congratulate all of my colleagues, including those, who, on occasion, have had disagreements with me. And I want to thank them that on those occasions when they have disagreed with me, they have disagreed without being disagreeable. I hope that I have done the same. And I believe that most of the Members on our side have been at some pains to respect the integrity and the good will of the Members on the other side. I hope that applies to all of us.

□ 2030

The amendment in the nature of a substitute which I offer now would be a recodification of the original Roland-Zablocki language, with the addition of the entirety of the language which I offered earlier and which was adopted as an amendment to the Mica substitute, as amended by the Boland amendment.

In effect, what it does is to remove the verbiage which was contained in the Boland-Solarz amendment. It would contain the following clear provisions:

First, that this country will cease at a given date privy to the members of the Committee on Intelligence its covert activities of a military or paramilitary type inside the sovereign territory of Nicaragua.

Second, that it will provide $80 million for those friendly countries in the hemisphere who seek such assistance in sanitizing their borders against the intrusion of arms from outside.

Then, third, it will make an indictment of the Nicaraguan Government for its violation of pledges made to the Organization of American States and for its violation of the charter of the Organization of American States in its intrusions into its neighbor El Salvador.

It will call upon the President of the United States to use the good offices of the Presidency to ask for an immediate reconvening of the 17th conference of the foreign ministers of the Organization of American States for the purpose of taking such action as they would deem appropriate to monitor and supervise breaches of commitment that have been made by Nicaragua.

And, finally, it would permit the United States to participate if the Secretary of State and the President deemed appropriate, financially and otherwise, in peacekeeping measures and in measures designed and sanctioned by the Organization of American States of a multilateral nature, to prevent the flow of arms from one country into another in the Central American region, to monitor that prohibition against the flow of arms and to provide such other means as may be necessary to create the conditions of a lasting peace, including free elections and, if necessary, joint supervision of those free elections by the Organization of American States.

PARLIAMENTARY INQUIRY

Mr. ROBINSON. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman from Virginia will state his parliamentary inquiry.

Mr. ROBINSON. My parliamentary inquiry, Mr. Chairman, is this: If the Wright substitute, as just introduced, is adopted by the House, does it then prevent the minority from introducing a motion to recommit with instructions that would be reported back to the floor immediately?

The CHAIRMAN. The Chair would advise the gentleman that the rule does not protect such a motion to recommit, but that would be up to the Speaker when we go back into the House to answer that question specifically.

AMENDMENT OFFERED BY MR. HYDE TO THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WRIGHT

Mr. HYDE. Mr. Chairman, I offer an amendment to the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. HYDE to the amendment in the nature of a substitute offered by Mr. WRIGHT. At the end of Section 1 of the amendment insert:

"EFFECTIVE DATE

"SEC. 803. The provisions of this title shall take effect 30 days after:

"(a) the Permanent Select Committee on Intelligence and the Committees on Foreign Affairs and Armed Services of the House of Representatives have held hearings on the feasibility of the overt interdiction assistance program which would be authorized by section 802 of this title on the costs and number and type of U.S. personnel and the amount and type of equipment required to implement such a program that would overtly and effectively interdict arms and supplies shipped from or through Nicaragua to support military or paramilitary operations against any nation in Central America; and

Mr. HYDE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

Mr. BONIOR of Michigan. Mr. Chairman, I object.

Mr. HARKIN. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will continue to read.

The Clerk continued the reading of the amendment.

Mr. BARNES (during the reading). Mr. Chairman, I withdraw my objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois (Mr. HYDE) that the amendment be considered as read and printed in the RECORD?

Mr. HARKIN. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will continue to read.

The Clerk concluded the reading of the amendment.

Mr. HYDE. Mr. Chairman, I yield to the gentleman from Georgia (Mr. FOWLER).

Mr. FOWLER. Mr. Chairman, I thank my friend, the gentleman from Illinois.

We simply need a copy of the amendment which we do not have on this side.

I thank the gentleman.

Mr. HYDE. Mr. Chairman, this amendment simply says that the bill will take effect, the legislation will take effect, 30 days after the Permanent Select Committee on Intelligence, the Foreign Affairs Committee and Armed Services have held hearings on the feasibility of the overt interdiction assistance program which would be authorized by section 802. Hearings should deal with the cost and number and type of U.S. personnel, the amount and type of equipment required to implement such a program that would overtly and effectively interdict arms and supplies shipped from or through Nicaragua to support military or paramilitary operations against any nation in Central America.

Now, the reasons for this is rather simple. We are taking a course of action by shutting off covert aid, and we are moving to the interdiction of the export of revolution overtly, but we do not have any money in the bill that relates to the reality of that problem. We have taken $30 million in fiscal 1983 and $50 million in fiscal 1984 literally out of the sky. Where did those numbers come from? Those are the sums that the administration wanted for covert interdiction.

Now, covert interdiction and overt interdiction are two separate operations. Overt interdiction involves a lot more than covert interdiction. So it just seems to me, if we are going to start a program, we ought to know what it costs. We ought to know what is involved. We have held no hearings on this very important strategic, not to say economic, move from trying to interdict covertly to overt interdiction. We are talking about Honduras, we are talking about El Salvador, we are talking about Costa Rica. We really do not know what we are talking about. But it seems to me one should not launch into a program, at least as far as the taxpayers are concerned, not to say our friends in Central America, without some idea as to what it will cost.

Now, it just seems to me very foolish to say we are going to overtly interdict and we pick figures that obviously are not related to overt interdiction. And all my amendment says is: Please, let us hold hearings, let us get the facts, and then the bill may take effect.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from New York.

Mr. STRATTON. I think the gentleman is making a very excellent amendment. We have just passed in this Chamber a bill for a 1984 budget of some $187 billion. A number of Members in this Chamber, more than 100, were opposed to the legislation. And if we are going to get in, as the gentleman has suggested, to overt military action, which the Pentagon has indicated to be extremely costly, certainly there ought to be hearings in the Committee on Armed Services so that we could understand what impact this will have on our defense.

I would strongly support the gentleman's amendment, and it would appear to be noncontroversial.

Mr. SOLARZ. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from New York.

Mr. SOLARZ. I thank the gentleman for yielding.

I wonder if my good friend, the gentleman from New York, who just spoke, would perhaps answer a question.

I have no problem, speaking just for myself, with this amendment. It requires a hearing, but I assume the hearing can be held in a timely and expeditious fashion.

Mr. HYDE. They are within your control, as you know.

Mr. SOLARZ. Well, I am neither on the Intelligence Committee nor the Armed Services Committee. I have no doubt that the Intelligence Committee would be prepared to have an expeditious hearing on this.

Can the gentleman from New York give us some reasonable assurances that Armed Services would proceed, if this is adopted, to have a hearing as well?

Mr. STRATTON. Well, I cannot speak for the committee, but I am sure that the chairman would move very expeditiously, because this is going to have a major impact on the budget we just passed, and it might require that some of the things that have been added to the budget would have to be taken out.

Mr. SOLARZ. If the gentleman will yield further, do I interpret the gentleman's amendment correctly to read that if the hearings envisioned in the amendment are held, even before the legislation is enacted, it would satisfy the requirement of the amendment to have such a hearing?

Mr. HYDE. That is correct. I simply want hearings held so we do not leap into the dark, into a new operation in Central America and not have any idea what it costs.

□ 2040

The CHAIRMAN. The time of the gentleman from Illinois (Mr. HYDE) has expired.

(On request of Mr. COURTER and by unanimous consent, Mr. HYDE was allowed to proceed for 3 additional minutes.)

Mr. SMITH of Florida. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Florida.

Mr. SMITH of Florida. I thank the gentleman for yielding.

Mr. Chairman, I would like to know if this 30-day prohibition until after those enumerated committees have their hearings applies not only to the $80 million in overt aid but also the covert aid as well?

Mr. HYDE. Yes, sir; it is the effective date of the legislation must wait until the hearings are held.

Mr. SMITH of Florida. If the gentleman would yield further, in essence, then, if their hearings were to be stretched out over any period of time for any reason whatsoever, that all the covert aid would continue to flow while those hearings were held?

Mr. HYDE. Well, if I may say, Mr. SMITH, the chairmen of the three committees involved are Democrats, and they are pretty strong people. They can open the hearings and close the hearings. They can determine whether they are moving along, and control the ebb and flow of the hearings. So I am not concerned with that.

Mr. SMITH of Florida. The answer is yes. I thank the gentleman.

Mr. HYDE. Well, yes.

Mr. MARTIN of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to my friend, the gentleman from North Carolina.

Mr. MARTIN of North Carolina. I thank the gentleman for yielding.

Mr. Chairman, I would observe for the benefit of the gentleman from Florida who was inquiring about the effective date that the amendment offered by the gentleman from Illinois does not in any way supersede the provisions that is already in the Wright substitute, which says it takes effect upon the date prescribed in the classified annex to the report of the select committee.

That certainly is not going to be revoked by this 30-day provision which the gentleman from Illinois has provided.

If the gentleman would yield further, I would want to commend him for his amendment.

Mr. HYDE. I always yield to be commended.

Mr. COURTER. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from New Jersey, because I suspect he may have a commendation in mind.

Mr. COURTER. I do, but that is not the main reason I want to be heard.

Mr. Chairman, is it my understanding that the purpose for your bringing this amendment is the fact that there has been no hearings or independent determination on adequacy of the $80 million?

Mr. HYDE. That is right.

Mr. COURTER. Is the gentleman saying that we are about to pass legislation that requires an $80 million expenditure with no determination as to its adequacy?

Mr. HYDE. I am saying that we are moving from a program of covert interdiction into overt. They are two different animals entirely, with different requirements, so we ought to have hearings to see what it will cost.

Mr. MARTIN of North Carolina. Mr. Chairman, will the gentleman yield for a partial answer?

Mr. HYDE. I yield to my friend, the gentleman from North Carolina.

Mr. MARTIN of North Carolina. I think I can remind the Members of a partial answer that was developed earlier, if I may have the attention of the gentleman, when, in debate, we pointed out that a recently defected former member of the Sandinista secret police gave us his estimate that the amount that had been brought into Nicaragua for export was somewhere in excess of $500 million.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. HYDE) has again expired.

(On request of Mr. BEDELL and by unanimous consent, Mr. HYDE was allowed to proceed for 2 additional minutes.)

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Iowa.

Mr. BEDELL. I thank the gentleman for yielding.

Mr. Chairman, the question that needs to be clarified is the gentleman says "have held hearings." Does this mean one hearing, or does this mean that the committee could string it on and on, and on and on if it was the will of the committee to do so and, therefore, hold this up for an indefinite period of time?

Mr. HYDE. I would say it would be within the control of the chairman of the committee and the members of the committee, and since your party is in the majority, I have total confidence in them.

Mr. BEDELL. Mr. Chairman if the gentleman from Iowa could be heard further, then the net result of this amendment is to leave it up to any one of those committees to delay this thing for as long as they wish to do so. This Member of this body thinks this is a responsibility of the Members of this body, and I, for one, am not willing to turn it over to any one of our committees to delay it forever.

Mr. HYDE. This Member can only express dismay at the lack of confidence in the committee structure established by the Democratic rules. I reaffirm my confidence in the chairmen.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to my friend, the gentleman from Nebraska.

Mr. BEREUTER. I thank the gentleman for yielding.

Mr. Chairman, first I would like to ask, does the gentleman's amendment cover the requirement to look at additional U.S. military assistance that would be involved in an overt interdiction program?

Mr. HYDE. Yes, sir.

Mr. BEREUTER. Including personnel, U.S. personnel?

Mr. HYDE. Yes, sir. You see, if we are going to be involved down there in terms of money and personnel, the least thing we can do is hold hearings to find out how many personnel and how much money.

Mr. BARNES. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Wright substitute.

Mr. Chairman, before I address the merits of the Wright substitute and the Hyde amendment to it which are pending before us, I just want to comment that I think the leadership that we have seen from the chairman of the Intelligence Committee, the gentleman from Massachusetts (Mr. BOLAND) has been absolutely remarkable, and I know the Members on both sides of the aisle have seen their respect for the gentleman from Massachusetts grow today. I, for one, have found it an honor to work with our chairman on this issue.

I also want to say that we throw our titles around here a lot. We are all proud of the titles we have as chairmen or whatever, but the title "majority leader" has taken on a new dimension, I think, in the context of the debate today and I am very proud of the role that the majority leader has played in leading the majority of this House on an important issue.

The leader's substitute could not be more appropriate. Earlier today some of us noted the excellent letter that President Reagan sent to the presidents of the four Contadora countries, the presidents of Panama, Colombia, Mexico, and Venezuela, in which President Reagan said, and I quote:

> The charter of the Organization of American States makes clear that it should be the purpose of the OAS to either prevent unjust acts committed against one state against another, or to provide for common action on the part of the members in the event of difficulties.

The President said:

> I believe the OAS, as this Hemisphere's regional forum, is the appropriate mechanism to insure that those who make commitments comply with them.

Well, the substitute that we have before us now offered by the distinguished majority leader calls upon the Government of the United States to go to the Organization of American States as the proper forum for consideration of the concerns that we have with respect to the actions of Nicaragua. It is totally consistent with the statement that the President made in his letter to the four Presidents.

I would urge strong support for the substitute offered by the gentleman from Texas (Mr. WRIGHT). I would urge opposition to the amendment to

the Wright substitute that has been offered by the gentleman from Illinois (Mr. HYDE). There is no need for any amendment to this bill that would delay the implementation of the termination of the covert action and the movement of the United States to the Organization of American States to begin the action that is called for under the Wright substitute. There is no need for us to await action.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield?

Mr. BARNES. I yield to the gentleman from South Carolina.

Mr. CAMPBELL. I thank the gentleman for yielding.

Mr. Chairman, let me ask one question, and it is a very serious question.

I am in agreement that the OAS ought to act. What does the Wright substitute provide for if they do not act and if Nicaragua continues with their actions?

Mr. BARNES. The Wright substitute incorporates, as did the original Boland-Zablocki language that was before the House at the beginning of this debate, assistance for our friends in the hemisphere, and as the chairman of the Intelligence Committee and the chairman of the Committee on Foreign Affairs said earlier this week in a "Dear Colleague" that all of us received, if the assistance that is provided in this legislation turned out at some date in the future not to be adequate, they would expeditiously bring to the floor of the House legislation to provide adequate assistance.

□ 2050

So that is taken care of.

I want to make one final point in the time that is remaining to me, and I apologize that I do not have much time, but I want to make one final point.

Mr. CAMPBELL. I will ask for more time for the gentleman.

Mr. BARNES. It demonstrates the significance of what we have done today, the timeliness and the importance of what we have done today.

On the evening news tonight, on CBS, there was this report. CBS reported:

There are deep divisions within the CIA's clandestine operations directorate over plans to expand covert operations against Nicaragua.

CBS reported further:

Senior career officers are warning the plans pose a major danger of escalating the conflict.

They went on to say:

According to very reliable sources, CIA Director William Casey proposed expanding the covert operations over the objections of a number of his senior advisors.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. BARNES) has expired.

Mr. BARNES. Mr. Chairman, I ask unanimous consent to proceed for 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

Mr. LOTT. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

AMENDMENT OFFERED BY MR. BEREUTER AS A SUBSTITUTE FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WRIGHT

Mr. BEREUTER. Mr. Chairman, I offer an amendment as a substitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. BEREUTER as a substitute for the amendment in the nature of a substitute offered by Mr. WRIGHT:

Strike out all after the enacting clause and in lieu thereof insert the following:

That the Intelligence Authorization Act for Fiscal Year 1983 is amended by adding at the end thereof the following new title:

TITLE VIII—PROHIBITION ON COVERT ASSISTANCE FOR MILITARY OPERATIONS IN NICARAGUA; AUTHORIZATION OF OVERT INTERDICTION ASSISTANCE

"PROHIBITION ON COVERT ASSISTANCE FOR MILITARY OPERATIONS IN NICARAGUA

"SEC. 801. (a) None of the funds appropriated for fiscal year 1983 or 1984 for the Central Intelligence Agency or any other department, agency, or entity of the United States involved in intelligence activities may be obligated or expended for the purpose or which would have the effect of supporting, directly or indirectly, military or paramilitary operations in Nicaragua by any nation, group, organization, movement, or individual.

"(b) This section shall take effect upon the date prescribed in the classified annex to the report of the Permanent Select Committee on Intelligence of the House of Representatives to accompany H.R. 2760 (98th Congress), but in no event earlier than October 1, 1983, unless before that effective date the President, after consultation with the Congress, has submitted to the Speaker of the House of Representatives and the President pro tempore of the Senate in writing a new plan providing for the interdiction of arms being shipped from or through Nicaragua to forces hostile to the Government of El Salvador. In formulating such a plan, the President shall consider whether it would be useful to pursue direct bilateral negotiations between the United States and the Government of Nicaragua; multilateral negotiations among selected Western Hemispheric countries; involving the Organization of American States, the United Nations, or any other nation or nations in a diplomatic or peacekeeping role; involving other countries in the process of arms interdiction using United States military supplies and training; and any other policy that will stop the shipment of arms from Nicaragua to El Salvador. The plan submitted pursuant to this subsection shall cease to be implemented and the prohibition contained in subsection (a) shall take effect if—

"(1) the Government of Nicaragua has, by formal action, agreed that it will cease all its activities involving the furnishing of arms, personnel, training, command and control facilities, or logistical support for military or paramilitary operations in or against any country in Central America or the Caribbean; and

"(2) the Government of Nicaragua is taking steps to implement the commitments made by the Government of National Reconstruction of Nicaragua to the Organization of American States in July 1979; and

"(3) the cessation of such activities, and the taking of steps to implement such commitments, has been verified by the Organization of American States or the President of the United States.".

"AUTHORIZING OF OVERT INTERDICTION ASSISTANCE

SEC. 802. (a) The Congress finds that—

"(1) in the absence of a state of declared war, the provision of military equipment to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America violates international treaty obligations, including the Charter of the United Nations, the Charter of the Organization of American States, and the Rio Treaty of 1949; and

"(2) such activities by the Governments of Cuba and Nicaragua threaten the independence of El Salvador and threaten to destabilize the entire Central American region, and the Governments of Cuba and Nicaragua refuse to cease those activities.

"(b) The President is authorized to furnish assistance, on such terms and conditions as he may determine, to the government of any friendly country in Central America in order to provide such country with the ability to prevent use of its territory, or to prevent to the extent permitted by international law the use of international territory, for the transfer of military equipment from or through Cuba or Nicaragua or any other country or agents of that country to any individual, group, organization, or movement which the President determines seeks to overthrow the government of such friendly country or the government of any other country in Central America. Assistance under this section shall be provided openly, and shall not be provided in a manner which attempts to conceal United States involvement in the provision of such assistance.

"(c) Assistance may be provided to a friendly foreign country under this section only if that country has agreed that it will not use any assistance provided by the United States under this section, the Foreign Assistance Act of 1961, or the Arms Export Control Act to destabilize or overthrow the government of any country in Central America and will not make any such assistance available to any nation, individual, group, organization, or movement which seeks to destabilize or overthrow any such government.

"(d) At least 15 days before providing assistance to a foreign country under this section, the President shall submit an unclassified report which describes the proposed assistance to the Speaker of the House of Representatives and to the chairman of the appropriate committees of the Senate.

"(e) There is authorized to be appropriated to the President to carry out this section $30,000,000 for the fiscal year 1983 and $50,000,000 for the fiscal year 1984.

"(f) Funds to carry out this section shall be made available for any friendly country in Central America only for the purpose of interdicting the transfer of military equipment to any country in Central America.".

SEC. 2. (a) The Congress finds that—

(1) the Government of National Reconstruction of Nicaragua has failed to keep

solemn promises, made to the Organization of American States in July 1979, to establish full respect for human rights and political liberties, hold early elections, preserve a private sector, permit political pluralism, and pursue a foreign policy of non-aggression and non-intervention;

(2) by providing military support (including arms, training, and logistical, command and control, and communications facilities) to groups seeking to overthrow the Government of El Salvador and other Central American governments, the Government of National Reconstruction of Nicaragua has violated article 18 of the Charter of the Organization of American States which declares that no state has the right to intervene, directly or indirectly, for any reason whatsoever, in the internal or external affairs of any other state;

(3) the Government of Nicaragua should be held accountable before the Organization of American States for activities violative of promises made to the Organization and for violations of the Charter of that Organization; and

(4) working through the Organization of American States is the proper and the most effective means of dealing with threats to the peace in Central America, of providing for common action in the event of aggression, and of providing the mechanisms for peaceful resolution of disputes among the countries of Central America.

(b) The President shall seek a prompt reconvening of the Seventeenth Meeting of Consultation of Ministers of Foreign Affairs of the Organization of American States for the purpose of re-evaluating the compliance by the Government of National Reconstruction of Nicaragua—

(1) with the commitments made by the leaders of that Government in July 1979 to the Organization of American States; and

(2) with the Charter of the Organization of American States.

(c) The President shall vigorously seek prompt actions by the Organization of American States that would provide for a full range of effective measures by the member states to bring about compliance by the Government of National Reconstruction of Nicaragua with those obligations, including verifiable agreements to halt the transfer of military equipment and to cease furnishing of military support facilities to groups seeking the violent overthrow of governments of countries in Central America.

(d) The President shall use all diplomatic means at his disposal to encourage the Organization of American States to seek resolution of the conflicts in Central America based on the provisions of the Final Act of the San Jose Conference of October 1982, especially principles (d), (e), and (g), relating to non-intervention in the internal affairs of other countries, denying support for terrorist and subversive elements in other states, and international supervision of fully verifiable arrangements.

(e) The United States shall support measures at the Organization of American States, as well as efforts of the Contadora Group, which seek to end support for terrorist, subversive, or other activities aimed at the violent overthrow of the governments of countries in Central America. Funds authorized to be appropriated by this Act may be used to provide United States support for activities with respect to Nicaragua which are designed to end the conflict in the region and which are approved by the Organization of American States, including international surveillance and supervision activities, peacekeeping forces, border patrols, and election supervisors.

(f) Not later than March 15, 1984, the President shall report to the Congress on the results of his efforts pursuant to this Act to achieve peace in Central America and to end the flow of arms to Central America. Such report may include such recommendations as the President may consider appropriate for further United States actions to achieve these objectives, including requests for the authorization and appropriation of additional funds to carry out the purposes of this Act.

Mr. BEREUTER. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

Mr. WEISS. Reserving a point of order, Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will continue to read.

The Clerk continued the reading of the amendment.

Mr. BEREUTER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

Mr. HARKIN. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will continue the reading of the amendment.

The Clerk continued the reading of the amendment.

Mr. SOLARZ (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

POINT OF ORDER

Mr. WEISS. Mr. Chairman, a point of order.

The CHAIRMAN. Does the gentleman from New York (Mr. WEISS) insist upon his point of order?

Mr. WEISS. Mr. Chairman, I do insist on my point of order.

The CHAIRMAN. The Chair will be glad to hear the gentleman.

Mr. WEISS. Mr. Chairman, it is my understanding that substitutes, except for the one offered by the gentleman from Texas, the majority leader, have to be in written form and filed in advance. I understand that this particular substitute had not been, and that is the basis of my point of order.

The CHAIRMAN. Does the gentleman from Nebraska desire to be heard?

Mr. BEREUTER. I do not, Mr. Chairman.

The CHAIRMAN. The Chair would advise the gentleman from New York (Mr. WEISS) that this is an amendment offered as a substitute for the Wright amendment and the rule does not require that it be printed in the RECORD.

Is there objection to the request of the gentleman from New York (Mr. SOLARZ) that the amendment be considered as read and printed in the RECORD?

There was no objection.

The CHAIRMAN. The gentleman from Nebraska (Mr. BEREUTER) is recognized for 5 minutes in support of his amendment.

Mr. BEREUTER. Mr. Chairman, the amendment I have offered can be explained very briefly in that the three components in this amendment have been thoroughly discussed, have been read, have been debated at great length.

The three components of this amendment that I am offering are, first, the so-called Broomfield-Mica amendment offered earlier; second, the amendment offered by the majority leader, the gentleman from Texas (Mr. WRIGHT), which relates to the promises made by the Government of Nicaragua and involves the Organization of American States, I think we recall that, and, third, would be to reinstate section 802 from the original Boland-Zablocki bill or resolution. That section, of course, relates to the overt interdiction aid provided to adjacent Central American nations in the amount of $30 million for fiscal year 1983 and $50 million for fiscal year 1984.

I think that is an adequate explanation. We have been over it before.

Mr. Chairman, I yield back the balance of my time.

Mr. BOLAND. Mr. Chairman, I rise in opposition to the amendment just offered by the gentleman from Nebraska.

Mr. Chairman, the gentleman's amendment, of course, absolutely reinstates the Broomfield amendment. There is no doubt about that.

This House has already voted twice on that particular amendment. We ought to vote it down for a third time.

I have some problem with the Hyde amendment, I must say. I have no problem with the individual. I think he is one of the nicest men you would ever want to meet and perhaps one of the cleverest lawyers here.

I am a little concerned about the effective date. The covert action, of course, would go on until the effective date has been accomplished and that effective date would be 30 days after the Armed Services Committee, the Intelligence Committee, and the Foreign Affairs Committee have held hearings.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I am delighted to yield.

Mr. HYDE. I have no problem with 7 days after hearings. I just want hearings to be held before we launch into a new program and 7 days is fine with me.

The chairman of the Armed Services Committee is here and he hears what we are saying. I know him, as the gentleman knows him, to be an honorable man who will move with dispatch.

This is simple to do things in a sensible, reasonable, orderly way.

Mr. BOLAND. Mr. Chairman, I think if the gentleman from Illinois had restricted this particular amendment to any one of the three, I would have no objection to it; but it offers a way to delay this about as long as you want.

For my part, I am not about to hold a hearing all during August on this particular matter, I can tell you that. I do not know what is going to happen with the other two committees.

I think it is an ineffective amendment. I do not say it is a gutting amendment. I just say it is a very clever amendment. I would hope that the membership would vote "no" on the amendment.

On the final vote, I would hope the Members would vote "aye" on the Wright amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. HYDE) to the amendment in the nature of a substitute offered by the gentleman from Texas (Mr. WRIGHT).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. BROOMFIELD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 194, noes 229, not voting 10, as follows:

NOT VOTING—10

Addabbo	Franklin	Molinari
Boucher	Heftel	Stangeland
Chappie	Jones (TN)	
Dowdy	McDade	

□ 2110

The Clerk announced the following pair:

On this vote:

Mr. Molinari for, with Mr. Addabbo against.

Mr. GUARINI changed his vote from "aye" to "no."

Mr. COUGHLIN changed his vote from "no" to "aye."

So the amendment to the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Chair will state that all time under the 5-minute rule on the bill has expired.

The question is on the amendment offered by the gentleman from Nebraska (Mr. BEREUTER) as a substitute for the amendment in the nature of a substitute offered by the gentleman from Texas (Mr. WRIGHT).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. BEREUTER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 196, noes 228, not voting 9, as follows:

[Roll No. 283]

NOT VOTING—9

Addabbo	Franklin	McDade
Chappie	Heftel	Molinari
Dowdy	Jones (TN)	Stangeland

□ 2130

The Clerk announced the following pair:

On this vote:

Mr. Molinari for, with Mr. Addabbo against.

So the amendment offered as a substitute for the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Texas (Mr. WRIGHT).

The amendment in the nature of a substitute was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2760) to amend the Intelligence Authorization Act for Fiscal Year 1983 to prohibit U.S. support for military or paramilitary operations in Nicaragua and to authorize assistance, to be openly provided to governments of countries in Central America, to interdict the supply of military equipment from Nicaragua and Cuba to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America, pursuant to House resolution 261, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. BROOMFIELD

Mr. BROOMFIELD. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. BROOMFIELD. I certainly am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. BROOMFIELD moves to recommit the bill, H.R. 2760, to the Permanent Select Committee on Intelligence and the Committee on Foreign Affairs.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. BROOMFIELD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 189, nays 234, not voting 10, as follows:

[Roll No. 284]

□ 2210

The Clerk announced the following pairs:

On this vote:

Mr. Addabo for, with Mr. Molinari against.

Mr. Hoyer for, with Mr. Jones of Tennessee against.

Mr. MICA changed his vote from "aye" to "no."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2973) entitled "An act to repeal the withholding of tax from interest and dividends."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3263. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1984, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3263) entitled "An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1984, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MATTINGLY, Mr. LAXALT, Mr. GARN, Mr. HATFIELD, Mr. SASSER, Mr. INOUYE, and Mr. STENNIS to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill, joint resolutions, and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 1340. An act to revise and extend the Rehabilitation Act of 1973 and to extend the Developmental Disability Assistance and Bill of Rights Act, and for other purposes;

S.J. Res. 116. Joint resolution to designate the week of September 4, 1983, through September 10, 1983, as "Youth of America Week";

S.J. Res. 131. Joint resolution designating "National Cystic Fibrosis Week"; and

S. Con. Res. 58. Concurrent resolution correcting the enrollment of S. 272.

PERMISSION FOR SUBCOMMITTEE ON WATER RESOURCES OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT TOMORROW DURING THE 5-MINUTE RULE

Mr. ROE. Mr. Speaker, I ask unanimous consent that the Subcommittee on Water Resources of the Committee on Public Works and Transportation be permitted to sit during the 5-minute rule in the House on Friday, July 29, 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

IMF INCREASE NEEDED

(Mr. WYLIE asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous matter.)

Mr. WYLIE. Mr. Speaker, I was particularly pleased by the editorial in the Columbus Dispatch yesterday, headlined, "IMF Increase Needed." The editorial is well reasoned and very supportive of the IMF quota legislation. This is significant because it comes from a Midwestern, conservative, established newspaper which is now the second largest in circulation for the State of Ohio.

The Columbus Dispatch is too sound to take an editorial position of this magnitude without first thoroughly evaluating both sides of this issue. This is, indeed, very good news today.

[From the Columbus Dispatch]

IMF INCREASE NEEDED

The U.S. House of Representatives may vote this week on a bill to increase this Nation's contribution to the International Monetary Fund. It is important that this increase be approved and vital that voters help push the hike through.

The IMF has 146 member nations which contribute funds to a central account. These funds can then be loaned to nations in need of financial help. The present U.S. contribution to the IMF is $16 billion, and the bill before the House would increase that amount by $8.4 billion.

Strengthening the IMF is important to the United States for several reasons. One of the most important reasons is that the loaned money enables borrowing nations to safeguard their own economies. Strong—or at least stable—foreign economics are absolutely essential to the well-being of the U.S. economy since this nation exports so much of the goods it produces to consumers overseas. If foreign consumers cannot afford to buy U.S. goods, American production and employment will suffer. It is estimated, for instance, that one in five American jobs is dependent upon foreign consumer. U.S. Rep. Chalmers Wylie, R-Columbus, a strong supporter of the IMF increase, points out that one-third of all goods consumed in Mexico are produced in the United States. A dropoff in trade with Mexico, which could happen if the IMF is unable to assist that nation in getting back on its feet, could result in a substantial loss of jobs for U.S. workers.

In short, the money the United States contributes to the IMF works for the American citizen. Not only is interest paid on the loans, but the U.S. money helps prime the pump of international trade which results in jobs, production and tax revenues benefiting all Americans.

The IMF is important in another way to this country, since the United States is both a borrower and a lender. Indeed, Washington is the IMF's second highest all-time borrower, having gone to the IMF well on 24 separate occasions, the last being in 1978 when President Carter looked for help in strengthening the U.S. dollar and borrowed $2.28 billion for this purposes. England is the IMF's all-time top borrower.

Despite these obvious benefits, the IMF increase legislation is in danger in the House, not because of Democratic opposition but because some Republicans do not like the idea of this form of international assistance. What needs to emerge is a majority of moderate representatives from both sides of the aisle who see the wisdom in a free global marketplace but who also recognize the need to insure that credit is available to those countries which need help from time to time getting through economic difficulties. As Wylie rightly points out "The international financial system is a disarray. There is a critical need for the IMF to help countries weather the current financial crisis."

The IMF increase has the strong support of the Reagan White House and it deserves broad support from the citizens of this land. Voter views should be voiced in Washington to guarantee this bill's passage.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 953

Mr. EDWARDS of Oklahoma. Mr. Speaker, I ask unanimous consent to have my name removed as a cosponsor of H.R. 953.

The SPEAKER pro tempore (Mr. ECKART). Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF THE AMENDMENTS IN DISAGREEMENT TO THE CONFERENCE REPORT ON H.R. 3069, SUPPLEMENTAL APPROPRIATIONS, 1983

Mr. FROST. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 284 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 284

Resolved, That during the consideration of the amendments reported from conference in disagreement on the bill (H.R. 3069) making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes, all points of order under clause 7 of rule XVI are hereby waived against the proposed House amendments,

printed on the following pages of the joint statement of managers accompanying the conference report, to the following numbered Senate amendments reported from conference in disagreement: on pages 9 through 10, to number 1; on page 11, to number 8; on page 35, to number 83; on page 45, to number 119; on page 48, to numbers 128 through 132; on page 56, to number 164; on page 57, to number 168; and on page 67, to number 231.

The SPEAKER pro tempore. The gentleman from Texas (Mr. FROST) is recognized for 1 hour.

Mr. FROST. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, the Committee on Rules has reported House Resolution 284 to provide for the orderly and expeditious disposition of the conference report on the fiscal year 1983 supplemental appropriation and its amendments in disagreement. The rule specifically waives points of order on proposed House amendments to certain amendments in disagreement. The rule waives clause 7 of Rule XVI, the germaneness rule, against 12 specified amendments to the Senate amendments reported from the conference in disagreement.

This unusual procedure is necessary in order that the House might consider these 12 amendments on their merit, for otherwise, it would be possible for any one Member of the House to raise a point of order against consideration of each of these amendments and would thereby preclude the House the opportunity to come to a decision on these amendments. The waivers granted in the rule in no way change the normal procedure under which conference reports of the Appropriations Committee are considered, and as is customary, the conference report will be considered in the House under the hour rule. Once it has been adopted, the manager of the conference agreement, the distinguished chairman of the Committee on Appropriations, Mr. WHITTEN, will then bring up each of the 105 amendments in disagreement which will be considered and subject to a vote. In the 12 specific instances where waivers have been granted in the special order reported by the Committee on Rules, the waiver will enable each amendment to be called up, debated and voted on without a point of order being raised and sustained. Each of the amendments in disagreement is allowed 1 hour of debate, equally divided and each is subject to a rollcall vote.

Mr. Speaker, the conference agreement contains $7 billion in supplemental appropriations for the remainder of this fiscal year. Contained in this amount are critically needed funds for the food stamp program—failure to pass the supplemental before the end of this month will result in mandatory across-the-board benefit reductions for food stamp recipients in the month of August and the elimination of benefits in September. The conference agreement contains $1.2 billion in food stamp funding which will enable the program to operate at current levels through the end of the fiscal year. In total mandatory spending, the supplemental conference agreement contains $4.5 billion in administration requested moneys for five programs, including food stamps.

The waivers provided in the rule extend to a number of areas that, in addition to food stamps, need to be addressed in the supplemental. Included in the 12 specific amendments is a provision to incorporate the exact text of H.R. 3385, which passed the House on July 19 by a vote of 312 to 97. H.R. 3385 seeks to prevent the Department of Agriculture from imposing substantial hardships on upland cotton producers who are participating in the administration's PIK program. This bill received the overwhelming support of the House, and as such, the Committee on Rules has made special provision for this amendment to the supplemental in the rule before us today.

In addition, the rule waives point of order for amendments in disagreement relating to the school lunch program, the creation of a hazardous waste center within the Environmental Protection Agency, the creation of a commission to review the coal leasing procedures of the Department of the Interior, funding for the National Institutes of Health for further research on AIDS, extention of the availability of Federal funds for highway crossing Federal projects, provision of additional funding for a methane conversion study authorized by the Surface Transportation Assistance Act of 1982, recapture of funds for a bridge project in Florida and provision of additional funding for three integrated Veterans' Administration hospital system projects.

Mr. Speaker, in order to meet our commitments to the people of this Nation, time is of the essence. It is crucially important that the House act on this conference agreement in the most expeditious manner possible, and the rule before us affords the House that opportunity. I urge my colleagues to support the rule so that we may quickly proceed to the conference report and the important programs which it contains.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the hour is late. Some of the departments of Government will be short of funds unless this supplemental appropriation conference report is passed.

I would like to call to the attention of the Members of the House that when this supplemental appropriation bill was first considered on the floor of the House on May 25, some 41 pages out of 77 pages had to be protected by waivers of points of order. Tonight, what we have in this rule is a whole new set of waivers of the House rules. These waivers are included to protect specified amendments in disagreement from points of order for failure to comply with the germaneness rule.

I think the waivers are being misused.

I feel that this House should limit its use of supplemental appropriations. A supplemental appropriation should be used only for departments and agencies that have run short of funds. But instead, we are using supplemental appropriations for many other purposes. In the future I hope the supplemental appropriation can again become a means for supplementing programs that have run short, rather than a vehicle for new initiatives.

□ 2220

But, Mr. Speaker, the hour is late. We cannot let the Government come to a screeching halt.

Mr. Speaker, I have no requests for time and I do not oppose the rule.

Mr. FROST. Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. Speaker, I move the previous question on the resolution.

the SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. THOMAS of California. Mr. Speaker, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. The Chair will count. Two hundred and twenty-two Members are present, a quorum.

The pending business is the demand of the gentleman from California (Mr. THOMAS) for a recorded vote.

A recorded vote was refused.

Mr. THOMAS of California. Mr. Speaker, on that I demand a division.

On a division (demanded by Mr. THOMAS of California) there were—ayes 178, noes 51.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and on a division (demanded by Mr. THOMAS of California) there were—ayes 161, noes 63.

RECORDED VOTE

Mr. THOMAS of California. Mr. Speaker, I demand a recorded vote.

The SPEAKER pro tempore. Was the gentleman on his feet at the time the vote was announced?

Mr. THOMAS of California. Mr. Speaker, I was on my feet, and as in

previous operations, the Chair did not recognize me immediately.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 267, noes 138, answered "present" 1, not voting 27, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore (Mr. ECKART). Without objection, a motion to reconsider is laid on the table.

Mr. THOMAS of California. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

PARLIAMENTARY INQUIRY

Mr. SMITH of Iowa. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. SMITH of Iowa. Mr. Speaker, was there a unanimous-consent request? Is that all it was?

The SPEAKER pro tempore. The gentleman objected to the question of laying the motion to reconsider on the table.

Mr. SMITH of Iowa. I move to table the motion.

Is there a motion before the House?

The SPEAKER pro tempore. There is no motion pending before the House.

Mr. GEPHARDT. Mr. Speaker, I move to reconsider House Resolution 284.

Mr. FROST. Mr. Speaker, I move to table the motion to reconsider.

The SPEAKER pro tempore. The question is on the motion to table.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. THOMAS of California. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 271, nays 125, not voting 37, as follows:

□ 2300

So the motion to table was agreed to.

The result of the vote was announced as above recorded.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on consideration of the conference report on H.R. 3069, and on all amendments reported in disagreement, and that I may include extraneous and tabular matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. THOMAS of California. Mr. Speaker, reserving the right to object, I am reserving the right to object to take this time to indicate that this House functions primarily under the spirit of the rules.

When Members exercise the rules to the letter this House does not function. I am asking Members to consider their actions in the spirit of the rules rather than the letter of the rules, and I am referring specifically to objections under the previous bill for purposes of dilatory tactics in using up the time when there was a set time for consideration under the bill.

I will not object, but I would only ask that we consider the spirit of the rules rather than the letter.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. EDWARDS of Oklahoma. Mr. Speaker, reserving the right to object, I reserve the right to object to make a point. Some of my colleagues on the other side apparently thought that the gentleman from California made a funny remark.

I have been in this body for 7 years. This is the first time on the last bill that I ever saw anybody, when we had a time limit on debate, object to the waiving of the reading of an amendment solely for the purpose of using up the time to prohibit Members from offering amendments or debating them fully.

I do not think it is funny. I would think the gentlemen on that side would not think it was funny, either.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

CONFERENCE REPORT ON H.R. 3069, SUPPLEMENTAL APPROPRIATIONS, 1983

Mr. WHITTEN. Mr. Speaker, I call up the conference report on the bill (H.R. 3069) making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of July 20, 1983.)

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) will be recognized for 30 minutes, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I ask for the attention of my colleagues at this time. I realize that all of us are tired and there have been many problems that have arisen throughout the day. But the Appropriations Committee certainly did not cause those problems and we are just trying to serve the interests of the House on a conference agreement that is absolutely essential we adopt this week.

This supplemental appropriations bill is necessary. Sixty-five percent of this bill is considered as mandatory under existing law. It contains payments to the social security trust fund of $1,300,000,000 and $1,189,484,000 for food stamps. It is critical that this measure be signed by the President soon because notice has been sent that if we do not act on this bill this week, on Monday there will be no food stamps.

The pay supplementals total $785,664,602. This is also considered a mandatory item as is $615,000,000 for advances to the unemployment insurance trust fund. Other mandatory items include $342,264,000 for payment to the civil service retirement system, $186,000,000 for black lung benefits, and $118,000,000 for the school lunch program.

May I say to you again that 65 percent of the conference agreement is required by law and your committee is the only one you can turn to to handle the matter and bring it to your attention.

My understanding of the schedule for the rest of the evening is that we will debate this conference report for not to exceed 1 hour, vote on the conference report, and then adjourn until tomorrow. So I hope you will bear with us for a little while more tonight. The amendments in disagreement will be disposed of tomorrow.

The other body made 254 amendments to this bill which had to be resolved in conference. The other body added the IMF funds of about $8.5 billion. We did not go along with that be-

cause it is not authorized. We are bringing that to you in true disagreement. Unless the House should approve the authorization for it in the meantime, we will move to insist on the House position at this time, not on the merits of the funding for IMF but because it should not be in a supplemental appropriation without the House having an opportunity to act on the authorization.

□ 2310

This conference agreement provides $7,038,061,267 in budget authority for fiscal year 1983. This is only $100,616,235 over the amounts requested by the administration, or approximately 1 percent. Excluding funding for the IMF, this conference report is $600 million below the amount proposed by the Senate, and is well within the budget ceilings.

Now, after going through 2 days of wrestling with 254 amendments, certainly we appreciate your help in winding up the conference report in a hurry tonight so we can go home and come back tomorrow and dispose of the amendments in disagreement.

I would like you to know again that notice has already gone out and if the Congress does not get this bill to the President by the weekend, there will be no food stamps on Monday.

May I add that last Wednesday, a week ago, I asked unanimous consent to bring this bill up on Friday. We were ready then or any day thereafter. Your committee has been ready to bring up the conference report.

I want to mention a specific provision that the conferees agreed to. We have in this bill a provision that was passed by the House in identical form by a vote of 312 to 97. It corrects an injustice that happened by representations that proved to be unfair and untrue made by the administration in connection with the operation of the PIK program and upland cotton.

We have put it here with the agreement of our friends on the Committee on Agriculture and I expect them to help us handle it. It puts it on the track to perhaps get it through in time to be of some benefit.

I see my good friend, the chairman of the Committee on Agriculture, KIKA DE LA GARZA, and others. I am sure they would agree with me. As I say, our position on amendment No. 1 is exactly the same as the bill that the House passed by 312 to 97.

Another issue we have is the restoration of the west front of the Capitol. Funds have been included to accomplish this, which is in agreement with the House position. We also have the coal leasing provision which we worked out in conference. It provides for the establishment of a commission to review current policies and make recommendations to the Congress on the Department of Interior's coal leasing program. It is the conferees' hope that this commission will be a positive step in the resolution of a very significant problem.

Other major items in the conference agreement include $152,000,000 for the small business loan and investment fund, $22,000,000 to repair the Beirut Embassy as a result of the bombing, and $97,000,000 for education programs.

So, I ask you again, just give a little consideration of what we have gone through to bring this to you, and we bring it to you because we are the only ones that can. We need to get busy on it because tomorrow's paper is going to say if you do not get this passed by Friday, there will be no food stamps Monday.

So, I hope you will go along with us. We have done a good job for you. We ask your approval.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman.

Mr. WALKER. I thank the gentleman for yielding.

Is it not a fact that the reason why we are faced with the food stamp crisis at this point is because last year we did not fully fund the food stamp program for the entire year? So therefore we come down to the point that we are 9 months into the program, have no money because we did not go through a full year? And is it not also a fact that you opposed an amendment that I offered at that time to fund it for a full year so we would not be in this crisis at this point, hanging a big spending bill on the crisis of the hungry people in this country? I think that the very kind of policies we adopted some years ago is the problem.

Mr. WHITTEN. Will the gentleman let me answer his question first?

The gentleman is incorrect; it is here because of the increase in unemployment which made many more people eligible for the program.

The gentleman is right that at one time we proposed to appropriate less than the money required for a full year, but that was because the administration had asked for changes in the law which did not occur.

They refused to request the money to carry out the law as it was. So what we did, instead of us taking the credit for cutting down the amount which is required by law, we took the money they asked for in the budget and applied it for a period of less than 1 year.

In conference with the Senate we worked that out. We did appropriate the full amount of money called for by law. We were able to do that because the President submitted a revised request. But due to the period of great unemployment, more and more people became eligible and the request was understated. I assure the gentleman the money here is to take care of the increased eligibility by reason of unemployment.

Mr. WALKER. Will the gentleman yield further? The gentleman does admit though that when we funded this program last year the problem is that we did not fund it for a full year and the gentleman did oppose an amendment designed to fund it for the full year?

Mr. WHITTEN. We appropriated the full amount requested by the President and the OMB to run the program for a full year.

Mr. WALKER. Yes, but only for a 9-month period.

Mr. WHITTEN. The money they finally requested was for a full year so we gave it to them. We refused to change the law which we had no authority to do.

Mr. ROEMER. Mr. Speaker, will the chairman yield?

Mr. WHITTEN. I yield to the gentleman.

Mr. ROEMER. I thank the chairman for yielding.

In reading a report on our supplemental tonight, the numbers say that it is $2.23 billion more than the House bill that we passed. Would you explain to the Members of the House why that much more, what area it is in? You might want to hit it.

Mr. WHITTEN. The gentleman has a copy of the report, which includes an explanation of those items. Since we are trying to get through at a reasonable time this evening I would hope the gentleman would read the report. At this point in the RECORD I will insert a table detailing the budget estimates considered, the House and Senate recommendations, and the conference agreement.

[The table follows:]

SUPPLEMENTAL APPROPRIATIONS, 1983 (H.R. 3069)

	Supplemental Request	House	Senate	Conference	Conference compared with Request
TITLE I					
CHAPTER I					
DEPARTMENT OF AGRICULTURE					
Agricultural Research Service					
Scientific activities overseas (foreign currency program)	3,172,000	2,000,000	2,000,000	2,000,000	1,172,000

1/ Does not reflect estimate of $8,464,008,776 for IMF reported in true disagreement.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I did not sign the conference report on this supplemental.

I want to make it clear to my colleagues that I will vote for the conference report.

Except for a few items, this is a good conference report.

We went to conference with 254 Senate amendments. The Senate bill was over the President's budget by $1.4 billion, which consisted of $775 million in budget authority, $647 million in deferrals, and $7 million in other forms of obligational authority, such as transfers, loans, and limitations.

The conference agreement is $530 million under the President's budget estimates. While we are $101 million over in budget authority, we are $157 million under in deferrals, and $474 million under in transfers, loans, and limitations.

All in all, we reduced the Senate bill by $1.9 billion. The major reductions were an $800 million deferral and a $370 million appropriation for the strategic petroleum reserve, $350 million in direct loans, $105 million in military sales loan guarantees, and $225 million for health care benefits for the unemployed.

These cuts were very difficult for the conferees to make. However, in the end, there was agreement that we wanted a bill that would be signed, and not a veto, and the necessary agreements were reached.

In making those agreements, I particularly want to recognize the outstanding contributions made by the gentleman from Illinois, the chairman of the Interior Subcommittee, and the gentleman from Mississippi, the chairman of the full committee.

The gentleman from Illinois was the key to an agreement on the strategic petroleum reserve. The gentleman from Mississippi was they key to an agreement on direct loans.

While in both cases the disagreements were strong, and the gentleman from Mississippi and the gentleman from Illinois stoutly defended their positions, when the chips were down, agreements were reached.

Although there was some rhetoric in the conference about cutting domestic spending at the expense of spending for defense and foreign aid, as a matter of fact, that was not a real issue.

The conference agreement on foreign aid is $478 million below the administration's request. Further cuts would have been irresponsible in the extreme. And virtually all of the additional funds in the defense chapter were $453.6 million for Army missile procurement, which was in the House bill, and was not amended by the Senate, and was, therefore, not a conference item.

Members may also be interested to know how the conference report compares to the budget resolution for fiscal 1983.

If we compare the original budget resolution with the conference report, the amendments in technical disagreement, and the House position on the four amendments in true disagreement, we would be under the original 1983 ceilings by $8.1 billion in budget authority and by $479.6 million in outlays.

If we make the same comparison, using the Senate position on the four amendments in disagreement, we would be $356 million over the original ceiling for budget authority, and $473.9 million under the original ceiling for outlays.

However, in the Rube Goldberg world of the congressional budget process, the ceilings in the budget resolution we passed on June 23 are not the same ceilings any more.

Section 2 of that resolution established a reserve for fiscal 1983 of $6 billion in budget authority, and $5.4 billion in outlays.

The Budget Committee met on Tuesday of this week, and through a report to the House released $696 million in budget authority and $381 million in outlays for fiscal 1983.

The Budget Committee specifically released those funds for H.R. 1190, the Emergency Agricultural Credit Act of 1983, and H.R. 3521, the Health Care for the Unemployed Act, plus related interest.

However, under section 3(e) of the budget resolution, any reserves released simply increase the total ceilings for budget authority or outlays.

So the amounts released by the Budget Committee for emergency agriculture programs and health insurance for the unemployed have the effect of increasing the 1983 ceilings enough to accommodate the conference report, all of the amendments in technical disagreement, and the Senate position on the amendments in true disagreement, including IMF.

If Rube Goldberg were alive today he could not make a living. People would be too busy watching the budget process.

In summary, we have a conference agreement that is acceptable to the administration, with two exceptions.

Those exceptions are the IMF, where I will offer a motion to recede and concur in the Senate amendment which provides the funds for IMF, and the cotton-PIK program, which will be subject to a separate vote.

In my opinion, however these two items are disposed of, the bill will be enacted into law, provided no further changes are made on the House or Senate floor.

The bill contains $1.2 billion which is needed immediately for the food stamp program and other funds which are required under existing law such as $342 million for the civil service retirement fund, $786 million for pay costs, $118 million for child nutrition, $615 million for the unemployment trust fund, $186 million for black lung benefits, and $1.3 billion for the social security trust fund.

I urge my colleagues to vote for the conference report, and I will urge the President to sign it.

AGRICULTURE

The Agriculture portion of the supplemental appropriations conference report resolved seven items of difference with the Senate version of the bill—funding of $1.2 billion in food stamps, unbudgeted request for $965,000 for the Commodity Futures Trading Commission, deletions and additions for rural water and waste disposal grants, and deletion of money for salaries and expenses for the OICD for the Caribbean Initiative.

There are nine agriculture items in technical disagreement. The main controversy revolves around the cotton PIK provision (amendment 1). The Senate added to the House language which brought rented and leased land farmed by the same person or persons the year before into the PIK program. The Senate action would increase the amount available to $100 million over the currently estimated $2.5 billion for the cotton program.

The administration opposes this action because it relieves the contractual obligation farmers agree to under the program. In the face of rising cotton prices and the need to provide more cotton to fulfill the requirements of the program, the administration believes that this is an undesirable action and urges the support of the House language.

The other amendments in technical disagreement make adjustments in FmHA, salaries and SLUC charges in the Food and Drug Administration, and provide for announcement of farm program dates. They are considered noncontroversial and have the approval of the administration.

The main public concern with the agriculture portion of the bill is that food stamps will have to be reduced if a bill is not signed into law before the August recess.

The conference report provides $308,700,000 for the Departments of Commerce, Justice, and State and for the Judiciary and related agencies, an increase of $208,512,000 over the House bill and $2,164,000 over the Senate bill. Ninety-seven percent of the increase over the House bill is for three items: $152 million to cover expected defaults on Small Business Administration guaranteed loans, $20 million for a trust fund for the Pribilof Islands, and $30 million for the replacement of the Embassy and other emergency costs related to the Beirut bombing tragedy.

Senate conferees refused to accept $15 million provided in the House bill for Project Democracy activities of the U.S. Information Agency. Funding is provided in the reported fiscal 1984 appropriations bill for the National Endowment for Democracy, a related but separate activity to be administered by the two major political parties, the AFL-CIO and the Chamber of Commerce.

The conferees also agreed to the Senate amount of $2.9 million for the Asia Foundation instead of the $5 million provided by the House. It is expected that the amount provided will be sufficient in the relatively short time remaining in fiscal 1983, and $10 million is included for the foundation in the fiscal 1984 bill.

The conferees did not agree to Senate language extending the availability of money provided in the so-called jobs bill for SBA tree-planting projects beyond the current fiscal year which ends September 30, 1983. I opposed the appropriation of these funds all along, but since the money was appropriated for short-term employment assistance, it should be spent promptly. Language is included in the statement of the managers insuring that the funds can be used for purposes other than planting trees as long as the money is spent before October 1, 1983.

DISTRICT OF COLUMBIA

In chapter 12, the D.C. section, the conferees have reduced the District's budget authority for District funds by some $22 million. The House version of the supplemental did not reflect District requests because those requests were not available at the time the House passed its version of the supplemental.

The action taken by the conferees in chapter 12 reflects two considerations in the District's budget pursuant to a review of the District's financial posture: First, various District agencies have been determined to have excess and unneeded authority, while others have unmet needs; second, there is projected to be a revenue shortfall in the District this year of some $24 million below the amount originally anticipated when the budget was approved.

As I said, the District of Columbia section contains a net reduction of some $22 million overall. However, conferees have provided additional authority in the amount of $9.1 million in the public safety and justice category.

Most of the new authority for public safety and justice will go to support a correctional institution population which is larger than originally anticipated, and to support additional correctional officers pursuant to a court order.

The remainder of the public safety and justice funds will go to the fire department and the District of Columbia court system.

Other conferee actions which will result in a rise in District funds spending authority include $2.1 million in additional human support service funding, $2.1 million in energy adjustments, and additional authority for the District Convention Center and lottery games enterprise funds for support for those funds.

All in all, Mr. Speaker, I think the conference action taken with respect to the District of Columbia will result in aiding the District government in moving toward a balanced budget.

DEFENSE

The Defense portion of the conference approves $185 million for procurement of certain long-lead time items for the B-1 bomber program. This is not new money. It comes from the funds already appropriated in the 1983 bill for the B-1. In no way does this action approve multiyear procurement for the bomber. That matter will be addressed in the fiscal 1984 bill.

Conferees also agreed to continue to deny the Army authority to move more equipment to Europe for storage in pre-positioned sites, but this issue as well, will be taken up in the fiscal 1984 bill.

ENERGY AND WATER

Within chapter IV, the energy and water development section of the bill, there are several items worth mentioning. First, the conferees have agreed to the House position in approving $30 million for the Western Area Power Administration, to be used for a direct current intertie near Sidney, Nebr. This project will be of great benefit to power consumers in the Western Area Power Administration service area, who should benefit from lower electrical rates when this intertie becomes operational. In addition, this project should generate much-needed work for manufacturers of the electrical equipment needed for the intertie.

The conferees have agreed to several legislative provisions relating to the Corps of Engineers and the Bureau of Reclamation. For the Bureau of Reclamation, these include the authorization of a feasibility study for the Prairie Bend unit of the Pick-Sloan program. This study will include a detailed report on any effects the proposed project may have on wildlife habitat, including habitat of the sandhill crane and the endangered whooping crane. The study will also develop alternative water management plans that are consistent with the Endangered Species Act and Migratory Bird Treaty Act.

The conference agreement also authorizes the Secretary of the Interior to engage in a joint study with the State of Nebraska of cost-effective alternatives to the Norden Dam of the O'Neill unit. No funds will be expended for any construction activity on the Norden Dam prior to the completion of this study.

The conferees agree with the House report language regarding the falls of the Ohio National Wildlife Conservation area in Kentucky, and with the Senate report language regarding the South Metropolitan Atlanta Study in Georgia.

FOREIGN OPERATIONS

The conference report provides $667,209,000 in budget authority and $293,500,000 in loan guarantees for foreign assistance activities. In budget authority the amount provided is $131,575,000 over the House bill and $8,429,269,776 below the Senate bill. The amount agreed to for loan guarantees, which is entirely for foreign military sales credits, represents an exact split between the House and Senate—$104.5 million over the House bill and the same amount below the Senate bill.

Senate conferees accepted the House amount of $245 million for an additional U.S. contribution to the sixth replenishment of the International Development Association, the soft loan window of the World Bank. The Senate had included only $125 million for IDA VI. I offered the amendment in our Appropriations Subcommittee adding this $245 million to the bill, and I am pleased that this will put us within shooting distance of completing our commitment to IDA VI during fiscal 1984.

The conference report includes the Senate amount of $16 million for the International Fund for Agriculture Development. The House bill contained no funds for IFAD. When combined with funds in the continuing resolution, the total U.S. contribution to IFAD in fiscal 1983 will be $40 million, or $25.4 million below the President's request.

Lebanon will receive a total of $251 million under the conference agreement, including $150 million in grant aid in economic support funds, $100 million in foreign military sales credits, and $1 million in military training.

El Salvador is limited to $25 million in military assistance, compared to $50 million in the Senate bill and no funding in the House bill. Together with amounts provided under the continuing resolution and a reprograming, El Salvador will receive $18.3 million in military assistance in fiscal 1983. The administration plans to provide nearly three times that amount, or $232 million, in economic assistance during the same period.

In the security assistance area, the conferees agreed to strong administration requests to avoid earmarking funds for specific countries in order to allow the maximum amount of flexibility with the reduced funding provided. In dollar terms the report includes $301,250,000 for the economic support fund, an increase of $48 million over the House bill and a reduction of $21 million below the Senate bill. The conferees split the dollar differences in the military assistance grant program and the foreign military sales guarantees, providing $93,325,000 for the former and $293,500,000 for the latter.

In summary, the foreign assistance chapter of this supplemental bill represents the usual compromise between those who favor more economic assistance and those who support more security assistance. We should support this agreement.

HUD

The HUD portion of the supplemental was relatively noncontroversial, and moved through the conference quickly. The conferees accepted Senate language to provide the Secretary of HUD authority under section 8 housing to add up to 6,000 units of loan management, 7,000 units of property disposition, 900 new or substantial rehabilitation units, and up to 100 public housing units.

The House also accepted a Senate amendment which increased the authority the Secretary of HUD has under section 203 of the National Housing Act to provide emergency disaster assistance. Under current law, the Secretary is granted emergency authority to insure replacement of single family residences destroyed in natural disasters up to 100 percent of the assessed value of the property, not to exceed $14,400. The amendment by the other body increased that limit to $67,500.

Mr. Speaker, another provision in the HUD portion of the supplemental increased the salaries and expenses account for EPA by $9 million, some $2.2 million above the House-passed bill. In addition, the conferees agreed to include report language requesting a university study on toxic waste.

Other appropriations in the legislation include nearly $180 million for medical care at VA hospitals, $225,000 for the Office of Revenue Sharing, $1.3 million for the National Science Foundation to remain available through fiscal year 1984, and $400,000 for the Selective Service System.

Also of importance, Mr. Speaker, is the deletion of House language which would have prohibited HUD from implementing its proposed cost-saving rules on construction of section 202 housing. The proposed HUD rules would have required competitive bidding by the contractors of section 202 dwellings, which are sponsored by nonprofit organizations. The proposed rules were a cost-saving device, and I was upset to see a prohibition against implementing those rules in the House bill. However, the conferees agreed to delete the House language, allowing HUD to begin implementing the new regulations shortly.

INTERIOR AND RELATED AGENCIES

H.R. 3069 will appropriate $327,931,000 for pay and program activities during the remainder of fiscal year 1983 at the Department of the Interior and related agencies. The bill was agreed to by the conferees on July 20, 1983.

The conference agreement on this supplemental appropriation drops the House prohibition on the sale or lease of coal on public lands for the balance of 1983. Instead, the Secretary of the Interior shall, within 30 days after the enactment of this act, appoint a commission to study the Department's coal leasing procedures. Within 6 months, this commission will make its recommendations to the Secretary to insure the Department receives fair market value under its coal leasing program. Under this language, the Secretary may proceed with a leasing program for the balance of fiscal year 1983.

The conferees agreed to drop the prohibition on lease sale No. 78 from

taking place during the balance of fiscal year 1983. This prohibition was dropped after the Department of the Interior, the Department of Defense, and NASA agreed that oil rigs would not be located under NASA flight plans.

Finally, at the insistence of the administration, the managers have reluctantly recommended no funds in this bill for further construction of the Big Hill, Tex. storage site.

Additional funds for the construction will be presented in the fiscal year 1985 budget request from the administration. The managers reaffirm their strong commitment to an average daily fill rate of 220,000 barrels, as required by law, for the strategic petroleum reserve.

LEGISLATIVE BRANCH

The conference report provides $96,305,600 for legislative branch items, which is an increase of $861,000 over the House bill and $990,000 over the Senate bill; 90 percent of the funds provided is for two items: $49 million for the restoration of the west front of the Capitol, and $37.9 million for official mail costs.

Concerning the west front, the conferees agreed to the House amount of $49 million instead of the $48 million provided by the Senate. The funds are to be used for restoration only, not for extension. House conferees agreed to Senate language providing for a fixed-cost contract and for the appointment of a consulting architect to "assist" the Architect of the Capitol on this project.

The conferees also agreed to language allowing Senators a 15-percent pay increase, thus placing Senators' pay at the same level as House Members, $69,800. Language is also approved imposing a statutory limitation on income from honoraria for both House and Senate Members at 30 percent of congressional pay, effective January 1, 1984.

The Senators' pay raise is effective July 1, 1983. And finally, the Commission on Executive, Legislative and Judicial Salaries is directed to assume a prohibition on the receipt of honoraria by Members when recommending an appropriate salary for Members.

As the long-time sponsor of an equal limitation on honoraria for both Houses of Congress, I heartily applaud the conferees for this action. I will do whatever I can to assure that never again are the two Houses treated differently in matters of pay and other income.

LABOR/HHS/EDUCATION

When H.R. 3069 passed the House, the Labor/Health and Human Services/Education chapter was almost precisely at the amount of the supplemental budget request. In fact, the program supplementals were exactly at the budget request—$615 million for advances to the unemployment trust fund; $186 million for the black lung trust fund; and $4.8 million for title III of the Higher Education Act. Those items were agreed to by the Senate.

For pay supplementals, we provided some $3 million less than requested, a figure that the Department subsequently agreed with.

Then on the floor of the House, the subcommittee chairman and I added $12.5 million for stepped-up research on acquired immune deficiency syndrome (AIDS). I might add at this point that the $12.5 million for AIDS was retained in conference, with an amendment that I offered making the money available through fiscal year 1984, in the event there is not time to obligate it in the remaining months of fiscal year 1983.

The Senate, in its inimitable style, made some 39 amendments in this chapter alone. It added funding for two late administration requests; $2.6 million for defaults under the health maintenance organization loan fund, and $1.3 billion for crediting the Social Security Administration checks, as required in the Social Security Act of 1983.

It also added some $418 million in unrequested supplementals for a number of different programs. In conference, we cut that figure back substantially, by over two-thirds, to about $140 million, and did a good job, I think, of bringing this chapter into line with the overall requirements of the bill.

We deleted the $225 million the Senate had provided for health care for the unemployed, since that legislation has not yet been enacted. But we did add, at my request, language indicating that we will act expeditiously to provide funds when the health care for the unemployed legislation is enacted. That is an important piece of legislation, and we will act on it as soon as it is in place.

We retained $47.9 million for Public Law 94-142, education for the handicapped, grants to States; $40 million for chapter I, compensatory education for the disadvantaged, to take care of 14 States, mostly in the South, that were losing a significant proportion of funds in fiscal year 1983 due to the effects of the 1980 census data on the distribution formula; $42.9 million for academic facilities at the University of Oregon, the University of New Hampshire, and Boston College; $2.1 million for independent living centers; $1.5 million for two rehabilitation centers; and $1.25 million for regional resource centers under education for the handicapped. We added about $8 million in pay supplementals, approximately half of the Senate figure, to reduce the amount of reprogramming required from other programs in the Public Health Service in order to meet additional pay costs. Under this category, I was able to obtain agreement to add $1.2 million to the National Institute of Mental Health to reduce the amount of reprogramming necessary from clinical training and research funds, and to assure that NIMH is treated on a par with NIH.

I was also able to obtain the agreement of the conferees to retain the bill language requested by the administration and included in the House bill to reimburse outside debt collectors from the amounts of defaulted student loans collected by the outside collectors. This will allow the Department to pursue aggressively the debt collection program it has commenced.

The Heinz amendment—to impose a moratorium on social security disability reviews—was not included in the conference report because of the actions taken by the Ways and Means Committee to enact reforms needed in the disability review process. We stated in our conference report the following:

> The conferees strongly support the authorizing committees in drafting legislation, and urge prompt action to achieve enactment. The conferees direct the Secretary of Health and Human Services to proceed with extreme caution in the termination of benefits, pending enactment of this legislation.

You can be sure I would never have agreed to this outcome because of my strong position on the necessity to enact such reforms unless I had received the strong personal assurances of the chairman of the Subcommittee on Social Security that legislation would be forthcoming.

TRANSPORTATION

Chapter X of this supplemental measure appropriates funds for the Department of Transportation and related agencies. For the Coast Guard, the conferees provided $7.5 million for the national boating safety and facilities improvement fund. I have long opposed funding for this activity as an unwarranted intrusion into what should be a State and local matter, and can take only small comfort in the fact that the conference compromise is $2.5 million below the Senate amount.

The conferees have directed that $15 million in funds previously appropriated to Amtrak for the rehabilitation of a line between Attleboro and Hyannis, Mass., be made available to the Commonwealth of Massachusetts. These funds, which represent the total Federal participation in the capital cost of this project, will permit work to get underway this construction season in restoring this line for rail passenger service.

The conferees have also provided $1.75 million to the Federal Highway Administration to perform a study of methane conversion, as authorized in section 152 of the Surface Transportation Assistance Act of 1982. The House

report provided that this would be an analytical demonstration of the commercial practicability of offshore methane conversion for highway fuel use, and directed the Department to contract for the necessary data base development as rapidly as possible.

Finally, the conferees have agreed to delete language contained in the House-passed bill that would have prohibited the Department of Transportation from limiting the applicability of the "buy America" provision in section 165 of the Surface Transportation Assistance Act to projects above a specified dollar amount. The Federal Highway Administration's interim $450,000 project cost threshold has been eliminated, and a final rule in this area will be issued later in the year following a Transportation Systems Center assessment of the impact of the "buy America" provision on transportation grantees.

TREASURY, POSTAL SERVICE

Mr. Speaker, chapter 11 of the conference report, the Treasury, Postal Service section, had only a few points of difference between the two bodies, and those points of difference were of minor consequence.

Total funding in the supplemental for those entities under the Treasury/Postal Service jurisdiction is $344.7 million. Of that sum, $342.3 million will provide for the Government's share of the retirement cost of the unfunded liability in the civil service retirement and disability fund generated by the October 1982 pay raise.

The conferees agreed to provide small additional sums to the Department of Treasury for official representation expenses so that U.S. officials do not have to put forth out-of-pocket moneys when representing our Government at official business functions such as international conferences.

The conferees have provided for a raising of the limitation on availability of revenue in the Federal buildings fund of the General Services Administration. The raising of this figure will accommodate the reimbursement to the Treasury for the payment of certain construction claims.

Among these claims is one for $7 million for a Federal courthouse and office building project in Atlanta, Ga. The House had disallowed reimbursement for that claim while the Senate had provided for it.

While the conferees agreed to provide for the reimbursement on this project, it is stipulated in the manager's statement that the General Services Administration and the Federal courts are to work together to monitor Federal court construction projects to prevent recurrence of a situation such as the overrun in Atlanta where a substantial amount of already completed work was torn down and redone.

Also included in the conference report is an amendment I originally introduced in full committee to prohibit the Internal Revenue Service from moving forward to enforce any regulation, ruling, procedure or other activity to tax campus faculty housing furnished at colleges and universities. I might point out that while I wanted to help the schools, I offered this amendment reluctantly.

Without this provision, which seeks only to buy time to allow the appropriate tax-writing committees to address the subject, the IRS will go forward with issuing to educational institutions, notices of back taxes due, which could run into the hundreds of thousands of dollars for each of many institutions across the country.

With most, if not all of the affected institutions, plagued by sliding endowments and borderline cash flow postures, the requirement to all of a sudden pay out large sums for back taxes would have a devastating effect.

At this point, Mr. Speaker, I would like to call attention to one of the administrative provisions in chapter 11 on which the two bodies disagreed, and on which the Senate receded to the House. That provision prohibits the Office of Personnel Management from going forward with needed personnel management changes.

With the publishing of new regulations by OPM, this prohibition, which refers to proposals published in the March 30, Federal Register, is a moot point. That being the case, however, I would strongly suggest to this body that the appropriate committees in Congress work with the Office of Personnel Management in putting forth constructive changes in our personnel management system, rather than trying to block activity in this area.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield.

Mr. CONTE. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, I rise in opposition to H.R. 2760 as reported by the Intelligence and Foreign Affairs Committees.

In July 1979, the Sandinistas pledged that their government would be democratic, nonalined, and pluralistic. In response, from July 1979 through 1981 the United States provided $120 million in economic aid, and sponsored $262 million in loans from international lending institutions—twice that received by Somoza in the previous 19 years. Total Western aid came to $1.6 billion—an amount equal to about three quarters of Nicaragua's annual GNP.

In return, the Sandinistas did not welcome a friendly relationship with the United States. An excellent article written by Lawrence E. Harrison, the Director of U.S. Agency for International Development in Nicaragua from 1979 to 1981, recently appeared in the Washington Post. I commend this article, which follows, as an interesting first-hand account.

Since the success of the Sandinista revolution, and to this day, Nicaragua has been propping up the guerrillas in El Salvador. According to the Intelligence Committee report which accompanies this bill:

> It is not popular support that sustains the (Salvadoran) insurgents. * * * This insurgency depends for its lifeblood—arms, ammunition, financing, logistics, and command and control facilities—upon outside assistance from Nicaragua and Cuba. * * * It began shortly after the overthrow of Somoza in July 1979. It had provided—by land, sea, and air—the great bulk of the military equipment and support received by the insurgents.

Mr. Chairman, it is absurd to claim that Nicaraguan radicalism abroad, and at home, is caused solely by U.S. support of anti-Sandinistan guerrillas. The Intelligence Committee report indicates that U.S. support began about December 1981. Before that the Sandinistas were actively supporting Salvadoran violence. Defections from the ruling Sandinista junta had already begun. Dissent of business, labor, and church groups had already begun in response to persecution. While there may be other merits to this bill, it seems highly unlikely that it will quell Sandinistan radicalism.

For that reason, Mr. Chairman, I intend to support the amendment offered by the gentleman from Michigan, Mr. BROOMFIELD, and the gentleman from Florida, Mr. MICA, which would predicate the cessation of U.S. covert assistance upon Nicaragua ceasing its covert and overt actions in El Salvador. In my judgment, that amendment provides the first worthwhile incentive to help stop export of militarism in the region. Such a mutual ban has been endorsed both by President Reagan in his April 27, 1983 speech to Congress, and by Daniel Ortega of the Sandinistan junta in his July 19, 1983 speech.

This amendment is also important, I feel, to help begin regional or bilateral negotiations to settle more fundamental questions. I support negotiations in the region, particularly those sponsored by the Contadora Group (Colombia, Mexico, Panama, Venezuela). Those nations have an even larger stake in the future of Central America than does the United States, and would appear to have a greater ability to hammer out a workable solution.

Mr. Chairman, I urge support of the Broomfield-Mica amendment, and urge the subsequent passage of H.R. 2760.

The subsequent article follows:

[From the Washington Post, June 30, 1983]

WE TRIED TO ACCEPT NICARAGUA'S REVOLUTION—THE SANDINISTAS COULDN'T LIVE WITH A POSITIVE IMAGE OF THE UNITED STATES

(By Lawrence E. Harrison) [1]

The Sandinista Government of National Reconstruction was installed four years ago, on July 19, 1979. Three days later, I arrived in Nicaragua in a Flying Tigers DC-8 stretch jet loaded with food—the first of many such flights—to take charge of U.S. assistance programs, the most tangible evidence of our commitment to build a new relationship with Nicaragua.

I left Nicaragua two years later, on July 1, 1981. During those two years, the U.S. government was the most important source of food aid and one of the most important source of financial aid to revolutionary Nicaragua. We provided assistance valued at $120 million, including 100,000 tons of food. We had tried very hard to build that new relationship. But the effort failed, principally, I believe, because the Sandinistas could not live with a positive image of the U.S. government. They did not try at all. And many in the United States cheered them on.

Within a few months of the installation of the Government of National Reconstruction, an article appeared in the Sandinista newspaper Barricada announcing the imminent arrival of 600 Cuban teachers. I called on the minister of education, with whom I had been working to reactive an old school construction loan, to express concern that so large a number of Cuban teachers would be interpreted in the United States as a Cuban takeover of the Nicaraguan education system. The minister replied that the government would welcome qualified teachers from any country.

I told him that the United States would certainly be interested in sending teachers, possibly through the Peace Corps. He responded, somewhat apologetically, "You know, we Latin Americans have a view of the Peace Corps which would make it an inappropriate vehicle." (He meant, "We Latin Americans of the Left." What he had in mind was symbolized by the movie "Blood of the Condor," which depicts Aryanlooking Peace Corps volunteers engaging in genocidal sterilization programs in Bolivia.)

At the end of 1979, as a result of the intervention of then junta member Alfonso Robelo (who is now allied with ex-Sandinista Eden Pastora's guerrilla movement), we received Sandinista approval in principle to start a Peace Corps program. After a lengthy study, the Peace Corps sent in a husband-wife team as co-directors. Both were experienced in Latin American, altruistic and totally committed to building a new relationship with Nicaragua. After six months of being fobbed off by the Sandinistas, they left. Not one Peace Corps volunteer was accepted.

We often expressed our concern to Sandinista officials about the line in the Sandinista anthem, "We shall fight against the Yankee, enemy of humanity." In November 1979, Jaime Wheelock, one of the most influential comandantes and a person with whom I sustained a very frank dialog throughout my two years in Managua, told me that the word "poverty" was going to be substituted for "the Yankee." Soon thereafter, I was told the same thing by then economic czar (and Stanford MBA) Alfredo Cesar, who has since defected. The change was never made.

At about the same time, a U.S. congressional delegation, led by Rep. Dante Fascell (D-Fla.), visited Managua at Ambassador Larry Pezzullo's initiative. Fascell was extremely effective, as were his colleagues. Lee Hamilton (D-Ind.), Matthew McHugh (D-N.Y.) and David Obey (D-Wis.). They pressed hard on the issues of political pluralism and nonalinement in very intense meetings with both the junta, which was increasingly becoming a figurehead, and Sandinista National Directorate, which is where the real power resides. The congressional group was particularly forceful on the question of elections. In each session they were told that national reconstruction had to be the first priority but that the Sandinistas were committed to elections.

When Alfonso Robelo resigned from the junta in April 1980 and went into opposition, he was promptly labeled a traitor by the Sandinistas. In a conversation with Jamie Wheelock, I tried to explain our concept of dissent. I got nowhere—there is no Spanish word that accurately captures the nuances of "dissent." A day or two later I experienced similar frustration in a conversation about dissent with a young U.S.-trained cabinet minister who had on his desk a bottle of Cuban rum, and a copy of "Das Kapital." At one point, he suddenly beamed and said, in English, "Now I know what you're talking about—Civil disobedience!"

He has since defected.

A few months later, Larry Pezzullo and I were in Washington to lobby in Congress for the much-delayed $75 million special appropriation for Nicaragua. The Sandinista minister of health, with whom I was working on several programs, was also in Washington, and we had dinner together. During the conversation I complained about inaccuracies and distortions in Barricada, the official Sandinista newspaper, and el Nuevo Diario, which closely followed the Sandinista line. Both sounded very much like Cuba's official newspaper, Granma, particularly in their treatment of the United States. The minister's response : "You don't understand revolutionary truth. What is true is what serves the ends of the revolution."

The August 1980 ceremony to celebrate completion of the literacy campaign was a chilling experience. I had been invited to sit with the commandantes and the cabinet because AID had contributed food and some vehicles to the campaign. The ambassador sat in nearby stands with the diplomatic corps.

The Plaza of the Revolution was mobbed with kids in uniform shouting slogans in response to the urgings of leaders on the platform. I was reminded of films I had seen of Nuremberg in the 1930s.

Commandante Humberto Ortega gave the principal address. In the midst of a series of attacks on the United States, he announced that elections would not be held until 1985, thereby reneging on a commitment to opposition groups for early elections. Moreover, he assured his audience, the elections of 1985 would be nothing like the corrupted elections held in the United States. Larry Pezzullo and I both walked out.

My youngest daughter, Amy, then 16 years old, worked during the summer of 1980 as a volunteer with a Nicaraguan organization, Genesis II, which promoted breastfeeding and provided help to orphanages. The head of the organization was Geraldine Macias, a former American Maryknoll nun married to Edgard Macias, vice minister of labor. At the end of the summer (shortly after the completion of the literacy campaign), we had a get-together at our house for Amy and her co-workers. The evening was a little strained because some of the Genesis II people were totally committed to the Sandinista cause and doubtless felt uncomfortable being in the USAID director's house. The Maciases may have felt that way.

Two years later, after the Sandinista security police threatened his life, Edgard sought asylum in the Venezuelan embassy. The Maciases and their children arrived in Washington soon thereafter. They were treated as lepers by many left-leaning church people in the Washington area who had formerly been their friends. The Maciases have found it very difficult to get work and have been living on a shoestring ever since.

In a recent letter to friends, they said:

"Since leaving Nicaragua we have had access to documentation of [the Sandinistas] and some of [their] former members that proves beyond a doubt that their plans from 1979 on were to deny political and religious freedom. Documents that also show how their methods resemble Somoza to the point they appear as a mirror image: rapes, torture, disappearances, murders, threats, and control of unions and community groups through the formation of their 'elite' political party."

During the last part of 1980, the Partners of the Americas program between the state of Wisconsin and Nicaragua, which had endured for some 15 years, ran into trouble. Most of the activities were focused on the Atlantic Coast. Among other problems, the Sandinistas attempted to take over the Partners' educational radio station (they subsequently did take it over); two Wisconsin plastic surgeons were harassed during a visit to Puerto Cabezas, where they did some highly complicated surgery free; and the Sandinistas circulated the word that Partners personnel were CIA agents.

The ambassador sent a letter to the junta expressing his concern, and I called on the comandante responsibile for the Atlantic Coast. After I ran down the litany of problems, the comandante said, "You have to understand, Mr. Harrison, that Americans are not very popular in this country." I replied that I had lived in Nicaragua for 18 months, traveled extensively, and had the impression that, notwithstanding Sandinista efforts to paint us as devils, most Nicaraguans liked Americans. I added that this seemed to be particularly true on the Atlantic Coast.

He paused for a few moments, then broke into a broad grin and said, "You're right."

Norma Pineda, an accountant, was the senior Nicaraguan employee of the USAID mission, an admirable professional and human being. Her husband, Byron, had been a lieutenant colonel in a noncombatant unit of the National Guard. Just prior to their triumphal entry into Managua, the Sandinistas announced that National Guard members who had committed no crimes had nothing to fear. Despite the pleadings of family and friends to seek asylum in a nearby embassy, Byron Pineda chose to stay in his house because, as he told his wife, "I have done nothing wrong."

About two weeks after the installation of the Sandinista government, Pineda was arrested and much of his property was confis-

[1] The writer, director of USAID in Nicaragua from 1979 to 1981, is now at Harvard's Center for International Affairs.

cated. He was tried some six months later and sentenced to 11 years in jail. As in thousands of others cases, all that was proven by the prosecution was that he had been a member of the National Guard.

A few months later, the Sandinistas told Pineda that he would be freed if his wife would provide information on USAID activities to the government. She refused. He was, however, released to house arrest toward the end of 1980, perhaps because of representations the ambassador and I made at high levels of government. Shortly after, he was told that he would be returned to prison if he failed to persuade his wife to become a spy and if he refused to engage in spying activities himself.

A few weeks after that Norma Pineda left Nicaragua. Byron Pineda sought asylum in the Peruvian Embassy in Managua, where he has lived for more than 2 years.

Late in 1980, the Latin American Studies Association, an organization of U.S. intellectuals interested in Latin America, held its annual meeting in Bloomington, Ind. Junta member Sergio Ramirez and Foreign Minister Miguel d'Escoto attended and were given a hero's ovation. James Cheek, then deputy assistant secretary of state for Latin America, was jeered and heckled, (Cheek, one of the Foreign Service's most distinguished and enlightened specialists on Latin America, had played a crucial role in U.S. disengagement from Somoza as far back as 1974).

In a subsequent Latin American Studies Association newsletter, Harvard Professor and Association President Jorge Dominguez described the Bloomington meeting as "one of the darkest moments of my professional life . . . appalling . . . scandalous . . . damnable."

I returned to the United States on July 1, 1981, and retired from AID early in 1982. I have been at Harvard working on a book on the relationship between culture and development. In December 1982, I was asked to appear on a panel at the John F. Kennedy School of Government at Harvard. The principal speaker was Francisco Fiallos, then Nicaraguan ambassador to the United States. Despite a subdued speech on Nicaragua's economic problems, Fiallos was given a hero's ovation by the 300 people in attendance. My comments focused on Sandinista human rights abuses and, in particular, Sandinist reneging on commitments to pluralism and nonalinement. I was booed and jeered repeatedly.

One week later, Fiallos defected.

Mr. CONTE. OK, $1.3 billion, social security.

Mr. FRENZEL. Got that.

Mr. CONTE. $118 million child nutrition; $115 million food stamps; $22 million for NOAA, $152 million for SBA; $232 million more for foreign aid, $38 million more for National Park Service, $52 million for the abandoned mine reclamation fund, $38 million for Indian programs, $40 million for education grants, and $48 million for State grants for the handicapped. That is it.

Mr. FRENZEL. I thank the gentleman.

Mr. CONTE. I could go on in great detail, but after a 2:30 session here the other night and almost a 1:30 session on that baseball field, I quit.

Mr. WHITTEN. Mr. Speaker, I yield 5 minutes to the gentleman from Maryland (Mr. LONG).

Mr. LONG of Maryland. Mr. Speaker, the Foreign Operations portion of the supplemental totals $677 million in new budget authority and $293 million in loan guarantees.

□ 2320

In addition to this, the conferees have brought back in true disagreement the matter of funding for the International Monetary Fund.

The principal items in the conference report include the International Development Association, affectionately known as IDA, $245 million; the economic support fund, $301 million; military assistance program, $93 million; and military credit sales of $293 million.

Now contained in the figure for military assistance is $25 million for El Salvador. Funding for El Salvador was clearly the most difficult subject of all the foreign assistance issues.

Frankly I feel that $25 million is too large a sum for military aid to El Salvador at this time, given both the human rights situation and the unavailability of reliable information about how effectively our military assistance funds are being used.

Substantial improvements have occurred in the human rights situation in El Salvador, notably the decline of murders in 1 year to half their 1981 number; namely, 10,000 to 5,000; the recent release of 540 political prisoners as a result of the agreement with Secretary Shultz and President Magana as a condition of the reprograming of $30 million in military aid; the agreement of El Salvador to permit the inspection, unannounced and unsupervised, of the prisons and detention centers by the International Red Cross to determine whether prisoners are being held without due process or being mistreated; and the appointment of retired Federal Judge Harold Tyler to inspect the raw FBI files to determine whether vital information was overlooked by the Salvadoran prosecuting authorities in remanding the cases of the accused murderers of the four American nuns. America's Watch has referred to the release of the prisoners as the most encouraging development in the recent history of the Salvadoran human rights problem.

In addition, there is some reason to hope that former Senator Richard Stone, appointed as Ambassador under the Long-Shultz agreement may be making progress in getting the two sides to negotiate for a political settlement and that it constitutes a move toward a broad base and honest election in which all elements of the Salvadoran nation may participate without fear or discrimination.

These developments are encouraging. However, human rights violations are still far too high and may even be increasing again.

Further, the war goes on with great loss of life and damage to property and standards of life and health.

In view of these somewhat less encouraging recent developments, the Foreign Operations Subcommittee must serve notice therefore that in the future the provision of additional military assistance to El Salvador will continue to depend on evidence of improvement in the human rights records and the more effective use of military personnel and the movement toward a political rather than military solution.

Mr. CONTE. Mr. Speaker, I have quite a few requests here, but I am reserving them, because I have been assured by the majority that they do not have any requests.

I will reserve them, but they keep talking.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. BIAGGI).

Mr. BIAGGI. Mr. Speaker, I would like to pose a question to the distinguished gentleman from Mississippi, the chairman of the committee, regarding some of the funds provided to programs under the Older Americans Act in this bill.

As the gentleman knows, the House earlier this year passed legislation I authored, H.R. 2807, which raised authorization levels in the commodity distribution program under title III of the act by $5 million in fiscal 1982 and $16 million in fiscal 1983. This increase was necessary in order to increase funding for this program this year to avert cutbacks in the meals programs supported by the commodity program. I am pleased to note that the House bill reflected the need for added funds in this program. If this money is not provided to allow for States to be reimbursed 51.5 cents for each meal that they serve, major cutbacks in the meals program will have to be effected this year. Can the gentleman tell me if funds are included in the conference report for the commodity program?

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. BIAGGI. I yield to the gentleman from Mississippi.

Mr. WHITTEN. May I say to my colleague the $16 million for 1983 is included in the bill. The $5 million for 1982 was funded out of available funds by the Department.

Mr. BIAGGI. I thank the gentleman.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Speaker, 40 amendments were added to the Commerce, Justice, and State portion of the supplemental by the Senate. And I have been asked some questions about

three of four of these items that I want to mention very briefly.

The money for Project Democracy is not in the bill because it was not authorized.

The $152 million for repurchase of defaulted loans guaranteed by SBA is in the bill.

The money for replacing the Embassy in Lebanon, $22 million, is in the bill.

A number of Members were interested in trade adjustment assistance, $3.8 million is in the bill to take care of the increased pay cost requirements for ITA, and $5.1 million in carryover balances for the trade-adjustment-assistance program is earmarked in the statement of the managers to take care of some of the applications for this program that Members were interested in.

A total of $2 million is in the bill that will permit the continuation of FTC's 10 regional office structure.

A total of $1.65 million is in the bill for the SEC for increased pay costs and 33 additional positions, which some Members were interested in because of the increase in the SEC's activity.

I think this supplemental bill is very essential and I ask my colleagues to support the conference report.

● Mr. BOLAND. Mr. Speaker, chapter VI—the HUD-Independent Agencies Subcommittee's chapter—is noncontroversial. The chapter includes supplemental program appropriations totaling $280,680,000 in budget authority—an increase of $15 million above the budget estimates. We are also recommending that $1.6 billion of recaptured rent supplement and rental housing assistance authority be set aside for contract amendments for 33,700 State aided, noninsured housing units. The administration had proposed rescinding this authority. I will go into greater detail on that matter in a few minutes.

Let me now review briefly the conference agreements.

You may recall that funds for the 1983 assisted housing programs were included in the further continuing resolution enacted last December. The Department did not comply with the distribution of 1983 assisted housing funds as outlined in that conference report. As a result, the 1983 housing distribution table was included in the jobs bill as a statutory provision. However, having the table in law removes all flexibility in meeting changing needs.

Because of that problem, bill language is included under the annual contributions for assisted housing heading that will allow funds to be shifted between individual housing programs with the approval of the Committees on Appropriations. In addition to the general reprograming language, the conference agreement contains specific transfer language proposed by the Senate. This will provide for up to 6,000 units of loan management, up to an additional 7,000 units of property disposition, up to 900 units of section 8 new or substantial rehabilitation pursuant to a court order, up to 100 additional public housing units for conversion from section 23 assistance, and $245 million in budget authority for amendments for existing section 8 units. The cost of these additional units is approximately $1.2 billion.

Instead of giving HUD discretion as to which programs to reduce, the conferees made those decisions. Offsetting the increases, the bill language reduces the budget authority available for public housing interest rate adjustments by $340 million—section 23 conversions by $63,450,000, public housing amendments by $62 million and amendments for section 8 new construction and substantial rehabilitation by $198 million.

However, the offsetting items carried as decreases total only approximately $663 million. Therefore, language has also been included which permits the Department to make up the difference by the use of any recaptured funds exceeding $2.4 billion. The Department is to choose the order of priority for the additional funding.

Next, let me address the administration's rescission request for the rent supplement and rental housing assistance programs. This is a complicated proposal—but it is an action which both the House and Senate conferees believe is necessary at this time.

The administration, because of inadequate amendment funds, is converting units covered by the rent supplement and rental assistance payment programs to section 8 assistance. The Congress has provided section 8 funds to make the conversions for the past 4 years. However, despite directions to fund cost increases for State aided, noninsured projects, the Department has announced its intention not to do so. The conferees disagree with the administration's proposal regarding noninsured projects and are recommending a long-term solution to this problem. The recommendation permits the Department to continue converting insured rent supplement and rental housing assistance projects to section 8 assistance. However, instead of rescinding an estimated $1.6 billion, those funds will be reserved for contract amendments for an estimated 33,700 State aided, noninsured rent supplement and rental housing assistance units.

The State agencies would like to have 100 percent of the increased costs covered. However, the bill includes a long-term solution that provides for 90 percent of these increased costs to be funded with Federal funds. Although the State agencies believed that the Federal Government has an obligation to fund all the amendment costs—the conferees felt that that was simply not the case, In fact, the Department's general counsel has issued an opinion that there is no legal Federal responsibility to fund cost increases.

The bill, therefore, includes language covering 90 percent of the amendment costs because the noninsured projects belong to the States. This approach will insure that the States contribute at least 10 percent of the costs which, in turn, suggests that the State governments have some responsibility in this area. In view of the large Federal deficit it does not seem unreasonable to ask the States to contribute 10 percent of the cost increases on projects owned by the States. The only change from the original House language which passed in May is that the implementation date of the 90-percent provision is delayed until October 1, 1983, in order to provide an orderly transition to the cost-sharing stipulation.

The conference agreement also includes $5 billion of additional loan guarantee authority under the Federal Housing Administration mortgage insurance program. This will insure that as housing activity continues to escalate—sufficient authority is available for FHA mortgage commitments.

Language has also been included in the bill which amends section 203(h) of the National Housing Act by raising the amount insurable for mortgages on residences replacing residences destroyed by natural disasters from $14,400 to $67,500, more in high-cost areas. In view of the significant number of natural disasters occuring in the past 3 months throughout the Western States—this legislative change is critical.

The conferees agreed to $6 million for an urban renewal grant for the Kendall Square project. This grant will be the final funding for the project and fulfills a unique and long-standing Federal Government responsibility to finance the completion of the Kendall Square project.

The bill includes $9 million in supplemental funds for salaries and expenses of the Environmental Protection Agency. This amount includes $2 million to be transferred to the research and development account for establishing a hazardous waste management center to bring together technical, medical, and public policy experts in a modern research and educational facility. I believe that the establishment of a center for hazardous waste management is essential to solving the Nation's serious hazardous waste problems.

The conferees adopted highly technical language for the Consumer Information Center. The Senate added language setting up a fund to be de-

rived from appropriations, reimbursements, and fees that will be used to pay for activities of the Consumer Information Center—including those dealing with the cost of distributing consumer pamphlets to recipients.

The conferees reached agreement on several matters relating to the Veterans' Administration. A Senate amendment proposed transferring less than 2 acres of land from the National Park Service and the Forest Service to the Veterans' Administration for the Sitka National Cemetery. Frankly, I questioned why this legislation needed to be in an appropriations bill. However, the Senate conferees insisted on their amendment, with a technical modification.

The conference agreement also includes $180,168,000 for increased pay costs for the medical care appropriation and a provision regarding three integrated hospital system computer projects. The conferees were concerned that integrated hospital system (IHS) computer projects proposed for three VA medical centers were not proceeding forward. To address this concern and carry out the previously planned IHS projects, language earmarking $4,200,000 for this purpose from available fiscal year 1983 medical care funds has been included in the bill. The $4,200,000 is to be derived from the reprograming of funds that the VA is unable to obligate for the purposes planned. The VA has been unable to effectively obligate $4,200,000 of the $11,200,000 assumed for the contractual component of the psychological readjustment counseling program. It is not intended that funding for the IHS projects be derived from decentralized hospital computer program moneys.

The $4,200,000 together with sufficient fiscal year 1984 moneys, estimated to be $6,300,000, will be made available to fully fund the three IHS projects at Philadelphia, Pa.; Saginaw, Mich.; and Big Spring, Tex. It is expected the the contracts for these multiyear pilot projects will be awarded by February 1, 1984.

Finally, in accordance with the conference agreement on the 1983 HUD-Independent Agencies Appropriation Act, this bill includes the requested amounts of $254 million for the replacement hospital at Minneapolis and $9,400,000 for the clinical addition project at Cleveland. While the funding for these two projects is requested in the 1984 budget, the conferees believe that construction funding should be provided at this time in order that construction can begin on the hospitals during the 1983 construction season.●

● Mr. FAZIO. Mr. Speaker, this conference report includes funds to restore the structural integrity of the west central front of the Capitol. The House had approved $49 million; the Senate approved $48 million. The conferees agreed to the $49 million with specific reference to including funds to repair and replace the old terrace courtyard walls. However, the funding level, $49 million may well not be enough to do the work properly. Our best estimate, developed by competent and experienced architectural and engineering consultants after more than 1 year of extensive study and after the development of detailed working drawings, was $66 million. In order to be sure the job is done thoroughly and to assure sufficient resources, that is the amount that should be appropriated.

The fact that insufficient funds will be available will likely result in the necessity to appropriate additional amounts in the future. In their ardor, the opponents of the west front extension, including the American Institute of Architects, forced this arbitrary reduction in order to make the debate between extension and restoration into an economic issue. Although the AIA did not share with us the details of this revised estimate, we have to assume it comports with the actions of the Senate subcommittee in marking up the restoration proposal. We have been able to remedy one defect. Among the obvious deficiencies of the arbitrary reduction was that of the old courtyard walls. The cost for their repair had been eliminated by the Senate and has been restored in conference in order to retain the earth that forms the footings and foundation area for the main north and south original wings.

Other inadequacies remain unresolved. The reduction in the contingency percentage of 35 percent, recommended by the consultants as typical and prudent for a project of this nature, is another weakness in the last minute estimate. For example, the consultants estimated that only 5 percent of the sandstone in the west front wall will have to be repaired or replaced. However, if there should be a need to repair or replace just 10 percent of the stone—not an unlikely possibility—the cost of doing that work will increase from $7,281,534 to $14,563,068, using escalated figures. The cost difference of $7,281,534 would almost exhaust the remaining contingency amount of $8,355,077.

In addition, there will be delays resulting from noisy and potentially disruptive work having to be accomplished outside of regular working hours, in order not to interfere with legislative activities in the Capitol. That is a common experience in construction and renovation work in the area of the Capitol and was provided for in the more carefully developed cost estimates of the consulting engineers and had been incorporated in the official $66 million estimate.

Furthermore, although the terrace walkways are not necessarily a part of the wall project, they are unarguably in need of restoration and should be repaired concurrently with the wall project so that the entire west front is completed over a relatively short period of time and with minimum future disruption to its use and enjoyment by all. But the funds to restore the terraces were eliminated by the AIA-backed House amendment and the Senate provision—a fact, I believe, that most Members were not aware of.

Mr. Speaker, early this year my subcommittee began the move to resolve the west front issue. Mr. LEWIS, the ranking minority member, and I urged the Commission to act and committed ourselves to taking the necessary appropriation action. We felt the situation had gone too long without resolution and I am proud that we have accomplished the primary objective.

In short, Mr. Speaker, whereas I am pleased that the Congress has finally acted on the west central front issue, I believe we have cut too many corners. The Capitol Building is a national treasure and we should be prudent and realistic in appropriating the funds needed to properly restore it. Instead, what we have here is a situation where the extension proponents may well have low balled the estimate. If additional funds are required in the future to finish the job, I hope we find support among those who have sold us this restoration at a discount price.

AMENDMENT NO. 153—CONTRACT PROVISIONS

The Senate added language to the bill—which is a portion of amendment 153—regarding vendor contracts with the House and Senate. Under current law, if a vendor wishes to provide a discount or special terms and conditions on a product or service, he must offer that discount or terms and conditions to every agency of the Government.

The language exempts House and Senate transactions from that provision.

Now there are many cases where suppliers and GSA have negotiated so-called schedule contracts for items—which saves a great deal of administrative time and saves the Government and industry a great deal of money each year.

If a House or Senate office has a need for a special device—whether in a routine or experimental application—it is not able to accept a discount or slightly different terms and conditions—even if warranted under the circumstances—without potentially forcing a complete adjustment in the highly detailed scheduled contracts or in the vendor's normal price line.

This is an unnecessary burden for both industry and Government. It also works a great disadvantage to House and Senate offices who do not have an elaborate procurement bureaucracy at their disposal as does the executive branch.

We agreed to the Senate provision in conference because it makes good business sense.

AMENDMENT NO. 158—HONORARIA INCOME

The House receded to the Senate in the matter of honoraria income and an increase in the salaries of Senators.

We had an honoraria limitation—30 percent of a Member's salary—in the bill sent to the Senate. The House language was added when the full Appropriations Committee considered and reported H.R. 3069 to the House.

The Senate adopted a similar 30-percent limit which will become effective on January 1, 1984. While not a word-for-word copy of the language in the House bill—which had been patterned after the honoraria limitations which have applied to all Members of the House for many years in rule XLVII—the effects are almost identical.

Very simply, beginning January 1, 1984, all Members of Congress will be covered by a limit on their income from honoraria of 30 percent of their congressional salaries.

For Members of the House this represents no change at all. They have been covered by an honorarium limitation all along.

For Members of the Senate, they have not been covered by any limitation—but now will be.

I think that restores a sense of equity to congressional compensation and eliminates the potential for serious abuse of our public trust.

The language also lifts the limitation as the salaries of Members of the other body. Henceforth, Members of both bodies will now make the same salaries—which is as it should be.

AMENDMENT NO. 159—CHARITABLE CONTRIBUTIONS

The Senate added this language in a floor amendment. The language amends the Federal Elections Campaign Act at 2 U.S.C. 441i(b) to define the conditions upon which a charitable contribution can be made without being counted in the $2,000 limitation on honoraria imposed by the act.

Under current law, a Government official has to undertake a very elaborate procedure whereby five charities are designated, and the sponsoring organization actually makes the payment. We are told that frequently the sponsors do not complete the paperwork, or that the Government official or Member is not advised of the actual payment for tax purposes.

We are just simplifying the procedure in this amendment. Henceforth, in applying the $2,000 test under 2 U.S.C. 441i(b), the official may make direct payment to the charity. This will facilitate the paperwork and make it easier to maintain our records for financial disclosure.●

● Mr. YATES. Mr. Speaker, chapter VII includes several matters which posed a number of difficult problems. First is the issue of the strategic petroleum reserve. At the insistence of the administration, the managers reluctantly have recommended no funds in this bill for further construction of the Big Hill, Tex., permanent storage site. The conferees, after lengthy deliberation, agreed to delete the appropriation for the construction of phase III to avoid the consequences of a threatened veto. The administration has committed in writing to submit a budget request for further construction at Big Hill in fiscal year 1985. The fill rate for the reserve remains at 220,000 barrels per day in fiscal year 1983 and the managers reaffirmed the Congress resolve to maintain this fill rate.

Coal leasing, another important energy concern, is also a major component of this chapter. The managers have agreed that the Secretary shall appoint a commission to review the Department's coal-leasing procedures to insure fair market value and that they shall make their recommendation within 6 months after enactment of this act.

The Secretary is reported to have asked David Linowes and Elmer Staats, members of the former Linowes Commission on Royalty Management to serve on the Commission. It is the expectation that people of similar caliber exemplifying independence and expertise will be selected. It is also the expectation that the Commission will make clear any problems with the coal program stemming from deficiencies in the authorizing legislation; review the methodology for estimating fair market value; determine the impact of competition on achieving fair market value; review the procedures for evaluating tracts to reflect regional differences in coal and establishing cents per ton minimums on a regional basis; determining if presale planning procedures are adequate; and of equal importance, holding public hearings on proposed lease sales.

We reluctantly yielded to the Senate on a moratorium on coal leasing since it appears that the Fort Union coal lease sale scheduled by the Secretary of Interior has slipped and will probably not occur in fiscal year 1983. In addition we considered the threat of a veto which would have a nationwide impact since items such as food stamps and funds for payment of salaries are contained within this bill. We are resolved to bring the proposed moratorium back in the appropriation bill for fiscal year 1984 because we believe so strongly that it is the course of action which must be taken if we are to protect the American public against giveaway coal-leasing practices and assure fair value to the American people for their resources.

In respect to land acquisition, this chapter contains partial compensation for the legislative taking in 1978 in Redwoods National Park. The money is to be allocated to the three major timber owners according to the distribution formula agreed to by the owners and the court. Language has also been added that requires the National Park Service to order an update of the appraisal of Sweeney Ridge within 30 days and to begin good-faith negotiations with the owners of that tract in the Golden Gate National Recreation Area within 30 days after the updated appraisal is approved by the service.

In this bill we have yielded to the Senate on many occasions in order to effect a timely bill that does not jeopardize meeting the needs of the people by being vetoed. However, there is one issue where we did not agree. That is the Cumberland Gap Tunnel. We did not agree with the Senate in adding $14 million in liquidating cash to finance engineering, roadway and bridge access, and pilot tunnel boring for Cumberland Gap National Historic Park. This funding is the tip of the iceberg on a $125 million project. I am, therefore, requesting of my colleagues in the House their support for this disagreement.

Mr. Speaker, I recommend that the conference report, and this specific chapter, be agreed to.●

● Mr. LEHMAN of Florida. Mr. Speaker, at the appropriate time a preferential motion will be offered on amendment 169, which is in true disagreement, to recede and concur in the Senate amendment. This is a change in the position the House conferees first agreed to on July 19, which is necessitated by changed circumstances.

Originally, the House conferees chose to bring this Senate amendment which appropriates $5 million for design and engineering work to replace the Talmadge Bridge in Savannah, Ga., back to the House floor in true disagreement. We took this action based on the objections of the House authorizing committee chairman, Mr. HOWARD, and the Senate authorizing committee chairman, Senator STAFFORD. Since that time, the gentleman from Georgia (Mr. THOMAS) has brought to our attention the fact that, on July 23 a cargo boom from a ship passing under this bridge struck the primary support beam on its center span causing the bridge to be closed for at least 3 months. We are advised that the total collapse of this bridge was only narrowly averted.

Due to these changed circumstances, the chairman of the House authorizing committee, Mr. HOWARD, has notified the committee that he has withdrawn his objection to inclusion of this provision in the bill. Similarly, as chairman of the Transportation Appropriations Subcommittee, I feel that, in light of these changed circum-

stances, the House should recede and concur in the Senate amendment.

As a point of clarification, the Senate amendment appropriates $5 million from the general fund for planning and engineering work only. This appropriation is not intended to distort any priorities that have been established with respect to projects funded under section 144 of title 23.

Finally, I want to commend the gentleman from Georgia (Mr. THOMAS) for the outstanding work he did in educating the members of the committee on the need for this appropriation. He was highly effective in covering the necessary bases. I doubt if this project would have made it this far without his diligence.●

● Mr. McDADE. Mr. Speaker, I rise in support of the conference report to H.R. 3069 making supplemental appropriations for fiscal year 1983 and to urge its adoption by this House.

The Interior chapter contains a provision that is particularly critical to the citizens of the entire east coast of the United States and especially the residents of northeastern Pennsylvania. It provides a framework that will allow us to save lives and save jobs in the area adjacent to and including the Delaware Water Gap National Recreation Area. It represents a light at the end of the tunnel for both the residents along Route 209 and the people who must, for work or for pleasure, cross highway 209 through the park. It is an integral part of the entire stream of commerce that passes from New England through the Middle Atlantic States to the south and west.

I would be remiss if I did not thank the Senator from New York, Senator D'AMATO, the Senator from Idaho, Senator MCCLURE, the Senator from Oregon, Senator HATFIELD, the Senator from West Virginia, Senator BYRD, the Senator from Kentucky, Senator HUDDLESTON, and my own chairman of the Interior Subcommittee the gentleman from Illinois (Mr. YATES) along with all of the House conferees for their support and their willingness to hear the pleas of my constituent for relief from the Route 209 problem.

Mr. Speaker, the conferees did agree to apply an immediate ban on all through trucks except those trucks in the three counties of Monroe, Pike, and Northampton adjoining the Delaware Water Gap National Recreation Area. Those trucks will be given access to the road paying a toll, receipts from which will be retained by the National Park Service for permanent maintenance and safety improvement along the highway. The ban on through trucks will take effect immediately upon enactment of the supplemental and will terminate on December 31 of this year, absent other actions. The tolls meanwhile will continue in place for maximum of 10 years. It is the expectation of all of us that should construction begin on a permanent alternative to Route 209 those tolls would terminate much before that.

Meanwhile, the legislation authorizes the creation of a three-State, five-member Commission to be called by the Secretary of the Interior consisting of Secretary Watt, Transportation Secretary Dole, and the Governors of Pennsylvania, New Jersey and New York. The Commission will be established within 15 days and within 90 days that Commission will report back to Congress on a permanent solution to the Route 209 traffic problem. In shaping that solution the Commission will look very hard, not only at the best way to clean up Route 209, but will also explore the consequences of truck bans on the smaller roads of all three States. Should the Commission find that a new through route linking the interstate is necessary this legislation provides the authority and the financial assistance necessary to build that road. The Commission is on a tight schedule. Its creation insures that all three States will meet at highest levels, something they have never done before, to grapple with the Route 209 problem head on. The National Park Service, because it has a road to manage and park to run, has a tremendously vital stake in the outcome of the Commission deliberations as well.

Mr. Speaker, the residents of northeastern Pennsylvania have waited for nearly two decades for a solution to the Route 209 dilemma. Regrettably Route 209 has become something for which it was never intended when built—a link between two major interstates—Route 80 on the south and Route 84 on the north. Winding through both Pennsylvania and New York, U.S. Route 209 was originally built as a small farm road to enable trucks to get to market. This was long before the advent of the Delaware Water Gap National Recreation Area.

Because of delays in completing the Interstate System in northeastern Pennsylvania, especially delays in completing Interstate 84, trucks from the south and west were forced onto Route 209 as the quick, easy way to avoid New England. The problem and the resulting confusion was aggravated by the heavyhanded presence of the Federal Government and the endless turmoil that surrounded the creation of the Delaware Water Gap National Recreation Area. Land was being acquired to create a park whose overall design and scope was still subject to violent debate and legislative challenge. The terrible problems of Route 209 were caught up in a wave of redtape and bureaucratic confusion. All the while lives were threatened daily. Unfortunately, even after the completion of Route 84 the trucks did not leave Route 209, staying in droves until this 35-foot highway was carrying 10,000 vehicles per day, 3,000 of which were large trucks. Mingled with schoolbuses, tourists to the park, and resort goers, the traffic situation became unbearable.

In 1972, I held a meeting in my office to try to bring all the affected parties together to find a common ground for attacking the Route 209 problem. At this time the Army Corps of Engineers proposed construction of the Tocks Island Dam creating a 37-mile square lake in the middle of the park. This would provide a possible solution to the Route 209 problem since the legislation authorizing the Tocks Dam would have to relocate Route 209 over the mountain and west of the park. At that meeting the Federal Highway Administration, the Commonwealth of Pennsylvania, representative of local counties adjacent to Route 209, and the National Park Service all agreed that a relocated Route 209 should be pursued.

The Corps of Engineers would acquire the land, complete the design, and complete the environmental review for a new four-lane highway linking the Interstates 80 with 84 around the western boundary of the park. But the authority to relocate Route 209 contained in the Tocks Dam authorization allowed the corps to construct two lanes only. The Commonwealth of Pennsylvania would then construct the two outside lanes of the four-lane highway and the necessary interchanges. Congress even went so far as to provide, at my request, an initial payment of $5 million to begin the process.

Regrettably, the Commonwealth of Pennsylvania reneged on its promises, a rejection based upon the lack of construction funds. This rejection left us with funds and authority for a two-lane highway around the edge of the park. However building a two-lane highway around the park was not the answer. It would not have solved the Route 209 traffic problem. It simply would have moved it over the mountain. There would be a new two-lane road carrying too many trucks depositing them 23 miles down Route 209 at the park's edge. Instead of solving the problem, we were making it worse. A new course had to be charted.

It was then decided that the Commonwealth of Pennsylvania would deed Route 209 to the National Park Service. The Park Service, faced with an unsafe highway cutting through the park, stipulated that they would accept title to the highway only if they could be allowed to manage it properly and if funds were provided for necessary safety improvements. It took 2 years to secure a unanimous act of the Pennsylvania Legislature to achieve but the legislation passed and was signed by the Governor.

One final hurdle remained. A complete truck ban in accordance with ex-

isting regulations would have led to the direct loss of at least 1,000 verifiable jobs in the northeastern regions of the State. The legislation contained in the conference report gives the relief necessary to allow those people the opportunity to live and work in the region near the park. It is a reasonable approach for the through-truck access around the park on the Interstate System remains available. For the local trucks, a reasonable amount of access is guaranteed.

Throughout the entire debate over what to do with this highway, several things have become clear. First, that this 23-mile segment of road is far too small, far too unsafe, far too inadequate to handle a 3,000-vehicle volume per day load. It is also apparent that seldom in the history of this Nation has there been such confusion of responsibility as to who should take the initiative and try to solve a highway problem. Route 209 has become an unintended consequence of delays in completion of the interstate and delays surrounding the creation of the park, with big trucks and small schoolbuses blending together in a witch's brew that threatens lives. For the Congress to step in and act to save lives is proof that the peoples branch of Government, on welcome occasions, does overcome adversity.

With the legislation herein Congress is going fully and forcefully on record that Route 209 in northeastern Pennsylvania is a vital link in interstate commerce. The Congress has found that Route 209 as presently constructed constitutes an inherent and critical public safety problem resulting from excessive interstate truck traffic. The Congress has further found that such unlimited truck traffic seriously affects the public health of and safety of citizens in the United States. The Congress has found that such unlimited truck passage must be limited in the public interest and under the authority of its inherent power to regulate commerce and such other powers as may be available and in recognition of the current emergency on Route 209, the legislation contained in this bill has been agreed upon.

This language is, in my judgment, the way to proceed. It is a compromise. Yet we did not compromise with people's lives. What we did do was to give the impacted States the chance to devise a permanent solution to this problem. What we did was draw the framework for that solution; 90 to 95 percent of these big trucks will come off Route 209 now. Those who remain will have access that will alleviate their economic difficulties. The National Park Service will accomplish these goals through revisions in their regulations.

It was the conferees clear intention that the availability of funding not be a barrier to the ability of the three States to come up with a permanent solution. The report includes the House provision providing 90 percent trust fund money and another 10 percent from general revenues to facilitate construction. It is to be hoped that this will serve as a further incentive to help the three States arrive at a long-term solution. I hope my friends on both sides of the aisle can support this compromise and support this conference report.●

Mr. WHITTEN. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 257, nays 133, answered "present" 1, not voting 42, as follows:

□ 2240

Messrs. NIELSON of Utah, WILLIAMS of Montana, HUTTO, WYDEN, and HERTEL of Michigan changed their votes from "yea" to "nay."

Mr. GLICKMAN changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

EXPLANATION FOR MISSED VOTES

Mr. GILMAN. Mr. Speaker, I was unavoidably detained earlier today, and was unable to cast my vote on House Resolution 267, relating to activities of the Committee on Standards of Official Conduct and the vote on the conference report to H.R. 2973. Had I been present, I would have voted "aye" on House Resolution 267, and "aye" on the vote on the conference report to H.R. 2973, to repeal withholding on interest and dividends and the report on the Caribbean Basin Initiative.

IRREGULARITIES IN PIK PROGRAM

(Mr. MRAZEK asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MRAZEK. Mr. Speaker, a front page story in today's Washington Post details blatant irregularities in the Department of Agriculture's payment-in-kind program, including a $214,000 windfall in free cotton for the program's administrator, Everett G. (Bud) Rank, Jr.

The story goes on to detail how major conglomerates such as Tenneco, Shell Oil, Chevron USA and others stand to receive millions of dollars in free cotton through the PIK program. At the other end of the spectrum, the small farmer who needs help most desperately during these hard times for agriculture in our country is, not surprisingly, benefiting the least from PIK.

Mr. Speaker, these allegations lend strong support to the notion that we in this body bought ourselves a pig in a poke when the House gave recent approval to the PIK program. As in the case of tobacco subsidies, and peanut subsidies, and a lot of other programs to benefit the few, we are seeing the results of this stupidity in Mr. Rank's bulging coffers.

At a time of $200 billion deficits which threaten to choke off the limited economic recovery we have realized by forcing interest rates back up, I need not impress upon my colleagues the overwhelming necessity incumbent upon us to choose our priorities wisely for the expenditure of Federal dollars. As in all other spheres, subsidies to the truly needy among our farmers can be justified when net farm income, adjusted for inflation, has just hit its lowest ebb since the Great Depression. I would suggest that Bud Rank and Big Oil do not qualify as truly needy.

Mr. Speaker, it could well be that an agonizing reappraisal is in order with respect to the PIK program.

The following article was submitted for the RECORD.

[From the Washington Post, July 28, 1983]

AGRIBUSINESS WINDFALL: CONGLOMERATES TO REAP MILLIONS FROM PIK

(By Ward Sinclair)

FRESNO, CALIF.—Dozens of big farms in the San Joaquin Valley, some owned by such conglomerates as Bangor Punta, Tenneco, Chevron USA, Shell Oil and Superior Oil, will receive millions of dollars worth of free cotton through the Reagan administration's payment-in-kind (PIK) program.

In Fresno, Kings, Kern and Tulare counties, nearly 50 farms will receive cotton worth $1 million or more each, according to Department of Agriculture records at county offices of the Agriculture Stabilization and Conservation Service. They also show that dozens of smaller farms in the four counties will receive free cotton worth more than $500,000 through the federal program.

Among the beneficiaries is Everett G. (Bud) Rank, Jr., chief administrator of the PIK program and head of the Agriculture Department's Stabilization and Conservation Service since 1981. He and four partners in a Fresno County operation, Cinco Farms, will receive 1.3 million pounds of cotton, worth slightly more than $1 million, in return for idling their entire cotton base of 2,163 acres.

The PIK program will give farmers amounts of free cotton, wheat, corn and rice in return for not planting all or part of their 1983 crop. It is intended to reduce market-depressing surpluses and increase farm prices. Last year, net farm income, adjusted for inflation, hit its lowest mark since the Depression.

But PIK is coming under increasing fire in Congress and across the farm belt. Critics, charging that the program is too generous, estimate that it will cost taxpayers $12 billion or more and claim that it undermines farm-supply companies and gives outsized benefits to big farmers, who in many instances need help the least.

Rank, in a meeting with farmers here last week, touched on these issues. He said farm program costs are becoming "kind of embarrassing" and are "bleeding the taxpayer."

"Being from California, our philosophy is for a market-oriented agriculture," Rank said. "We can't expect the American taxpayer to keep subsidizing agriculture. . . . The American taxpayer at some point is going to say 'that's enough'. . . . We farmers bitch about welfare and we all have our hands out. You have to relaize the taxpayers are not going to guarantee your profit."

Willoughby Houk, a rancher near the community of Firebaugh who idled 91 acres and stands to get only 98 bales of free cotton, said, "The rich just get richer in this program. They never should have waived that $50,000 limit on federal payments to individual farmers."

As PIK was being designed late last year, Secretary of Agriculture John R. Block insisted that the program would not work unless it was open to all farmers. He argued that it would not attract enough participants if a congressionally imposed limit of $50,000 on federal aid payments to individual farmers was left in place.

The Agriculture Department, which failed to win congressional authorization for the PIK with a waiver of the payment limitation, went ahead on its own. Government lawyers reasoned that the $50,000 limit would not apply because farmers would be given a commodity rather than cash.

That decision has turned out to be a boon for many of the country's largest grain and cotton farmers. In the four major cotton-growing counties of the San Joaquin Valley, 503,479 acres—two of every five eligible acres—have been enrolled in the program.

In this valley, where farmers traditionally have been harsh critics of federal agricultural support programs, yet have been quick to take advantage of them, there is an additional dimension to benefits from Washington.

Federally subsidized irrigation water available to many farmers here at a fraction of its real cost has contributed to extraordinary cotton yields from a desert landscape that otherwise would produce little. Farmers from this area mounted a major lobbying effort to persuade Congress to retain their water subsidies in last year's revision of the Reclamation Act of 1902.

The large PIK payments to the valley's farmers are based on these high yields, which range between two and three bales per acre of high-demand, top-quality cotton, compared with one bale per acre for the typical dry-land farmer in the South and Southeast.

They also are getting another break in the PIK program. Because of the cost of irrigation water here, they have been exempted from the program's requirement to plant their idled fields with cover crops to prevent erosion.

The Agriculture Department also is permitting farmers here to use a "skip-row" cropping technique that will enhance yields further by alternating planted strips of land with idled strips, thus creating more "outside" rows that get more full sunlight. Some farmers in the valley also are being allowed to plant grapevines on idled land if they intend to give up cotton as a crop.

Some of the biggest recipients of PIK cotton here also cashed in handsomely in 1979 when the federal government paid millions of dollars in low-yield disaster payments to cotton farmers stricken by drought the previous year.

One such operation is South Lake Farms, owned by Producers Cotton Oil Co., a subsidiary of the Bangor Punta Corp., a Connecticut-based conglomerate that makes airplanes, boats, firearms, sporting goods and other industrial products. South Lake Farms, in Kings County, received $1 million in diaster aid in 1979. This year it will get at least 4,524,329 pounds of PIK cotton, worth about $3.6 million, according to the Government records.

Producers Cotton Oil Co. President Gerald Brewer, who is also president of the National Cotton Council, refused to divulge details of his company's participation in PIK, although he said that the company has farms "in two or three counties." Producers Vice President Sid Cox refused to identify the counties or to name the farms, then hang up the telephone.

South Lake is only one of a number of conglomerate-owned farming operations

that will benefit from the cotton portion of PIK.

In Kern County, Belridge Farms, an affiliate of Shell Oil, is due to get 3.1 million pounds of cotton, worth about $2.5 million, plus 37,000 bushels of free Federal wheat, worth about $150,000, through another part of the PIK program.

In Kern and Tulare counties, farming subsidiaries of Tenneco West, an arm of the Houston-based Tenneco oil and gas multinational, will get slightly more than 2 million pounds of cotton, with a current resale value of about $1.7 million.

Chevron USA, although not directly involved in farming, will cash in on PIK through its ownership of extensive agricultural land put in to the program by farmers who operate on leases.

At least nine of these operations in Kern, Fresno and Kings counties will give Chevron more than 502,000 pounds of cotton, with a value of at least $401,000, as its share from the PIK program. Chevron also stands to get at least 2,346 bushels of PIK-program wheat from two of its Kern lease operations.

In Tulare County, the Superior Farming Co., a subsidiary of Superior Oil, will get 222,707 pounds of cotton through PIK, while the Standard Oil Co., operator of another farm, will receive 43,641 pounds of cotton.

Farmers in Fresno County, the richest agricultural county in the world, stand to get 73.2 million pounds of PIK cotton, with 26 of the growers receiving more than 1 million pounds each. Many of them are in the Westlands Water District, a 600,000-acre federally irrigated zone where farms of 1,000 acres and more with high yields are common.

Westlands farmers, represented by a phalanx of Washington and California lawyers, lobbied Congress to rewrite in 1902 reclamation law in ways that would protect their large holdings and their access to the cheap Federal water.

Federal district and appellate courts had held that the 1902 law limiting an individual to 160 acres of federally irrigated land and requiring owners to reside on the land, had been violated on a wholesale basis in Westlands. The 1982 revision of the law will increase water rates in Westlands, but it wiped out the tight restrictions on farm size and residency.

The biggest PIK recipients from Fresno County include Hillside Farms, owned by Steven H. Hall, and El Dorado Farms, operated by Yataro and Isamu Minami, with more than 4.6 million pounds of cotton each. Harris Farms, operated in Westlands by John Harris, will get 3.4 million pounds.

The largest individual PIK recipient in the valley apparently will be C. J. Ritchie Farms in Tulare County, which is scheduled to get 4,798,862 pounds with a market value of $3.8 million.

Don Jackson, who operates alone and in partnerships on about 25,000 acres in Kings and Tulare counties, according to government records, will get about 3.5 million pounds of cotton, which could be resold today for more than $2.8 million.

Jackson said in an interview that he had no qualms about accepting federal aid because he felt that federal farm policies were the root of his and other farmers' economic troubles.

"They're helping us out of something they got us into." Jackson said. "It is a salvation for farmers across the United States. There would be wholesale bankruptcies without it . . . The government uses food as a big hammer over the markets. The whole concept of federal support levels is wrong . . . If they kept their hands off, we would be okay."

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. PICKLE, in connection with the bill H.R. 2973, the Caribbean Basin Initiative.

SENATE JOINT RESOLUTIONS REFERRED

Joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 116. Joint resolution to designate the week of September 4, 1983, through September 10, 1983, as "Youth of America Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 131. Joint resolution designating "National Cystic Fibrosis Week"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. MURTHA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 45 minutes p.m.) the House adjourned until tomorrow, Friday, July 29, 1983, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1634. A letter from the Deputy Assistant Secretary (Logistics and Communications), transmitting notice of the Air Force's decision to convert to contractor performance the mess attendant function at Loring Air Force Base, Maine, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1635. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's decision to convert to contractor performance the food services function at the Naval Regional Medical Center, Charleston, S.C., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1636. A letter from the Director, Information Security Oversight Office, General Services Administration, transmitting an information copy of that Office's annual report to the President for fiscal year 1982; to the Committee on Government Operations.

1637. A letter from the Assistant Attorney General, Office of Legislative Affairs, Department of Justice, transmitting a draft of proposed legislation to amend certain provisions applicable to compensation for the overtime inspectional service of employees of the U.S. Customs Service and Immigration and Naturalization Service, and for other purposes; jointly, to the Committees on the Judiciary and Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PERKINS: Committee on Education and Labor. Report pursuant to section 302(b) of the Congressional Budget Act of 1974 (Rept. No. 98-326). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 1256. A bill to amend title 14, United States Code, to provide for selective preappointment travel to the Coast Guard Academy for cadet applicants; with amendments (Rept. No. 98-327). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means H.R. 3409. A bill to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State; with an amendment (Rept. No. 98-328). Referred to the Committee of the whole House on the State of the Union.

Mr. HAWKINS: Committee on House Administration. House Joint Resolution 297. Joint resolution providing for appointment of Jeannine Smith Clark as a citizen regent of the Board of Regents of the Smithsonian Institution (Rept. No. 98-329). Referred to the House Calendar.

Mr. HAWKINS: Committee on House Administration. S. 930. An act to authorize the Smithsonian Institution to purchase land in Santa Cruz County, Ariz. (Rept. No. 98-330). Referred to the House Calendar.

Mr. HAWKINS: Committee on House Administrations. Senate Concurrent Resolution 7. Concurrent resolution to authorize a bust of Carl Hayden to be placed in the Capitol (Rept. No. 98-331). Referred to the House Calendar.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 3564. A bill to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program; with amendments (Rept. No. 98-332). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 3677. A bill to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program (Rept. No. 98-333). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BILIRAKIS:

H.R. 3686. A bill to provide benefits under the survivor benefit plan to surviving spouses of certain members of the Armed Forces retired before September 21, 1972; to the Committee on Armed Services.

By Mr. DERRICK:

H.R. 3687. A bill to amend title 18, United States Code, to prohibit certain practices in administering and using polygraph exami-

nations for purposes of hiring, demoting, promoting, disciplining, and dismissing employees; to the Committee on the Judiciary.

By Mr. EDWARDS of California:

H.R. 3688. A bill to amend the Clayton Act to limit the liability of units of local government under the antitrust laws; to the Committee on the Judiciary.

By Mr. KASTENMEIER:

H.R. 3689. A bill to eliminate diversity of citizenship as a basis of jurisdiction of Federal district courts, and for other purposes; to the Committee on the Judiciary.

H.R. 3690. A bill to modify diversity of citizenship as a basis of jurisdiction of Federal district courts; to the Committee on the Judiciary.

H.R. 3691. A bill to amend title 28, United States Code, to increase the amount in controversy in diversity cases to $100,000, and to require certain diversity cases to be brought in State court; to the Committee on the Judiciary.

H.R. 3692. A bill to amend title 28, United States Code, to increase the amount in controversy in diversity cases to $100,000, and to require diversity cases to be first submitted to arbitration; to the Committee on the Judiciary.

H.R. 3693. A bill to restrict diversity of citizenship as a basis of jurisdiction of Federal district courts, and for other purposes; to the Committee on the Judiciary.

By Mr. LIVINGSTON:

H.R. 3694. A bill to repeal the Boland amendment, relating to the use of Central Intelligence Agency funds in Central America; to the Committee on Appropriations.

By Mr. PEASE:

H.R. 3695. A bill to amend the Federal Water Pollution Control Act to require that 30 percent of the amounts granted for construction of treatment works in a State be used in labor surplus areas; to the Committee on Public Works and Transportation.

By Mr. DICKS:

H.R. 3696. A bill to amend title XVIII of the Social Security Act to provide that certain hospice programs may provide nursing care through arrangements with certified medicare providers in rural and medically underserved regions; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. DOWNEY of New York (for himself, Mr. MRAZEK, Ms. FERRARO, and Mr. SOLARZ):

H.R. 3697. A bill to modify Federal land acquisition and disposal policies carried out with respect to Fire Island National Seashore, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ERLENBORN (for himself and Mr. HORTON):

H.R. 3698. A bill to amend the Freedom of Information Act to require that information be made available to Congress; to the Committee on Government Operations.

By Mr. FAUNTROY:

H.R. 3699. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to provide autonomy for the District of Columbia Government over expenditure of funds derived from revenues of the District of Columbia Government; to the Committee on the District of Columbia.

H.R. 3700. A bill to authorize the Architect of the Capitol to relocate certain greenhouse and nursery facilities presently located at Poplar Point, to direct the Secretary of the Interior to permit the District of Columbia to construct, maintain, and operate certain transportation improvements; jointly, to the Committees on the District of Columbia and House Administration.

By Mr. STARK:

H.R. 3701. A bill to designate the main channel for the project for San Leandro Marina, California, as the "Jack D. Maltester Channel"; to the Committee on Public Works and Transportation.

By Mr. WEISS (for himself, Mr. WAXMAN, Mrs. BOXER, and Mr. ROYBAL):

H.R. 3702. A bill to amend the Public Health Service Act to provide funds for the prevention and treatment of public health emergencies; to the Committee on Energy and Commerce.

By ERDREICH:

H.R. 3703. A bill to amend section 1086(c) of title 10, United States Code, to provide for payment under the CHAMPUS program of certain health care expenses incurred by certain members and former members of the uniformed services and their dependents to the extent that such expenses are not payable under medicare; to the Committee on Armed Services.

By Mr. GREEN (for himself, Mr. RANGEL, and Mr. WEISS):

H.J. Res. 333. Joint resolution to congratulate the people of the county of New York on the occasion of the tricentennial of the founding of the county of New York; to the Committee on Post Office and Civil Service.

By Mr. FISH (for himself, Mr. PEPPER, Mr. SOLOMON, Mrs. SCHROEDER, Mrs. HALL of Indiana, Mrs. KENNELLY, Mr. MCHUGH, Mr. GILMAN, Mrs. BOXER, Ms. KAPTUR, and Mr. GARCIA):

H.J. Res. 334. Joint resolution to establish a Commission on the Eleanor Roosevelt Centennial; jointly, to the Committees on Post Office and Civil Service and Interior and Insular Affairs.

By Mr. MOAKLEY:

H. Con. Res. 152. Concurrent resolution directing the Commissioner of Social Security and the Secretary of Health and Human Services to immediately conduct a study and report to Congress on steps which can be taken to correct the benefit disparity known as the notch problem, in order to insure equitable and fair treatment for those who have based their retirement plans on benefit levels which have existed for the past decade; to the Committee on Ways and Means.

By Mr. STANGELAND:

H. Res. 288. Resolution abolishing the page system of the House of Representatives; to the Committee on House Administration.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DYSON:

H.R. 3704. A bill for the relief of Emiliana Raqueno; to the Committee on the Judiciary.

By Mr. FRANK:

H.R. 3705. A bill for the relief of Dennis Brutus; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 408: Mr. GILMAN, Mr. WAXMAN, Mrs. BOXER, Mr. DELLUMS, and Mr. FORD of Tennessee.

H.R. 433: Mr. GRAY.

H.R. 601: Mr. GEJDENSON, Mr. EVANS of Iowa, Mr. CORRADA, Mr. OBEY, Mr. MCHUGH, Mr. JEFFORDS, Mr. SOLARZ, Mr. ADDABBO, Mr. LIPINSKI, Mr. HORTON, Ms. OAKAR, Mr. OWENS, Mr. HARRISON, Mr. LAFALCE, Mr. BIAGGI, Mr. HARKIN, Mr. GARCIA, Mr. TOWNS, Mr. RANGEL, Mr. NEAL, Mr. KOSTMAYER, Mr. ROSE, Mr. SCHUMER, Mr. YATRON, Mr. LOWRY of Washington, Mr. DICKS, Mr. MCCLOSKEY, and Mr. JACOBS.

H.R. 700: Mr. HOWARD.

H.R. 1016: Mr. HORTON, Mr. LAGOMARSINO, Mr. OTTINGER, and Mrs. SCHNEIDER.

H.R. 1176: Mr. TORRES.

H.R. 1199: Mr. DANIEL B. CRANE, Mr. MRAZEK, Mr. ASPIN, Mr. CRAIG, Mrs. BOGGS, Mr. BOLAND, Mr. BROWN of California, Mr. COELHO, Mr. DONNELLY, Mr. FASCELL, Mr. HAWKINS, Mr. LOEFFLER, Mr. MCHUGH, Mr. MICA, Mr. MICHEL, Mr. MILLER of California, Mr. MURTHA, Mr. MYERS, Mr. OBERSTAR, Mr. OBEY, Mr. PANETTA, Mr. ROEMER, Mr. ROSTENKOWSKI, Mr. SAVAGE, Mr. SHANNON, Mr. SIMON, Mr. WHITTEN, Mr. BROOKS, and Mr. EARLY.

H.R. 1263: Mr. FORSYTHE.

H.R. 1376: Mr. MARTIN of New York, Mr. PRITCHARD, Mr. RAHALL, and Mr. WEISS.

H.R. 1415: Mr. DUNCAN.

H.R. 2036: Mr. RATCHFORD, Mrs. BOXER, Mr. MORRISON of Connecticut, Mr. MRAZEK, Mr. BEDELL, Mr. CORRADA, and Ms. FERRARO.

H.R. 2053: Mr. ALBOSTA, Mr. SIKORSKI, Mr. OBERSTAR, and Mr. GAYDOS.

H.R. 2097: Mr. NIELSON of Utah, Mr. HANSEN of Idaho, Mr. WORTLEY, Mr. BONIOR of Michigan, Mr. FISH, Mr. LEVIN of Michigan, Mr. REID, Mr. MCCURDY, Mr. RANGEL, Mr. BETHUNE, Mr. CONABLE, Mr. HARTNETT, Mr. GILMAN, Mr. BILIRAKIS, Mr. PORTER, Mr. PACKARD, and Mr. BROYHILL.

H.R. 2145: Mr. BRITT and Mr. SWIFT.

H.R. 2169: Mrs. COLLINS and Mrs. JOHNSON.

H.R. 2176: Mr. JEFFORDS.

H.R. 2191: Mrs. COLLINS, Mr. DEWINE, Mr. GEJDENSON, and Mr. RAHALL.

H.R. 2351: Mr. STARK and Mr. ROYBAL.

H.R. 2382: Mr. LUKEN, Mr. SISISKY, Mr. ST GERMAIN, Mr. SILJANDER, Mr. NOWAK, Mr. OLIN, Mr. FORSYTHE, and Mr. WORTLEY.

H.R. 2440: Mr. CORCORAN, Mr. EDWARDS of Oklahoma, Mr. GOODLING, and Mr. PRITCHARD.

H.R. 2702: Mr. BEDELL and Mr. MCKINNEY.

H.R. 2711: Mr. BOUCHER, Mr. CAMPBELL, Mr. GILMAN, Mr. PASHAYAN, Mr. STAGGERS, and Mr. WOLPE.

H.R. 2715: Mr. FUQUA, Mr. LEVIN of Michigan, and Mr. VANDERGRIFF.

H.R. 2817: Mr. HARRISON, Mr. SHUSTER, and Mr. MURPHY.

H.R. 2837: Mr. RICHARDSON, Mr. BADHAM, and Mr. DASCHLE.

H.R. 2887: Mr. STUMP.

H.R. 3031: Mr. KRAMER and Mr. MCNULTY.

H.R. 3072: Mr. MITCHELL.

H. Res. 190: Mr. COUGHLIN.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2780

By Mr. LEVITAS:

—Page 2, beginning on line 18, strike out all of section 4 through line 22 and redesignate the succeeding sections (and references thereto) accordingly.

H.R. 2867

By Mr. EDGAR:

—On page 59, after line 4 add the following new section:

NATIONAL GROUND WATER COMMISSION

SEC. 26. (a) ESTABLISHMENT.—There is established a commission to be known as the National Ground Water Commission (hereinafter in this Act referred to as the "Commission").

(b) DUTIES OF COMMISSION.—The duties of the Commission are to:

(1) Assess generally the amount, location, and quality of the Nation's ground water resources.

(2) Identify generally the sources, extent, and types of ground water contamination.

(3) Assess the scope and nature of the relationship between ground water contamination and ground water withdrawal and develop projections of available, usable ground water in future years on a nationwide basis.

(4) Assess the relationship between surface water pollution and ground water pollution.

(5) Assess the need for a policy to protect ground water from degradation caused by contamination.

(6) Assess generally the extent of overdrafting of ground water resources, and the adequacy of existing mechanisms for preventing such overdrafting.

(7) Assess generally the engineering and technological capability to recharge aquifers.

(8) Assess the adequacy of the present understanding of ground water recharge zones and sole source aquifers and assess the adequacy of knowledge regarding the interrelationship of designated aquifers and recharge zones.

(9) Assess the role of land-use patterns as these relate to protecting ground water from contamination.

(10) Assess methods for remedial abatement of ground water contamination as well as the costs and benefits of cleaning up polluted ground water and compare cleanup costs to the costs of substitute water supply methods.

(11) Investigate policies and actions taken by foreign governments to protect ground water from contamination.

(12) Assess the use and effectiveness of existing interstate compacts to address ground water protection from contamination.

(13) Analyze existing legal rights and remedies regarding contamination of ground water.

(14) Assess the adequacy of existing standards for ground water quality under State and Federal law.

(15) Assess monitoring methodologies of the States and the Federal Government to achieve the level of protection of the resource as required by State and Federal law.

(16) Assess the relationship between ground water flow systems (and associated recharge areas) and the control of sources of contamination.

(17) Assess the role of underground injection practices as a means of disposing of waste fluids while protecting ground water from contamination.

(18) Assess methods for abatement and containment of ground water contamination and for aquifer restoration including the costs and benefits of alternatives to abatement and containment.

(19) Assess State and Federal ground water law and mechanisms with which to manage the quality and quantity of the ground water resource.

(20) Assess the adequacy of existing ground water research and determine future ground water research needs.

(21) Assess the roles of State, local, and Federal Governments in managing ground water quality and quantity.

(c) MEMBERSHIP.—(1) The Commission shall be composed of seventeen members as follows:

(A) Four appointed by the Speaker of the United States House of Representatives from among the Members of the House of Representatives, two of whom shall be members of the Committee on Public Works and Transportation and two of whom shall be members of the Committee on Energy and Commerce;

(B) Four appointed by the majority leader of the United States Senate from among the Members of the United States Senate;

(C) Eight appointed by the President as follows:

(i) Four from among a list of nominations submitted to the President by the National Governors Association, two of whom shall be representatives of ground water appropriation States and two of whom shall be representatives of ground water riparian States;

(ii) One from among a list of nominations submitted to the President by the National League of Cities;

(iii) One from among a list of nominations submitted to the President by the National Academy of Sciences;

(iv) One from among a list of nominations submitted to the President by groups, organizations, or associations of industries the activities of which may affect ground water; and

(v) One from among a list of nominations submitted to the President from groups, organizations, or associations of citizens which are representative of persons concerned with pollution and environmental issues and which have participated, at the State or Federal level, in studies, administrative proceedings, or litigation (or any combination thereof) relating to ground water; and

(vi) The Director of the Office of Technology Assessment.

A vacancy in the Commission shall be filed in the manner in which the original appointment was made. Appointments may be made under this subsection without regard to section 5311(b) of title 5, United States Code. Not more than two of the four members appointed under subparagraph (A) and not more than two of the four members appointed under subparagraph (B) may be of the same political party. No member appointed under paragraph (C) may be an officer or employee of the Federal Government.

(2) If any member of the Commission who was appointed to the Commission as a Member of the Congress leaves that office, or if any member of the Commission who was appointed from persons who are not officers or employees of any government becomes an officer or employee of a government, he may continue as a member of the Commission for not longer than the ninety-day period beginning on the date he leaves that office or becomes such an officer or employee, as the case may be.

(3) Members shall be appointed for the life of the Commission.

(4)(A) Except as provided in subparagraph (2), members of the Commission shall each be entitled (subject to appropriations provided in advance) to receive the daily equivalent of the maximum annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including travel time) during which they are engaged in the actual performance of duties vested in the Commission. While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Government service are allowed expenses under section 5703 of title 5 of the United States Code.

(5) Members of the Commission who are Members of the Congress shall receive no additional pay, allowances, or benefits by reason of their service on the Commission.

(6) Five members of the Commission shall constitute a quorum but two may hold hearings.

(7) The Chairman of the Commission shall be appointed by the Speaker of the House of Representatives from among members appointed under paragraph (1)(A) of this subsection and the Vice Chairman of the Commission shall be appointed by the majority leader of the Senate from among members appointed under paragraph (2)(B) of this subsection. The Chairman and the Vice Chairman of the Commission shall serve for the life of the Commission unless they cease to be members of the Commission before the termination of the Commission.

(8) The Commission shall meet at the call of the Chairman or a majority of its members.

(d) DIRECTOR AND STAFF OF COMMISSION; EXPERTS AND CONSULTANTS.—(1) The Commission shall have a Director who shall be appointed by the Chairman, without regard to section 5311(b) of title 5, United States Code.

(2) The Chairman may appoint and fix the pay of such additional personnel as the Chairman considers appropriate.

(3) With the approval of the Commission, the Chairman may procure temporary and intermittent services under section 3109(b) of title 5 of the United States Code.

(4) The Commission shall request, and the Chief of Engineers and the Director of the Geological Survey are each authorized to detail, on a reimbursable basis, any of the personnel of their respective agencies to the Commission to assist it in carrying out its duties under this section. Upon request of the Commission, the head of any other Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Commission to assist it in carrying out its duties under this section.

(e) POWERS OF COMMISSION.—(1) The Commission may, for the purpose of carrying out this section, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate.

(2) Any member or agent of the Commission may, if so authorized by the Commission, take any action which the Commission is authorized to take by this section.

(3) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(4) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

(5) The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this section. Upon request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(f) REPORT.—(1) The Commission shall transmit to the President and to each House of the Congress a report not later than October 30, 1985. The report shall contain a detailed statement of the findings and conclusions of the Commission with respect to each item listed in subsection (b), together with its recommendations for such legislation; and administrative actions, as it considers appropriate.

(2) Not later than one year after the enactment of this Act, the Commission shall complete a preliminary study concerning ground water contamination from hazardous and other solid waste and submit to the President and to the Congress a report containing the findings and conclusions of such preliminary study. The study shall be continued thereafter, and final findings and conclusions shall be incorporated as a separate chapter in the report required under paragraph (1). The preliminary study shall include an analysis of the extent of ground water contamination caused by hazardous and other solid waste, the regions and major water supplies most significantly affected by such contamination, and any recommendations of the Commission for preventive or remedial measures to protect human health and the environment from the effects of such contamination.

(g) TERMINATION.—The Commission shall cease to exist on January 1, 1986.

(h) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for the fiscal years 1983 through 1985 not to exceed $7,000,000 to carry out this section.

By Mr. FROST:

—Page 21, line 15, after "as a fuel." insert: "After the date of enactment of this subsection and until standards are promulgated and in effect under paragraph (2) of this subsection, no fuel which contains any hazardous waste identified or listed under section 3001 may be burned in any cement kiln which is located within the boundaries of any incorporated municipality with a population greater than 500,000 (based on the most recent census statistics) unless such kiln fully complies with the regulations (as in effect on the date of the enactment of this subsection) under this subtitle which are applicable to incinerators. Any person who knowingly violates the prohibition contained in the preceding sentence shall be deemed to have violated section 3008(d)(2).".

By Ms. MIKULSKI:

—Page 30, after line 25, insert:

EXPORT OF HAZARDOUS WASTE

SEC. 11. (a) EXPORT.—Subtitle C is amended by adding the following new section at the end thereof:

"EXPORT OF HAZARDOUS WASTE

"SEC. 3004. (a) GENERAL.—Beginning twenty-four months after the date of enactment of the Hazardous Waste Control and Enforcement Act of 1983, no person may export any hazardous waste identified or listed under section 3001 unless—

"(1) such person has provided the notification required in subsection (c) of this section,

"(2) the receiving country has consented to accept such hazardous waste, and

"(3) a copy of the receiving country's written consent is attached to the manifest accompanying each waste shipment.

"(b) REGULATIONS.—Not later than 12 months after the date of enactment of the Hazardous Waste Control Enforcement Act of 1983, the Administrator shall promulgate the regulations necessary to implement this section.

"(c) NOTIFICATION.—Any person who intends to export a hazardous waste identified or listed under section 3001 after the date beginning twelve months after the date of

enactment of the Hazardous Waste Control Enforcement Act of 1983, shall, before such hazardous waste is scheduled to leave the United States, provide notification to the Administrator. Such notification shall contain the following information—

"(1) the name and address of the exporter;

"(2) the types and estimated quantities of hazardous waste to be exported;

"(3) the estimated frequency or rate at which such waste is to be exported, and the period of time over which such waste is to be exported;

"(4) the ports of entry;

"(5) a description of the manner in which such hazardous waste will be transported to and treated, stored, or disposed in the receiving country; and

"(6) the name and address of the ultimate treatment, storage, or disposal facility.

"(d) PROCEDURES FOR REQUESTING CONSENT OF THE RECEIVING COUNTRY.—Within 30 days of the Administrator's receipt of a complete notification under this section, the Secretary of State, acting on behalf of the Administrator, shall—

"(1) forward a copy of the notification to the government of the receiving country;

"(2) advise the government that United States law prohibits the export of hazardous waste unless the receiving country consents to accept the hazardous waste;

"(3) request the government to provide the Secretary with a written consent or objection to the terms of the notification; and

"(4) forward to the receiving country a description of the Federal regulations which would apply to the treatment, storage, and disposal of the hazardous waste in the United States.

"(e) CONVEYANCE OF WRITTEN CONSENT TO EXPORTER.—Within 30 days of receipt by the Secretary of State of the receiving country's written consent or objection (or any subsequent communication withdrawing a prior consent or objection), the Administrator shall forward such a consent, objection, or other communication to the exporter.

"(f) INTERNATIONAL AGREEMENTS.—Where there exists an international agreement between the United States and the receiving country establishing notice and export procedures for the transportation, treatment, storage, and disposal of hazardous wastes, only the requirements of subsection (g) shall apply.

"(g) REPORTS.—After the date of enactment of the Hazardous Waste Control Enforcement Act of 1983, any person who exports any hazardous waste identified or listed under this subtitle shall file with the Administrator no later than March 1 of each year, a report summarizing the types, quantities, frequency, and ultimate destination of all such hazardous waste exported during the previous calendar year.

"(h) OTHER STANDARDS.—Nothing in this section shall preclude the Administrator from establishing other standards for the export of hazardous wastes under section 3002 or section 3003 of this subtitle.".

(b) PENALTIES.—Section 3008(d) is amended by adding the following new paragraph at the end thereof:

"(6) knowingly exports a hazardous waste identified or listed under section 3001 without the consent of the receiving country;".

CONFORMING AMENDMENTS.

Page 39, line 18, insert "or".

H.R. 2957

By Mr. PATMAN:

—Strike title III of H.R. 2957.

By Mr. ST GERMAIN:

—Page 18, after line 13, insert the following:

PROMOTING ECONOMIC GROWTH AND CONDITIONS FOR EXCHANGE RATE STABILITY

SEC. 301. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"PROMOTING ECONOMIC GROWTH AND THE CONDITIONS FOR EXCHANGE RATE STABILITY

"SEC. 46. (a) In order to help assure that the resources provided under section 40 are used to support pro-growth policies which will help establish the economic conditions necessary for greater financial and exchange rate stability, it is the sense of Congress that the Secretary of the Treasury shall instruct the United States Executive Director of the Fund to work for adoption of policies in the Fund, both within the framework of Article IV consultations and with respect to the conditions associated with Fund-supported balance of payments adjustments programs, that—

"(1) promote sustained noninflationary economic growth, monetary stability, and higher levels of productive employment;

"(2) support the evolution of broadly based, nondiscriminatory, low-rate tax systems which will encourage private sector savings and provide incentives for productive employment, investment, and private sector growth;

"(3) encourage the establishment of sound monetary and fiscal policies which limit government preemption of real and financial resources and which are conducive to sustainable economic recovery and growth, full employment, and price and exchange rate stability;

"(4) discourage government regulation and government allocation of real and financial resources;

"(5) encourage international capital flows and investment by providing a predictable economic and legal climate based on sanctity of contracts with, and property rights of, foreign investors;

"(6) ensure that policies adopted by third world countries pursuant to their borrowing from the Fund are fair and equitable to all strate of their economy and society; and

"(7) would allow prices to better reflect underlying market forces.

"(b) In negotiating with third world countries, the United States Executive Director of the Fund shall work through the Fund for policies which assist low- and moderate-income families to maintain and increase their level and standard of living, and which provide for and foster the creation of democratic institutions.

"(c) The Secretary shall also instruct the United States Executive Director of the Fund to propose and work for the adoption of policies by the Fund that would strengthen efforts to promote conditions contributing to greater stability of exchange rates. Among other steps, the United States Executive Director of the Fund shall propose that—

"(1) Fund-approving economic adjustment programs seek to promote greater exchange rate stability by supporting policies which would reduce the need for abrupt or damaging exchange rate changes;

"(2) as part of the Article IV consultation process, the Fund review the efforts of each Fund member to collaborate with the Fund to promote stable exchange rates. If as a result of such review, it is determined by the Fund that a member is not pursuing policies which promote a stable system of exchange rates, the Fund shall recommend and encourage the adoption of policy changes to better promote greater economic, price and exchange rate stability.

"(d) The Secretary of the Treasury, as the United States Governor of the Fund, shall report to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and to the Committee on Banking, Finance and Urban Affairs of the House of Representatives on a semi-annual basis concerning the above directives to the United States Executive Director of the Fund.".

Page 18, strike out line 18 and all that follows through page 19, line 3, and insert in lieu thereof the following:

(A) by striking out "decision of January 5, 1962, and inserting in lieu thereof "decisions of January 5, 1962, and February 24, 1983, as amended in accordance with their terms,"; and

(B) by striking out "not to exceed $2,000,000,000 outstanding at any one time," and inserting in lieu thereof "in an amount not to exceed the equivalent of 4,250,000,000 Special Drawing Rights, limited to such amounts as are appropriated in advance in appropriation Acts, except that prior to activation the Secretary of the Treasury shall certify that supplementary resources are needed to forestall or cope with an impairment of the international monetary system and that the Fund has fully explored other means of funding,";

(2) in section 17(b), by striking out "$2,000,000,000," and inserting in lieu thereof "4,250,000,000 Special Drawing Rights, except that prior to activation the Secretary of the Treasury shall certify that supplementary resources are needed to forestall or cope with an impairment of the international monetary system and that the Fund has fully explored other means of funding,";

Page 19, line 16, insert "(a)" after "Sec. 40.".

Page 19, after line 20, insert the following:

"(b) The Secretary of the Treasury shall consult with the Chairman and the Banking Minority Member of—

"(1) the Committee on Banking, Finance and Urban Affairs and the Committee on Appropriations of the House of Representatives, and any appropriate subcommittee of each such committee; and

"(2) the Committee on Foreign Relations, the Committee on Appropriations, and the Committee on Banking, Housing and Urban Affairs of the Senate, and any appropriate subcommittee of each such committee, for purposes of discussing the position of the executive branch and the views of the Congress with respect to any international negotiations being held to consider any future quota increase for the International Monetary Fund which may involve an increased contribution, subscription, or loan by the United States. Such consultation shall be made (A) not later than 30 days before the initiation of such international negotiations, (B) during the period in which such negotiations are being held, in a frequent and timely manner, and (C) before a session of such negotiations is held at which the United States representatives may agree to such quota increase."

Page 25, strike out line 20 and all that follows through page 27, line 5, and insert in lieu thereof the following:

SUSTAINING ECONOMIC GROWTH

"SEC. 307. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SUSTAINING ECONOMIC GROWTH

"SEC. 47. (a)(1) The President shall instruct the Secretary of the Treasury, the Secretary of State, and other appropriate Federal officials, including the Chairman of the Board of Governors of the Federal Reserve System, to use all appropriate means to encourage countries to formulate economic adjustment programs to deal with their balance of payment difficulties and external debt owed to private banks.

"(2) Such economic adjustment programs should be designed to safeguard, to the maximum extent feasible, international economic growth, world trade, employment, and the long-term solvency of banks, and to minimize the likelihood of civil disturbances in countries needing economic adjustment programs.

"(b) To ensure the effectiveness of economic adjustment programs supported by Fund resources—

"(1) the United States Executive Director of the Fund shall recommend and shall work for changes in Fund guidelines, policies, and decisions which would—

"(A) convert short-term bank debt which was made at high interest rates into long-term debt at lower rates of interest;

"(B) assure that the annual external debt service, which shall include principal, interest, points, fees, and other charges required of the country involved, is a manageable and prudent percentage of the projected annual export earnings of such country; and

"(C) provide that in approving any economic adjustment program the Fund shall take into account the number of countries applying to the Fund for economic adjustment programs and the aggregate effects that such programs will have on international economic growth, world trade, exports and employment of other member countries, and the long-term solvency of banks.

"(2)(A) Except as provided in subparagraph (B), the United States Executive Director of the Fund shall oppose and vote against providing assistance from the Fund for any economic adjustment program for a country in which the annual external debt service exceeds 85 percent of the annual export earnings of such country unless the United States Executive Director of the Fund first determines and provides written documentation to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives that—

"(i) the economic adjustment program converts short-term bank debt which was made at high interest rates into long-term debt at lower rates of interests;

"(ii) the annual external debt service required of the country involved is a manageable and prudent percentage of the projected annual export earnings of such country; and

"(iii) the economic adjustment program will not have an adverse impact on international economic growth, world trade, exports, and employment of other member countries, and the long-term solvency of banks.

"(B) The provisions of subparagraph (A) shall not apply in any case in which the United States Executive Director of the Fund first determines and provides written documentation to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance, and Urban Affairs of the House of Representatives that—

"(i) an emergency exists in a nation that has applied to the fund for assistance that requires an immediate short-term loan to avoid disrupting orderly financial markets;

"(ii) a sudden decrease in export earnings in the country applying to the fund for assistance has increased the ratio of annual external debt service to annual export earnings, to greater than 85 percent for a period projected to be no more than one year; or

"(iii) other extraordinary circumstances exist which warrant waiving the provisions of subparagraph (A).

"(C) The National Advisory Council on International Monetary and Financial Policies shall include in each of its annual reports to the Congress copies of the analyses and any written documentation prepared by the United States Executive Director of the Fund pursuant to paragraphs (2)(A) or (2)(B) of subsection (b) and a statement detailing the actions and progress made in carrying out the requirements of subsections (a) and (b).".

PROMOTING DOMESTIC ECONOMIC GROWTH AND EMPLOYMENT

SEC. 308. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"PROMOTING DOMESTIC ECONOMIC GROWTH AND EMPLOYMENT

"SEC. 48. (a)(1) The cornerstone of a healthy world economy and international trading and financial system is a growing domestic economy in the United States with price stability and low interest rates.

"(2) Sustained noninflationary economic growth in the United States, full employment in United States basic industries, and a robust economy are essential to avoiding the imposition of protectionist barriers that would inhibit the free flow of trade and undermine the economic and financial stability of countries using the Fund.

"(3) Provision of adequate credit at affordable rates of interest to the United States economy by the United States banking system is essential to promoting a growing domestic economy.

"(b) To that end, and especially to provide working capital to promote the expansion of domestic industries, the appropriate Federal banking agencies, as defined in section 402 of the International Lending Supervision Act of 1983, are directed to develop regulations to implement subsections (c) through (f) within 30 days of the date of the enactment of this section.

"(c) This section shall apply to all banking institutions which have foreign loans which are excessive. A banking institution's loans shall be considered excessive if the aggregate of such loans to public and private sector borrowers in a foreign country described in section 404 of such Act exceeded such banking institution's primary capital on June 30, 1983, or on any date thereafter until January 1, 1986.

"(d)(1) Except as provided in subsections (e) and (f), from the date of the enactment of this section until January 1, 1986, no banking institution having excessive loans under subsection (c) shall make any new loans to foreign countries described in section 404 of such Act if such loans shall cause the growth rate of such banking institution's aggregate loans to all such foreign countries to exceed one-half of the growth rate of such banking institution's aggregate loans to all such foreign countries during the period of January 1, 1980, through June 30, 1982.

"(2) Notwithstanding the provisions of this section, banking institutions may honor binding commitments, which were effective before July 30, 1983, to lend in such countries.

"(e)(1) Any banking institution having excessive loans under subsection (c) may exceed the limits set forth in subsection (d) if the annual rate of growth of such banking institution's domestic lending exceeds the limit so specified.

"(2) In such cases, the rate of growth of aggregate loans to all foreign countries described in section 404 of such Act shall not exceed the rate of growth of domestic lending.

"(f) This section shall not be enforced if—

"(1) the Secretary of the Treasury and the Chairman of the Board of Governors of the Federal Reserve System find that such enforcement would adversely affect the domestic economy; or

"(2) the President determines that enforcement of this section would be detrimental to the national interest.".

PROHIBITION OF FRONT END FEES

SEC. 309. (a) In order to avoid excessive debt service burdens on debtor countries, no banking institution shall charge, in connection with the restructuring of an international loan, any fee exceeding the administrative cost of the restructuring unless it amortizes such fee over the effective life of each such loan.

(b) The requirement of subsection (a) shall take effect on the date of the enactment of this section. Each appropriate Federal banking agency shall promulgate such regulations as are necessary to further carry out the provisions of this section.

OPPOSING FUND BAILOUTS OF BANKS

SEC. 310. The Bretton Wood Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"OPPOSING FUND BAILOUTS OF BANKS

"SEC. 49. Except as provided in section 47 (a section entitled 'Sustaining Economic Growth'), the Secretary of the Treasury shall instruct the United States Executive Director of the Fund—

"(1) to oppose and vote against any Fund drawing by a member country where, in his judgment, the Fund resources would be drawn principally for the purpose of repaying loans which have been imprudently made by banking institutions to the member country; and

"(2) to work to insure that the Fund encourages borrowing countries and banking institutions to negotiate, where appropriate, a rescheduling of debt which is consistent with safe and sound banking practices and the country's ability to pay.".

FLOATING EXCHANGE RATES

SEC. 311. The Bretton Woods Agreements Act (22 U.S.C. et seq.) is amended by adding at the end thereof the following:

"FLOATING EXCHANGE RATES

"SEC. 50. (a) The Secretary of the Treasury shall, in consultation with the Secretary of State and the United States Trade Representative, initiate discussions with other countries regarding the economic dislocations which result from structural exchange rate imbalances.

"(b) Not later than 180 days after the date of the enactment of this section, the Secretary of the Treasury shall transmit a report to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Com-

mittee on Banking, Finance and Urban Affairs of the House of Representatives regarding proposals to reform the floating exchange rate system. Such report shall contain such recommendations for legislative or administrative actions as the Secretary of the Treasury considers advisable.".

SURPLUS COMMODITIES REPORT

SEC. 312. (a) Section 4(b) of the Bretton Woods Agreement Act (22 U.S.C. 286b) is amended—

(1) in paragraph (5)—

(A) by inserting "(A)" after "(5)"; and

(B) by adding at the end thereof the following:

"(B) Beginning 180 days after the date of the enactment of this paragraph, and at intervals of 180 days thereafter for the next three years, the Council shall prepare and transmit to the President and to the Congress a report listing all applications which have been filed during the preceding 180 days with the Fund for project assistance which would establish or enhance the capacity of any country to produce a commodity for export, if—

"(i) such commodity is in surplus on world markets or is likely to be in surplus on world markets at the time the resulting productive capacity is expected to become operative; and

"(ii) such project assistance will cause substantial injury to the United States producers of the same, similar, or competing commodity."; and

(2) by adding at the end thereof the following: "(8) The general policy objectives for the guidance of the United States Executive Director of the Fund shall take into account the effect that country adjustment programs have upon individual industry sectors and international commodity markets—

"(A) to minimize projected adverse impacts; and

"(B) to avoid, wherever possible, government subsidization of production and exports of international commodities without regard to economic conditions in the markets for such commodities.".

HUMAN NEEDS REPORT

SEC. 313. Section 33 of the Bretton Woods Agreement Act (22 U.S.C. 286s) is amended by adding at the end thereof the following:

"(d) Not later than 180 days after the date of the enactment of this subsection, the Secretary of the Treasury shall transmit a report to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance, and Urban Affairs of the House of Representatives specifying the actions which have been taken to carry out the provisions of this section.".

NON-PROLIFERATION OF NUCLEAR WEAPONS

SEC. 314. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"NON-PROLIFERATION OF NUCLEAR WEAPONS

"SEC. 51. The United States Executive Director of the Fund shall consider, if appropriate, in carrying out his duties, whether a recipient country has detonated a nuclear device, whether the country is not a State Party to the Treaty on Non-Proliferation of Nuclear Weapons, and whether the country is not a State Party to the Treaty Banning Nuclear Weapon Tests in the Atmosphere, in Outer Space, and Under Water.".

PROMOTING ECONOMIC GROWTH AND CONDITIONS FOR EXCHANGE RATE STABILITY

SEC. 301. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"PROMOTING ECONOMIC GROWTH AND THE CONDITIONS FOR EXCHANGE RATE STABILITY

"SEC. 46. (a) In order to help assure that the resources provided under section 40 are used to support progrowth policies which will help establish the economic conditions necessary for greater financial and exchange rate stability, it is the sense of Congress that the Secretary of the Treasury shall instruct the United States Executive Director of the Fund to work for adoption of policies in the Fund, both within the framework of Article IV consultations and with respect to the conditions associated with Fund-supported balance of payments adjustments programs, that—

"(1) promote sustained noninflationary economic growth, monetary stability, and higher levels of productive employment;

"(2) support the evolution of broadly based, nondiscriminatory, low-rate tax systems which will encourage private sector savings and provide incentives for productive employment, investment, and private sector growth;

"(3) encourage the establishment of sound monetary and fiscal policies which limit government preemption of real and financial resources and which are conducive to sustainable economic recovery and growth, full employment, and price and exchange rate stability;

"(4) discourage government regulation and government allocation of real and financial resources;

"(5) encourage international capital flows and investment by providing a predictable economic and legal climate based on sanctity of contracts with, and property rights of, foreign investors;

"(6) ensure that policies adopted by third world countries pursuant to their borrowing from the fund are fair and equitable to all strata of their economy and society; and

"(7) would allow prices to better reflect underlying market forces.

"(b) In negotiating with third world countries, the United States Executive Director of the Fund shall work through the Fund for policies which assist low- and moderate-income families to maintain and increase their level and standard of living, and which provide for and foster the creation of democratic institutions.

"(c) The Secretary shall also instruct the United States Executive Director of the Fund to propose and work for the adoption of policies by the Fund that would strengthen efforts to promote conditions contributing to greater stability of exchange rates. Among other steps, the United States Executive Director of the Fund shall propose that—

"(1) Fund-approved economic adjustment programs seek to promote greater exchange rate stability by supporting policies which would reduce the need for abrupt or damaging exchange rate changes;

"(2) as part of the Article IV consultation process, the Fund review the efforts of each Fund member to collaborate with the Fund to promote stable exchange rates. If as a result of such review, it is determined by the Fund that a member is not pursuing policies which promote a stable system of exchange rates, the Fund shall recommend and encourage the adoption of policy changes to better promote greater economic, price and exchange rate stability.

"(d) The Secretary of the Treasury, as the United States Governor of the Fund, shall report to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and to the Committee on Banking, Finance and Urban Affairs of the House of Representatives on a semi-annual basis concerning the above directives to the United States Executive Director of the Fund.".

Page 18, strike out line 18 and all that follows through page 19, line 3, and insert in lieu thereof the following:

(A) by striking out "decision of January 5, 1962, and inserting in lieu thereof "decisions of January 5, 1962, and February 24, 1983, as amended in accordance with their terms,"; and

(B) by striking out "not to exceed $2,000,000,000 outstanding at any one time," and inserting in lieu thereof "in an amount not to exceed the equivalent of 4,250,000,000 Special Drawing Rights, limited to such amounts as are appropriated in advance in appropriation Acts, except that prior to activation the Secretary of the Treasury shall certify that supplementary resources are needed to forestall or cope with an impairment of the international monetary system and that the Fund has fully explored other means of funding,";

(2) in section 17(b), by striking out "$2,000,000,000," and inserting in lieu thereof "4,250,000,000 Special Drawing Rights, except that prior to activation the Secretary of the Treasury shall certify that supplementary resources are needed to forestall or cope with an impairment of the international monetary system and that the Fund has fully explored other means of funding,";

Page 19, line 16, insert "(a)" after "Sec. 40.".

Page 19, after line 20, insert the following:

"(b) The Secretary of the Treasury shall consult with the Chairman and the Ranking Minority Member of—

"(1) the Committee on Banking, Finance and Urban Affairs and the Committee on Appropriations of the House of Representatives, and any appropriate subcommittee of each such committee; and

"(2) the Committee on Foreign Relations, the Committee on Appropriations, and the Committee on Banking, Housing and Urban Affairs of the Senate, and any appropriate subcommittee of each such committee, for purposes of discussing the position of the executive branch and the views of the Congress with respect to any international negotiations being held to consider any future quota increase for the International Monetary Fund which may involve an increased contribution, subscription, or loan by the United States. Such consultation shall be made (A) not later than 30 days before the initiation of such international negotiations, (B) during the period in which such negotiations are being held, in a frequent and timely manner, and (C) before a session of such negotiations is held at which the United States representative may agree to such quota increase.

SUSTAINING ECONOMIC GROWTH

"SEC. 307. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SUSTAINING ECONOMIC GROWTH

"SEC. 47. (a)(1) The President shall instruct the Secretary of the Treasury, the Secretary of State, and other appropriate

Federal officials, including the Chairman of the Board of Governors of the Federal Reserve System, to use all appropriate means to encourage countries to formulate economic adjustment programs to deal with their balance of payment difficulties and external debt owed to private banks.

"(2) Such economic adjustment programs should be designed to safeguard, to the maximum extent feasible, international economic growth, world trade, employment, and the long-term solvency of banks, and to minimize the likelihood of civil disturbances in countries needing economic adjustment programs.

"(b) To ensure the effectiveness of economic adjustment programs supported by Fund resources—

"(1) the United States Executive Director of the Fund shall recommend and shall work for changes in Fund guidelines, policies, and decisions which would—

"(A) convert short-term bank debt which was made at high interest rates into long-term debt at lower rates of interest;

"(B) assure that the annual external debt service, which shall include principal, interest, points fees, and other charges required of the country involved, is a manageable and prudent percentage of the projected annual export earnings of such country; and

"(C) provide that in approving any economic adjustment program the Fund shall take into account the number of countries applying to the Fund for economic adjustment programs and the aggregate effects that such programs will have on international economic growth, world trade, exports and employment of other member countries, and the long-term solvency of banks.

"(2)(A) Except as provided in subparagraph (B), the United States Executive Director of the Fund shall oppose and vote against providing assistance from the Fund for any economic adjustment program for a country in which the annual external debt service exceeds 85 percent of the annual export earnings of such country unless the United States Executive Director of the Fund first determines and provides written documentation to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives—

"(i) the economic adjustment program converts short-term bank debt which was made at high interest rates into long-term debt at low rates of interest;

"(ii) the annual external debt service required of the country involved is a manageable and prudent percentage of the projected annual export earnings of such country; and

"(iii) the economic adjustment program will not have an adverse impact on international economic growth, world trade, exports, and employment of other member countries, and the long-term solvency of banks.

"(B) The provisions of subparagraph (A) shall not apply in any case in which the United States Executive Director of the Fund first determines and provides written documentation to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance, and Urban Affairs of the House of Representatives that—

"(i) an emergency exists in a nation that has applied to the Fund for assistance that requires an immediate short-term loan to avoid disrupting orderly financial markets;

"(ii) a sudden decrease in export earnings in the country applying to the Fund for assistance has increased the ratio of annual external debt service to annual export earnings, to greater than 85 percent for a period projected to be no more than one year; or

"(iii) other extraordinary circumstances exist which warrant waiving the provisions of subparagraph (A).

"(c) The National Advisory Council on International Monetary and Financial Policies shall include in each of its annual reports to the Congress copies of the analyses and any written documentation prepared by the United States Executive Director of the Fund pursuant to paragraphs (2)(A) or (2)(B) of subsection (b) and a statement detailing the actions and progress made in carrying out the requirements of subsections (a) and (b).".

PROMOTING DOMESTIC ECONOMIC GROWTH AND EMPLOYMENT

SEC. 308. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

EXTENSIONS OF REMARKS

THE ECONOMIC RECOVERY: FACT OR FACADE

HON. NICHOLAS MAVROULES
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. MAVROULES. Mr. Speaker, judging from the deluge of press releases of the past 2 months, the administration would have us believe that our economy is undergoing the greatest surge of prosperity of the present century. While it is true that some economic signals have turned for the better, the optimistic forecasts we hear from the administration do not tell the whole story. When taken at a second glance, the simple facts about the economic recovery hold much more behind their rosy surface.

To start with, the recovery must be taken in its proper perspective. In January 1981, Reaganomics plunged the economy into the most severe crisis since the Great Depression. Since then, our Nation has struggled to regain the billions of dollars of output lost as a result of these disastrous policies. Moreover, the pace of the recovery has been slow from a historical context. Martin Feldstein himself has confessed that this year's growth in GNP has been 33 percent below the average of the last seven recoveries. Considering the poor performance of other factors such as unemployment, budget deficits, and business failures during 1981–82, expectations about the recovery are doubtful at best.

However the validity of the so-called recovery lies not so much in where we are coming from as in where we are heading. The true implications of the Reagan economic policies can best be shown through careful analysis of some of our Nation's vital economic signs. As I will prove, these signs show virtually no promise for a strong, sustained recovery.

Certainly the root of the problem lies in the basic Reagan economic program. In his budget for fiscal year 1984, for instance, the President clearly made known his priorities. Defense expenditures would grow by 14 percent while a number of programs would be cut drastically: education by 8 percent, job training funds by 18 percent, environmental expenditures by 21 percent, and medicaid by 3 percent. The amount of low-income housing units being built would be reduced by more than half and rents would be raised for 3.5 million low-income families and elderly. In addition, localities would be affected by the scheduled 46 percent reduction of block grants for community development by 1986. Granted, Congress must tighten its financial belt, but such a lopsided distribution of cuts places an unfair and unwarranted burden on certain members of society.

The question of equity arises in the distribution of benefits as well. The President's 3-year tax cut serves as a perfect example. In the midst of the Kemp-Roth tax debate of 1981, OMB Director David Stockman admitted that "the Kemp-Roth was always a Trojan horse to bring down the top rate." As many economic experts could foresee, Stockman was right. The tax cut, though justified by the trickle down theory, was in reality a deceptive Republic ploy designed to conceal benefits to the rich. As evidence of this, the Joint Congressional Committee on Taxation has determined that the wealthiest 5 percent of the taxpayers will derive 35 percent of the plan's benefits over the next 3 years. Put another way, those with income below $10,000 will lose more than $20 billion while those with incomes over $80,000 will save $64 billion. Can such an uneven tax cut be deemed fair to all citizens? Must the middle and lower classes be forced to accept the worst in both services and tax benefits?

The President's combination of large tax cuts, uncontrollable defense spending, and cuts in domestic services have created an even greater economic monster: the budget deficit. In 1981, President Reagan stated:

> This administration is committed to a balanced budget, and we will fight to the last blow to achieve it . . . we will not sit on our hands and watch helplessly as the deficit swells and swells.

Evidently, the President could not have been serious about his commitment.

Currently, budget deficits of at least $200 billion are projected through 1985. Taken cumulatively, this means that the national debt during the Reagan administration approaches the $1 trillion mark, an amount greater than the total debt incurred during the first 200 years of the Republic. And this from a President who even now says he supports a constitutional amendment for a balanced budget.

Virtually every economist acknowledges the relationship between huge budget deficits and high, long-term interest rates which stand in the way of recovery. Everyone except Mr. Reagan, that is. He has sidestepped the issue whenever possible and, when confronted, often defends himself by noting that interest rates have declined approximately 8 percentage points since the start of his Presidential tenure. However, Americans should realize that this sudden drop was attributable to a sudden growth in the money supply and not at all due to the administration's economic policies.

No one can be fooled about the damaging effects of high rates of interest on the economy. Federal Reserve Board Chairman Paul Volcker has stressed that extensive Treasury borrowing could take away about three-fourths of all net private saving. The President's chief economic adviser Martin Feldstein has even warned that:

> The primary cause of the high real interest rates is the very large budget deficits that will hang as a cloud over the economy for the entire decade of the 1980's.

These high interest rates cripple any kind of recovery by discouraging mortgage buying, business investment, and consumer credit. In these ways, perhaps Mr. Reagan was correct in predicting that the effects of his program would trickle down to middle- and lower-class society.

Then there are the devastating effects of Reaganomics on business. Bankruptcies are the highest since the 1930's. Most specifically, small business firms, the backbone of our economy, were beset with a 38-percent bankruptcy rate for 1981–82, and small business failures increased 49 percent during that same period. Moreover, high interest rates pulled down business investment in 1982 by 5 percent and decreases of the same magnitude are expected in 1983.

Another well-kept secret of the President is the unevenness of the recovery. The many industries that have shown no improvement include steel, construction machinery, coal mining, oil and gas drilling, commercial aircraft, insurance, and industrial construction. In addition, bank failures have tripled. But hard times are not only limited to business and banking, they have also come to agriculture. Farm foreclosures are running at two to three times the normal rate and rising. Farm equipment manufacturers are on the ropes. Furthermore, we must bear in mind that the visible industries are not the only ones affected by the Reagan policies. Suppliers and distributors of these crucial industries are hit just as hard. With so many lagging parts of the business sector, to call what has happened in the last 2

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

months a recovery is hardly appropriate.

Let us look further at the other side of the coin: the consumers who serve and buy from business. According to the administration's economic plan, unemployment will remain at or above the 8-percent level until 1986. Considering a normal increase in the labor force, this means that there will be 3 million more jobless workers in 1986 as there were when President Reagan took office. This is a far cry from the 13 million new jobs the President promised to create back in 1981.

None of us can underestimate the psychological indignity and financial hardship that unemployment causes many Americans. All around us, in every walk of life, Americans struggle to make ends meet. Despite all of its talk about inflation, the administration has failed to mention that wages have decreased just as much as prices. The net result has been that the purchasing power of the average American has experienced virtually no gain since 1981. According to the Commerce Department, individual purchasing power has increased by 0.4 percent yearly, a rate of increase slower than the rate under every other President for the past 30 years. It comes as no surprise then that the average American's standard of living has actually decreased since President Reagan took office. Again, can this be seen as an economic recovery?

I have thus far discussed the major domestic effects of the Reagan policies. Lastly, I would like to say a word about the implications of these policies on foreign nations and on the present worldwide recession. At the recent Williamsburg summit, foreign leaders stressed that the President's economic pursuits greatly endanger worldwide recovery. A major concern is the present U.S. trade deficit which reached a record high of $42 billion in 1982 and is expected to reach an even greater $75 billion in 1983. The deficit, a result of the strength of the dollar abroad caused by high interest rates, could abort a world recovery in several ways. First, with a persistence of the deficit, the liberal trade system, important for both the economy and friendly relations, could be in danger of reform. Second, with its high unemployment and interest rates, the United States is forced to finance the deficit by drawing off investment funds from abroad. Lastly, the strength of the dollar hurts U.S. exports abroad; this will eventually affect the over 20 percent of industrial output destined for export use.

The trade deficit is not the only way in which U.S. policies influence the world economy. The international debt is another issue of grave concern. Again, high interest rates and the drawing off of capital impede the ability of underdeveloped nations to service their debts. We must change our policies at home now in order to prevent possible defaults by countries such as Brazil, Mexico, or any of our Latin American neighbors.

In conclusion, the failure of the President's economic policies can be demonstrated from a number of standpoints, both foreign and domestic. To put it simply, the economy just cannot survive if it remains headed in its present direction. Through the pursuit of controlled defense spending, greater sources of revenue, responsible increases in social programs, and through a serious commitment to balance the Federal budget, the economy can be restored. Without the adoption of these measures, there is a long way to go before a recovery is in sight.●

SPENDING CUTS A MYTH

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. BEREUTER. Mr. Speaker, I wish to bring to the attention of my colleagues an excerpt from a recent editorial that appeared in the Beatrice Daily Sun. The subject of the editorial is spending cuts and some of the myths that have been reported about what has and has not been done in Congress. The editor makes some very good points that deserve attention by my colleagues.

I commend a portion of the editorial to the CONGRESSIONAL RECORD.

[From the Beatrice Daily Sun, July 20, 1983]

SPENDING CUTS A MYTH

Those bleeding heart liberals who claim the Reagan Administration has sacrificed social programs in favor of a massive defense buildup are wrong again.

The facts show otherwise. Domestic spending this year is $149.5 billion higher than it was during the last year of the Carter Administration.

Yes, defense spending has increased, too—by $78.9 billion since the last year of the Carter term. But let the record also show that President Carter's last budget message projected a defense budget of $210.4 billion for 1983; we're actually spending $214.8 billion—a modest increase compared to that in domestic programs.

Without question our federal deficit is unacceptably high, but it's certainly not because people aren't paying enough taxes; rather because Congress is not willing to control spending.●

NERVE GAS

HON. ED BETHUNE

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. BETHUNE. Mr. Speaker, I believe all Members will find the enclosed article which appeared in the New York Times, July 28, 1983, to be a clear statement of the reasons why we should not produce nerve gas. Speaking for myself, I simply do not believe the minute questionable benefit to be gained from producing unneeded artillery shells and suspect aerial bombs is worth the loss of high ground we now hold in world opinion. Why the administration refuses to capitalize on the stark contrast between our policy and practice and that of the Soviets can only be attributed to an intractable mindset that world opinion has little or no value in arms control.

The article follows:

[From the New York Times, July 28, 1983]

NERVE GAS: A CHANCE TO BOLSTER CREDIBILITY

(By David Pryor and Ed Bethune)

WASHINGTON.—The recent vote in the Senate providing $130 million for the production of nerve gas raises a fundamental question concerning the larger issue of arms control: Does the United States mean what it says? Our credibility is already suspect on the issue of nuclear weapons. We are now running the same risk on the issue of chemical weapons. At the very least we are sending out mixed signals.

Many people think the United States is not serious about arms control. Almost every proposal we have made to reduce or eliminate nuclear weapons has been met with suspicion at the outset.

When it comes to nuclear weapons, people tend to see the United States and the Soviet Union as partners in crime because both build and deploy more and more weapons while calling for nuclear treaties. For complicated reasons, this regrettable contradiction may persist. But there is no real reason why the United States should allow itself to be caught in the same bind on chemical weapons.

The United States has not produced chemical weapons since 1969. The Soviet Union, on the other hand, is producing chemical and other toxic weapons and using them as well. The stories out of Sverdlovsk and Afghanistan clearly show that the Soviet Union is in the wrong.

On Feb. 4 in Geneva, Vice President Bush announced a comprehensive initiative on chemical weapons, calling for a treaty banning the development of new chemical weapons and eliminating all existing ones. His proposal generated good will among our allies and third world nations. Yet our negotiating strategy is not playing as well as it should. Why?

The reason is that while our negotiators seek a treaty, the Administration is asking for money to start producing a whole new age of chemical weapons, presumably on the assumption that such weapons are necessary to induce the Soviet Union to bargain. The euphoria surrounding the Vice President's proposal in February has disappeared because the Soviet Union and its allies continue to say we are not serious about our position.

The new "binary" weapons keep two chemical substances separate until the last moment, when they are mixed to create deadly nerve gas. In a recent Government Accounting Office report, scientists said the chemical agents in binaries are "dangerous substances" and that one of them is "extremely toxic as an oral poison." These weapons would replace the "ready mix" unitary weapons we have. The Chemical Corps,

advancing the notion that the new weapons would be safer, wants to replace our existing stock of 155-millimeter unitary artillery shells with the new binaries, and they want to build a new binary aerial bomb called the Bigeye.

We don't need the shells, and the Bigeye is a mechanical nightmare. In fact, this "deep strike" weapon is more likely to blow up on us than on the enemy—which it has done twice in recent testing.

Our chemical weapons stockpile now includes a large supply of 155-millimeter unitary shells, most of them in good shape. The Defense Department had to admit that this supply would be serviceable at least to the end of this decade and perhaps longer. They have an excellent safety record, we have the means to deliver them and they have been dynamically tested, which the binaries have not.

Our point is this: The current stockpile is sufficient to see us through treaty negotiations. The Administration should pull back its request to start producing binary nerve gas weapons. And it should expressly restate the policy begun by President Nixon in 1969 against producing and using chemical weapons. The House of Representatives has taken that position two years in a row.

Furthermore, the Administration should join Congress in speaking proudly of our record and our policy. We should point out that even though the Soviet Union produces and uses chemical weapons, the United States does not. We are a good people, a people of hope, and we want nothing to do with these weapons.

The Committee on Disarmament is meeting in Geneva. It will be in session again in February. Before giving up the high ground from our freeze on nerve gas, we should define a comprehensive political strategy that puts world pressure on the Soviet Union—then see what it will do.

And we can take further constructive action at home. While the Senate has approved money for chemical weapons, the House has defeated the proposal. This leaves the issue up to a conference committee, where the right move can still be made. If the people of the world understand that the United States is serious and that we are trying to do the right thing, they will trust us. And their trust will not only serve us well in chemical weapons discussions, it will carry over into other arms negotiations as well.●

TRIBUTE TO A HERO: MR. DELBERT HALYARD

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. HAWKINS. Mr. Speaker, on October 10, 1980, Mr. Delbert R. Halyard lost his life trying to help another man—a stranger he had never seen before.

Mr. Halyard was killed while preventing the senseless beating of a lone man by six youths in front of a liquor store in Downey, CA. The man Halyard assisted is alive today because of his special heroics.

Mr. Speaker, I am honored to nominate Delbert Halyard as recipient for the Carnegie Hero Fund Award, which would go to benefit his wife and children who are still trying to cope with the tragic reality of his death. All of us can be proud of Mr. Halyard's courageous action. When he first saw the man being brutally assaulted, he said to a bystander, "I can't stand to see this. I've got to go break it up." Mr. Halyard's willingness to place another man's welfare ahead of his own epitomizes the characteristics to which we all should strive to achieve.

There is not a logical way to communicate to Mr. Halyard's sons the reasoning of his untimely death. But they should know that he stood for what is decent and right in our society and that his Good Samaritan act is a source of inspiration to us all.

Mr. Speaker, I submit to my colleagues a poem written in behalf of Delbert Halyard honoring him for his valiant and unselfish bravery:

DELBERT HALYARD THE BRAVE ONE

I have written of great men,
Things courageous they've done,
But none ever gave more,
Than Halyard the brave one.

Who went against six,
To aid a lone stranger,
Without thought for himself,
Or the risk of great danger.

For he just couldn't stand,
Seeing one kicked around,
So he went to his aid,
And was knocked to the ground.

Where they beat, kicked and shot him,
Yes it cost him his life,
He leaves two children,
And his expecting wife.

But the other man was saved,
Who walked away knowing,
That this hero most brave,
He would always be owing.

We owe him in Downey,
As good hearts everywhere,
To care for his family,
As he did when here.

For he set an example,
A great blazing show,
Of most splendid courage,
On which we may grow.

That we all survive,
We must encourage his kind,
Rewarding those who are always,
The back bone of mankind.●

CONGRESSIONAL FAST AND PRAYER VIGIL FOR SOVIET JEWRY SENDS STRONG MESSAGE TO SOVIETS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. PORTER. Mr. Speaker, on July 14, 1983, I was proud to sponsor with my distinguished colleague from New York, Congressman ROBERT MRAZEK, the National Congressional Fast and Prayer Vigil for Soviet Jewry. The day marked the fifth anniversary of the imprisonment of Anatoly Shcharansky. Our observance at the west front of the Capitol was highlighted by speeches by JACK KEMP and JIM WRIGHT, by leaders of the religious community, by Lynn Singer, president of the Union of Council for Soviet Jews, Morris Abram, chairman of the National Conference on Soviet Jewry and especially by Anatoly's wife, Avital, who has worked tirelessly for his release and for the release of all refuseniks and prisoners of conscience in the Soviet Union.

I am particularly proud that over 100 Members of Congress participated in the fast and prayer vigil and helped send to the Soviet authorities the strong message that we in the Congress will continue to fight against violations of basic human rights in the Soviet Union and will bring before the world, wherever possible, the repression, anti-Semitism, and discrimination that characterize Soviet policy and action toward Jews in their country today.

My remarks on July 14, follow:

Today all of us on Capitol Hill join with people from all over the country, people from all over the world in commemoration of an anniversary. But it is an anniversary not of a happy remembrance. It is not a time to celebrate or rejoice.

For unfortunately today marks another milestone in the lengthy record of flagrant human rights violations and the long history of Jewish oppression that has characterized the Soviet Union.

For today marks for one man, Anatoly Shcharansky, the fifth year of his imprisonment simply because of his conviction to stand by his religious beliefs and the principles of human freedom. Today marks a sad moment for his wife, Avital, who has not seen her husband since the day after their wedding, ten years ago. But today provides to all of us who believe in freedom, democracy and human rights the opportunity to show our commitment that the injustices suffered by millions of Soviet Jews be ended, once and for all.

Today we join together by fasting and standing together on the steps of the Capitol, a building that represents freedom of speech, freedom of religion and the many other freedoms guaranteed by our Constitution. We join together in solidarity, hope and prayer for Anatoly Shcharansky and all refuseniks and prisoners of conscience living in the oppressed society of the Soviet Union.

In prayer I turn to the words of one who understood the meaning of both suffering and hope far better than I ever could. I offer to you, to Anatoly and to Avital the words from the diary of Anne Frank, a young Jewish girl forced to hide from Nazi oppression. Anne Frank beautifully expresses her prayer for the suffering she felt and the faith that kept her alive. These are the words of Anne Frank, words we offer to all those living in the Soviet Union:

"That's the difficulty in these times: ideals, dreams and cherished hopes rise within us, only to meet the horrible truth and be shattered. It's really a wonder that I haven't dropped all my ideals, because they seem so absurd and impossible to carry out. Yet I kept them, because in spite of everything, I still believe that people are really good at heart. I simply can't build up my

hopes on a foundation consisting of confusion, misery, and death. I see the world gradually being turned into a wilderness. I hear the ever-approaching thunder, which will destroy us too. I can feel the sufferings of millions and yet, if I look up into the heavens, I think that it will all come right, that this cruelty too will end, and that peace and tranquility will return again. In the meantime, I must uphold my ideals, for perhaps the time will come when I shall be able to carry them out."

These words of hope, of dreams, and of prayer reflect the thoughts of Anatoly himself. At the end of his trial Shcharansky said: "Now when I am farther than ever from my people and my Avital, now, when I face long, hard years of imprisonment, I turn to my people and to my Avital and say: 'Next Year in Jerusalem! Next Year in Jerusalem!' "

Both Anne Frank and Anatoly Shcharansky were persecuted merely for their belief in the Jewish religion. We must confess that we allowed anti-Semitism to darken our world once—we will not allow it to happen again.

Soviet propagandists have engineered a multi-media campaign against the Soviet Jews through anti-Semitic literature and broadcasts. Anti-Semitic propaganda supplements the Soviet government-sanctioned raids on Jewish homes, confiscation of personal property, suppression of Jewish culture and threats of arrest and imprisonment. Last month an official Soviet Anti-Zionist Committee claimed that virtually all those who wanted to leave the Soviet Union had done so. This is an outrageous lie! Over a hundred members of Congress are joining together today in fasting and prayer on behalf of individuals who are denied the right to emigrate. Let's make it clear to Radio Moscow and the Soviet authorities, who don't believe us, that there are over 750,000 Soviet Jews alone who would welcome the chance to escape their repression. There's one simple way for the Soviets to find out who tells the truth. Allow all who want to leave to do so now.

We cannot stand idle and allow the Soviets to use their people as political hostages. We cannot allow the Soviets to continue to violate international human right treaties. We must continue to speak out—forcefully, so that the Kremlin knows we will not give up our fight. For the last four months I have tried to get an appointment with someone at the Soviet Embassy in Washington. Again and again they have set up appointments and cancelled. I had an appointment with the First Secretary of the Embassy for today. Two days ago he cancelled due to a "scheduling conflict". The Soviets can continue to refuse to discuss this issue, but we in the Congress—members of the Congressional Human Rights Caucus and all who believe in human rights—will continue to speak out.

Let us join together in prayer for Anatoly Shcharansky for all refuseniks and for all the prisoners of conscience. Anatoly turned to us five years ago today and said "Next Year in Jerusalem!" This can happen only if, like Anne Frank, we uphold our ideals, fight for the principles of democracy and continue to work for human rights. We turn to you and praise your continued struggle on behalf of those under the hand of oppression. We turn to the Soviets and cry out we will not give up our fight. Next Year in Jerusalem! . . . for Anatoly Shcharansky . . . and for all who wish to be free.●

AMENDMENT TO RCRA ON HAZARDOUS WASTES EXPORTS

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Ms. MIKULSKI. Mr. Speaker, I am offering this amendment today in order to close a major loophole in the Resource Conservation and Recovery Act.

Currently EPA has no authority to prevent the export of hazardous wastes to other countries. My amendment will provide EPA with the authority to prohibit the export of hazardous wastes if the receiving nation does not certify that it is aware of the hazardous nature of the waste, and that it is willing to receive the shipment.

This amendment does not mandate an outright ban on such shipments. I recognize the fact that there are several legitimate reasons for exporting hazardous wastes, such as for scientific testing, reprocessing, and recycling. My amendment is not aimed at these shipments.

The focus of my amendment is those wastes which are exported to avoid the stringent and more expensive requirements which govern the disposal of hazardous wastes in this country.

We must prevent the dumping of hazardous waste in unsuspecting Third World nations and we must make it very clear to other countries that we will not export our problems onto their shores.

There have been several incidences in the past few years where American companies have sought to export wastes in order to dump them in someone else's backyard. This reflects poorly on our country and harms our foreign policy interests.

In Mexico, an American citizen illegally disposed of PCB's and mercury sludge—both extremely hazardous substances—in an abandoned mine without adequate safeguards to the surrounding area.

Last year a Florida company proposed to incinerate large quantities of PCB-contaminated wastes in a Honduran facility after it had been denied an EPA permit for PCB incineration in this country. Once the Honduran Government learned of the hazardous nature of the waste, it refused to permit the activity.

In both of these cases, if the receiving country was notified of the nature of the waste, and certified it was willing to accept it, this amendment would provide no obstacle to the shipment. However, if the receiving country does not want the shipment, EPA would have the authority to stop the shipment.

Both the State Department and EPA agree that the RCRA legislation is the appropriate place to deal with this issue and I have worked with the EPA to create the least administrative burden on that Agency.

Our own country will have safeguards from the ill effects of hazardous waste upon passage of this legislation. We should take an equally firm stand on the transportation of hazardous waste bound for export to other countries. I urge you to support my amendment to insure such a clear message to the rest of the world.●

STAKES ARE HIGH IN CENTRAL AMERICA

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. MARTIN of North Carolina. Mr. Speaker, each of us faces a complex problem in voting on the Boland-Zablocki amendment. Several important issues are involved, and there are different ways of looking at the problem. Because the stakes are high, it is vital that we identify the most fundamental issue and view the matter in the clearest possible light.

The fundamental issue is whether the United States has the political will to help stop the advance of communism in Central America. Other issues are of deep and legitimate concern to many, but, I believe, this one is paramount.

It is true that the underlying causes of the crisis in Central America are poverty and oppression. But it is also true that popular discontent is being exploited by Communist-led forces, aided and abetted by Cuba and the Soviet Union, in order to impose Communist rule. This threatens our national security as well as the interests of the people of Central America. It is the Communists who have turned Central America into an East-West issue. To those who claim there can be no military solution, I say: you are so wrong: If we turn our backs and abandon any responsibility to non-Communist latin countries, there will be a military solution. The Cubans and Soviets and Nicaraguans and Sandinistas will impose a military solution.

Decades of repression by Somoza brought the Sandinistas to power in 1979. The United States did not oppose their takeover and gave considerable aid to the new regime. But the Sandinistas spurned our friendship, repudiated their promises of democracy, and turned to Cuba and Russia for help. As the veil of Communist totalitarianism falls across Nicaragua, the people find they have merely exchanged one oppressor for another.

This would not be our business, but for the Sandinistas' aggression against El Salvador, by providing the major

support for the Communist guerrillas in that country, and by providing their main operations center outside Managua. The majority report of the House Intelligence Committee on H.R. 2760 concedes:

It is not popular support that sustains the insurgents * * * (t)his insurgency depends for its lifeblood—arms, ammunition, financing, logistics and command-and-control facilities—upon outside assistance from Nicaragua and Cuba.

Nicaragua is rapidly becoming a Cuban-Soviet client state. It has welcomed 4,000 to 5,000 Cuban civilian "advisers" and 2,000 military and secret police personnel. It has a full-fledged Department of "State Security"—"KGB" in Russian. The militarization of the country has proceeded to the point that its armed forces exceed the rest of Central America's combined, and there are 50 Soviet military advisers as well.

The Soviet-Cuban-Sandinista effort to take advantage of instability in Central America poses a potentially grave threat. It could lead to an extensive, permanent Soviet presence in the region, leaving us exposed, for the first time, in our own hemisphere. Who among us wants to take responsibility for that?

Following is documentation of the massive Soviet buildup in Cuba and the comparable growth in Cuban forces. In addition, I submit for the RECORD a list of the possible military consequences of an increased Soviet presence in Central America and the Caribbean area.

All members agree that our policy ought to be to foster democracy and freedom in the region. Communist Nicaragua is threatening democratic development throughout the area. Regardless of past policies, U.S. policy today is nurturing the seed of democracy. We are giving solid backing to the elected Governments of Costa Rica and Honduras, and are making slow progress against difficult obstacles in El Salvador. The Caribbean Basin Initiative is the centerpiece of our efforts to address the underlying economic causes of turbulence and revolution.

Another issue that rightly concerns many of us is covert action against a foreign government. Two points should be considered. First, Nicaragua and Cuba are doing exactly that in their attempt to subvert the freely elected Government of El Salvador. Our assistance to those fighting the Sandinistas is legitimate self-defense on behalf of El Salvador. Second, the widening revolt against the Sandinistas is a spontaneous uprising against repression and the betrayal of the revolution that expelled Somoza; it is not a creation of the CIA. It would be derogation of the historic traditions of our country not to aid these courageous people, the vast majority of whom are fighting for the ideals we share.

The fundamental issue stands out for all to see. American's capability to defend its interests also is clear. What is not clear, however, is our will to defend our interests and the cause of freedom in Central America. Some do not believe our country has the moral right to do this. Their success would send an unmistakable message to our foes and allies that the United States will not exert its power, where necessary, to oppose aggression and meet its obligations, even on its own doorstep. The world will become more unstable, the influx of refugees will reach floodtide, and the descent into chaos will accelerate.

A. THE CHARACTERISTICS OF THE SOVIET/CUBAN BUILDUP: MEN, MONEY, MATERIEL

The Soviet Union maintains and reinforces its presence by:

Deploying its long range Bear Bombers to the region on an almost back-to-back basis.

Deploying its naval combatants for joint training exercises with Cuba.

Providing a palace guard of approximately 3,000 men of its Soviet Brigade near Havana and an additional presence of 2,500 military advisors.

Providing Cuba with 8,000 civilian advisors.

In 1982, the Soviets and Cubans had 50 times as many military advisors in Latin America as did the U.S. Last year the Soviets increased their military advisors in Cuba by 500.

The U.S.S.R. has also provided a steady stream of military equipment to Cuba. In 1981 alone, Moscow provided 66,000 metric tons in military assistance valued at $600 million. Deliveries in 1982 exceeded 1981 by 2,000 metric tons and amounted to over $1 billion in military assistance in the last two years.

Cuban armed forces have grown to a size disproportionate for defensive needs:

Cuba posesses an Army of over 225,000; a Navy of 11,000 and air and air defense forces of 16,000 not including hundreds of thousands of paramilitary.

Cubans have well over 200 MIG fighter aircraft.

Castro has about 65,000 Cubans serving overseas, 40,000 military (25,000 troops in Angola, about 12,000 in Ethiopia) and 25,000 civilian technicians.

Cuba has 2.3 percent of its population in the regular armed forces, one of every 20 Cubans participates in some security mission.

Moscow underwrites the activities of its Cuban surrogate at a cost exceeding $4 billion annually (¼ of Cuba's GNP) and supports efforts to collect funds, arms, and supplies from the communist bloc for guerrilla activities in Central America and the Caribbean.

The number of Soviet Bloc academic grants offered annually to Latin American students jumped from 400 in the 1960's to about 7,000 now. In 1979 Moscow admitted to sponsoring 7,000 Cubans for studies in the Soviet Union. Last year 700 Nicaraguans were reported studying there and an additional 300 scholarships were being provided. Scholarships include free room, board, tuition, transportation, medical care and a small stipend.

About 3,000 Latin American students, including 1,600 Nicaraguans are studying in Cuba. Cuba has constructed 17 schools for foreigners each costing about $2 million to build and $600,000 to operate annually.

B. THE THREAT POSED BY SOVIET EXPANSIONISM

Such communist expansion could lead to an extensive and permanent Soviet presence, and an increased Soviet strategic capability in the region which would create significant military consequences for the U.S.

It could place hostile forces and weapons systems within striking distance of targets in the U.S.

It could provide air and naval bases, such as those in Nicaragua and Grenada, for recovery of Soviet aircraft after strategic missions.

It would furnish missile sites for launching attacks against the U.S. with short and intermediate range missiles.

It could provide bases for use in covert operations against the U.S. and our neighbors.

It could provide for pre-positioning of Soviet equipment, supplies and ammunition in our hemisphere.

It could allow the Soviet Pacific and Atlantic fleets to operate near our shores without having to return to the U.S.S.R. for maintenance.

It could threaten our Caribbean Sea Lines of Communication through which a large volume of our goods pass; thus endangering the economic well-being of our nation.

And finally, it could cause the U.S. to divert scarce resources in manpower and materiel from other areas of the world to protect an area previously considered militarily secure.●

END COVERT MILITARY AID TO NICARAGUA

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. EDGAR. Mr. Speaker, I would like to share with my colleagues a very strong statement by Catholic theologian Father Henry Nowan and signed by 68 Catholic orders and organizations, appealing to Congress to end the attacks on Nicaragua by our Government.

I urge my colleagues to give careful consideration to the statement and immediately end covert military aid to Nicaragua.

At this critical moment, in which the rumors and threats of a war with Nicaragua are increasing day by day, we, members of the Catholic Church in the United States, want to repeat loudly and clearly the words of Pope John Paul II, "War should belong to the tragic past." We affirm the U.S. Catholic Bishops' conviction, so strongly stated in their recent Peace Pastoral Letter, that peacemaking is not an optional commitment but a requirement of our faith.

Therefore, in the name of Our Lord Jesus Christ and in the name of His Gospel of peace, we call for an immediate halt to any form of U.S. intervention in Nicaragua. We condemn any intervention in the Nicaraguan struggle for self-determination as unjustifiable, illegal and immoral.

We call upon our government to cease any support of armed attacks upon the govern-

ment and the people of Nicaragua. We call upon the people of the United States to resist thoughts, words, and actions that can lead to war and we promise to call on the members of our organizations, as well as on those with whom we live and work, to join us in our attempt to seek a constructive reconciliation with the Nicaraguan people.

THE EFFECT OF THE SOCIAL SECURITY SYSTEM ON BLACK AMERICANS

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. CLAY. Mr. Speaker, during the last decade preceding the signing into law of Public Law 98-21, the Social Se-

curity Amendments of 1983, a great number of adverse financial reports was discussed pertaining to our Social Security system. These reports created a significant degree of public pessimism regarding the longevity of the social Security System.

Public opinion polls consistently showed that substantial doubts existed as to whether the Social Security system would survive. In addition, the public's view was that even if the system did survive, it was doubtful whether it would provide much of a retirement benefit.

Even after the amendments were signed into law on April 20, 1983, in an attempt to resolve the financing problems. Mr. Speaker, discussions, research, and controversy pertaining to our Social Security system continue.

A Dallas-based think tank recently conducted a Social Security reform study and found that raising the retirement age gradually to age 67 in the next century will adversely affect black workers. While most people recognize that our Social Security system favors the old over the young; few realize that the system also favors some individuals over others within the same age group. According to the attached article, the black population can expect to receive considerably fewer benefits from Social Security.

I commend the following article reported in the Globe-Democrat Newspaper of St. Louis, Mo., on July 15, 1983, for the consideration of my colleagues:

SOCIAL SECURITY REFORM COSTS BLACKS THE MOST, STUDY SAYS

DALLAS (AP)—Raising Social Security's retirement age to 67 in the next century will hurt black workers the most because of their lower life expectancy and will result in a "massive transfer of wealth from blacks to whites" a Dallas-based think tank contends.

"It would appear that Social Security is becoming a system under which black workers pay taxes to support white retirees," John Goodman, president of the National Center for Policy Analysis, said in an interview Wednesday.

The center has issued a report detailing how the recently enacted two-year increase in the retirement age will affect blacks.

"A black male born today has a life expectancy of 64 years," said Goodman.

"Over his working life he will pay more than $60,000 in Social Security taxes. Yet he can expect to die three years before he reaches full retirement age, which at that time will be 67."

In 1979 the Advisory Council on Social Security, a panel of outside experts who studied the system for Congress, concluded that although a disproportionate number of minority workers do not live to retirement age, "they are more likely to have surviving spouses and children who collect Social Security survivor benefits."

The council said that in 1977 blacks, who constitute about 12 percent of the U.S. population, made up 7.8 percent of retired workers, but 10.3 percent of all Social Security beneficiaries. Blacks also were 16.5 percent of disabled workers and 21 percent of the children of retired, dead or disabled workers.

Social Security experts estimate that raising the age to 66 by the year 2009 and to 67 by 2027 amounts to about a 13 percent benefit cut on average for everyone born since 1960. All those born since 1938 will be affected, to some degree.

The think-tank study said the change means a black male age 25 today lost more than 80 percent of his expected benefits. By contrast, a white male the same age lost less than 22 percent of his.

"Exact statistics are not available, but it is probably true that considerably more is being taken from the black population in Social Security taxes than is being paid back to the population in the form of benefits," the study said.

Social Security Administration spokesman James M. Brown in Baltimore said Thursday the agency had no immediate comment on the study.●

DEFLATING THE CLAIMS OF THE AIR-BAG STUDIES

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. HILLIS. Mr. Speaker, the recent ruling of the Supreme Court overturning the administration's decision to forgo a mandatory passive restraint standard for automobiles is only the last in a very long list of events surrounding air bags. The debate has raged within the Department of Transportation, the Congress, and now the Supreme Court for years. No issue is memory has been more debated, more studied, more reviewed without being resolved.

I personally felt that the administrator, Raymond Peck of the National Highway Traffic Safety Administration, was correct in his decision not to implement the passive restraint standard. I think the Supreme Court was mistaken in its interpretation of the law requiring NHTSA to review its passive restraint decision.

The Wall Street Journal on July 21 ran an article written by Sam Kazman entitled "Deflating the Claims of the Air-Bag Studies," which presents a clear argument against the Court's position. Because I feel that the Congress will once again be forced to consider this issue, I am placing the article in the CONGRESSIONAL RECORD at this point. I recommend it to everyone's reading.

[From the Wall Street Journal, July 21, 1983]

DEFLATING THE CLAIMS OF THE AIR-BAG STUDIES

(By Sam Kazman)

The Supreme Court's recent overturning of the Department of Transportation's decision to rescind its requirement of passive restraints in autos has been widely characterized as a judicial defeat for President Reagan's deregulatory effort. However, when nine Supreme Court justices manage to agree unanimously that an agency arbitrarily assessed such a factbound issue, one begins to suspect that the setback was dealt less by the court than by the agency itself.

That suspicion isn't allayed in the least by a review of DOT's handling of the issue, for the agency's course was fundamentally marred by an administrator's failure to challenge his staff's advocacy of a technological fix.

The decision to rescind the passive restraint rule was made by Raymond Peck Jr., head of the National Highway Traffic Safety Administration within DOT. The most crucial aspect of his decision was his acceptance of the assessment that his predecessor, Joan Claybrook, had made concerning air bags—that their effectiveness had been confirmed by the field experience of those air bag-equipped cars that were on the road. Most of these cars had been manufactured by General Motors from 1974-76; while GM had hoped to sell several hundred thousand cars so equipped, it succeeded in selling only 10,000 and subsequently stopped offering the optional device.

BUREAUCRATIC INFATUATION

In fact, there was good reason to doubt the claim that air bags were a proven technology. Had Mr. Peck openly questioned that claim as part of his basis for rescinding the rule, then it is highly unlikely that the Supreme Court would have ruled, as it did, that the agency had illegally failed to consider an air bag-only requirement. Instead, NHTSA blandly asserted that it had "no basis . . . for changing its earlier conclusions" on this issue. There were few ways indeed that NHTSA could have made things harder for itself in court than through this approach. NHTSA's action illustrates how an agency can become so wedded to a notion that even a new administrator, riding a popular mandate for political change, is unable to break the knot and instead ends up being hanged by it.

In the case of air bags, the indications of bureaucratic infatuation are clear—NHTSA has misrepresented the device to the public, and it has concealed adverse data and analysis regarding air-bag performance.

The agency has long known that air bags alone don't offer full occupant protection but must be used together with manually buckled lap belts. For an agency committed to the dream of totally passive protection, however, this is an exceedingly inconvenient fact that must be ignored or glossed over. For example, a 1977 NHTSA brochure, aimed at the general public, describes air bags as "systems that protect automobile occupants from collision injuries automatically, without the need to fasten belts or to take any other action." Pity the person who, believing that, finds himself unbelted in a side, rear, or rollover collision, where air bags offer little or no aid.

NHTSA's attitude doesn't change when one moves from its public relations to its analytical work.

In April 1976, a NHTSA statistician examined the four deaths that were then known to have occurred in air-bag cars and concluded that "the actual number of deaths (in these cars) was at least four times as high as the expected number—a discrepancy that he found to be "statistically significant at the 99% confidence level" and which sugested "that the air bag is totally ineffective in fatality reduction." This wasn't the sort of finding that would be joyously received by an agency enthralled by air bags. Instead, the study, "A Statistical Analysis of

Air Bag Deaths," was concealed for 2½ years until it was forced into the open in 1979 during the Pacific Legal Foundation's suit against the passive-restraint rule.

The agency's most recent examination of the accident data appeared in July 1980, in its "Automobile Occupant Crash Protection—Progress Report No. 3." On the basis of six reported fatalities, that study concludes that the demonstrated effectiveness of air bags is "consistent with earlier estimates made by the Department. . . ." Because this effectiveness was calculated by comparing the known fatalities in air bag cars with the expected fatality experience of a conventional fleet of similar model cars, its value was critically dependent on the accuracy of the air-bag fatality count.

However, at the time NHTSA issued this report it knew not of six but of seven air bag fatalities. That seventh death, resulting from a 1974 accident in Florida, was simply omitted from the agency's analysis because it occurred more than 30 days after the accident and thus exceeded the usual time cutoff for defining a fatality. While this 30-day standard may be acceptable in computing national statistics, its appropriateness is highly questionable when data are as scarce as those on airbag fatalities. One would expect at least a footnote indicating the omission of a fatality; instead one finds total silence.

More importantly, the 1980 report illustrates NHTSA's unfounded assumption that it knows of every fatality that has occurred in an air-bag car. This assumption is crucial because, given the single-digit numbers at issue here, every such fatality that NHTSA doesn't know about (or knows about and ignores) significantly reduces the calculated effectiveness of these devices.

The tenuous nature of this assumption of omniscience should have been evident to the agency from the very pattern of the fatalities described in its report.

Generally, about 38% of all occupant fatalities occur in non-frontal impacts. One would expect to find at least several such accidents among the six fatal collisions reported for the air-bag cars. In fact, however, there wasn't a single such case among them; all six deaths occurred in frontal collisions with full air-bag deployment. This absence of non-frontal accident deaths could hardly be credited to air bags, because those devices are unlikely to deploy in such impacts. It is far more likely that non-frontal accident fatalities were simply being missed by NHTSA's reporting system, because the collision of a non-deployed air-bag car could easily be mistaken as involving only a conventional vehicle.

In effect, much of the fatality reduction that NHTSA was touting was probably due not to air bags but to the inadequacy of the agency's own reporting system.

Strangely enough, NHTSA received strong evidence of this inadequacy in the same month that it issued its Progress Report. In July 1980, the agency learned of a non-deployment fatality in the non-frontal rollover collision of an air-bag car in Washington State. However, lest one think NHTSA's reporting system had suddenly begun to function properly, the accident itself had occurred in September 1977. NHTSA had simply been unaware of it for nearly three years. NHTSA's chief counsel, Frank Berndt, wasn't the least bit apologetic for this delay; in a surprisingly candid letter, he stated that the agency felt "quite fortunate to have discovered the Washington State accident at all, let alone 34 months after its occurrence."

Fortunate indeed! Between this nearly undiscovered accident and the Florida fatality that NHTSA neatly ignored, the 54% effectiveness that NHTSA calculated for air bags is reduced by more than one-quarter; it would take only a few more undiscovered fatalities to shrink that effectiveness figure down to insignificance.

CAMPAIGN FOR AIRBAGS

Misleading advertising, concealed studies, conveniently incomplete data—this sounds like the archetypal accusation that Joan Claybrook would throw at the auto industry. Instead, it characterizes NHTSA's own campaign for air bags. Unlike the market activities of car manufacturers, however, that campaign is restrained by neither competition nor product liability.

This isn't to say that air bags themselves are inherently ineffective. The issue of whether and when they should be reintroduced into the market, however, isn't a question that can be entrusted to NHTSA. Unfortunately, that is exactly where it currently rests.

Coming to office in the wake of th Reagan election, Raymond Peck was ideally situated to question the conventional wisdom that air bags have been proven in the real world. Because he didn't, that bromide has received the imprimatur of the Supreme Court. It is doubtful that the issue will be examined any more critically by the new transportation secretary, Elizabeth Dole, who saw fit to publicly praise air bags one week before the case was argued before the court.

In 1972 NHTSA mandated ignition interlocks, which so enraged the public that Congress soon banned their requirement. In 1978, NHTSA's requirement of complex antilock devices for air-braked buses and trucks was overturned by a federal court when it found that the agency had created "a potentially more hazardous highway situation than existed before . . . ." The cost of these fiascoes was ultimately borne by consumers. From the looks of things, the public is in for an even heftier tab in the future.●

THE DEFECTION OF COMANDANTE MONTENEGRO

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. MARTIN of North Carolina. Mr. Speaker, one of the most remarkable sources of information about the Communist direction and domination of the guerrilla forces in El Salvador has come to us in the person of Arquimedes Canadas, who defected from his military leadership position with the Salvadoran guerrillas, where he was known as Comandante Montenegro. Many of us have visited with this courageous man and been impressed by his narrative. I spread this interview on the RECORD for the benefit of the Congress.

The article follows:

[From the New York Times, July 28, 1983]

CUBA DIRECTS SALVADOR INSURGENCY, FORMER GUERRILLA LIEUTENANT SAYS

(By Bernard Weinraub)

WASHINGTON, July 27.—A former Salvadoran guerrilla who played a key role in anti-Government raids in San Salvador has told United States officials that Cuba has "directed the activities" of the insurgency since 1980 and that the guerrilla leadership is now operating from bases in Nicaragua.

The former rebel, Arquimedes Canadas, also known as Comandante Alejandro Montenegro, said in an interview here that before 1980 the guerrilla movement was largely "nationalistic," made up of a multitude of political and armed groups. But he said it gradually moved under Havana's influence to the point that Cuban military aides specifically advised Salvadoran guerrillas on tactics to cripple Government forces.

Mr. Canadas, who has been sentenced to death by guerrilla forces and is under United States Government protection here, said he and four other leaders of the People's Revolutionary Army met four Cuban military officials, three men and a woman, in Havana and Managua in July and October 1981. At that point Mr. Canadas, the 28-year-old son of a civil servant, was an underground leader in the "central front," which includes San Salvador, the capital.

"As far as the central front was concerned," Mr. Canadas said, "they said the principal activity should be the sabotage of electric power and telephone lines to prevent the national army from using the telephone as a principal means of communication and force them to use only radio."

REPORT HAS "CHECKED OUT"

Two State Department officials said Mr. Canadas's background and the details of his report had been checked in recent months by the State Department and the Central Intelligence Agency. "His bona fides have been established," an official said. "We have checked what he's said with other sources and it's checked out."

The official said there was special concern in validating the report, given the embarrassment last March when a Nicaraguan publicly recanted statements given to the State Department and the C.I.A. about Nicaraguan and Cuban involvement in El Salvador.

Mr. Canadas was seized last Aug. 22 by Honduran security forces at a cafe in Tegucigalpa while on his way to a meeting of Salvadoran rebel leaders in Managua. Since then he has told his story to United States officials, ranging from a teen-ager who abhorred what he called the Salvadoran Government's "military repression" to an underground leader who directed one of the guerrilla movement's major propaganda triumphs, the destruction of seven American-made helicopters and eight planes at the Ilopango Air Base near San Salvador in January 1982.

"The seven soldiers that carried out the operation were trained for six months in Havana," Mr. Canadas said. "In October, when I was in Managua, Villalobas had put me in charge of the mission." Joaquin Villalobas leads the People's Revolutionary Army.

OPPOSED CUBAN INVOLVEMENT

Although several other guerrilla leaders have been seized and accepted amnesty—and quietly fled to other Latin American countries after privately yielding intelli-

gence information—Mr. Canadas said he had decided to speak publicly for several reasons.

At the time he drifted into the underground in 1974, after 30 people died when the military opened fire on a peaceful demonstration by students, anti-Government activity was "nationalistic," he said.

"We wanted an end to oppression in our homeland," Mr. Canadas said. "We did not want Communists and Cubans."

Even before his arrest, he said, he had made known his dissatisfaction "that the process was being transformed and manipulated by other interests, the Cubans and Nicaraguans."

"At the moment," he continued, "we should fight for peaceful political alternatives so that the bloodshed will be stopped. I want to take that message and direct it to my ex-companions."

The Salvadoran spoke in Spanish in the interview, held at the institute on Religion and Democracy, a foundation and church-supported group.

"PEOPLE CLOSED THEIR DOORS"

Mr. Canadas said he grew aware of Cuba's involvement in mid-1980 when the Farabundo Marti National Liberation Front was set up as the umbrella organization for Salvador's guerrilla groups, inlcuding the People's Revolutionary Army. Overseeing the front was a supreme executive body, the Unified Revolutionary Directorate, or D.R.U., that was formed, he said, at a secret meeting in Havana.

"From the political and military point of view, all the decisions that the D.R.U. took—from the strategic sense, from the military sense—were done in coordination with the Cubans," he said.

For example, in November 1980, when guerrilla leaders met in Havana, "the military plan for the final offensive in January '81 was authorized by the Cubans," he said.

That offensive, in which guerrilla forces attacked key points in hopes of a general uprising, fizzled. "There was no popular backing for an insurrection," Mr. Canadas said, adding that the umbrella guerrilla group had "never agreed on a common strategy; there were ideological differences."

He said he was in Soyapango, just east of San Salvador, on Jan. 10 and "the people closed their doors on us."

According to Mr. Canadas, the guerrillas made a crucial mistake in March 1980 when the highly popular Archbishop Oscar Arnulfo Romero, who had advocated social change, was murdered. "There could have been the insurreciton then and there," he said. "The people were waiting for the call." But "the Communists in the movement said wait," he said, adding, "It was a major political error."

By June 1980, Mr. Canadas said, after guerrilla leaders, not including him, went to Havana, "arms began coming in and the commanders after that meeting did not return to Salvador." He said that was when the leaders moved their operations to Nicaragua.

"They never returned," he said, with the exception of Villalobas, who was the last one to leave Salvador in February '81."

"Before that we did not have much arms coming in," he said. "After that the majority of arms was given by Vietnam, American M-16's. The arms came from Vietnam to Havana. Havana to Managua. Managua to Salvador."

Mr. Canadas said that although the guerrillas' umbrella group includes several factions of either nationalist or Communist grouping, it moved into closer alignment with Cuba "because they thought they were going to win militarily; they felt with Cuban aid the success would come more quickly."

Mr. Canadas, a hefty man with an engaging smile, said he now lives in Costa Rica and Panama. He is in Washington for several days and declined to discuss further details about his whereabouts.

On his first visit to Cuba in July 1981, he recalled, he and three other People's Revolutionary Army leaders—Jorge Meléndez of the Morazán area, Juan Ramón Medrano of the "southern front" and Miguel Ramírez of the "western front"—met the four Cubans.

The Cubans "told us what had to be done in the interior of the country," Mr. Canadas said. "They directed the activities. In the case of Morazán, they said the principal activities should be to take the fight from the mountain to the city because we had to get the city population on our side." Morazán Province, northeast of San Salvador on the Honduran border, is a key battleground.

Three months later, in October, he said, the same group of Salvadorans and Cubans met in Managua. "We examined everything that had been done since July," he said. "We analyzed the taking of Villa el Rosario in Marazán. It was a village occupied by the guerrillas. It showed how much we had advanced. As far as the central front, they indicated that the sabotage of the electric power and telephone lines was not enough, not sufficient. We had to make greater efforts in these activities.

Mr. Canadas said he hoped the United States would back away from any military solution in El Salvador and press the Salvadoran Government for "a political agreement among all sectors."

"You have to take into account the guerrilla forces in any settlement," he said.●

SCHOLARSHIP FUND

HON. MICHAEL DeWINE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. DEWINE. Mr. Speaker, last April, two of my constituents, Mr. and Mrs. Robert T. Rice, of Springfield, Ohio, contacted all Members of Congress to explain their efforts to develop a scholarship fund in memory of their son, Bob, who died in action in Vietnam.

Bob was a graduate of Xavier University, in Cincinnati, Ohio where he was a member of ROTC, Pershing rifles and the corps drill team. In recognition of this outstanding leadership and scholastic achievement, Bob was awarded in his freshman year the Presidents' trophy and the superior cadet decoration. Later in his college career he received awards for outstanding proficiency in leadership, drill and the exercise of command. He and his men won many awards in drill meets around the country. In 1969, Bob received his bachelor of science degree and was awarded a regular commission in the U.S. Army Infantry. The regular commission was awarded on the basis of his graduating as a distinguished military student.

Mr. and Mrs. Rice have worked since Bob's death to memorialize his enthusiasm and his desire to help others by building a scholarship fund at Xavier University. It is their hope to raise enough money to provide a 4-year tuition scholarship to be granted to at least one incoming freshman each year. In addition to their own substantial contributions, the Rices have asked almost 11,000 individuals, corporations, funds and foundations for contributions for the scholarship fund. Their appeal is not professional, but is heartfelt and earnest. In fact, their letter asks its readers to make a contribution to the college or university of your choice in honor of all our servicemen.

I believe that Mr. and Mrs. Rice's desire to help their son's university is exemplary. Many parents throughout the United States lost sons in Vietnam conflict. There is no way to replace this loss to thousands of American families. However, the hard work of Mr. and Mrs. Rice to bring positive results in order to help other college students build meaningful lives should be applauded.●

DAIRY TAX SHOULD BE REPEALED

HON. RICK BOUCHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. BOUCHER. Mr. Speaker, I would like to direct my colleagues' attention to legislation introduced by my good friend and colleague, the gentleman from Virginia, (Mr. OLIN). In a dear colleague letter of July 25, 1983, Representative OLIN announced that he is introducing a bill to repeal the second 50-cent assessment on milk production, which is scheduled to take effect on September 1 of this year.

Everyone associated with the dairy industry knows that the assessment program has been a disaster. Originally designed to decrease large dairy surpluses and the cost of the dairy program, the assessment has only encouraged dairy farmers to produce more milk in anticipation of revenue shortfalls arising from the assessment.

In an effort to restore stability to the dairy program, the Livestock, Dairy and Poultry Subcommittee of the House Agriculture Committee has reported H.R. 1875, the Dairy Production Stabilization Act of 1983. This comprehensive legislation, which repeals the Secretary's authority to impose the second 50-cent assessment, holds great promise for a more equitable and responsible dairy program. However, it now appears that H.R. 1875 will not be acted upon before the

summer recess and that unless we adopt Representative OLIN's bill, the second assessment will go into effect on September 1.

Representative OLIN's bill addresses the most serious problem of the current dairy program, and it encompasses one of the major components of H.R. 1875. I urge my colleagues to act upon this bill immediately so that it may become law before the recess.●

DISCRIMINATION IS STILL WITH US

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. HAWKINS. Mr. Speaker, I am pleased that the Washington Post has provided the opportunity to present a civil rights viewpoint shared by millions of our citizens. Unfortunately, for our Nation and our people, discrimination is still with us. Only through a vigorous enforcement of civil rights statutes can we insure that all Americans benefit from an improving economy. I sincerely trust that the administration will join with us in fighting discrimination wherever it exists. I submit my article from yesterday's Post to further this effort.

[From the Washington Post, July 26, 1983]

(By Augustus F. Hawkins)

DISCRIMINATION IS STILL WITH US

Attorney General William French Smith contends ["Yes, We Do Enforce Civil Rights Laws," Outlook, July 10] that criticism of the administration's civil rights enforcement policies and record unfairly focuses on the administration's opposition to busing as a remedy for school segregation and quotas as a remedy for employment discrimination. Unfortunately, once again this administration seems to have missed the mark.

While the administration may not be willing to admit it, discrimination on the basis of race, sex, and national origin exists in virtually all phases of our society. As a result, minorities and women continue to lag well behind white males when it comes to earnings or in access to employment, education or housing opportunities.

The magnitude of the disparity takes on greater significance when we consider just the area of employment and the following facts: the lowest black unemployment rate for the last decade is greater than the highest white unemployment rate for the same period. In the last few months, while the unemployment rate for whites has been on the decline, the unemployment rate for blacks has remained constant at more than double that of whites. Despite the federally enacted programs that prohibit maintaining different pay scales for men and women who perform "equal work," there is ample evidence that women continue to lag well behind white males with respect to pay.

There are strong indications that these persistent disparities are not chance occurrences. Data compiled and analyzed in a recent study by the U.S. Commission on Civil Rights showed that "improvement in the overall health of the economy and in the education or skill level of blacks, Hispanics, and women lead in some cases to the reduction of disparities, but not to their elimination." The commission conservatively concluded: "The suspicion, therefore, remains that discrimination continues to have a major effect on blacks, Hispanics and women in their struggle to find jobs commensurate with their qualifications and experience."

Elaborating on the conclusions of the study, the commission observed further: "We believe this report does an excellent job of exploding the myth that the younger age of black and Hispanic populations, the lack of adequate education and skills, or the changes in economic cycles are the principal cause of minority underemployment and unemployment." The commissioners concluded, as I believe this administration must, that "Instead, we must try to end discrimination directly by enforcing the law."

Enforcing the law, if it is to be effective, may mean relying for a time on remedial relief that imposes temporary group preferences. The alternative would be to provide no relief or meaningless, symbolic relief which serves only to perpetuate the community-wide harmful effects of the unlawful conduct.

The characterization of the concerns of women and minorities as dissatisfaction with the administration's policies on busing and quotas is a poor attempt to hide the truth. Busing and quotas are remedies of last resort, which are used by courts when discrimination has been proven and where other relief would be ineffective. Neither has been defended as being without negative aspects. They have been used, often with reluctance, because on balance the negative results they may generate are far outweighed by the clear and present injury that results from permitting present discrimination and the effects of past discrimination to persist.

It is noteworthy that this administration often tries to equate goals and timetables with quotas, notwithstanding the clear distinction between the two devices. As Ellen Feingold, a member of the board of the American Civil Liberties Union, noted in comments before the House subcommittee on employment opportunities, which I chair:

"Goals and quotas are both numbers, as pineapples and lemons are both fruits. But there the similarities cease. A quota is a ceiling; it is rigid, it is usually small, it has no relationship to equity or to availability, and it is designed to be exclusionary. The fact that it is a number is not its essential quality.

"A goal is just that—it is an objective which is set and toward which one strives. It is rooted in reality—related to an organization's policies and needs, and to the constraints and opportunities of the organization's environment. It is one of the most normal business practices, described by every major treatise on good management since the 1940s as an essential component of proper business management. Goals, objectives, targets, deadlines, milestones—these are standard components of good management planning, and no manager, senior or mid-level, who wishes to do well would dream of doing without these necessary tools for business success."

This administration would have us believe that the battle for equal opportunities for minorities and women has been won. It would have us believe that discrimination, where it does exist, affects only a few individuals and hence should, and can, be fought on a case-by-case basis. It would also have us believe it has been doing everything possible to end discrimination and make the dream of equal opportunity for all Americans a reality.

When it comes to equal opportunities and civil rights for women and minorities, the attorney general seems to be satisfied with carrying out the letter, but not the spirit of the law, and with resting the administration's civil rights record on the number of cases it has initiated. However, after decades of struggling, we know the error of elevating form over substance. And, unlike this administration, we know that the significant variables in the quest for civil rights and equal opportunity are the results achieved, and not merely efforts allegedly expended.

To assess the success of the civil rights struggle, there are no substitutes for objectively measurable factors such as the number of women and minorities in professional schools, the percentage of minorities and women in a given industry or the number and type of loans a lender is willing to make to minorities and women.

The administration's opposition to serious affirmative action measures justifies the accusation, which the attorney general now seeks to rebut, that the Department of Justice and, indeed, the entire administration, lack any real commitment to enforcing this nation's civil rights laws or ensuring equal opportunities for all its citizens.

Paraphrasing Lyndon Johnson: you do not wipe away the scars of centuries by saying, "Now you are free to go where you want, and do as you desire, and choose the leaders you please." You do not take a person who, for years, has been hobbled by chains and liberate him, bring him to the starting line of a race and then say, "You are free to compete with all the others," and still justly believe that you have been completely fair. Thus, it is not enough in 1983 for the administration to say that it is going to treat everyone the same and expect the goal of civil rights for all Americans to be achieved.●

DIOXIN/CANCER

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. DASCHLE. Mr. Speaker, I am inserting for the benefit of my colleagues an article which appeared in the July 28, Washington Post, which provides further evidence that the chemical contaminant in agent orange, dioxin, is carcinogenic in humans. Of special interest is the fact that some of the Monsanto workers died of soft tissue cancer fully 30 years after initial exposure.

Two independent studies conducted in Sweden confirm the NIOSH findings as does the following chart I am inserting which reveals a 771-percent increase in soft tissue sarcomas over the past 20 years among white women in Midland, Mich., not coincidentally the location of a Dow Chemical Co. plant where agent orange and other

dioxin contaminated herbicides were produced.

Following is the Washington Post story and the chart from the National Cancer Institute/Environmental Protection Agency Interagency Agreement on Environmental Carcinogenesis:

[From the Washington Post, July 28, 1983]

EVIDENCE CALLED STRONG—DIOXIN TIED TO CHEMICAL WORKERS' CANCER

(By Victor Cohn and Felicity Barringer)

A rare form of Cancer contracted by seven herbicide manufacturing workers "strongly suggests" that dioxin can cause cancer in humans, according to the chief of surveillance for the National Institute for Occupational Safety and Health (NIOSH).

If diagnoses by the victims' doctors are confirmed by the Armed Forces Institute of Pathology, the cases will become evidence that the controversial chemical—highly carcinogenic in animals—can cause cancer in humans.

The seven rare cancers, called soft tissue sarcomas because they attack muscle, fat, nerves or connective fibers, were discovered in studies of between 3,000 and 4,000 workers exposed to dioxin. Soft tissue sarcomas normally appears once in 50,000 persons in the general population, suggesting that the incidence in the chemical workers may be related to dioxin exposure.

Dioxin, an unwanted contaminant of the manufacture of herbicides and related chemicals is one of the substances most toxic to animals.

Dioxin was contained in an oil compound that was sprayed on roads to keep down dust in dozens of Missouri communities, and has been recently discovered in other sites across the country. The Environmental Protection Agency evacuated and bought the entire town of Times Beach Mo., after dioxin washed through the community during a flood this spring.

Chemical companies' officials, however, have said that there is no proof that dioxin causes anything more serious in humans than a sometimes severe skin disease, called chloracne.

Dr. Philip Landrigan, chief of surveillance, evaluation and field studies for NIOSH, cautioned that samples of the suspected cancers are being studied at the Armed Forces lab for final confirmation of diagnoses.

"To be absolutely certain there's a cause-and-effect relationship" between dioxin exposure and cancer, "we want this confirmation" and "we need to investigate more cases," Landrigan said.

"But to me," he added, "the evidence is very strongly suggestive that occupational exposure to dioxin can cause cancer."

Although workers for other companies were included in the studies, the seven cancers were found in workers at the Dow Chemical Co. and the Monsanto Co.

Dow and Monsanto doctors have said the findings on dioxin's role as a long-time hazard are inconclusive. "If you force me to say is it or is it not, I'd have to say no. I want to see some further research," said Dr. Ralph Cook, director of epidemiology for Dow.

Dr. William Gaffey, who holds the same position at Monsanto, said, "I don't think we can say until we have an opportunity for a longer look."

Four of the workers, all now dead, were involved in the manufacture of 2,4,5-T and related herbicides or their chemical components, compounds commonly contaminated by dioxin, Landrigan said.

The other three, he said, may have been exposed because they worked in plants where such products were made. One of the three is still alive.

Officials at the Environmental Protection Agency's Health Effects Research Laboratory in Cincinnati are examining independently a set of EPA reports saying that this and other evidence show that dioxin "probably" can cause human cancers, an EPA spokesman said.

The Dow and Monsanto cases were disclosed in medical journals two years ago. But their significance was debated at the time, because of varying results in different studies.

It is unclear, too, whether these studies show major hazards from lower-level exposures, the kind that might be more applicable to the general population. Most of the chemical workers were either exposed for several years, had massive shorter-term exposures or both.

The Dow and Monsanto experiences "don't tell us whether or not" low-level exposure is harmful but do dictate caution, Landrigan said.

Chemical industry officials say that industrial exposure to dioxin has caused many cases of chloracne, a skin disorder that can sometimes escalate into serious liver, blood or nerve problems. But both industry and government officials have repeatedly said that there is no proof that dioxin has caused even worse effects, like cancer.

Swedish scientists first reported five years ago that lumberjacks and other laborers exposed to dioxin suffered five to six times the expected number of soft tissue sarcomas.

Dow and Monsanto independently studied four groups of their workers at plants in Midland, Mich., and Nitro, W. Va. None of these studies seemed to show a statistically abnormal number of the rare tumors.

But NIOSH epidemiologists added up these populations and added possible cases reported by other doctors. This produced the seven cases under investigation, two among Dow workers, five among Monsanto's.

Information on the length and intensity of the workers' exposures is incomplete. Dow's Cook said that one of the Dow workers was first exposed to suspect substances in 1964 and died in 1975. The other was first exposed in 1951 and died this year. Both were part of a group inadvertently over-exposed for three to nine months in 1963-64 when a manufacturing change released unexpectedly large quantities of chemicals.

At least two of the seven victims being studied by NIOSH were heavy smokers, Cook said. Scientists know cancer may sometimes be caused by smoking in combination with a chemical exposure.

Gaffey said three of the Monsanto victims worked at the Nitro plant where a 1949 explosion may have spread chemicals. He said two of the three might have been involved in the cleanup after the accident. The third, a clerk, had "minimal opportunity" for exposure, he said.

The final Monsanto cases involved a father and son who worked at an East St. Louis, Ill., plant. Gaffey said that the father was a maintenance worker exposed to unknown amounts of dioxin and that the son, a clerk, was diagnosed as having a soft tissue sarcoma two years after he went to work. The son is dead; the father is alive.

[1] Significantly more deaths than expected.●

ON INTRODUCTION OF HIS FORGOTTEN WIDOWS LEGISLATION

HON. MICHAEL BILIRAKIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. BILIRAKIS. Mr. Speaker, today I am introducing legislation to provide benefits under the Uniformed Services Survivor Benefit Plan to a deserving group of military widows who have thus far been denied the recognition and compensation they have earned through their contributions to their husbands' long service careers and to this Nation as military wives. My bill would provide survivor benefits to widows whose husbands retired and died prior to enactment of the SBP in 1972.

These forgotten widows are receiving no military annuity benefits despite the fact that their husbands served for 20, 30, or even 40 years. These are women who for the most part worked—and I emphasize worked—as traditional wives, homemakers, and mothers throughout their spouses' career. Providing a home for their family and supporting their husband through the separations, frequent moves, and often inadequate pay that charactize military life, these widows usually had no personal work experience and only meager savings, if any, to fall back on when their hus-

bands died. After giving the best years of their lives in service to the military, many of them assumed—incorrectly perhaps but in good faith nevertheless—that they would be cared for as widows. And because there was no requirement when their spouses retired prior to 1972 that they be notified if their husband chose not to participate in a survivor plan, they did not find out until his death that their years of service had earned them nothing.

Unfortunately, these widows were not included in the Survivor Benefit Plan when it was enacted in September 1972. In 1980, the Congress brought some pre-1972 widows under the plan when it extended the SBP to those widows whose husbands died on active duty before 1972 after becoming eligible for retirement. My bill would at long last provide benefits to women whose spouses died in retirement prior to the plan's enactment. These service members had at least 20 years of active duty service but did not have the opportunity to join the Survivor Benefit Plan.

The rationale for failing to include these widows when the SBP was created and for continuing to exclude these elderly women from the plan is based on the assumption that their husbands had an opportunity, at the time of retirement, to choose participation in a survivor plan. The argument goes that since these men did not choose to participate, their widows should not be entitled to any survivor benefits.

This argument requires a closer look, however. Prior to 1972, the only survivor plan available to servicemembers was the Retired Serviceman's Family Protection Plan, commonly referred to as the RSFPP. In truth, this plan had many, many shortcomings.

The cost of participating in the RSFPP was often prohibitive in light of the low military pay at that time and only a very small percentage of military personnel could afford to purchase coverage. In some cases, the premiums were 2½ to 5 times higher than those charged civilians for comparable coverage. Because of flaws such as this, many members earnestly believed they could better provide for their spouse by other means. And it was this obvious inadequacy of the RSFPP that prompted Congress to enact a more solid and substantial survivor plan in 1972.

If we could honestly say that these men had access to a fair and affordable survivor plan and that these women were fully aware of what their circumstances would be in the event their husband died, then the argument that congressional action is inappropriate would hold water. The facts, however, clearly state that this was not the case.

While it is difficult to determine the exact number of these forgotten widows because the military files kept prior to 1972 are inadequate in many ways, the Department of Defense has proposed an estimate that there are fewer than 27,000 of these women today. However, a recent search of computer files at the Defense Manpower Data Center indicated that there could be fewer than 4,000 widows who would receive benefits under my bill. The National Organization of Military Widows estimates from their firsthand contact with forgotten widows that this lower figure may be more accurate.

As a fiscal conservative, I would point out that the cost of providing benefits to these widows would decline in future years because of the advanced age of most of these women. However, I firmly believe that the primary question here is one of equity and not cost. It is terribly unfair that these women are being penalized because of the inadequacies of the system now and at the time of their spouse's retirement. Certainly it is through no fault of their own that they are not eligible for benefits as compensation for their contributions to a long military career.

I also want to make the point that there is precedent for this change. The civil service survivor benefit plan was amended 25 years ago to provide benefits to those widows whose husbands retired prior to the plan's enactment in 1948. Our military widows deserve no less and this legislation will bring the uniformed services SBP up to date in this regard.

My bill will not provide retroactive benefits to these widows, but it will provide them with the same benefits as other widows presently covered by SBP whose husband died before 1972. These annuities would be based on the same formula already in place—55 percent of their deceased husband's retired pay, adjusted by the overall percentage increase in retired pay since his death. The annuity would be subject to future cost-of-living adjustments.

The great majority of the forgotten widows are elderly and many of them are living at or near the poverty level. Some must rely solely on meager social security benefits but others have no pension income of any kind. I am very concerned that these women are suffering severe and unnecessary hardships and I firmly believe that they were cocontributors to their husband's career and equal partners in their family's service to this country. They gave the best years of their lives. We can and must afford to provide for them in these their later years and I urge my colleagues to join me in this effort on behalf of these women.●

THE BAY CLIFF HEALTH CAMP

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. DAVIS. Mr. Speaker, I am submitting to my colleagues an essay written by Ms. Dixie Franklin which tells the story of a special place in northern Michigan. At the Bay Cliff Health Camp handicapped children of all ages have, for 50 years, been given the affection and devotion of dedicated staffers and the financial and emotional support of an enthusiastic community. In this, Bay Cliff's 50th anniversary year, I congratulate everyone involved with Bay Cliff's efforts and hope for many more happy summers for the handicapped children of northern Michigan.

BAY CLIFF

The note was pinned to a cabin wall at the Bay Cliff Health Camp, its author a 10-year-old handicapped camper.

It read in part:

"You call me 'cripple Billy'
And I guess that is my name
But the cripple part is not my heart
My legs are all that's lame . . ."

Therapists who found the note never met the author of the poem, but they are working with 195 handicapped youngsters like Billy during their six weeks of training here.

Handicapped children ages 4 to 18 occupy the cabins at this 170-acre camp located on the shores of Lake Superior at Big Bay 30 miles northwest of Marquette. The camp serves handicapped children primarily from the Upper Peninsula.

"There are many day camps for handicapped children but Bay Cliff is unique in that it serves children with a variety of handicaps on a live-in basis," said camp director John Vargo.

Children receive daily therapy designed to meet their special needs through programs approved by their physicians. This includes occupational therapy, physical therapy, reading and speech.

Wheelchair campers, children in braces and children with other handicaps participate in activities such as camping, swimming and cookouts.

One therapist said working with campers here gives her the opportunity to see children in all their moods: in therapy, in their cabins at rest hour, at meals and play.

"I am seeing them as people, not merely as clients," said Janette Tews of Milwaukee.

Here some children learn to dress themselves for the first time, learn to eat alone, attempt faltering steps, "accepting themselves, believing themselves and learning to like themselves," one therapist said.

Bay Cliff attracts therapists and counselors from across the nation. Vargo said part of the success of the camp was due to the enthusiasm generated by the youthful staff members who work with the children day and night and become their parents away from home.

Counselors offer piggy-back rides to 5-year-olds, with other preschoolers hanging on to outstretched hands or tagging along behind. They take time to listen to teen problems and save hugs for nine-year-olds.

Bay Cliff is a non-profit, tax-deductible organization financed by contributions. Each of the Upper Peninsula's 15 counties attempts to raise money for support of children from their area, Vargo said.

The health camp was established in 1933 by Elba L. Morse, R.N., (deceased) of Marquette and Goldie B. Corneliuson, M.D., of Drummond Island, Mi. and Ft. Myers, Fla.●

INEXHAUSTIBLE ENERGY: THE CLINCH RIVER BREEDER REACTOR

HON. SID MORRISON

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. MORRISON of Washington. Mr. Speaker, the United States is on the threshold of tapping an inexhaustible energy source that is known to be both technically feasible and within economic reach. I am referring to the Clinch River breeder reactor plant project.

It has been correctly assessed that this project is locked in a struggle that may reach a climax in this session of Congress. What needs to be understood is that the price to build Clinch River is well worth the cost of the struggle. Nothing of great value to the Nation comes without an enormous amount of controversy and effort.

The Clinch River project now stands poised to begin construction work at the end of 1983. Tremendous progress has been made since site preparation began almost a year ago. Over $1.5 billion has been invested in the project and $750 million worth of components have either been delivered or ordered. Research and development work stands almost 98 percent complete, and the plant design is over 90 percent complete. All this tremendous investment will be irretrievably lost if the project were sacrificed at this late date. Even more devastating would be the loss of the R&D benefits should this national project be canceled.

Recently, the Nuclear Regulatory Commission issued a limited work authorization (LWA) for the Clinch River project. Issuance of this LWA represents a major step in the licensing process and demonstrates the licensability of breeder reactors in the United States. The LWA also completes the plant's environmental review and affirms that the Clinch River reactor and plant site meet all environmental regulations and are environmentally acceptable.

The plant is also on a fast track construction schedule. With the issuance of a construction permit, work can begin late this year and the plant can begin producing power by 1990. The project is supported by the majority of the scientific community and by the Committee on Jobs, Environment, and Technology (CJET), which is an extraordinary coalition of very diverse groups—the likes of which have probably never been associated before in support of a single project. Its highest priority is support for the Clinch River project. CJET members include such organizations as the Building and Construction Trades Department of the AFL-CIO, the National Association for the Advancement of Colored People, the U.S. Chamber of Commerce, the National Federation of Women's Clubs, and 30 other national and local organizations.

Congress has clearly indicated that increased funding for the Clinch River project must be provided by the private sector. This financing is being developed in the alternate financing plan proposed by the utility industry. The proposals outlined in this plan would provide the basis for private sector financing of about 40 percent of the remaining cost to completion. There is substantial and general agreement among the Government, the investment community, and the utility industry that about $1 billion can be raised. This should, once and for all, end any impression that private industry is not committed to seeing Clinch River built, or that confidence in the project and its technology does not exist.

The utility industry has already pledged $257 million to the project. With the accumulated interest to be paid on this money, the total commitment from the electric systems of this country will come to almost $350 million. This is the largest financial commitment ever made by the electric systems of this country to a single research and development project and, together with the positive approach now being developed for new source financing, the private sector will be providing about two-thirds of the CRBR plant cost of $1.7 billion. There are a number of other significant points that I wish to bring to the attention of my colleagues.

JOBS

About 4,000 people in 32 States and the District of Columbia are presently employed on the Clinch River breeder reactor project. Proceeding to construction will provide additional jobs which will peak over the next 3 years providing 12,000 to 15,000 more workers in the construction and manufacturing trades and in the raw materials and resource supply industries.

If the project is abandoned, these jobs will be lost forever. It is quite likely that these jobs, and thousands of others created by the new breeder industry, would be simply exported to countries that are developing breeder technology. We would once again be putting ourselves in the position—as we have in the automobile industry—of creating an industry and letting other countries harvest the benefits of our efforts.

ENDLESS ENERGY

The breeder reactor is about 60 times more efficient than today's nuclear reactors. Breeders can utilize depleted uranium reserves and produce electricity for centuries. This existing stockpile of uranium for breeder reactors is worth trillions of dollars and will produce energy equivalent to all U.S. coal reserves or three times OPEC oil reserves.

ELECTRIC GROWTH RATE

Nobody really knows what the demand for electricity will be in the future. However, even using conservative growth estimates of 1 or 2 percent annually, America will still have to double its electrical energy capacity by early in the next century. We will need to build more nuclear power plants to keep up with the energy demand. Sooner or later we will need to have breeders or forgo the option of the energy that can be provided from uranium.

BREEDER DEVELOPMENT WORLDWIDE

All advanced countries are developing the breeder reactor. Japan, Germany, Great Britain, France, and the Soviet Union are pushing ahead with breeder programs because they know that those who lead the world in energy development will lead the world economically and thereby influence it politically.

THE CLINCH RIVER PROJECT IS TECHNOLOGICALLY ADVANCED

Those who claim that the Clinch River project is obsolete are simply wrong. From a technical standpoint, the Clinch River project is at the cutting edge of breeder technology. Some of its components and technical advancements are not yet even incorporated in breeders in other parts of the world. The Clinch River breeder reactor will be the finest reactor of its kind in the world when it goes into operation in 1990.

What it comes down to is whether the United States is going to turn its back on nuclear energy and the future. As the General Accounting Office concluded in one of its reports on Clinch River, the project is an important and necessary step in developing the breeder. With the breeder reactor, nuclear energy has an unlimited future. Lack of willingness to build the Clinch River project implies a willingness according to the General Accounting Office, to "foreclose on the long-term future of a major energy option—nuclear fission."

Alvin Weinberg, a world-famous scientist and currently director of the Institute for Energy Analysis of Oak Ridge Associated Universities, recently summed up his position on breeders by saying that development of an inexhaustible energy source must be regarded as an effort at least as noble as going to the Moon. I concur.

The question is not whether we can afford to build the Clinch River project. The question is, Can we afford not to?●

JUSTIFYING AN UNJUSTIFIABLE CENTRAL AMERICAN POLICY

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. EDWARDS of California. Mr. Speaker, recent polls assert that over three quarters of all Americans are opposed to this administration's plan to overthrow the Government of Nicaragua. In fact, a majority of Americans feel that the real threat in Central America lies not in the spread of communism, but in U.S. entanglement in the internal conflicts of the nations within that region. Yet, in spite of this opposition, the Reagan administration continues to maintain its antagonistic position toward the Sandinista government to the extent of possibly involving the United States in an undeclared war.

Jay Friedman, an associate researcher at the Council on Hemispheric Affairs, recently prepared a thought-provoking analysis of the situation in Central America and the Reagan administration's Central American policy. I would encourage each of my colleagues to take the time to read this insightful article. I am enclosing a copy of the article for the RECORD.

The article follows:

The Reagan Administration and Congress are in grim embrace over Central American policy. One of the administration's new weapons in its battle against Congressional opponents is the State Department's recently released White Paper on Central America. Pending action by Congress on the Boland-Zablocki bill to "prohibit United States support for military or paramilitary operations in Nicaragua" will mark the legislative response to a presidential challenge whose outcome will affect not only the future of U.S.-Latin American relations, but also the balance of power in the U.S. foreign policy-making process.

The May 27 release of the White Paper coincided with a series of staff changes by which Reagan sought to buttress his capacity to promote military objectives in Central America. Assistant Secretary for Inter-American Affairs Thomas O. Enders, who had been a prime architect of administrative policy in the area, clashed with Secretary of Defense Caspar W. Weinberger over the contents of the new White Paper. This encounter contributed to the causes lying behind his being ousted in favor of a presumably more responsive Langhorne A. Motley. Although Secretary of State George P. Shultz said Enders performed "as well as anyone in memory," he failed to protect Enders against an even tougher line being promoted by National Security head William Clark and United Nations ambassador Jeane Kirkpatrick.

The preface to the White Paper states that it is "being issued in the interest of contributing to a better public understanding of the history of developments in the region." This latest document, however, is little more than a rehash of an original White Paper released February 23, 1981 entitled "Communist Interference in El Salvador." Several months later, the Wall Street Journal exposed errors and distortions in the paper, and the finding quickly lost credibility.

The new White Paper, like its predecessor, attempts to detail the alleged Cuban, Nicaraguan and Soviet activities in Central America. More specifically, it "describes how politically motivated violence is being used to exploit the demands for more democracy, social justice, and economic development in Central America in order to bring extreme leftist groups in power."

The major failing of the new State Department release, and perhaps Reagan's Central American policy as well, is clearly established by a sentence in its own preface: "This background paper does not attempt to analyze social and economic conditions in the Central American countries." The Reagan administration consistently has given little more than a pro forma nod to the indigenous nature of Central America's social and economic problems and attempts. Instead, it insists on continually pressing upon Congress and U.S. public opinion its messianic vision that the region is in strife because of a Moscow-inspired communist contagion.

Even some State Department experts knowledgeable on Central American affairs privately downgrade what may well be the myth of inevitable Soviet penetration. The favor Senator CHRISTOPHER J. DODD's (D-Conn) response to Reagan's address to a joint session of Congress in April: "If Central America were not wracked with poverty, there would be no revolution."

In Honduras, according to news of a few days ago, the CIA is planning to double its secret war effort by supporting a Nicaraguan exile army that is increasing to 12,000 to 15,000 armed combatants. While this force's original mission was to interdict the flow of military supplies from Nicaragua to the Salvadoran guerrillas, the exiles themselves have flaunted their real intention which is to topple the Sandinista regime. In recent days, the administration has also ceased to cite the interdiction function as the reason why it is financing the exile forces.

Despite the administration's effort to educate the public on its version of what is happening in Central America, a recent national poll reveals that more than three-quarters of Americans oppose a secret campaign to overthrow the Sandinistas; and a majority believes U.S. entanglement in the problems of Central America pose a greater threat than the spread of communism in the region. In response to the unease of the U.S. public, the Reagan administration continues to maintain a painfully obvious double standard in Central America. Its uneven foreign policy condemns violence and subverison against the governments in El Salvador and Guatemala, while supporting it in Nicaragua. Indeed, even ex-CIA director Stansfield Turner recently remarked that "Congressional and public instinct on Nicaragua is correct today."●

THE GENIUS OF RONALD EDMONDS, EDUCATOR

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. HAWKINS. Mr. Speaker, one of America's great educators, Prof. Ronald Edmonds, died on July 15, 1983, creating a great void in the field of education for those who credited Professor Edmonds with speaking most clearly on matters pertaining to urban education.

His most outstanding work was in effective schools research, where he gained a national reputation for articulating the view that all schools have the potential to educate all their students, regardless of a student's socioeconomic status.

His research efforts took him to Harvard University's Graduate School of Education where he taught, and where he directed Harvard's Center for Urban Studies.

Concurrent with his appointment at Harvard, Professor Edmonds served as the senior assistant to the chancellor for instruction for the New York City school system, and organized the nationally recognized school improvement program.

On numerous occasions he provided assistance to me and my staff on matters pertaining to urban education, and on methodologies for improving classroom teaching, curriculum development, and leadership enhancement for school administrators. His expert guidance was sought on other occasions in helping to plan seminars and conferences on education.

In 1981, Professor Edmonds returned to his home State of Michigan, where he assumed teaching assignments at Michigan State University, and where he was senior researcher at the Institute for Research in Teaching in MSU's College of Education.

His major contribution to education was his assertion, based on years of study and teaching, that strong instructional leadership from principals, that high expectations of academic excellence of students by their teachers, and that the climate of the school—were significant contributions to student achievement.

This giant of an educator will be sorely missed.●

LEGISLATION INTRODUCED TO CLARIFY APPLICATION OF ANTITRUST LAWS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. EDWARDS of California. Mr. Speaker, I am pleased to introduce today legislation that will clarify the application of the antitrust laws to a city, county, or other local government unit. The antitrust laws remain the cornerstone of our economic policy based upon a system of free enterprise that has proven the most effective way to distribute goods and services in our economy. Antitrust laws, however, do not serve us well when applied to legitimate governmental activity that is based upon the will of the majority and provides our citizens with services and protections that cannot fairly and sufficiently be distributed by a private market economy.

Having recognized these fundamental distinctions, the courts generally did not extend the Federal antitrust laws to governmental activity at any level. See, for example, *Parker* v. *Brown*, (317 U.S. 341 (1943)). Recent decisions of the Supreme Court, however, have now limited the immunity available to actions of city and local governments. See *Community Communications Co.*, v. *City of Boulder, Colo.* (455 U.S. 40 (1982)). Local governments occasionally engage in activity in competition with private enterprise, and probably should, to that extent, be subject to the same rules of competition applicable to others. There is, however, little dispute that governments should be free, to exercise their police and regulatory powers free of concern with potential antitrust liability.

Two other distinguished members of the Committee on the Judiciary have preceded me in introducing clarifying legislation concerning antitrust immunity for local governments. I share the concerns which have motivated their action. The bill I offer today differs somewhat from each of the other proposals. Most significantly, it extends antitrust immunity to those activities engaged in by a local governmental unit that are an "exercise of the sovereign power of the State" in which such unit is located. There is no express condition that the State confer authority to the governmental body before antitrust protection attaches. I do not maintain the belief that, in instances where a local government is engaged in undisputed regulatory conduct for the benefit of its citizens, antitrust immunity for municipalities or other local bodies should turn on the frequently technical, or subtle, point of whether authority to act was first conferred by the State legislature. Certainly, that line of inquiry was not decreed by the Congress which passed the Sherman Act and, in numerous other contexts, Congress has acted not to disturb the relationship between States and their subgovernmental local units. This is not to say, of course, that courts are prohibited from looking to legislative enactments or other actions by States in order to reach a conclusion about the character of a particular activity engaged in by local bodies. Rather, the threshold question is deciding whether or not anticompetitive conduct is of the type the Sherman Act meant to proscribe involves a determination as to whether such activity is required of the governmental unit in carrying out its duties as sovereign.

I also note here that while antitrust immunity under this bill will ultimately turn on the court's interpretation of a flexible standard; nonetheless, that standard is one that reaches back far into America's legal history. The distinction between actions sovereign in character, and those more commericial in nature, was recognized early in our Nation's history by Chief Justice John Marshall, who effectively described the rationale supporting such a standard:

> It is, we think a sound principle, that when a government becomes [involved with] a trading company, it divests itself, so far as it concerns the transactions of that company, of its sovereign character, and takes that of a private citizen. Instead of communicating to the company its privileges and its prerogatives, it descends to a level with those with whom it associates itself, and takes the character which belongs to its associates, and to the business which is to be transacted. 22 U.S. (9 Wheat) 398, 399 (1824).

Laws in other areas have recognized similar distinctions between the exercise of governmental or regulatory powers, on the one hand, and the conduct of commercial or proprietary activity, on the other hand. For example, the Foreign Sovereign Immunities Act, 28 U.S.C., section 1605, does not confer immunity on the actions of foreign states that are commercial or proprietary in nature. Similarly, a 1982 amendment to the Clayton Act draws a distinction between foreign government-owned enterprises that engage primarily in commercial activities and those that do not. Public Law 97-393, 96 Stat. 1965. For a review of some other applications, see *Yosemite Park and Curry Co.* v. *United States*, 686 F.2d 925, 933 n.40 (Ct.Cl. 1982).

Hearings on this bill and other proposed legislation dealing with this subject will surely aid in building a record for distinguishing sovereign acts from those that should be viewed as commercial or proprietary. The Department of Justice and the Federal Trade Commission may well be able to offer expert advice on the types of activities that should remain under the protective wing of antitrust law and policy, even when engaged in by local governments.

My hope now is that, following full and constructive debate, Congress will act promptly to resolve this question in the interest of local governments and the citizens they represent.●

WHY CLINCH RIVER?

HON. JOE SKEEN

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. SKEEN. Mr. Speaker, over the next few weeks as the alternative financing plan for the Clinch River breeder reactor is debated, the project's merits will likely again become an issue.

I would, therefore, like to bring to my colleagues' attention the assessment by Dr. Alvin Weinberg, Director of the Institute for Energy Analysis at Oak Ridge, entitled, "Why Clinch River?" (Public Utilities Fortnightly, April 14, 1983), and ask that this be entered in the RECORD.

[From Public Utilities Fortnightly, Apr. 14, 1983]

WHY CLINCH RIVER?

(By Alvin M. Weinberg)

Nuclear power is proving to be a difficult, demanding enterprise. At this moment, we are in the throes of a nuclear moratorium: No new reactor has been ordered in the U.S. since 1978, and it is unlikely that a new one will be ordered in this decade. Why, then, do I believe that we should build the Clinch River breeder?

We must distinguish between energy strategy and energy tactics. By energy "strategy" I mean the overall policies that govern the long-term development of our energy future; by energy "tactics" I mean the short-term decisions that implement the overall strategy. Our failure to distinguish between strategy and tactics has confused the debate over Clinch River.

Since fossil fuels are limited, either because they may be exhausted, or because their environmental impact may be unacceptable, our government has always accepted as a cornerstone of energy policy the development of the so-called inexhaustible energy sources. These include solar energy in all manifestations (wind, hydro, direct solar, biomass); thermonuclear fusion; and the breeder. Any one of these represents an essentially inexhaustible energy source. When we shall need any of the inexhaustibles is hard to say—it may well be as much as fifty or even 100 years from now. But every administration, since President Truman's, has accepted as national policy the necessity of investigating these long-range energy sources including the breeder, and it has committed many millions of dollars to each of them; at present more than $1 billion is being spent on developing these inexhaustible energy sources. Even Jimmy Carter accepted the necessity of pursuing breeders, although he rejected Clinch River.

Various tactics can be adopted for achieving the strategic goal of a successful breeder. An alternative tactic to building Clinch

River would focus on testing components rather than building an operating breeder. This course is being advanced both by those of the Clinch River opponents who accept the long-range strategic goal of breeders, and by the nuclear nihilists who see killing Clinch River as a step to killing nuclear energy. My own forty years of experience in nuclear energy has shown over and over that the least effective way to do heavy engineering development is to spend too much effort on components without focusing on a fully integrated operating device in which the real problems reveal themselves. One reason other countries are so far ahead of the United States in breeder development is that they built operating reactors, while we fiddled with components. Clinch River is our first full integrated large-scale breeder: It represents a shift in research tactics from never-ending development of components to the building of an integrated device that will exhibit the true problems and possibilities. I can only say we lost ten years, and suffered tremendous cost escalation, by choosing the wrong tactics in developing the breeder.

The second reason for building Clinch River has to do with time scale. I often have felt that we went too fast in our conventional light water reactor deployment, that much of nuclear energy's travail would have been avoided had we moved more deliberately. We forget that a 1,000-megawatt-electric power plant, if it is to be fully economical, is expected to last as long as thirty years; but if we build reactors too quickly we have no way of knowing whether the system will last anywhere near thirty years, nor can we incorporate lessons learned in earlier reactors into later ones without expensive backfits. This is now happening with many light water reactors—steam generators and pipe cracking may limit their lifetime seriously, even though we have learned ways of dealing with these problems.

Can we not learn from this experience? If we have fifty years before breeders are needed on a large scale, we do not have all that much time to wait. If Clinch River is built by 1990, it will be 2020 before we know whether the device has lasted thirty years—or whether serious deficiencies, that appear after extended operation, will limit its lifetime.

We are unaccustomed to think about technologies that are as slow moving and ponderous as are large nuclear power plants. In this age of computers and jet travel, time is foreshortened, and we forget that only with the passage of thirty years will we *know* that a big device will last for thirty years. We do not have time to waste. We ought therefore to get on with Clinch River. The great French Marshal Lyautey once said to his gardener: "Plant a seedling tomorrow." And that gardener said, "It won't bear fruit for a hundred years." "In that case," Lyautey said to the gardener, "plant it this afternoon." Clinch River is such a seedling.

Dr. Weinberg thus makes the important point that we do not have time to waste and we must, therefore, get on with Clinch River. I urge my colleagues to consider the wisdom of his analysis and to strongly support his conclusions.●

TUITION CREDIT ISSUE

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. HAWKINS. Mr. Speaker, the recent Supreme Court decision allowing tax deductions for certain school expenses to parents of Minnesota schoolchildren, at first reading seems to promise more than it actually does. Initially there was talk that the Court decision was supportive of the administration's tuition tax credit scheme. This is far from the case: The tax benefits in this case could be received by parents of students who attend either private school or public school. And the Minnesota tax benefit is a deduction. The administration's bill provides tax credits—not tax deductions, for private schools—not public schools.

Even with the Supreme Court decision, which somewhat broadens an understanding of who may participate in a school tax benefit plan, there are very serious problems concerning any tuition tax credit plan. For example: What would be the nature of the tuition tax credit revenue loss? Is the tuition tax credit scheme a "budget busting" initiative? Would the middle-and upper-class benefits be unfair in comparison to other economic groups? Of what benefit would tuition tax credits be to poor people?

A more extended discussion of this most important issue appeared in a recent edition of the Los Angeles Times. I urge my colleagues to read the article which I have submitted for their information:

[From the Los Angeles Times, July 13, 1983]

TAX CREDITS FOR TUITION ADDRESS THE WRONG ISSUE

(By Edwin Dorn and Mary Frances Berry)

The U.S. Supreme Court's recent 5-4 decision upholding a Minnesota law allowing tax deductions for certain education expenses including private-school tuition represents a narrow victory for someone, but it is hard to say for whom. It would seem to be a victory for proponents of tuition tax credits, except for two points: The court's majority made clear that it supported the Minnesota law because the tax benefits are available to parents of students who are enrolled in private and public schools. And the operative mechanism in the Reagan Administration's proposal is credits—not deductions—for private-school tuition.

Thus, in order to survive this court's scrutiny, it appears that the Reagan plan would have to be revised to allow parents of all schoolchildren to obtain tax benefits for educationally related expenses. When one adds up all the potential deductions (or credits) for all the nation's 50 million students—gym clothes, materials for home work projects, transportation, field trips, textbooks and tuition—losses to the U.S. Treasury could become astronomical.

Indeed, the court may have opened a door through which Congress could authorize billions of dollars worth of tax expenditures for education, thereby canceling out the federal government's recent cutbacks. Even as indirect support, this could be very helpful to the nation's educational needs, and it would raise another set of problems. Tax expenditures generally are regarded as inefficient public-policy mechanisms, because their benefits are difficult to target. They also tend to be inequitable, because low-income people who pay little or no taxes can claim few if any deductions.

Whatever the ultimate implications of the high court's decision, its immediate effect is to eliminate some of the constitutional arguments from the debate over tax credits. This should cause the Adminstration, its supporters and its critics to focus on the educational merits of the private-school tuition issue.

On key question that proponents of schemes to assist private schools must now address is this: What will additional support for private schools, which enroll only 10 percent of the nation's schoolchildren, do to improve the quality of American education? The National Commission on Excellence in Education reported recently that our nation's future is "at risk" because our education system has been turning out underachieving students trained in the wrong subjects. Ninety percent of the nation's students are enrolled in public schools, and it is in those schools that the problems are most pronounced. Clearly tuition tax credits do not address those problems.

Tax credits may enable more public-school students to enroll in private schools. However, that is not likely to happen quickly, because few quality private schools have vacancies; some have years-long waiting lists. Where room does become available in the better private schools, it will attract the most talented public-school students and their committed parents thereby adding grease to the slippery slope of decay that many public schools have been sliding down. Even some low-income parents who have moved their children from public to private schools do not want to see measures taken that would erode further the quality of public education.

The ability to be selective is one major advantage that private schools have over public schools. Selectivity is the reason why comparisons between public and private schools often are misleading, and also why talk about fostering competition between public and private schools borders on sophistry.

The better private schools are selective on the grounds of merit. But many others are selective on the grounds of race and other prohibited criteria. Thus a second question that supporters of tax credits must answer is: How will civil-rights enforcement efforts be stepped up to ensure against discrimination? That question would become especially important if federal funds were to start flowing, however indirectly, into the coffers of "segregation academies." One wonders whether the proponents of tuition tax credits have thought carefully about the implications of closer government scrutiny.

Discrimination has as much to do with the quality of education as school finance does. The Commission on Excellence in Education found cause for alarm not only in the failure of schools to teach relevant skills but also in their failure to convey the "intellectual, moral and spiritual strengths . . . which knit together the very fabric of society." Our young people will not learn the value of our richly diverse society if they attend schools that are segregated by race, class or religion.

America's historic commitment to public schools has stood for more than a minimal guarantee of training for work; it has been a great cohesive force in the life of the nation. In principle, if not always in fact, our system of public education has been a proving ground for our democratic ideals. The public base of our schools should be a source of pride, not begrudgement.

The Supreme Court's decision may provide mild encouragement to the supporters of tuition tax credits. At the same time, it presents a constructive challenge to those of us who sincerely want to arrest the "unilateral educational disarmament" that the commission described. We must now think very hard about ways by which the nation can provide quality education to all its young people. In a united re-dedication to strengthening public education, the people of this country could find a new sense of purpose and cohesion.●

FIRE ISLAND NATIONAL SEASHORE

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. DOWNEY of New York. Mr. Speaker, today I introduced legislation to amend the Fire Island National Seashore Act. The Fire Island National Seashore was established in 1964 to preserve and protect one of the last relatively unspoiled natural barrier islands in the Northeast for the use and enjoyment of future generations.

Fire Island is a unique resource. It is located only 50 miles from New York City and has one of the finest ocean beaches in the world. It also has magnificent dunes and spectacular maritime forests including the famous Sunken Forest preserve. Although there are bridges at either end of Fire Island, there are no roads to mar the beauties of the island. Access to most of the seashore is by ferry or footpath. Within the boundaries of the seashore are 18 scattered small, heavily developed communities, primarily consisting of single-family homes and cottages and the businesses serving them and day visitors. There are about 4,500 such structures today compared with fewer than 3,000 when the seashore was established. Future growth is estimated at about 1,000 additional structures.

The act exempts private property within these communities from condemnation, with some exceptions, provided that the local authorities have in effect zoning ordinances which conform to standards promulgated by the Secretary and which are approved by him. No current local zoning ordinances have been approved by the Secretary, although three of the four zoning authorities have made the necessary amendments and the fourth one is expected to follow shortly. No new commercial use or expansion of existing ordinances is permitted without the approval of the Secretary of Interior. Property subject to a variance or nonconforming use loses this exemption. Since the subdivision in many communities originally was intended for modest cottages, under present zoning laws many plots are buildable only under a variance. More than one-third of the structures built since 1964 received a legal variance under New York law.

Public Law 95-625 created an oceanfront development on the protective dune system. Owners of undeveloped property within the dune district are permitted to retain title provided the dune is kept in its natural state.

The first zoning standards were promulgated by the Secretary in 1967; the latest revision was in September 1980. The standards contemplated low density of use to protect the environment, mostly single-family homes, and limitation of commercial uses to those serving the needs of the communities. The idea was to keep private development within bounds appropriate for a national park. Unfortunately this scheme has not been entirely successful. The high demands for vacation rentals on this most desirable island has led to the sometimes illegal conversion of single-family homes into multiple dwellings or roominghouses. Bars, discos, and hotels have been established in violation of zoning standards.

Enforcement of standards, by and large, has been a failure because Congress authorized condemnation as the only enforcement tool. The Secretary has no authority to obtain an injunction in Federal court. We twice have raised the authorized ceiling for land acquisitions, but annual appropriations have not been adequate. Furthermore, in these times of fiscal constraints, the National Park Service puts a low priority on using scarce land acquisition funds for enforcement. A Federal court has criticized this scheme as follows:

In their justifiable frustration plaintiffs have sought relief from the courts but it is clear that only Congress can provide the remedy . . . nevertheless, precatory though our words must necessarily be, we cannot help but urge those with the power and authority to preserve this gem of an island to halt their procrastination and get on with the urgent business of saving this charming and fragile outpost of nature before the encroachment of haphazard development irrevocably despoil it. (Biderman v. Morton, 497 F.2d at page 1148-49).

This bill offers a way out of the dilemma. It is one which will cost the taxpayer little or nothing. It is one which avoids retiring from private use expensive property with little or no public value. It also is more flexible and respectful of private property owners.

It is important to emphasize that the broad powers the Secretary now has and the additional powers this bill would grant are intended to be used only in instances when the municipalities are unable or unwilling to enforce the zoning standards. The principle of home rule in this area is primary. The Secretary's powers are a court of last resort.

It is intended that the Secretary shall use the powers given to him only in cases of gross violations which degrade the character of the communities or which threaten the natural resources which the seashore was established to protect. The seashore now has a land-acquisition plan that takes into account these fine distinctions. Congress cannot take on the burden of enforcing the Secretary's zoning regulations or making judgments on individual instances. But we can provide a better and more cost-efficient mechanism than now exists.

This bill does two things: It allows the Secretary to sell acquired property with a covenant for a conforming use and to retain the proceeds for future enforcement action. It also gives the Secretary the option of applying to the U.S. district court for an injunction against the nonconforming use pending the condemnation. These are not new powers. What is new is the way in which they are being applied.

The turn-around provision, acquiring a nonconforming property and selling it for a conforming use, has been in the Lands and Waters Conservation Act. It has not been used in the seashore because the proceeds from such sales do not go back in the seashore but into the general fund. This bill would establish a revolving fund to put proceeds of the sales right back into the seashore only for the purposes of implementing the act.

One reason the deterrent has not been effective is that the safeguards Congress has built into land-acquisition procedures to protect the interests of private property owners have a built-in time delay. Where development pressures are as great as they are at Fire Island, these put the property owner who is determined to violate the standards in a no-risk situation, which guarantees a loss to the taxpayers.

Testimony before the House Appropriations Subcommittee on Interior and Related Agencies, March 17, 1980, documented a number of recent instances in which building in violation of standards was carried on even after the Secretary had initiated use of his condemnation powers. Before the required proceedings had been completed, the Government was faced with paying fair market value for a developed tract instead of for vacant land. The National Park Service then either backed away from the whole situation or expended hundreds of thousands of dollars needlessly.

The provision to permit the Secretary to apply for an injunction will give him the ability to act swiftly to prevent such exploitation. It does not confiscate property rights because at the end of this procedure one of two things happens: either the property owner is paid fair market value for his property, or he decides to use it in conformity with the zoning standards. If the property is acquired, this bill provides for the turnaround and the ability to use appropriate funds similarly for future potential violations.

This is not exactly a "free lunch" proposal. There will be some costs. But it does protect both the public interest in preserving the island and the public treasury. It also is more equitable for private property owners than what we now have and will allay the concerns some Fire Islanders have expressed in the past about the seashore's acquisition and condemnation policies.

Since this proposal was introduced in the last session of the 97th Congress, the Park Service has issued a land protection plan for the seashore. That plan attempts to offer cooperation and good faith as principle vehicles for resolving land-use issues. We applaud that attitude and sincerely hope that it will be met with a positive response locally. However, intervening development actions that contravene local zoning standards indicate a need for a viable enforcement mechanism. This legislation will prove such a tool and will insure that the will of Congress—to permit compatible development within the national seashore—will be upheld.

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Fire Island National Seashore Amendments Act of 1983".

SEC. 2. Section 2 of the Act entitled "An Act to establish the Fire Island National Seashore, and for other purposes", approved September 11, 1964 (16 U.S.C. 459e-1), is amended by adding at the end the following new subsections:

"(h)(1)(A) The Secretary shall sell any property described in subparagraph (B) of this paragraph acquired by condemnation under this Act—

"(i) to the highest bidder;

"(ii) at not less than the fair market value; and

"(iii) subject to covenants or other restrictions that will ensure that the use of such property conforms to the standards specified in regulations issued under section 3(a) of this Act which are in effect at the time of such sale and to any approved zoning ordinance or amendment thereof to which such property is subject.

"(B) The property referred to in subparagraph (A) of this paragraph is any property within the boundaries of the national seashore as delineated on the map mentioned in section 1 except—

"(i) property within the Dune district referred to in subsection (g) of this section;

"(ii) beach or waters and adjoining land within the exempt communities referred to in the first sentence of subsection (e) of this section; and

"(iii) property within the eight-mile area described in the second sentence of subsection (e) of this section; and

"(iv) any property acquired prior to October 1, 1982, that the Secretary determines should be retained to further the purposes of this Act.

"(2) Notwithstanding any other provision of law, all moneys received from sales under paragraph (1) of this section may be retained and shall be available to the Secretary, without further appropriation, only for purposes of acquiring property under this Act.

"(i)(1) Upon or after the commencement of any action for condemnation with respect to any property under this Act, the Secretary, through the Attorney General of the United States, may apply to the United States District Court for the Eastern District of New York for a temporary restraining order or injunction to prevent any use of, or construction upon, such property that—

"(A) fails, or would result in a failure of such property, to conform to the standards specified in regulations issued under section 3(a) of this Act in effect at the time such use or construction began; or

"(B) in the case of undeveloped tracts in the Dune district referred to in subsection (g) of this section, would result in such undeveloped property not being maintained in its natural state.

"(2) Any temporary restraining order or injunction issued pursuant to such an application shall terminate on the date the United States acquires title to such property or, if such proceedings are terminated without the United States acquiring title to such property, on the date of such termination.".

SEC. 3. Section 3(e) of the Act entitled "An Act to establish the Fire Island National Seashore, and for other purposes", approved September 11, 1964 (16 U.S.C. 459e-2(e)), is amended to read as follows:

"(e) If any property, including improved property but excluding undeveloped property in the Dune district referred to in section 2(g) of this Act, with respect to which the Secretary's authority to acquire by condemnation has been suspended under this Act—

"(1) is, after the date of the enactment of the Fire Island National Seashore Amendments Act of 1982, made the subject of a variance under, or becomes for any reason an exception to, any applicable zoning ordinance approved under this section; and

"(2) such variance or exception results, or will result, in such property being used in a manner that fails to conform to any applicable standard contained in regulations of the Secretary issued pursuant to this section and in effect at the time such variance or exception took effect;

then the suspension of the Secretary's authority to acquire such property by condemnation shall automatically cease.".●

THE FAIR CAMPAIGN ACT OF 1983

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. LANTOS. Mr. Speaker, the time has come to take political power out of the hands of special interest groups and return it to the people. Political action committees organized by business and other groups with special interests and narrow concerns, exercise influence that frequently contradicts the general interests of the majority of the people of this Nation.

The tremendous power of these special interests is wielded through their substantial contributions to political campaigns. In the 1982 elections, PAC's contributed almost 24 percent, $82 million, of the $344 million spent in all races for Senate and House seats. The proportion of funds contributed by PAC's was even higher when amounts spent by candidates who lost in the primary elections are excluded—over 27 percent of the $290 million spent.

Nearly all of us who have been elected Members of the House of Representatives and the Senate have received money from these organizations. As long as we are subject to existing election finance laws, there is little that we as individual public officials can do to limit the influence of special interests upon the political process, no matter how much we may wish to do so. Acting together, however, we can limit their influence by changing the rules, and amending the laws that govern campaign contributions.

Mr. Speaker, to deal with these problems, I recently introduced H.R. 3610—the Fair Campaign Act of 1983. This legislation makes two major changes in campaign financing in order to reduce special interest influence in the political process.

First, it imposes a ceiling on contributions from PAC's. For campaigns for seats in the House of Representatives, the limit which could be contributed by all such committees would be $75,000 for a general or special election. An additional $25,000 maximum would be permitted in the case of a runoff election. In election campaigns for Members of the U.S. Senate, the limit for contributions from multicandidate political committees would be the greater amount of either $75,000 or the product of $37,500 times the number of U.S. Representatives elected from that State up to a maximum amount of $500,000. For runoff elections, an additional amount of either $37,500 or the product of $12,500 times the number of U.S. Representatives elected from that State would be permitted.

A second set of changes which H.R. 3610 makes would encourage individual participation in funding political campigans. The bill will increase the tax credit allowed to individuals for campaign contributions made to candidates for public office. Under current law a tax credit of $50 per individual and $100 per couple filing a joint return is allowed for political contribu-

tions. H.R. 3610 will double that amount to permit a tax credit of $100 per individual and $200 for a joint return.

Another provision of the bill to encourage individual—as opposed to group—contributions will increase the ceiling for individual contributions for political campaigns for seats in the House of Representatives from $1,000 to $2,500 per campaign.

Mr. Speaker, the purpose of the Fair Campaign Act of 1983 is to return the elections to the people—to reduce the influence of special interests, and to encourage individual participation in the electoral process.

Let us set aside partisan considerations. Let us act to return political campaigns to the people and limit the influence of special interests. I invite my colleagues in the House to join with me in cosponsoring and supporting this important legislation.●

SAN JOSE MERCURY ON U.S. COVERT ACTIVITIES IN NICARAGUA

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. MINETA. Mr. Speaker, I have repeatedly voiced my opposition to the administration's overt covert war in Nicaragua. In the House Select Committee on Intelligence, on the floor of this House, and in the news media, I have tried to point out the folly of using U.S. resources for the aggressive purpose of sponsoring a civil war.

Today, my colleague DON EDWARDS and I are pleased to acknowledge the outstanding editorial stance which our hometown paper, the San Jose Mercury, has consistently taken on this crucial issue. For my colleagues and their staff, we now submit into the record one of the Mercury's many outstanding editorials about U.S. policy in Central America. This editorial highlights the "rapidly escalating Americanization of the fighting in Central America," and it offers the well-reasoned recommendation that we move to end the administration's overt covert war.

We hope our colleagues take that advice.

[From the San Jose Mercury, July 26, 1983]

STOPPING THE "COVERT" WAR WITH "OVERT" $80 MILLION

Almost daily there is more evidence: The United States is drifting into war in Central America. With the administration setting an ever more militaristic course, it is left to Congress to demonstrate the caution called for by the majority of Americans. That can be an awkward process, as events in the House of Representatives will demonstrate this week.

The House today takes up a bill that cuts off money for the Central Intelligence Agency's $19 million a year covert operation in Nicaragua and substitutes for it an overt $80 million anti-gunrunning program. That amount would be parceled out to friendly Central American nations willing to help halt the flow of Cuban arms through Nicaragua to El Salvador.

This alternative, above-board arms interdiction effort has been endorsed by the two House Committees most intimately involved with the problem, Intelligence and Foreign Affairs. The House has scheduled two hours of general debate on the bill and 10 hours for consideration of the more than 150 amendments that have been offered to it.

We're not persuaded that spending $80 million this way will contribute greatly to defeating the leftist insurgency in El Salvador or to stabilizing Central America. But we are convinced that the CIA's secret war against Nicaragua is wrong, dangerous and must stop.

We urge our congressional delegation to vote for the Boland-Zablocki arms interdiction bill because it's the only measure now before Congress that shuts off the money the CIA needs to arm and supply its anti-Sandinista army. That's the Hobson's choice facing the House.

The Reagan administration insists it is secretly arming and training upward of 15,000 guerrillas so they can halt the flow of arms to El Salvador. The guerrillas say their goal is to shoot their way to power in Managua, a purpose that makes them legally ineligible for American aid. Last December Congress enacted the Boland amendment, which specifically outlaws aid, direct or indirect, to any force dedicated to overthrowing the government of Nicaragua.

If the Boland amendment is to have any meaning, Congress must make it impossible for the CIA to flout it. That's what this week's debate and vote in the House is all about. If the Boland-Zablocki bill passes the Democratic House, it faces an uncertain fate in the Republican Senate, which is more favorably disposed toward President Reagan's Central American policies.

Those policies, as expressed in administration actions to date, are frightening. We fear they will lead to a regional war in Central America that will ultimately involve direct American participation in the fighting. The parallel to Vietnam is chilling.

We are disturbed at the apparent contradiction between the administration's words on Central America and its actions there. The president has convened a National Bipartisan Commission on Central America and given it until Dec. 1 to produce a coherent consensus policy toward the region.

At the same time he has authorized six months of "routine" naval maneuvers off Nicaragua. The ships will practice blockade tactics.

Meanwhile, Army Green Beret troops have opened a training center for Salvadoran troops in Honduras, and an additional 26 Army doctors have joined the 40-odd American military advisers in El Salvador. The Pentagon says it may want to increase the number of advisers from the present authorized level of 55 to as many as 140 if Congress fails to give the administration the $110 million in military aid it has requested for El Salvador.

Further, the president has criticized as "not going far enough" Nicaragua's offer to join other Central American nations in negotiating a settlement of the region's problems. Yet he has offered little more than lip service to this process, first proposed last February by the governments of Mexico, Panama, Colombia and Venezuela, the Contadora Group.

These developments, coupled with the guerrilla invasion of Nicaragua the CIA is bank-rolling, constitute a rapidly escalating Americanization of the fighting in Central America. Public opinion polls consistently have found the American people disapproving of this. Congress is correct to reflect that disapproval in its votes on measures like the one before the House this week. If the administration plunges ahead militarily now, it may make little difference what the bipartisan commission on Central America says should be done come December.●

H.R. 2969

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mrs. SCHROEDER. Mr. Speaker, during our consideration of the Defense authorization bill (H.R. 2969) on Tuesday evening, I offered an amendment to authorize the payment of hostile fire pay to service members in Lebanon and El Salvador. The amendment was adopted by the House.

The adoption of this amendment should mean that our soldiers and sailors in these locations receive special pay for being subject to hostile fire or imminent danger after October 1, 1983. The following letter from Deputy Secretary of Defense Paul Thayer to Chairman LES ASPIN of the Military Personnel and Compensation Subcommittee states the intention of the Department of Defense to make such payments:

THE DEPUTY SECRETARY OF DEFENSE,
Washington, D.C., July 20, 1983.

Hon. LES ASPIN,
Chairman, Subcommittee on Military Personnel and Compensation, Committee on Armed Services, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This responds to your letter concerning the amendment to Section 310 of Title 37, United States Code, relative to "special pay: duty subject to hostile fire or imminent danger."

The Department of Defense supports the proposed amendment enclosed with your correspondence of July 12, 1983. If adopted, this amendment will extend eligibility for payment of this "special pay" to members serving outside the United States in areas where the member is exposed to imminent danger because of civil insurrection, civil war, terrorism, or wartime conditions.

If the "special pay" amendment is adopted, it will permit the payment of "special pay" to members serving in Lebanon and in El Salvador. In the event of adoption of this amendment, it is the intention of the Department to take advantage of the expanded eligibility and to declare Lebanon and El Salvador as areas in which members are eligible to receive the "special pay."

Sincerely,

PAUL THAYER.●

FOOD FOR THE TABLE, NOT THE WAREHOUSE

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. GARCIA. Mr. Speaker, the current withholding of excess food from the needy by the Department of Agriculture is a crime against this Nation's poor.

Earlier this year, the surplus of cheese, milk, and butter bought by the USDA greatly increased. Confronted with overflowing reserves, the USDA permitted and encouraged States to distribute food to the needy as they deemed necessary, and as long as supplies lasted. As the demand for food continued to rise, by as much as 100 percent in some States, the USDA distributed up to 60 million pounds of cheese per month.

However, following a midyear study which indicated a 15-percent decline in cheese sales, the USDA limited the amount of cheese a State could receive to 35 million pounds. Why has this action been taken when the level of needy people in this country is at an all time high? The USDA believes that some State procedures permit the inequitable distribution of free food to those not in dire need and holds that increased supplies of cheese contribute to the drop in commercial sales. Should alleged loopholes in the distribution procedures of some States prevent others in need from receiving increased allotments of food subsidies? Should people be permitted to go hungry while our Government pays for the purchase and storage of vast amounts of cheese and other produce? The following editorial from the Christian Science Monitor "Food for the Table, Not the Warehouse," highlights these points.

[From the Christian Science Monitor, July 21, 1983]

FOOD FOR THE TABLE, NOT THE WAREHOUSE

It has always seemed inexplicable that in a land so richly endowed with a flourishing agricultural economy as the United States, dire poverty and hunger should still be found in substantial parts of American society. Yet, hunger is now the "most prevalent and the most insidious" challenge facing U.S. cities, according to the United States Conference of Mayors. And a recent report by the General Accounting Office determined that hunger has increased throughout the United States during the past several years as a result of recession and high unemployment.

What that rising level of hunger has translated into, as many mayors repeatedly point out to Washington these days, is the development of scores, even hundreds, of food distribution and private relief centers.

The numbers by themselves indicate what is happening: a 75 percent increase in food centers in Rochester, N.Y., last year; requests for food assistance jumping by 112 percent in Cleveland from 1981 to 1982; a fivefold hike in the number of households served by food programs in the Detroit area from 1980 to 1982.

Given such an increase in assistance and food distribution programs, it hardly seems appropriate for the U.S. government to be cutting back on its programs to feed the needy. Yet the government is doing just that despite huge—and growing—surpluses of such commodities as cheese, milk, and butter.

Take cheese, for example.

Since December 1981, Washington has distributed 450 million pounds of cheese. This past March alone some 60 million pounds of cheese were turned over to the public. Cheese stockpiles have grown about 50 percent since late 1981.

But now, the Department of Agriculture has cut back cheese distribution programs to a limit of 25 million to 35 million pounds a month.

Why? An official explains that free distribution programs are believed to be partly responsible for a decline in the commercial sale of cheese at the supermarket counter.

Such an argument strains credulity.

The government should be alert to graft and misuse in the food distribution programs—i.e., cases where food stocks are delivered to persons not actually needing the commodities. The US Department of Agriculture will be remiss if it does not tighten up its administrative procedures involving distribution programs.

But beyond ensuring tighter administration, there is still the larger issue of hunger—and what to do with the available food stocks now on hand.

The robust recovery under way, as well as increasing employment, will no doubt alleviate some of the cases of hunger.

But administration economists concede that unemployment will remain historically high throughout 1983 and 1984. That being the case, it seems only reasonable that Washington draw on existing food stocks to help Americans truly in need.

Legislation introduced by Congressman Leon Panetta and Senator Robert Dole would actually *increase* federal food distribution programs. The legislation, which has cleared the full House and the Senate Agriculture Committee, should be approved by Congress and sent to President Reagan for signature.

In a land as blessed as the United States, no American should have to go to bed hungry.●

RANCHERS TELL STORIES OF COAL SLURRY PIPELINE COERCION

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. BEDELL. Mr. Speaker, on June 15 the Agriculture Subcommittee on Conservation, Credit, and Rural Development held a hearing on legislation I have introduced, H.R. 1749, regarding the sale by one State of water resources shared with other States. I am pleased to note that the hearing was extremely productive.

A number of witnesses expressed their serious concern that, in the wake of the Sporhase and El Paso decisions, the States have constitutionally questionable authority to protect their water resources from interstate transfer and particularly with regard to shared water resources.

Mr. Speaker, agriculture and the rural Midwest stand to lose a great deal if wholesale water transfers are allowed to take place. Our Nation's agricultural productivity would be severely hampered as a result.

One of the related issues that surfaced during the hearing was the impact of transporting the water by pipeline. Realizing that such pipelines would generally be routed across farmland, the farmer/landowner would be confronted with environmental hazards to his/her land. Farmers are some of our Nation's best conservationalists and go to great lengths to protect and promote the integrity of their land.

One panel of witnesses at the June 15 hearing was a group of four ranchers from western South Dakota who have experienced a great deal of difficulty with the ETSI pipeline attempting to route a water pipeline across their land for use in a coal slurry operation. At this point, I submit for the RECORD an article on their testimony from the Missouri Times:

RANCHERS TELL STORIES OF COAL SLURRY PIPELINE COERCION

(By Joan Edwards)

WASHINGTON.—Four South Dakota ranchers in cowboy hats came to Washington recently to tell a congressional subcommittee a shocking tale of intimidation and threats by Energy Transportation Systems Inc. (ETSI), which is seeking land to construct a coal slurry pipeline from South Dakota to Arkansas.

The project has created major controversies, since it involves a diversion of Missouri River water and obtaining a right of way for construction. Railroads, the traditional coal carriers, could be hurt by the loss of coal revenues. But the coal slurry pipeline could be an important energy source for some states and bring water to them.

All of these considerations took a back seat, however, as the ranchers told of their struggles to retain some sort of control over the use of their land by the powerful ETSI, which seeks federal rights of eminent domain, so it can take the property it needs for its pipeline.

Rep. Tom Coleman, R-Mo., who is ranking minority member on the House Agriculture Committee's Conservation, Credit and Rural Development Subcommittee, said to the ranches:

"I would like every members of Congress to hear your story, so that their constituents will not be turned into people who will be affected as you are."

Congressional passage of pending eminent domain legislation would permit ETSI to condemn privately-owned land.

"The farmers have been coerced and threatened," Coleman said. "I am not at all sure I want to allow companies the power to back those threats up."

South Dakota has contracted with ETSI to sell water from the Oahe Reservoir, which is connected with the Missouri River. ETSI would pay the state $1.4 billion over

50 years to take about 16 billion gallons of water per year from the reservior to the Powder River Basin coal mining region in Wyoming. The water would be mixed with crushed coal and sent, via a 1,300-mile pipeline, to Arkansas, where utilities from Arkansas, Louisiana and Oklahoma could purchase the coal.

ELOQUENT RANCHER

One of the ranchers, Pat Trask, gave an eloquent Mr. Deeds Goes to Washington presentation of ETSI's misdeeds. Trask proudly noted that his family had come to South Dakota the year after General Custer was defeated by the Indians at Little Big Horn. Then Trask told how his father, who was an expert in such matters, tried to persuade the ETSI respresentative that the path ETSI had chosen across his land for the pipeline was "almost impassable, and ecologically and financially unsound—but ETSI wants to take its pipeline to areas where people might buy its water." The Trasks wanted the least damaging and shortest route for the 100-foot right of way.

Trask said ETSI threatened his father: "Take the contract now, before it's too late or we'll go to the condemnation process."

The rancher said, "We do not support eminent domain for any entity that is a private corporation for profit—it's not in the Constitution. But ETSI got the politicians to work for them in South Dakota."

The ETSI plan had originally been sold to South Dakota citizens and state officials as a way to "save the Madison Formation" (a large underground water supply in western South Dakota and Wyoming) and use Missouri River water for the coal slurry pipeline. The pipeline also was supposed to supply water to "drought-sticken communities" along its path.

Another rancher said, "ETSI's a four letter word in South Dakota" and recalled how the ETSI representative has harassed "My 74-year-old dad, who has poor eyesight, with a lengthy contract in tiny print. The contract permits ETSI to take a 100-foot right of way which they can select, to carry any water, gas, oil or other substance. Land owners are held liable for any damage to the pipeline, accidental or otherwise."

ETSI on the other hand, would not be held liable for accidents to the pipeline that would prevent delivery of water to a community. "If ETSI decides to cut off its water to a town, they only have to let the people know a day ahead," the rancher said.

Pat Trask said ETSI's plan "does not bring water to South Dakota communities, not one single community has contracted for this. If the government gives ETSI eminent domain for the pipeline, the people will just have to borrow more money from the federal government to buy the water back.

"It's a wrong concept that the people of South Dakota are buying this garbage. When multinationals and government officials use government power and finances in states, we're in a last ditch struggle.

"The lawyers of the state are at ETSI's disposal, and they threaten land owners if they don't concede in the case—they can start pumping. The government canceled 250 water rights in the state so it could have the water to sell to ETSI."

DOMAIN GRANT REFUSED

The state legislature, after a major flurry of news stories about ETSI's activities, voted 2-to-1 to refuse to grant ETSI eminent domain. ETSI officials have claimed the firm must have eminent domain to begin the pipeline, and it is lacking about 10 to 20 percent of the land it needs.

Coleman said, "It does not speak well for the company to abuse this power, and we're being asked to extend it (in a House bill sponsored by Morris Udall, D-Ariz., and Dick Cheney, R-Wyo., among others). You people represent the ranchers, and the 2-to-1 vote in the state legislature is very important."

Coleman then asked the ranchers how the governor had responded to their complaints and the requests that the pipeline take the shortest, least damaging route. Trask said he usually waited six weeks to two months for a response, and at one point he was told it was up to the judiciary to decide. Coleman snapped, "Is this the same person who tried to get books taken off the shelves of stores in an attempt to curtail freedom of speech?"

South Dakota Gov. Bill Janklow reportedly has been in a fury over a recent book on the Indians in South Dakota in which he is prominently featured. The book, In the Spirit of Crazy Horse reportedly alleges the governor, when he was working on an Indian reservation, committed rape, random shooting of animals, public drunkenness and public nudity. Janklow has said these charges are all unfounded, and he is suing the author and publisher. But the book is a major best seller in South Dakota.

Rep. Tom Daschle (D-S.Dak.), told the ranchers:

"I'm proud you represent my state . . . I've come to the reluctant conclusion that ETSI does leave something to be desired. If we fail to provide the Missouri River water, they have the legal right to take the Madison Aquifer water."

The whole issue of the ETSI pipeline is enmeshed in legal controversy. The U.S. Supreme Court decided, in Sporhase vs. Nebraska, that water is an article of commerce, and therefore, a state cannot place a blanket embargo on export of water—just as no state could place an embargo on the export of oil or coal. But the ruling does prohibit the export of water "for wasteful purposes."

AN IMPORTANT PRECEDENT

"The quantity of the water (in the proposed ETSI diversion) is not germane to the issue, but the precedent is," Coleman said. "There are proposals on the drawing board that would siphon off 10 million acre feet of water per year, which is nearly half the flow of the Missouri River at Sioux City, Iowa.

"The Colorado River is nearly exhausted by the time it reaches Mexico . . . Distribution of its water by the U.S. Supreme Court has not worked. Because of a tangle of unreasonable demands and court decisions, states and Mexico have legal rights to more water than the Colorado contains. Before a similar point of no return is reached in reference to the diversion of the Missouri River water, a solution must be achieved."

The subcommittee hearing was on a bill, co-sponsored by Coleman and Rep. Berkley Bedell, D-Iowa, who is chairman of the subcommittee, to create an interstate compact in conjunction with out-of-state transfers of water.

On the Senate side, Missouri's Jack Danforth has introduced an amendment to coal slurry legislation that would also require consent by downstream states to water transfers and promote the formation of an interstate compact.

Steve Hilton, press aide to Danforth said "There will not ever be a Missouri Basin compact (to allocate water among the states) unless the upstream states have the incentive to negotiate a contract. Under our present water laws, there is no reason for upstream states to work out a compact. If the coal slurry goes through, this situation will be exacerbated."

Danforth said there are only two ways to deal with this situation, "either prevent passage of the coal slurry bill, or attach provisions so that other states could have control over decisions."

Danforth said the issue of environmental effects of the coal slurry pipeline has not been sufficiently addressed—the end product of the coal slurry would be a "corrosive, pollutive product."

He added that "economic consequences of the coal slurry pipeline" could be severe if the coal traffic, which is traditionally a major source of revenue for railroads, were to be moved to the slurry.

"Railroads are multi-commodity carriers, and if they lost their major source of revenue—coal—other commodities, such as grain, would feel this loss," Danforth said.

Hilton said a former federal railroad administrator has estimated that the railroad transportation rate for farm commodities could increase up to 40 percent if the railroads lost their principal source of revenue—coal.

"Railroads represent a transportation system that is in place," Danforth said. "The coal slurry system of transportation, in terms of being a competitive element, is silly. It is a single commercial carrier with no common carrier responsibilities. The slurries would be competing with nothing—operating under take-or-pay contracts ranging from 20 to 30 years."

The Senate bill on the coal slurry issue is expected to come to the floor of the Senate very soon. On the House side, there will be additional committee hearings.●

REAGAN'S BIG STICK

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. OTTINGER. Mr. Speaker, having attempted to turn the clock back in many areas of domestic policy, the Reagan administration is now demonstrating a dangerously nostalgic attitude toward the crisis in Central America. Preferring arrogant displays of military force to sincere and energetic efforts at negotiation, Mr. Reagan evidently yearns for the days of gunboat diplomacy. The deployment of several naval task forces off the Nicaraguan coasts, the buildup of the U.S. military presence in Honduras and the increased support being provided to groups attempting to overthrow the Nicaraguan Government are only the most recent signs of the President's desire to wield an American "Big Stick" in Central America. A recent article by Tom Wicker of the New York Times eloquently explains the self-defeating character of this short-sighted policy. I commend it to the attention of my colleagues:

[From the New York Times, July 26, 1983]

REAGAN'S BIG STICK

(By Tom Wicker)

MANAGUA, NICARAGUA, July 25.—If President Reagan set out last week to convince the people of Nicaragua that he means to make war on them and overthrow the Sandinista Government, he scored a considerable success. But it may prove a costly one that the United States will long regret.

Henry Kissinger, the Great Destabilizer of Chile, the scourge of Cambodia, is named to head a study of Central American policy. Maneuvers involving U.S. ground forces are announced for neighboring Honduras. An American flota de guerre is ordered to each of Nicaragua's coasts, amid talk of blockade and quarantine. Mr. Reagan himself, waving the biggest stick since Theodore Roosevelt seized Panama, says he doesn't see how the United States could reach an agreement with the Sandinistas.

All this came to Managua (in the glaring headlines of a controlled press) on top of the border fighting between Nicaraguan forces and the "contras" recruited and financed by the C.I.A., and in the wake of a history that includes occupation by the U.S. Marines from 1911 to 1933 and the U.S.-created and supported Somoza family dynasty (1934-79). Some of the contras, U.S. officials do not deny, formerly were members of the brutal National Guard that terrorized the country during the Somoza regime.

From all this it seems clear—certainly to the Nicaraguans—that Mr. Reagan aims to overthrow the Sandinista Government by military force. If so, he probably hopes to stop short of U.S. troop involvement; but whether he can or not, in the unpredictable winds of a Central American war, his is a policy that may prove far more self-defeating than the C.I.A.'s celebrated overthrow of the Arbenz Government in Guatemala 30 years ago.

It's true that the Sandinistas follow the Soviet line in foreign affairs, censor the press at home and have made some serious mistakes—including the mistreatment of the Miskito Indians on the Atlantic coast. But the economy here is still mixed, and the dominant reality in Nicaragua today, as the people of the barrios are eager to testify, is that they are free of the terror and brutality of the Somozas' National Guard. The human rights problem, as even American officials concede, is minor compared to those of Guatemala, where Mr. Reagan supports a repressive Government, and El Salvador, for which he constantly seeks more U.S. aid.

But the bone in Ronald Reagan's throat is the fear that Nicaragua will try to "export revolution." No one can say for sure that it won't. But this is a small, poor country that desperately needs all its resources at home; and the threat of exporting revolution seems hardly so menacing as to justify Mr. Reagan's militarist reaction (which may be in compensation for his ineffective war in El Salvador).

His policy, moreover, backfired in numerous ways, playing often into the hands of the Sandinistas. The threats of war and invasion serve to mobilize the nationalism and fighting spirit of the people, for instance, just when the enthusiasm of the four-year-old revolution might have begun to fade. The incursions of the conflict even give the Government an excuse to send militia units to the front for combat training and experience.

One of the problems of the Sandinistas is ineffective economic management, resulting in shortages of cooking oil, soap, gasoline and other necessities. U.S. hostility allows the Government to blame these shortages on the Reagan Administration; people standing in bread lines at the *supermercado* talk as much about invasion as about mismanagement, and a poster shows Uncle Sam's many-forked tongue spouting the lie: "They're sending all the soap to Cuba."

A people already suspicious of the Colossus of the North are far more so now; a Government already trending toward the Soviet bloc—although Moscow has never formally adopted Nicaragua and has no apparent wish to—has been pushed farther in that direction. Thus, while U.S. aid dropped from $123 million in 1981 to zero this year, the Socialist countries are making up nearly $300 million of the estimated $518 million Nicaragua needs in addition to its foreign earnings for 1983.

Therefore, the Reagan policy is to a great extent self-defeating, even if he isn't trying to overthrow the Sandinistas; and if he is, using contras and the Honduran armed forces as surrogates, he has little chance to gain his object that cheaply. Honduras is one of the world's poorest countries, and its ill-trained soldiers would be reluctant tigers indeed against the highly motivated and spirited Nicaraguans.

But even the possibility that American forces might have to extricate Ronald Reagan from a new Bay of Pigs is not as grim as his arrogant assertion of the right to dominate other countries of the hemisphere by force. Teddy Roosevelt at least had the excuse that in his day the 20th century was only beginning; while Mr. Reagan seems to have learned nothing from its bloody passage.●

HEALTH EMERGENCY TREATMENT FUND

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. WEISS. Mr. Speaker, When a community is injured by a hurricane, flood, or crippling fire, a wide range of Federal assistance programs are available to State and local governments. When these natural disasters strike we do not expect States or communities to be able to shoulder the burden of protecting public health and rebuilding property alone. The Federal Government has long been committed to supplementing local efforts.

I believe the same rationale should apply when a public health emergency, such as the recent outbreak of acquired immune deficiency syndrome, arises. Epidemics are often localized in certain cities or regions. Yet State and local governments cannot anticipate these sudden crises when formulating their budgets. Hospitals and health departments may be unable to transfer adequate resources. Sufficient funding for facilities, personnel and equipment may simply not be available.

A mechanism that permits the Federal Government to step in, as needed, is essential. Understanding and compassion are not enough.

Mr. Speaker, a bill I am introducing today along with three of our colleagues, Mrs. BOXER, Mr. ROYBAL and Mr. WAXMAN, would establish a revolving fund for treatment and prevention services in response to a public health emergency. The money would be provided, on an emergency basis only, through grants and contracts to State and local governments in areas particularly hard hit by a health crisis. Those governing bodies would have the option of contracting out services to institutions such as hospitals, hospices and nonprofit organizations. I am requesting $60 million for the first year of the revolving fund.

This legislation would amend the public health emergency fund recently enacted into law. The act, authored by the gentleman from California (Mr. WAXMAN), provides emergency funds for research into the cause, treatment and prevention of health crises. The revolving fund I am proposing today would complement the public health emergency fund by providing for actual treatment and prevention.

The best example of the need for these funds is also the most timely example. AIDS has hit particularly hard in certain cities such as New York, San Francisco, Newark, Los Angeles, Houston, and Washington, D.C. The local governments are doing the best they can to respond with treatment and prevention efforts, but they are drawing on already scarce resources. Public hospitals are overwhelmed.

The cost of treatment, estimated at about $60,000 per patient, is staggering. About 1,700 persons have contracted AIDS nationwide; we are therefore looking at a $360 million medical bill. And if the number of AIDS cases continues to double every 6 months, the cost of this health care will be in the billions.

The tremendous cost is compounded by the unfortunate reality that many persons with AIDS do not have health insurance. Those who are covered may carry a policy that does not reimburse for experimental treatment or runs out because of the size of the medical bills. Victims must wait 2 years before they qualify for medicare disability benefits. Many do not qualify for public assistance medicaid.

In a letter to the Journal of the American Medical Association, a group of physicians from New Jersey reported:

> We find that a large portion of our AIDS population is indigent and unable to obtain requisite outpatient care. Once discharged, they can neither eat well enough to bolster their deficient nutritional state nor afford the many drugs required for their multiple infections.

Without outside help, local efforts can be expected to focus only on the most immediate needs. However, the nature of AIDS, I believe, requires an outpouring of psychological and social

support. Needed services cover a broad spectrum: individual and group therapy, legal assistance, home care, hospice care, medical referrals, training for health professionals, crisis intervetion, and guidance through a maze of public assistance, health and disability programs.

In many instances, patients require additional support to deal with the feelings of isolation and loss that result from disruptions in their jobs, personal lives and social networks. Prevention, in the form of extensive public education, outreach and early screening, may save lives as well as money.

Mr. Speaker, a small but growing number of Americans are suffering from a frightening disease of which we do not know the cause or the cure. It is imperative that the Congress communicate to those individuals—as well as the health authorities in the communities in which they reside—that they need not face the struggle alone.

I strongly urge may colleagues to join me in cosponsoring this important legislation. The text of the bill follows:

H.R. 3702

A bill to amend the Public Health Service Act to provide funds for the prevention and treatment of public health emergencies

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That section 319 of the Public Health Service Act (42 U.S.C. 247d) is amended by adding at the end the following:

"(c)(1) The Secretary, acting through the Director of the Centers for Disease Control, may make grants to and enter into contracts with States and political subdivisions of States for programs conducted or supported by the States and political subdivisions for the prevention and treatment of public health emergencies determined under subsection (a) to exist. Funds provided under grants and contracts under this paragraph may be used by States and political subdivisions to conduct such programs and to provide grants and contracts for public and nonprofit private entities to conduct such programs. Applications for grants and contracts from the Secretary shall be subject to such conditions as the Secretary may by regulation prescribe.

"(2) There is established in the Treasury a fund designated the 'Public Health Emergency Prevention and Treatment Fund' to be available to the Secretary without fiscal year limitation to carry out paragraph (1). There is authorized to be appropriated to the fund $60,000,000 for fiscal year 1984. For fiscal year 1984 and each fiscal year thereafter there is authorized to be appropriated to the fund such sums as may be necessary to have $60,000,000 in the fund at the beginning of such fiscal year.

"(3) The Secretary shall report to the Committee on Energy and Commerce of the House of Representatives and the Committee on Labor and Human Resources of the Senate not later than ninety days after the end of a fiscal year—

"(A) on the expenditures made from the Public Health Emergency Prevention and Treatment Fund in such fiscal year; and

"(B) describing each public health emergency for which the expenditures were made and the activities undertaken with respect to each emergency which were conducted or supported by expenditures from the Fund.".

SEC. 2. Subsection (b) of section 319 of the Public Health Service Act is amended by striking out "Fund" each place it occurs and inserting in lieu thereof "Research Fund".●

HOSPICE SERVICES

HON. NORMAN D. DICKS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. DICKS. Mr. Speaker, last year the Congress approved the new medicare hospice program. Thus beginning in October of this year, hospice services will for the first time be reimbursable by medicare.

Hospice exists to provide support and care for persons in the last phase of incurable disease so that they might live as fully and comfortably as possible. Death is the natural end of life, but it is only a fraction of a moment. During all the hours and days and weeks before that moment, the dying person is a living human being, entitled to all the comfort, respect, and dignity to which everyone is entitled.

Mr. Speaker, unfortunately it now appears under the current law, thousands of deserving medicare recipients, residing in rural or medically underserved areas, could be denied this benefit. This occurs, not because these people are ineligible for the benefit, but because there will not be any hospices in their area that are able to contract out for nursing services.

The law as presently written states that a hospice must, "routinely provide directly substantially all" of four basic care services. These services include: nursing care, medical social services, physician services, and counseling.

Simply stated, this particular provision of the law prohibits the contracting out of any of these services.

The inability to have reasonable flexibility in subcontracting for nursing services severely limits the ability of many existing programs to continue. The problem is particularly acute in rural and underserved areas where flexibility in subcontracting for nursing services is the only way hospice care can be provided. The combination of limited manpower and limited fiscal capital investment moneys in such areas makes subcontracting essential in order to provide care. There are areas where there is only one, or a few nurses, physicians, or medical social workers in a geographic area. They cannot be hired directly and no hospice will exist in such areas if subcontracting is not permitted.

In a National Association for Home Care report dated June 13, 1983, Charles Frickey, vice president of the Association of Kansas Hospices stated in a letter to Senator ROBERT DOLE:

A community-based, volunteer hospice, which attempts to utilize and coordinate services already available, will find it difficult if not impossible to participate in the Medicare hospice benefit. The vast majority of Kansas hospices fall into this classification.

In a similar letter to members of the New Jersey congressional delegation, Maureen Eng, director of the New Jersey Hospice Organization, stressed the importance of preserving the coalition model of hospice. She responded to their survey by stating that over half of the hospices in New Jersey would be adversely affected by the inability to subcontract for nursing services.

Ann Katterhagen, executive director of Hospice of Tacoma, in a letter to me stated:

This amendment will improve the access to hospice care for patients with terminal disease, who happen to live in rural, underserved areas. Hospices in these areas need the flexibility to be able to contract for nursing care thus preserving the community nature of this model of hospice care so prevalent in small rural areas.

Mr. Speaker, I do not believe that it was the deliberate intent of Congress to penalize medicare recipients residing in rural or medically underserved areas. It is for this reason that I have introduced this bill to provide for contracting out of the nursing care service under certain specific conditions. Key provisions of the bill include:

First, a "Grandfather" clause which allows contracting out of nursing services for hospices which were incorporated or licensed prior to the passage of the Tax Equity and Fiscal Responsibility Act.

Second, permits for hospices located in rural areas or areas designated as "medically underserved" to contract out for nursing services.

Third, a requirement that if a hospice does contract out it must do so with an agency that is medicare certified to protect against fraud.

As Senator JEPSEN said in his recent statement concerning S. 1511, the Senate counterpart of this legislation:

It is hard enough to encourage qualified people to come to rural areas and work, let alone requiring services which inevitably would necessitate additional medical personnel.

Mr. Speaker, it is extremely important that we allow greater flexibility in the law.●

A TRIBUTE TO HERBERT M. FRISBY—SCIENTIST AND EXPLORER

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. MITCHELL. Mr. Speaker, this week, my city of Baltimore lost one of our treasured citizens, Herbert M. Frisby. Mr. Frisby, a noted former science teacher at Douglass High School, was also a determined explorer who was among those who explored and lived in Alaska.

Herbert Frisby's life was marked by the achievement of laudable goals amidst formidable obstacles. His research and exploration in such places as Norway and Canada and his insistence on pursuing certain courses offered to whites only, back in the 1940's, substantiated his refusal to accept racism as a deterrent. I am proud to share comments about the life of Herbert Frisby as presented in this morning's Baltimore Sun newspaper:

FRISBY OF THE NORTH

Not long after Robert E. Peary and five other men reached the North Pole in 1909, a teacher told sixth graders in a Baltimore Jim Crow school about Matthew A. Henson, the Marylander in the group, the first black man at the Pole. "I'm going to be second," a boy blurted out. For this he was made to write 500 times, "I will not talk about foolish things in class."

In 1956, a U.S. Air Force plane swooped low over the North Pole. Out dropped a tablet honoring Henson and the flags of the United States and Maryland. They fell from the hands of that boy, who at that moment because the second black man to reach the Pole.

Herbert M. Frisby's message in a life career as teacher in Baltimore schools, mostly segregated, was the opposite of the admonition he received. He taught by demonstration to pick an impossible goal and get there. "There are no Alps," he said.

Most boys drop their 11-year-old obsessions. Mr. Frisby clung to his, for the Arctic and for Henson. It took World War II and service as a correspondent for the Afro-American newspapers to get north, following black servicemen wherever they went, including Alaska and Greenland. He returned again and again, often on his own teacher's salary, more than 20 times, even in his 70s.

"Living in the Arctic is rough, rugged, harsh and everything negative to human existence," he said. But he had "Arctic fever." He lived with Inuit or Eskimos in Alaska, toured scientific installations in Spitzbergen in International Geophysical Year, inspected facilities in Norway and a Canadian station on Baffin Island. His home, "the Igloo," was filled with Arctic hides and Eskimo artifacts.

Mr. Frisby believed that Henson reached the Pole 45 minutes before Peary. His 15-year crusade to obtain proper honors for Henson succeeded in 1961 with placement of a memorial to the "co-discoverer of the North Pole" in the State House.

The dogged Douglass High School science teacher crossed terrain closer to home that was harsh and negative to human existence. His insistence on taking a course in greenhouse gardening offered to whites in 1949 by the parks department broke the color bar at Druid Hill Park. Denied access to an anthropology summer course at the University of Maryland College Park because of race, he took it at the University of Alaska.

Mr. Frisby, who died well up in years on Tuesday, combined research with the honorable profession of science teaching. He overcame barriers no American today need face. He said, "No worthy task is to be left undone because it seems impossible." He personified achievement in the Baltimore city schools.●

EXECUTIVE PRIVILEGE

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. ERLENBORN. Mr. Speaker, permit me to explain a bill Representative HORTON and I are introducing today to define the narrow circumstances and procedure under which a President could withhold information from Congress.

One of the recurring problems that plagues the Congress is difficulty in gaining access to documents of the executive branch which are relevant to our work. These problems became newsworthy again this year, as officials of an agency which was under investigation tried to deny Congress various documents, and one official and one of her former aides were even cited for contempt by the House.

Throughout all these disputes, the words "executive privilege" lurk in the background. Occasionally, they are even uttered. Never, though, are they defined. No one knows what the term means.

Our bill, which is identical to one we introduced and the House Government Operations Committee approved in 1974, would put an end to guessing about what the mysterious doctrine of executive privilege is. It establishes a specific statutory procedure to restrict the executive branch's ability to withhold information from Congress. Under that procedure, no individual in the executive branch except the President could decide to withhold documents or testimony from us. If either House objected to the decision, it could take the matter to court; and if we pursued the matter there, the President would bear the burden of proof in overcoming the presumption that all information should be provided. He would have to demonstrate a "compelling national interest" which would include protecting the essential ability of the President to confer with his close advisers, in order to prevail.

By greatly narrowing the Executive's prerogative to withhold material and balancing the burden of proof in executive-legislative information conflicts, the bill would greatly enhance the Congress capacity to secure materials it needs to carry out its legislative and constitutional responsibilities.

This would be a great improvement over the present situation, in which our ultimate weapon against a recalcitrant executive official is to cite him for contempt of Congress and ask that he be prosecuted on that charge. As demonstrated in a recent case, this procedure leaves us at the mercy of executive branch officials, who may choose not to bring suit.

If we won such a legal proceeding, all we would accomplish is to throw a Government official into the Capitol dungeon. That strikes me as an unseemly way to operate. Furthermore, I doubt very much that we would win. Courts just do not place much stock in Congress claims that certain material is essential to its work.

When Senator Sam Ervin's Watergate Committee sued President Nixon to secure important information, for example, the court of appeals ruled that the committee had failed to show that its duties "cannot responsibly be fulfilled without access to (the) records." The court indicated that such a showing could rarely, if ever, be made, when it stated:

> While fact-finding by a legislative committee is undeniably a part of its task, legislative judgments normally depend more on the predicted consequences of proposed legislative actions and their political acceptability, than on precise reconstruction of past events.

Enactment of our bill would make clear Congress' ability to enforce our rightful demands on the Executive. Importantly, it provides a civil forum for the resolution of these disputes, rather than the criminal contempt procedure.

Before another conflict between the legislative and executive branches deteriorates into a bitter stalemate, I urge enactment of this bill to establish a reasonable means for settling our differences.●

THE DEATH OF JOE DELANEY

HON. W.J. (BILLY) TAUZIN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. TAUZIN. Mr. Speaker, some of the Members of the House may have heard about the death of Joe Delaney, a 24-year-old running back for the Kansas City Chiefs. Mr. Delaney, a resident of Haughton, La., drowned earlier this month while trying to rescue three children from a water pond in Monroe, La. Although Mr. Delaney could not swim, he did not hesitate to jump into the pond to try to

save the drowning children. He thus demonstrated the highest form of love, when he sacrificed his life in order to save others.

President Reagan has awarded the Presidential Citizen's Medal to Mr. Delaney posthumously. I can think of no more fitting recipient for this award, and I commend the President for honoring Joe Delaney's memory.●

DEDICATION, CANDOR, AND REALISM: AMBASSADOR KAMPELMAN AT MADRID

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. KEMP. Mr. Speaker, as the Madrid Conference on Security and Cooperation in Europe draws to a close, Americans can take deep pride in the quality and dedication of the U.S. delegation, headed by our dedicated Ambassador, Max Kampelman. Thanks to his skillful leadership, and the support and solidarity of our allies, Soviet efforts to turn aside compliance questions and to divide the West were defeated; and Madrid became the single most comprehensive forum for public exposure of the nature of Soviet behavior.

I want to take this opportunity to express my personal thanks to Max Kampelman for his dedicated service to the Nation. When he was appointed by President Carter to the U.S. delegation to the CSCE in May of 1980, no one could have guessed that he was embarking on a 3-year tour, or that during his tenure he would deliver close to 100 speeches on Soviet and East European violations of human rights. He has proven himself to be a brilliant spokesman on behalf of the values all Americans hold dear. Little wonder President Reagan called upon him to lead our delegation at Madrid.

More than any single individual, Ambassador Kampelman has spoken out forcefully and bluntly to call the world's attention to ongoing Soviet and Eastern bloc violations of human rights in contravention of the Helsinki Final Act. His closing address before the CSCE is an unflinching recitation of the limits of high sounding promises in the face of continuing bad faith actions. Ambassador Kampelman's remarks were inspired by his deep faith in human rights, and the commitment of the United States to that cause, as embodied in the principles set forth in the Helsinki accords. Equally heartfelt and true is the Ambassador's warning that "unless these principles are taken seriously, the accords will become historically irrelevant."

Mr. Speaker, I ask that Ambassador Kampelman's final address before the Conference on Security and Cooperation in Europe be printed in the RECORD.

The address follows:

SPEECH BY AMBASSADOR MAX M. KAMPELMAN, CHAIRMAN, U.S. DELEGATION, CONFERENCE ON SECURITY AND COOPERATION IN EUROPE, JULY 18, 1983

Thank you, Mr. Chairman:

After two years and more than ten months of negotiation, we are close to the end of our Madrid meeting.

We have just been informed by the delegate from Malta that he intends, as is his right, to continue to pursue the amendments about which he has fully informed us. He is aware that our delegation, among others, will continue to oppose those amendments and will not provide the necessary consensus to them.

The American delegation is pleased with the draft concluding document that has emerged out of our deliberations. We consider it noteworthy that in a number of respects, such as in provisions dealing with the reunification of families, religious rights, trade unions, terrorism, rights of journalists, access to missions, and Helsinki monitors, the Madrid document goes beyond the Helsinki Final Act of 1975.

We also consider the decision to hold a conference on security and confidence building to be important. This can be a significant step toward strengthening security and cooperation in Europe. The need to minimize the risk of surprise military attack is of great significance to all of us. We welcome a decision to hold such a conference, a proposal we joined in supporting as early as February, 1981.

We look for a conference which will produce more than vaguely worded declarations. We take very seriously the provisions in the mandate that the conference would concern itself with confidence and security building measures which are militarily significant, politically binding, verifiable, and applicable to the whole of Europe. The conference must complement, and not interfere, with other arms control negotiations. The United States will take a constructive approach to the wish of the conference, and hopes that others will do the same.

Agreement to notify military activities which will take place on land in Europe is an example of the kind of measure we believe could be a valuable result of this conference.

It is also gratifying to all of us that Madrid is firmly establishing the continuity of the Helsinki process. We have done so explicitly; and we are doing so with our decision to hold another follow-up meeting in Vienna in 1986, preceded by a tenth anniversary meeting in Helsinki in 1985. This continuity is strengthened by a decision to hold meetings, between the sessions in Madrid and Vienna, on human rights, human contacts, cultural activities, the Mediterranean and the peaceful resolution of international disputes.

The United States recognizes the special importance of arriving at an agreement in Madrid at a time when international tensions and differences continue to dominate our consciousness. We hope Madrid will be a significant signal of a new beginning in our earnest pursuit of peace.

We must, however, not be blind to the difficulties of the task ahead. These difficulties were dramatized by a first-page editorial in the July 14 issue of Pravda, which I read shortly after leaving this hall on Friday, when 34 of us signified our provisional approval of a final document. The editorial sharpens for us not only the real meaning of the Madrid agreement, but its decided limitations as well.

The editorial's theme is the speech made to the June Plenum of the Communist Party Central Committee by the leader of the Soviet Union, during which he said: "There is a struggle for the hearts and minds of billions of people on this planet." Concerned that the USSR may not be doing too well in that struggle, Pravda urges that Soviet citizens be "immunized" against hostile ideas. Specifically, it aims at religion in the USSR as a danger.

The United States understands the profound seriousness of the inherent contradictions between the Soviet totalitarian system and the system of liberty and individual dignity which is a hallmark of democratic governments. Reaching agreements such as we did in Helsinki and now in Madrid, do not, by themselves, automatically minimize those differences or end the competition.

We intend to be in the competition for "hearts and minds" to which Pravda refers. We welcome a competition of ideas and values. In many ways the Madrid forum has been and remains a vehicle for that competition. What concerns us deeply, however, is that the Soviet Union may believe that it cannot win a competition of ideas and values without the threat and use of armed force and repression, both within and outside its borders.

The Helsinki Final Act and the Madrid Agreement are efforts to channel the competition of values within civilized constraints; and at the same time to strive for understanding so that we can learn to live with one another in peace. The fact that these agreements continue to be violated, even during this very period of negotiation and agreement, is discouraging.

We cannot in good conscience permit a limited negotiating success, important as we believe it to be, to make us forget, much to our regret, that signatures on a document do not necessarily produce compliance with its provisions. The continued fighting in Afghanistan, where more than 100,000 invading troups remain, violating the sovereignty of that unhappy country and abusing the humanity of its people, stands as an affront to the peace we in Helsinki professed to pursue.

The people of Poland remain today subjugated by a martial law which attacked the legitimacy of their free trade union, Solidarity, and continues to keep in internment and imprisonment thousands of persons who declare and champion their human rights.

Our delegation believes in the importance of words. But we cannot permit an agreement on words to obfuscate unpleasant realities.

We have sought and welcome the agreement represented by our decision in Madrid. We do not wish to minimize the importance of that agreement. But we also do not wish to minimize the consequence of undermining such agreements when they are not complied with in letter and in spirit.

What are we to think when at the very time we were coming to agreement on provisions dealing with religious rights, Pravda Vostoka of Uzbekistan informed us that leading members of the Seventh Day Adventist Church have been imprisoned by government authorities, precisely because of their wish to practice their religion?

Mr. Chairman, on December 1, 1981, I reluctantly brought to the attention of this body a detailed report of what clearly ap-

peared to be a government-sponsored anti-Jewish campaign in the Soviet Union. It was my hope, obviously misplaced, that I would never have reason to raise that issue again. The facts, however, force me to do so.

The decline in Soviet Jewish immigration is to the lowest levels since the 1960's, a tragic violation of the Helsinki Accords. An important escape valve has thus been cut off for one of the most presecuted religious groups in that society. We note too, with sadness, that many Jewish scientists and professionals have been stripped of their educational degrees; that the teaching of the Hebrew language brings on police harassment and arrest; and, perhaps most distutbing of all, that extreme anti-semitic articles are appearing in the Soviet press with increasing frequency.

Soviet officials sometimes respond to these facts with assertions of "indignation" and "libel". I fully understand such indignation in the light of the horrendous memories of anti-semitism during and prior to world war II. As to libel, in many of our societies truth is a defense to a charge of libel. We pray that this issue may soon disappear as an issue between us. Until the facts justify that change, however, I quote from a statement made last week by President Reagan: "We have repeatedly stated that our concern for human rights in general, and Soviet jewry in particular, is integral to our national interest and remains a major focus of our national policy."

The picture is no more encouraging when we turn to the very marrow of our objectives, the search for peace.

A Soviet pacifist, Alexlander Shatravka, was recently sentenced to three years in prison for circulating a petition calling for the universal abolition of nuclear weapons. The document had urged both the United States and the Soviet Union to scrap their nuclear arsenals. Mr. Shatravka had earlier been associated with a group of young people, who, a year ago, had been arrested for unfurling a banner in red square bearing only the Russian words for "bread-life-disarmament."

The arrest of these young Soviet citizens seeking peace stands in sharp contrast to the enthusistic editorial which appeared in Pravda last January hailing anti-war movements in Western Europe as "vital causes of the people." Is it any wonder that we are reminded of a perceptive statement by Clausewitz: "The aggressor" he said, "is always peace loving. We would like to make his entry into our country undisturbed."

We know that the people of the Soviet Union, like all of our peoples, are peace loving. But we also know from the Pravda editorial of last week that Soviet authorities, who are not elected by their people, fear independent ideas and want their people "immunized" against them. General Aleksei Yepishev, the political head of the Soviet Army, recently complained that Soviet youth was being infected by pacifism. To stop independent ideas is a lost cause. Ideas, like the wind currents and the climate, reach all lands and cannot be stopped by artificial barriers.

It is the view of our delegation, Mr. Chairman, that in arresting and harassing those of its citizens who work for peace and universal nuclear disarmament, Soviet authorities not only maintain an indefensible double standard, they clearly demonstrate that the mantle of peace, in which they would like to cloak themselves, simply does not fit their shape, their ideology, or their practices, and it is not simply, Mr. Chairman, one country that we wish to address these comments.

Similarly, a few weeks ago, more than 390 Czechoslovak young people were clubbed by the police, with many arrested, for holding a peace demonstration in Prague and chanting "we want peace and freedom." And in that country, Ladislav Lis, a spokesman for the Charter 77 Human Rights and Peace Organization, a Helsinki monitoring group, is expected to go on trial this week for his activities. Religious believers are also facing renewed repression for their expressions of faith.

In East Germany, where there is a growing unofficial peace movement that opposes all nuclear arms, including those of the Soviet Union and the United States, young people, many of them associated with churches, also find themselves harassed. At least 22 members of this group have recently been expelled. Patches worn on clothing depicting "swords into plowshares," distributed by East German church leaders, have been outlawed as "the expression of a mentality hostile to the state and proof of membership in an illegal political association." Students wearing the patch were threatened with expulsion from their schools and workers from their jobs.

The irony is not lost on us as we remind ourselves that the statue of peace given by Moscow to the United Nations has the same motif of "swords into plowshares."

A double irony is that the harassment of those who try to demonstrate for peace stands in stark contradiction to a United Nations General Assembly resolution of last December, co-sponsored by the United States, calling on all states "to encourage their citizens freely and publicly to express their own views on disarmament changes and to organize and to meet publicly for that purpose."

Once again, we have words: and we have deeds contrary to those words. We have that continuation of a pattern which has plagued the Helsinki process since 1975, and which continues to plague this meeting to this day.

The question might well be asked, therefore, and many in my country understandably ask, why do we negotiate about words? Why do we seek to forge a concluding document? Why do we enter into an agreement at a time when the repression of human beings in the Soviet Union is greater than at any time since the Helsinki accords were signed in 1975?

Mr. Chairman, the American delegation has pursued these activities here in Madrid because the pursuit of peace is too vital, the need for understanding too indispensible, the importance of the Helsinki accords too great to permit us to be discouraged by the task or by the obstacles we face.

We are convinced that the Helsinki Final Act has within it a formula for peace which is indispensible in this age of potential nuclear devastation. It is our conviction, furthermore, that unless these principles are taken seriously, the accords will become historically irrelevant. We, therefore, continue to express ourselves on this issue, even during these closing days of our meeting, in order to help mobilize a wider moral and political insistence upon universal respect for the act by compliance with its provisions. Anything less threatens the integrity of our process and of our relationships under it.

The American delegation makes this statement today not to irritate or offend any delegation here. We understand the need for patience in building the structure of peace and understanding among us. We cannot, however, lull our publics into believing that words alone are adequate to erase the pressing threats to the integrity of the Helsinki and Madrid principles.

We earnestly desire to enter into a constructive dialogue at all levels in order to achieve understanding and restore the "detente" contemplated in the Helsinki Accords. We wish to negotiate reductions in arms of all kinds to ease the burdens of military spending on all of us. We wish peace with every state here. We wish to resolve all potential conflicts between us, bilateral, regional, and international. We seek to do so on the basis of reciprocity and mutuality.

We appreciate that in order to have a successful dialogue, we must be as attentive and responsive to the concerns of others as we ask them to be with respect to ours. We are prepared to do so.

Mr. Chairman, I conclude with an extract from a statement issued by President Reagan in Washington last Friday evening:

"In concluding the Madrid meeting, we reaffirm our commitment to the Helsinki process. We will not flag in our continued determination to work with all governments and peoples whose goal is the strengthening of peace in freedom. As Madrid has shown, dialogue, when based on realistic expectations and conducted with patience, can produce results. These results are often gradual and hard-won but they are the necessary building blocks for a more secure and stable world. The challenge remains: We must all consolidate and build on these gains; we must ensure that good words are transformed into good deeds and that the ideals which they embody are given concrete expression. Giving substance to the promises of Madrid and Helsinki will remain one of our prime objectives."

Thank you.●

SAY NO TO COVERT AID

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. OTTINGER. Mr. Speaker, I am incensed by this administration's warmongering in Central America. The most odious of our involvements is the support by the United States for Somoza adherents in their endeavor to reestablish a rightwing dictatorship in Nicaragua. Even putting aside the critically important issue of abandoning our historic concern for human rights and democracy, this act of folly is the single most important factor encouraging the expansion of communism in the area, driving Nicaraguans to rally around the Sandinistas, the Sandinistas to turn ever more to Cuba and Russia for support, and the rest of the region to justly fear the imperialistic and repressive aims and results of American policy. The stupidity of maintaining this position in Nicaragua is astounding.

The President's ambiguity in his press conference this week about the expanding U.S. military involvement in Nicaragua makes it more important

than ever to pass the Boland/Zablocki amendment. Fueling a guerrilla war within Nicaragua brings us no closer to the peace and prosperity Mr. Reagan claims to desire for that region. It accomplishes the opposite.

I wonder at the President, whose own words should be enough to convince us immediately to halt the covert aid he so fervently desires. Consider some of his points from last night's press conference, "dialog and negotiations can best succeed when the parties are convinced that their goals cannot be achieved through the barrel of the gun." Why, then, are we concentrating on military and paramilitary operations to elicit the violent overthrow of the Sandinista government? Mr. Reagan said: "we want to help our neighbors lift themselves up to prosperity." Is this why our economic support to Nicaragua fell to zero this year? How will a gaudy display of military might help the Nicaraguans to implement land reform, or improve health, and education? Mr. Reagan says: "we want a political and peaceful solution," and responds with a massive naval maneuver on both ocean sides of Nicaragua accompanied by a threat of a blockade and the dispatch of 4,000 combat troops to Honduras.

I hail the sagacity of one of Mr. Reagan's strongest statements. He told the Nation:

> You have got to prevent what is happening down there to people who want peace, but are not allowed to have it because of outside forces that are seizing upon their situation and hoping to further their own ideological aims.

That is the most cogent argument for the Boland/Zablocki amendment to stop covert aid to Nicaragua. What the President's response should be is to endorse the offer of the Contadora group for reciprocal negotiations to ban all foreign troops and military equipment from the area, supervised by a regional international force, and a significant regional effort to improve the economic lot of Central Americans. That would achieve Reagan's stated aims of stopping the flow of Soviet and Cuban military assistance and offer a real hope for peace.

Let us take the opportunity today to take a step in the direction of peace in Central America. I urge my colleagues to support this necessary amendment.●

THE AMERICAN POLITICAL SCIENCE ASSOCIATION

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Ms. FERRARO. Mr. Speaker, for 30 years the American Political Science Association has been giving young professionals a chance to participate in the political process via the congressional fellowship program.

In the real world of Congress, 1,024 fellows—many of these fellows, I might add, have been women—have had a chance to see how practical politics and political theory work hand in hand to create our Nation's legislative system.

I have firsthand knowledge of the value of this program, having enjoyed the services of two congressional fellows in 1981–82. I know they contributed significantly to my office and I am confident that they took with them a much deeper understanding of the way our Government works.

In an era when public discourse tends to foster distrust and lack of confidence in our governmental institutions, I commend the APSA. For 30 years, APSA has brought our best and brightest to Washington and to Congress to see and understand.●

ALL-VOLUNTEER FORCE

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. PAUL. Mr. Speaker, this month marks the 10th anniversay of the end of the military draft and the birth of the All-Volunteer Force. Despite the record of the All-Volunteer Force we nevertheless continue to hear in this Chamber and in the Nation an outcry for a return to conscription. This, as Doug Bandow makes clear in this timely article in the July 26 Wall Street Journal, would be a serious mistake. Mr. Bandow, moreover, is a writer to be reckoned with, former staffer with the President's Military Manpower Task Force, editor of Inquiry magazine, and contributor on public policy to a wide range of newspapers and magazines. I commend this superb essay to the attention of my colleagues.

ALL-VOLUNTEER FORCE

(By Doug Bandow)

Ten years ago this month, America inaugurated the all-volunteer force, ending a costly 30-year experiment with a peacetime draft. American society is no longer being torn apart by conscription. The social and economic costs of raising a military have declined. And the services are having their best recruiting year ever. In short, the AVF is working.

Despite volunteerism's success, however, conscription remains an issue. Draft registration has entered its third year, and several politicians, including presidential hopeful Sen. Fritz Hollings (D., S.C.), support a return of the draft.

Among the AVF's most important benefits has been a lowering of the cost to society of raising the military. Though a draft lets the government pay some soldiers a lower salary, it increases overall "people" costs, simply moving most of the increased burden onto the draftees, who must disrupt their career plans. The rest of us also pay for the waste caused by the draft taking people out of their best occupations and education programs, increasing employee turnover and causing costly draft-avoidance activities.

A draft probably wouldn't even reduce federal budgetary costs. Of the $80.8 billion spent on personnel in fiscal 1981, for example, only $6.6 billion went to first-term active servicemen, who would be drafted. The rest supported soldiers, civilians and retirees. The small savings from severely cutting this amount would be more than offset by the costs of conscription, as well as the increased expense of maintaining the career force. (Draftees reenlist in fewer numbers than volunteers, so training costs would rise, and pay for careerists would have to be increased.)

What's more, by almost any measure, the services today are taking in higher-quality recruits than ever before. For example, in fiscal 1982 60 percent of the recruits scored above average on the Armed Forces Qualification Test, which divides the population into five separate mental-ability groups, compared with 53 percent of their civilian counterparts. Among recruits of the Army, which traditionally has had the greatest recruiting problems, 53 percent scored above average. And no service is drawing enlistees from the bottom 7 percent of the population.

In any case, a draft would do little to raise the quality of recruits. Bernard Rostker, a former Selective Service director, estimates that even a draft with few exemptions would do little to change the percentage of Army recruits in the lowest and highest categories. Indeed, a truly universal draft would result in a lower-quality military.

The AVF also has succeeded in building a military that is fairly representative of society. Recruits in fiscal 1982 were better educated than their civilian counterparts: 86 percent of all service recruits and of Army recruits were high school graduates, compared with 74 percent of young people generally. These levels are far higher than they ever were under the draft. The military as a whole has almost the same percentage of college graduates as does the civilian work force, and the new enlistees are as qualified as civilian young people to attend a representative group of colleges. Moreover, an Ohio State University study found that recruits had much higher educational aspirations than their civilian counterparts.

The AVF's socioeconomic composition reflects the rest of society. Officers and career enlisted personnel make up half of the military and are solidly middle-class. The educational background of young servicemen's parents is virtually identical to that of the parents of all civilian young men, and the occupational background of the recruits' parents is only slightly more bluecollar.

Blacks are overrepresented in the military, but the percentage of black Army recruits has declined for two years in a row. Moreover, since black recruits are qualified to serve and are volunteers, there isn't any demonstrated military or social problem with their role.

Anyway, a draft wouldn't significantly reduce blacks' representation, unless they were prevented from volunteering and reenlisting. And doing that would suggest the purpose of the military is to promote racial quotas rather than national defense.

Finally, the AVF is raising a military in a manner consistent with principles that underlie the founding of our republic. The

government is the protector, not grantor, of our rights; individual freedom is a right, not an "unearned benefit" to be paid for by service to the state. (Although, to the extent that people believe there is such an obligation, the AVF is still the best system. It most fairly distributes the burden of defending our nation throughout society by having everyone share the expense of raising a military. In contrast, a draft concentrates the cost on one narrow segment of the population.)

The AVF faces a number of challenges in the future. But it can meet them with a mixture of traditional incentives and innovative management. In particular, pay should keep pace with the cost of living: However patriotic young Americans are, they will be less likely to volunteer for military service if they must work at poverty levels.

The draft's proponents are nostalgic about a past that never was. The draft wouldn't enhance our national security. Moreover, it would violate the democratic traditions and the values of freedom that set this nation apart from so many others. If America has lost the moral authority to persuade its people to voluntarily defend this society, then it has lost something that no amount of coercion can restore.●

THE 25TH ANNIVERSARY OF CAPTIVE NATIONS WEEK

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. GEJDENSON. Mr. Speaker, last week we again commemorated the struggle and suffering of those living under Soviet domination with the 25th anniversary of Captive Nations Week. The grim histories of the Baltic republics, the Ukraine, the nations of Eastern Europe, and most recently, the brutal occupation of Afghanistan, are well known to all of us. This year, Captive Nations Week is an especially significant occasion as we recall the millions who died in the Ukrainian famine 50 years ago—a calamity not caused by natural forces, but by the ruthless directives of Stalin's regime.

Unfortunately, the terror and repression of totalitarian governments are not limited to a few isolated examples, or to one political ideology. Innumerable abuses of human rights continue throughout the world today. As we remember the plight of the Ukrainians, the Poles, and many other peoples and nations under Soviet control, it is vital that we take a clear and unwavering stand against tyranny in all its forms, as inimical to democracy and to humanity.●

AFRICAN DROUGHT: LESSONS FROM THE PAST

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. BERMAN. Mr. Speaker, 10 years after the devastating drought in Africa's Sahelean region, a similar catastrophe has struck an even larger area of Africa. If the United States does not immediately expand its belated and inadequate disaster relief, we will have learning nothing from the disaster that cost so many lives just a decade ago.

As happened with the Sahel, a U.S. Government preoccupied with military challenges in other regions has been slow to respond to famine in the world's poorest countries. A decade ago, hundreds of thousands died because aid arrived too late. Today, thouands face starvation. There are 50 to 100 children dying daily.

Just as 10 years ago, drought-affected nations have been deemed someone else's problem because they have not been counted among America's strategically important friends. This is especially true of Ethiopia, where the drought is most severe.

As happened with the Sahelean drought, the press and Congress have taken the lead in calling attention to the need for disaster relief and pressing for action.

As we learned in the Sahel, a slow American response to famine is costly in both economic and political terms.

By the time aid is finally sent, it must be delivered by the costliest means in order to curtail famine.

Friendly governments can fall before American relief arrives. This happened during the last drought in Ethiopia.

Today, drought in Ethiopia confronts the United States with a different but equally grave political problem. Many of us have made appeals to the Ethiopian Government on behalf of the Falashas, Ethiopia's Jews who have courageously practiced their religion for thousands of years. How seriously will our appeals for justice and humanity be taken if we do not help the multitude of Ethiopians who now face starvation?

I am proud to join the gentleman from New York (Mr. WEISS) in introducing a resolution calling for desperately needed U.S. assistance to the victims of drought in Ethiopia.

If we have learned anything from the Sahelean drought, it is that the United States must respond quickly and generously when our fellow human beings are threatened by drought and famine.

There are other lessons from the Sahel that we should apply in responding to today's drought in Africa.

First, it is critical that development assistance to African nations focus on food production. People who live constantly at the margin have no reserves for times of scarcity. Subsistence farmers using Biblical methods have not even the simplest means to overcome the effects of drought, though they live on a continent where weather varies more than anywhere else on Earth.

In this regard, I am deeply concerned about AID's current shift in emphasis from aiding the poor majority to aiding large businesses. This strategy makes little sense on a continent where 75 percent of the people still depend on farming for their livelihood, and most are subsistence farmers.

A second lesson from the Sahel is that donor and recipient nations can cooperate productively to prevent future catastrophes. The nations of the Sahel and Western donors have cooperated in making that region drought-resistant and raising its food production. This model should be applied in other drought-affected regions in Africa.

In this regard, the United States' support for regional cooperation in southern Africa is critical. The administration and Congress have joined in bipartisan support for this program. I have authored a provision of the foreign aid bill to earmark funds for the southern African program, in order to prevent this critical assistance from being again reprogrammed into less worthy projects.

Mr. Speaker, America's interests and values demand that we respond urgently and generously to the drought and famine in Africa, and that we work with African nations in their regional efforts to prevent starvation in the future.●

THE ISSUE OF UNIVERSAL TELEPHONE SERVICE

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. MARKEY. Mr. Speaker, today, the House and Senate begin consideration of no less than 13 bills on the issue of universal telephone service. That is quite a legislative bounty at a time when, only 4 months ago, committee leaders in both Houses of Congress were predicting that we were unlikely to see common carrier legislation this year.

Why the change?

I think that the change is a response to a perceived national crisis: The threat that millions of Americans, urban and rural, might lose one of modern life's most basic necessities, the telephone. Many in Congress,

myself included, believe that such a prospect would result in the most serious of consequences—the creation of an information aristocracy and an information underclass in our society. And while I have been skeptical about the value of legislation to deal with this problem during this period of grave uncertainty, I think it is time for everyone involved in the process to recognize the overwhelming consensus of the members of both committees to have legislation this year. We may well be beyond asking, "Should there be a bill?" and now appear ready to ask instead, "What bill should there be?"

On Tuesday, Mr. LUKEN and I introduced a bill which proposes one solution to this problem. The Consumer Communications Act of 1983, H.R. 3647, seeks to solve the impending difficulties which Members perceive in the telecommunications industry from a pro-consumer, pro-competition viewpoint. I use both of these terms in the same breath because I remain convinced that competition will ultimately serve to build the best national telephone network available to the greatest number of consumers at the lowest possible rates. For those who still need proof that competition benefits their constituents, the consumers of this industry, I recommend the most basic evidence: the morning newspaper. There you will find ads selling telephones for under $10, or promoting long distance service at half the normal rate. Thus, I feel enthusiastic about dubbing the Markey-Luken bill as the pro-consumer and pro-competition approach.

What are the elements of the Consumer Communications Act? I believe that the act is best understood by grouping its provisions into five categories:

First, it softens the impact that legal and regulatory changes have on consumers without distorting the new competitive communications market. H.R. 3647 lowers the residential access charge to 50 cents a month in 1984, down from $2 a month under the FCC's plan. It proposes a 10-year—as opposed to a 6-year—phasein of the charges. To make up the difference, it pegs business charges slightly higher. It also includes so-called "provider of last resort" safeguards for consumers. Over a 10-year period, then, it eliminates the uneconomic trap of subsidizing local rates with heavy long distance add-on charges.

Second, it provides help to those who cannot afford basic telephone service in the new environment. The bill targets moneys for a special "lifeline telephone service" rate for low-income Americans. Recognizing that poverty is not a rural or an urban problem, H.R. 3647 establishes a national lifeline telephone service fund to provide the resources needed to sustain such service. The fund is financed through a minimal surcharge on long-distance usage and local network bypassers.

Third, it attempts to aid those in high-cost areas without oversubsidizing the unneedy or promoting inefficiency in the national telephone network. Recognizing that some areas face particular problems, we have supported limited subsidies for high-cost areas. H.R. 3647 adopts the joint board formula with its efficiency rewarding subsidy taper as a reasonable compromise between the differing approaches outlined thus far.

Fourth, it seeks to enhance the prospects for competition within the industry. To this end, we have suggested in this bill that jurisdiction over intrastate toll policy should be moved to the FCC in an effort to speed up the growth of competitive long distance service. Also, we have prohibited cross-subsidization of regulated and unregulated services so as to insure that all competitors are playing on a level field.

Finally, fifth, it hopes to improve the effectiveness of the regulatory process. The Consumer Communications Act provides for the funding of public participation at the FCC to improve the breadth of debate at that forum. It also insists that a comprehensive study—even broader than the one the FCC ordered yesterday—be conducted to examine the future of universal service and the basis for local rate increase requests. Reports on this study are to be made annually to the Congress and the State commissions.

In conclusion, Mr. Speaker, I urge all Members of both Houses to consider the bills before us carefully and not agree to any quick fix of one of our Nation's most important and successful industries, I especially urge my House colleagues to examine H.R. 3647 closely, and join me as a cosponsor of this bill in the weeks ahead.

MAJOR PROVISIONS OF H.R. 3647

Sec. 1—Title and Table of Contents.

Sec. 2—Statement of Findings and Purposes: Substantially the same as Wirth-Dingell bill (H.R. 3621). The only differences are in Finding No. 5 on competition and technological innovation and the deletion of Purpose No. 3, increasing state regulatory powers.

Sec. 3—Definitions: This section is identical to H.R. 3621. Note that completely private systems are not considered indirect interconnectors.

Sec. 4—Access Charges: This section preserves in place, with some major changes, the FCC Access Charge decision (CC Docket 78-72). Elements of the decision not addressed in the bill remain unchanged. This includes preservation of Premium Access fees on AT&T or the role of the Joint Board. Likewise, long-distance carriers will continue to only pay for the access they receive. To minimize the impact of the Access Charge on consumers this section changes the ratio of residential to business access charges so that residential customers pay one-third of what businesses pay. In 1994 residential access charges would be $5.35 per month and $16.10 for business customers. This lowers residential costs by $40 and raises business costs by $90 per year.

This section spreads out the access charge phase-in. Under the FCC plan, customers face $2/mo. in 1984 rising to $8.50 in 1989. Under this bill, residential users begin at 50¢/mo. and rises to only $5.35 by 1994. Businesses begin at $1.50 (instead of $6 under the FCC plan) rising to $16.10 in 1994. Both would save substantially in reduced long-distance charges in comparison to H.R. 3621.

Indirect interconnectors pay a "comparable" charge less than that for direct connectors, who remain covered under the FCC's AC decision. Completely private systems are exempt from charges.

Sec. 5—Lifeline Services: Lifeline Service is basic telephone service intended to include a "limited" number of calls with a per-call charge for additional calls. Lifeline Service could not include LMS or OMS (measured service). Persons eligible for AFDC, SSI, or Food Stamps would be eligible for the subsidized rate. State Commissions would establish specific application rules, but eligibility certification would be simple. Most phone companies would offer this service at 30% of the cost of service, approximately $2 to $3 per month.

Sec. 6—Intrastate Competition: To further intrastate toll route competition, the bill shifts jurisdiction over these routes to the FCC.

Sec. 7—Lifeline Service Fund: This establishes a fund to reimburse exchange carriers for their losses in providing Lifeline Service below cost. Revenues will come from Carrier Common Line Charges and indirect interconnectors. the fund will be administered by the Joint Board which also oversees the High Cost Service Fund.

Sec. 8—High Cost Service Fund: This is what is known as the Universal Service Fund. This section codifies the proposed 50-60-95-100 reimbursement taper the Joint Board proposed in CC Docket 80-286. The FCC is estimating the cost of this set-up at $400 million and will ensure that no ratepayer pays more than 158% of the national average.

Sec. 9—Universal Service Study: This section directs the FCC to conduct a five-year study into the future of universal service. The FCC is required to make annual interim reports to Congress and state PUCs. The study is also to examine the basis and background for the cost structures claimed by local telephone companies in their filings before state PUCs.

Sec. 10—Public Participation: This section provides for the reimbursement of participants in FCC or Joint Board proceedings. It is designed to increase the level of potential participation by the public-interest sector in such proceedings. It is adapted from the Committee print of H.R. 5158 (97th Congress).

Sec. 11—Provider of Last Resort: This section grants to state PUCs the authority to require local exchange carriers to be providers of last resort of basic telephone instruments and inside wiring. If such service is required, it is to be provided at no less than cost.

Sec. 12—Competitive Equity: This section prohibits "cross-subsidization." It prohibits carriers from subsidizing unregulated services with revenues from regulated services. At the same time, it prohibits the FCC and

state PUCs from requiring a carrier to use revenues from unregulated services to defray the cost of providing regulated services. Yellow Pages revenues are excluded.

Sec. 13—Effective Date: The Act takes effect upon enactment.●

AN AMERICAN HERO: GERARD B. MORAN

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. LENT. Mr. Speaker, I rise today to bring to the attention of my colleagues the news of a truly heroic act performed by Mr. Gerard B. Moran, who, I am proud to say, lives in Seaford, N.Y., in my Fourth Congressional District.

Mr. Speaker, on rare occasions, we all have heard stories of brave men and women who, at tremendous personal risk, perform great deeds on behalf of others. Yet what Mr. Moran did on a day back in November 1982, was truly a heroic act above and beyond the call of bravery and duty.

Gerard Moran, 31 years of age, was working at his daily chores as the assistant director of personnel at a New York City hospital when an armed man, carrying a machinegun and two pistols, burst into a hospital office suite. Firing a warning shot, this would-be killer rounded up all the innocent bystanders and forced them into a nearby conference room.

The gunman then started toward the suite's occupied offices. Having witnessed what took place, Gerard Moran, disobeying the gunman's orders, ran to the offices to alert its occupants of the oncoming criminal.

At this point, the gunman began firing his guns, wounding two hospital employees. He then lowered his sights on Gerard Moran who stood nearby. At the moment he was about to pull the trigger, Mr. Moran lunged forward and grabbed the barrel of the machinegun. As the two men struggled, the gunman managed to fire another shot before Mr. Moran was finally able to subdue him. After disarming the assailant, Mr. Moran detained him until the police arrived.

In recognition of his heroism, the Carnegie Hero Fund Commission of Pittsburgh has just awarded Mr. Moran a special medal. Mr. Speaker, I believe Mr. Moran is truly one of America's heroes and we too should honor him for his heroic act.

His courage and bravery in saving the lives of so many innocent men and women deserve our commendation. It is a rare man who would step forward, face to face with death, to save the lives of those around him. Yet this is just what Gerard B. Moran did on November 4, 1982.

I am most proud to call Mr. Moran a constituent. I know all my colleagues join me in extending our congratulations to an outstanding American hero, Gerard B. Moran.●

HOUSE JOINT RESOLUTION 139

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mrs. OAKAR. Mr. Speaker, on February 10, I introduced House Joint Resolution 139, a measure designating the week of June 24, 1984, as "Federal Credit Union Week." It is during that week that our Nation's 11,400 Federal credit unions will join in celebrating the 50th anniversary of the signing of the Federal Credit Union Act. I want to thank all the Members who cosponsored this resolution.

From their inception on June 24, 1934, and continuing today, Federal credit unions have faithfully met their statutory mandate to promote thrift among their members and to provide credit for productive purposes. Federal credit unions have grown tremendously over the past 50 years. Today, they hold more than $45 billion in savings and serve more than 26 million members. Yet the orientation of Federal credit unions remains toward smaller, local institutions, with 87.7 percent of Federal credit unions having assets of less than $5 million.

I thank my colleagues once again for their support of House Joint Resolution 139.●

REMEMBER SHCHARANSKY AND NUDEL

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. GOODLING. Mr. Speaker, during the past few days we have been much occupied with Central America. Attention has primarily been focused on covert action in Nicaragua and the state of human rights in El Salvador—lively discussion on these issues has emanated from both sides of the aisle. But in our zeal to determine the legality of action in Nicaragua, and the condition of human rights throughout that region, let us not forget those on the other side of the globe whose human rights are being trampled upon daily. I speak of the Jews of the Soviet Union. I speak of Anatoly Shcharansky, of Ida Nudel, and of countless others.

At this moment, Anatoly Shcharansky lies in a prison cell watching his life slip away from him as the terrible conditions of his prison eat away at the remains of his health. At this moment, Ida Nudel waits in some small Soviet backwater for the authorities to tell her she has no right to reside in that area and must move on. This woman who was sent to Siberia, imprisoned with felons and madmen, forced for her own safety to sleep with an ax under her bed, then released from prison, but denied the vital residence permit, has been forced to wander throughout the Soviet Union in search of some town that would allow her to stay for more than 1 or 2 nights, all the while suffering from a weak heart. For these and other Soviet Jews, the Holocaust has not yet ended. Like Shakespeare's "Macbeth" they have supped full with horrors.

Let us not forget these unfortunate people. I urge all my colleagues to take the initiative and individually write to Yuri Andropov to ask him to allow Shcharansky and Nudel to leave for Israel.●

MEDICARE HOSPITAL INSURANCE PROGRAM

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. MINETA. Mr. Speaker, I am sponsoring H.R. 3405 to reform an excessively and needlessly burdensome provision of the medicare program.

As my colleagues know, the basic medicare hospital insurance program, known as part A, is automatically available to most individuals when they reach the age of 65. Those people who during their working career did not participate in social security, such as teachers and other public employees, are not automatically eligible for part A, but do have the opportunity to purchase such coverage at a rate of $113 a month.

In order to exercise that option to enroll in medicare, you are required to sign up during an initial enrollment period at the time of your 65th birthday. Those people who sign up after that initial enrollment period are charged a late penalty of 10 percent of the basic medicare part A premium for each year they are late in enrolling.

Thus, individuals who are 1 year late in enrolling pay a 10-percent penalty; those 2 years late pay a 20-percent penalty, and so forth. Under current law, this penalty is paid each and every month of coverage for the rest of the beneficiary's life.

My bill would keep the existing penalty structure in place, with one significant change. Under my bill, the penalty would be paid for twice the number of years the enrollment was delayed past the appropriate time, after which time the premium would revert to the regular monthly charge in effect at that time.

Thus, someone 1 year late in enrolling would pay a 10-percent penalty for 2 years; someone 2 years late would pay a 20-percent penalty for 4 years, and so on. Such individuals would receive credit toward the total years required for the time they have already paid penalties. No refunds, however, would be available.

For example, at the current monthly rate of $113, a 10-percent penalty is $11.30. Under current law, someone eligible to pay that penalty would pay it each and every month for the rest of their lives. Under H.R. 3405, the penalty would be paid for only 2 years. The following table shows the differences under current law and as changed by this legislation:

MEDICARE PENALTIES UNDER CURRENT LAW AND UNDER H.R. 3405

Years late	Penalty rate (percent)	Duration	
		Current law	Under H.R. 3405
1	10	Forever	2 yr.
2	20	...do...	4 yr.
3	30	...do...	6 yr.

In addition to part A, this legislation would also affect the penalties now charged for late enrollment in part B, the supplementary medical insurance coverage.

These penalty fees can be a terrible burden for seniors. To be sure, the Government has a legitimate need to encourage prompt enrollment. Without such a graduated system of penalties, it would only be natural for some individuals to delay enrollment until the onset of a major illness. Such delays in enrollment would, of course, deny the system significant revenues needed to keep the system solvent.

On the other hand, in practice this penalty has excessively penalized a small group of individuals. According to one estimate only about 18,000 people nationwide—mostly retired public employees—purchase the part A insurance, and only about 5,000 of them are paying some form of penalty.

One group that I am aware of, in particular, are retired school teachers in California, who believed in good faith that they had health insurance from Blue Cross. That Blue Cross policy was canceled, however, and by the time the retired teachers learned what had happened and understood that they needed to sign up for medicare, many of them were assessed penalties of from 1 to 3 years. Under current law, these teachers will pay these penalties for the rest of their lives.

Mr. Speaker, this is an important measure. For those who are forced to it, the penalty is a burdensome and difficult requirement. This is a moderate measure which maintains the basic premise and operation of the graduated penalty system, while at the same time eliminating its most oppressive aspects.

I am pleased to have the support of my colleagues from California, Mr. PANETTA and Mr. EDWARDS, for this legislation and I urge its careful and thoughtful consideration by the Congress.

Thank you.●

ALZHEIMER'S DISEASE

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. CONTE. Mr. Speaker, I would like to bring to the attention of my colleagues an article from Time magazine (July 11, 1983) describing the serious national health problem of Alzheimer's disease.

An estimated 5 percent of Americans over the age of 65 suffer from this dementing disorder. Equally startling, some 60,000 Americans in their forties and fifties—people still in the prime of life—are victims of what was once thought to be a disease of old age.

Scientists now know that Alzheimer's disease is not a natural result of old age. It is a disease. Mercifully, not every older person is afflicted. But enough are—and with the steadily growing number of Americans reaching age 65, more and more will fall victim—that conquering this devastating disease must be a national task of utmost priority.

In the forefront of the battle against Alzheimer's disease is the National Institute of Neurological and Communicative Disorders and Stroke (NINCDS). The NINCDS is the focal point within the Federal Government for brain research, and is the world's leader in developing the new technology scientists are now using to learn more about how the brain works and what goes wrong in Alzheimer's disease.

I commend the NINCDS for its carefully planned research attack on Alzheimer's disease and pledge my continued support for this effort until a cure and a prevention are found.●

THE STATUS OF INSURANCE TAXATION REVISION

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. STARK. Mr. Speaker, the Select Revenue Measures Subcommittee, which I chair, has spent the past few months developing a proposal for the taxation of life insurance companies.

This proposal, which has been the subject of subcommittee hearings, is the product of enormous staff work aided by the assistance and cooperation from the life insurance industry. The proposal, I believe, represents a sound starting point for the development of a final legislative product, which will establish realistic tax policy reflecting the current nature of the life insurance industry.

However, to achieve legislation that is fair and reasonable to all parties involved will required the continued cooperation and hard work that have marked these past few months. I believe Hon. DAN ROSTENKOWSKI, chairman of the House Ways and Means Committee, described the issue at hand and set the tenor for the upcoming legislative effort in a speech to the Massachusetts Mutual Life Insurance Co. delivered July 26. I would like to call members' attention to that speech which I feel explains the situation well.

The speech follows:

INSURANCE SPEECH BY DAN ROSTENKOWSKI

Insurance taxation is about as arcane and complex as any provisions of the code. Those of you who practice the art have my admiration—if not my envy.

My reason for accepting your invitation is not to duel over the fine points of insurance taxation, but to make the strongest case possible for continuing a working relationship between Congress and the life insurance industry in the months to come. We are bound by two contracts: first, is the budget instruction on revenue and second, is the expiration of the "stop gap" provisions at the end of this year. The first is a target. The second is a demand.

"Stop gap" was, as we all agreed last year, the best we could work out in a short time. It serves as a temporary remedy while we pursue our mutual commitment to seek a more rational, more balanced and permanent formula. Modified co-insurance was the first leg of the journey Stop gap was the second leg. We have now begun the last.

Our earliest and most significant decision was to make Capitol Hill—not the chambers of the ACLI or the Treasury—the forum for legislative choice. It is more than a symbol of our sense of jurisdictional prerogatives. It is a declaration that we are not willing, as we have in the past, to cede legislative control to the insurance industry—that we want to complete a broad and durable restructuring of insurance taxation that has public understanding and approbation.

We understood then, as we do today, that ultimate legislative success rests largely on flexibility and the willingness to work with you in the industry. We are fully aware that we cannot pick our way through the forest alone—and achieve both fairness and simplicity.

The most recent benchmark in this process is the Stark-Moore discussion draft now under consideration in the Select Revenue Measures Subcommittee. Both men have devoted enormous amounts of time and energy in an attempt to frame the issues and offer a more rational, simpler tax structure for life insurance. Hundreds of hours have been logged since January examining all facets of the life insurance business and the complexities of the 1959 Act and its predecessors—many of them spent with your industry's best technicians.

The Stark-Moore concept is a start, not an end. It is not perfect. It is not, perhaps, without political as well as technical flaws. But it is a significant product and stands as the point of reference for Thursday's hearings.

We are aware of the contradictory positions the mutuals and stocks have taken this year. We understand the economic and competitive stakes in restructuring. It is axiomatic, however, that any long-lasting revision of tax rules for life insurance companies must be built by consensus. And my job as chairman is to husband that consensus.

Pete Stark and Henson Moore have drawn up the preliminary blueprints for a new insurance taxation structure. We all understand that it does not perfectly suit the stocks or the mutuals. We sincerely invite you to suggest alterations. I would caution, however, that blatant attempts to undermine the basic structure of the Stark-Moore proposal will be met with resistance. I want to be very clear on that point.

The ultimate level of the aggregate tax burden on the life insurance industry will be determined much less by the recent budget instruction than what we on the Committee on Ways and Means believe is proper and fair relative to other economic sectors. Again, we are far more concerned with the structure than the precise cost, or revenue impact.

We are not unmindful of the unsettled state of financial intermediary deregulation and competition. Some have argued that even if we were to succeed in a good faith effort to accurately measure the economic income of life insurance companies, any tax increase—no matter how fair—would adversely affect life insurance companies relative to banks, property/casualty companies and holding companies. Therefore, goes the argument, the aggregate burden on life insurance companies shouldn't increase much at all.

This argument, of course, is a convenient reason to abandon any effort to reform the tax code. As it applies to the insurance industry, however, it has three fundamental flaws:

First, the industry itself suggested a two-year stop gap—which expires in five months.

Second, as much as we would like, we cannot reform the entire tax code in one session of Congress.

And third, there is a broad, if not yet well organized, effort underway to examine the tax treatment of property and casualty companies, banks, and other financial intermediaries. But we have to start somewhere.

The alternatives to failing to reach a compromise between Congress and the insurance industry before year's end are forbidding.

Returning to the provisions of the 1959 Act would undermine your economic standing.

In the event that the Stark-Moore initiative stalls or fails, we might have to develop a set of temporary tax rules to replace the stop gap provisions—with perhaps another stop gap. But given budget realities, we might be forced to add some sort of "toll charge." Such a development at best would be of speculative help to your industry and, at worst, could be harsh by current stop gap standards. This is not a bargaining posture. It is a budgetary reality—given the shortfall in revenues estimated with regard to the current stop gap provisions.

That's why Thursday's hearings are so important. They offer the forum to make changes in the Stark-Moore design. And perhaps more critical, they will set the temper of our relationship for some time to come. Intemperate broadsides and biased substitutes won't do.

We've all been negotiating on insurance taxation for nearly three years. Your representatives have been enormously cooperative and instructive. Our representatives have been receptive and appreciative. Together, we have the time and the knowledge to bring about an historic adjustment in insurance taxation. I am committed to that end. My committee is committed to that end—both in substance and in spirit. I urge your continued partnership in that effort.●

WHEELING-PITTSBURGH/BRAZIL DEAL EQUALS LOSS OF AMERICAN JOBS

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. KOSTMAYER. Mr. Speaker, I hate to say I told you so, but I told you so.

News reports this morning indicate that the Wheeling-Pittsburgh Steel Corp. is presently negotiating with Brazil to import unfinished steel slabs for finishing in this country.

What is ominous about this report, Mr. Speaker, is that Wheeling-Pittsburgh is the second major steel company trying to import foreign steel for finishing, following United States Steel's announcement that it was negotiating such a deal with the Government owned British Steel Corp.

It is clear that such arrangements pose a threat to America's steelmaking capacity. Foreign steel is subsidized in contravention of American trade laws, and its importation into our country means that American steelworkers will lose their jobs so that foreign workers can keep theirs. It is as simple as that.

Unless these proposals are stopped the Reagan administration will have to answer not just to the thousands of steel workers who lost their jobs, but to our countrymen who will shortly live in a country that has lost the ability to produce any steel at all.

In September the Subcommittee on International Policy and Trade under the chairmanship of Representative BONKER will hold hearings on the proposed deal between United States Steel and British Steel. As the Wheeling-Pittsburgh/Brazil deal now confirms, the issue of foreign investment in our steel industry demands the attention of the Congress because of its potential impact on our domestic steelmaking capacity. I urge my colleagues to help insure our trade laws are enforced, and to support efforts to stop these two deals from displacing American workers.●

WAGE EQUITY FOR ALL WORKERS: INCREASE THE MINIMUM WAGE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. BIAGGI. Mr. Speaker, today I am introducing legislation to provide for a long-overdue increase in the minimum wage from the current $3.35 per hour to $4.15 per hour. I propose this legislation in order to bring equity to our lowest-paid working men and women who depend upon this wage for their daily existence.

The last time the minimum wage was increased was on January 1, 1981. The ravages of inflation have dealt a severe blow to the purchasing power of the dollar and its ability to insure an adequate income to American workers. The current level of $3.35 is no longer acceptable. An increase is long overdue when one considers that a 1981 dollar is worth 83 cents today—a 17-percent decline.

A closer look at who receives the minimum wage as provided by the Fair Labor Standards Act of 1938 will paint a stark picture of the kinds of workers this bill will assist. Of the 98.3 million total American workers, 61.3 million are covered by the Fair Labor Standards Act which guarantees them the minimum wage. Of these 61.3 million workers, at least 11 million receive the minimum wage of $3.35 per hour and would directly benefit from this legislation. Higher wage earners would indirectly benefit as well as a result of a hierarchical wage ordering/pay system.

Who do these 11 million wage earners represent? Examination by age groups reveals that teenage and elderly workers are much more likely to receive the minimum wage than members of other age groups. Almost 70 percent of all minimum wage workers are adults 20 years of age and older; 50 percent are 25 or over. Looking at these earners by households will show that role of the minimum wage earner within the family unit. Over half of all minimum wage earners are either household heads—or spouses of household heads. Although male and female household heads together account for more than one-fourth of all minimum wage workers, women who head households are much more likely to earn the minimum wage than their male counterparts.

The impact of low wages disproportionately hurts women who are overrepresented in the entire minimum wage population. Women are three times more likely to be heading households while earning the minimum wage than men who are earning it. There are at least 1 million women

who are the only workers in their families—which represents 10 percent of all minimum wage workers and over 40 percent of all low-income single wage earners.

Looking at the impact upon women in differing marital situations does not improve their earnings record. Fourteen percent of married women, as compared to only 4 percent of married men are minimum wage workers. In addition, widowed, divorced or separated are especially burdened—twice as many of them as their male counterparts are employed but nearly four times as many of them work for the minimum wage or less.

An increase in the current $3.35 per hour is needed to help the poorest of American families. One-quarter of all minimum wage earners have family incomes of $6,000 per year or less according to the most recent data. An added 17.2 percent earn between $6,000 and $10,000 per year. Clearly, these families are the very same families that have been caught in the political and economic bondage of the past 3 years. They are the very same people that the now infamous safety net is supposed to assist. We now know that in fact, these very same people are those Americans who have been forced to bear the full weight of our past and present economic woes while at the same time living with woefully inadequate wages.

Mr. Speaker, 31 months is an unacceptably long time to wait for a wage increase. However, for the 11 million Americans who are receiving the minimum wage currently, this has been the amount of time they have been forced to accept this level of pay. The sheer demographics of this issue compel us to act to increase this level to $4.15 which would be the amount needed if we are to compensate for inflation as well as build upon the history of increases of the minimum wage since it was first enacted in 1938.

The same reasons for increasing the minimum wage that were given when the Fair Labor Standards Act was first adopted apply to the workforce today. The minimum wage guarantees a basic, adequate income for working men and women in this country. I believe that minimum wage earners have had to wait for too long for such a guarantee. If we are to adhere to the intent of the FLSA, then we must act accordingly to increase this wage base, otherwise, the working poor of this country will be forced into poverty because we have ignored their needs and not given them the proper ammunition with which to combat inflation. Dollars now buy less than they did 31 months ago—it is time to recognize that fact and give working Americans who rely on this wage as their sole or primary source of income a long in coming increase.

As a senior member of the House Education and Labor Committee, I intend to actively work to focus attention on this issue in order that we might pass this legislation in a timely fashion. To delay this bill would be to continue to delay—and deny the basic needs of the poorest of our work force.●

DENSE PACK OR ACID RAIN, WHITE HOUSE "SCIENCE" IS ALL THE SAME

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. RAHALL. Mr. Speaker, I believe the following editorial from the July 26, 1983, edition of the Wall Street Journal is highly illuminating. I ask that it be printed in the RECORD.

WHAT ACID RAIN?

We seem to be experiencing a sudden shower of "acid-rain" studies. The White House has just published two, the National Academy of Sciences another and the Environmental Protection Agency is working on one. What's apparent so far isn't how much we know about acid rain, it's how little. But some members of the Reagan administration have been put in such fear of the environmental lobby that they want private industry—and its customers, of course—to throw billions of dollars at the problem while its causes still are clouded with doubt.

The point man of this effort is presidential science adviser George A. Keyworth II, better known as the man who tried to give us "dense-pack" basing for the MX missile. Mr. Keyworth's acid-rain study isn't due out until fall, but he has been in such a hurry to get on the record that he has issued a sketchy five-page summary. It recommends that "additional steps should be taken now" to make a "meaningful reduction" in the emissions of sulfur compounds into the atmosphere. Presumably those steps include adding more super-costly scrubbers to the Midwest power plants the acid-rain lobbyists claim are ruining lakes in the Northeast U.S. and Southeast Canada.

What's the scientific basis for recommending such huge expenditures? Not much. "The overall scientific understanding of the various aspects of acidic precipitation is quite incomplete at the present time and will continue to have major uncertainties well into the future," the Keyworth summary admits. It says getting at the truth will take "at least 10 or 20 years" of additional research. While recommending action now based on "imperfect data" runs the risk of error, the White House science types insist that inaction pending more research entails "even greater risk of damage." And after all, we might add, it's someone else's money.

The National Academy of Sciences report takes a different tack. Curbing sulfur dioxide emissions throughout eastern North America would reduce acid deposition in the region, it argues. But the NAS can't predict whether substantially reducing emissions from Midwest power plants would help the Northeast U.S. and Canada. Moreover, the academy's scientists say they really don't fully understand the meteorological processes that may (or may not) be making precipitation more acidic. Their modeling suffers from a limited data base. "There is, admittedly, much to be learned about the relationships between emissions and deposition," the study states.

Neither the Keyworth nor NAS studies pay much heed to that considerable number of scientists who believe that what's called acid rain probably is more the result of changing natural conditions than man-made pollution. The Western U.S. has been less dry, on the whole, in recent years, which means that less alkaline dust is being picked up to neutralize the natural acidity of rain clouds as they move eastward, one such theory holds.

In addition, changes in local farming and forestry practices near the affected lakes and streams may be increasing the amount of acidic runoff. Rising precipitation levels may also be overwhelming the natural buffering capacity of sensitive areas in the Northeast. Declining fish-stocking in Adirondack lakes, coupled with increased fishing, may be more responsible for declining fish populations than those suspected rain clouds from Ohio and West Virginia.

These and other nagging questions about the acid-rain hypothesis were given more consideration by the White House Council on Environmental Quality, which in its annual report noted that the air generally is getting cleaner (something that seems self-evident and makes us wonder why, if acid rain is a result of pollution, it is said to be getting worse). Emphasizing the need for more long-term acid-rain research, it says that the work over the past 10 years shows that "the causes and effects of acid rain are certainly more complicated than once believed."

As part of a joint U.S.-Canadian acid-rain study published earlier this year, the U.S. team concluded that "cause-and-effect relationships have often not been clearly established." It couldn't differentiate between manmade and natural causes, for example, and cited our lack of knowledge about key chemical and biological processes that may effect water acidity.

In the face of all this scientific uncertainty, the call for "immediate action" is strange indeed. Peabody Holding Co., admittedly with some bias as a result of its coal interests, estimates tighter emission rules would cost Midwestern and Southern residents $7 billion annually in higher electricity bills and would create a loss of $5 billion in annual mining wages. Edison Electric Institute calculates electricity bills in some parts of the U.S. would rise as much as 50%.

That seems to us like a lot of money to extract from ratepayers on the basis of so little understanding. Perhaps Mr. Keyworth should be promoted to a political post and let someone else take over the job of evaluating scientific inquiry.●

WELFARE FOR THE RICH

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. ANDERSON. Mr. Speaker, it seems that every day we are informed of new outrages occurring under the Payment-in-Kind Tax Treatment Act of 1983, the so-called PIK program. In today's Washington Post, July 28,

1983, is an article explaining how large conglomerates, such as Bangor Punta, Tenneco, Chevron USA, Shell Oil, and Superior Oil will reap millions of dollars worth of free cotton from PIK. These companies own farms in Fresno, Kings, Kern, and Tulare Counties in California where "nearly 50 farms will be given cotton worth $1 million or more each, according to Department of Agriculture records at county offices of the Agriculture Stabilization and Conservation Service. They also show that dozens of smaller farms in the four counties will receive free cotton worth more than $500,000 through the Federal program.

The article cites the South Lake Farms, owned by Producers Cotton Oil Co., a subsidiary of the Bangor Punta Corp., a Connecticut-based conglomerate, which "received $1 million in disaster aid in 1979. This year it will get at least 4,524,329 pounds of PIK cotton, according to the Government records."

In addition, "in Kern County, Belridge Farms, an affiliate of Shell Oil, is due to get 3.1 million pounds of cotton, worth about $2.5 million, plus 37,000 bushels of free Federal wheat, worth about $150,000, through another part of the PIK program."

"In Kern and Tulare Counties, farming subsidiaries of Tenneco West, an arm of the Houston-based Tenneco oil and gas multinational, will get slightly more than 2 million pounds of cotton, with a current resale value of about $1.7 million."

"Chevron USA, although not directly involved in farming, will cash in on PIK through its ownership of extensive agricultural land put into the program by farmers who operate on leases."

"At least nine of these operations in Kern, Fresno, and Kings Counties will give Chevron more than 502,000 pounds of cotton, with a value of at least $401,000, as its share from the PIK program. Chevron also stands to get at least 2,346 bushels of PIK-program wheat from two of its Kern lease operations."

"In Tulare County, the Superior Farming Co., a subsidiary of Superior Oil, will get 222,707 pounds of cotton through PIK, while the Standard Oil Co., operator of another farm, will receive 43,641 pounds of cotton."

In the same edition of the Post, is another article outlining how Everett G. Rank, chief administrator of the PIK program, will receive about $214,000 worth of free cotton from PIK. I urge all of my colleagues to take notice of this story. As the only Member of Congress to vote against the PIK program, I must reluctantly say, "I told you so." The article follows:

[From the Washington Post, July 28, 1983]

TOP PIK OFFICIAL HAS FARM IN PROGRAM

(By Ward Sinclair)

Everett G. (Bud) Rank Jr., on leave from his California farm to work in the Reagan administration, will receive about $214,000 worth of free cotton from the federal payment-in-kind (PIK) program that he administers in the Agriculture Department, according to government records.

Rank is one of five partners in Cinco Farms, a Fresno County farming operation that is scheduled to receive 1,338,820 pounds of free surplus cotton through PIK. His share would be 267,764 pounds of cotton, which could be sold at today's prices for about 80 cents a pound, according to cotton handlers in Fresno, the center of San Joaquin Valley agriculture.

Rank said in an interview that he did not learn until last week that his farm had been enrolled in the PIK program and that he saw no conflict between that and his role as chief administrator of the PIK program.

But David Scott, chief counsel of the Office of Government Ethics at the Office of Personnel Management, said yesterday, "There clearly is a problem here. We will want to take a look into it, and will begin by contacting ethics people at USDA to take a look at this."

William J. Riley Jr., the Agriculture Department's director of personnel, said that he was not aware that Rank's farm was enrolled in PIK.

"Yes, of course, we will take a look at it," he said. "But I don't know if we would come to a different conclusion than Mr. Rank has."

Secretary of Agriculture John R. Block said that he also was unaware of Rank's enrollment in PIK, but he added that Rank had met federal requirements by giving up a directorship of the operation.

In contrast to Rank, Block has pledged that his own large farm operations in Illinois would not take part in federal farm aid programs, thus avoiding any real or apparent conflicts.

Block appointed Rank, a Republican, as national administrator of the Agriculture Department's Stabilization and Conservation Service shortly after the Reagan administration took office in 1981. Rank became chief of the PIK program when it was set up early this year to prop up farm prices and reduce crop surpluses.

Rank said that, to avoid conflicts of interest, he gave up his directorship of Cinco Farms when he came to Washington. He said that he was unable to sell his stock in the partnership when he came here and continues to receive rent from the farming operation in the huge Westlands Water District of the San Joaquin Valley.

Cinco Farms is headed by William McFarlane, a Fresno County grower who was president of a coalition of agribusiness interests that lobbied Congress heavily in 1981 and 1982 to retain federal irrigation subsidies in Westlands and in other western states.

Government records indicate that Cinco Farms enrolled its entire eligible base acreage of 2,163 acres in the PIK cotton program. Under terms of the federal surplus-reduction scheme, Cinco Farms is leaving that land idle this year and will receive 1.3 million pounds of surplus cotton for resale in the fall.●

THE GANDHI NOBODY KNOWS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. McDONALD. Mr. Speaker, a myth is being carefully built with the movie entitled: "Gandhi." It builds a myth of the man that is not entirely accurate. The film is, in reality, almost a pure propaganda film, as Mr. Richard Grenier, the movie reviewer for the magazine Commentary pointed out in the March 1983 issue. Mr. Grenier indicates some of the myths and unrealities of the movie in most precise way.

Extracts from his article follow:

[From Commentary, March 1983]

THE GANDHI NOBODY KNOWS

(By Richard Grenier)

I had the singular honor of attending an early private screening of Gandhi with an audience of invited guests from the National Council of Churches. At the end of the three-hour movie there was hardly, as they say, a dry eye in the house. When the lights came up I fell into conversation with a young woman who observed, reverently, that Gandhi's last words were "Oh, God," causing me to remark regretfully that the real Gandhi had not spoken in English, but had cried, Hai Rama! ("Oh, Rama"). Well, Rama was just Indian for God, she replied, at which I felt compelled to explain that, alas, Rama, collectively with his three half-brothers, represented the seventh reincarnation of Vishnu. The young woman, who seemed to have been under the impression that Hinduism was Christianity under another name, sensed somehow that she had fallen on an uncongenial spirit, and the conversation ended.

At a dinner party shortly afterward, a friend of mine, who had visited India many times and even gone to the trouble of learning Hindi, objected strenuously that the picture of Gandhi that emerges in the movie is grossly inaccurate, omitting, as one of many examples, that when Gandhi's wife lay dying of pneumonia and British doctors insisted that a shot of penicillin would save her, Gandhi refused to have this alien medicine injected in her body and simply let her die. (It must be noted that when Gandhi contracted malaria shortly afterward he accepted for himself the alien medicine quinine, and that when he had appendicitis he allowed British doctors to perform on him the alien outrage of an appendectomy.) All of this produced a wistful mooing from an editor of a major newspaper and a recalcitrant, "But still. . . ." I would prefer to explicate things more substantial than a wistful mooing, but there is little doubt it meant the editor in question felt that even if the real Mohandas K. Gandhi had been different from the Gandhi of the movie it would have been nice if he had been like the movie-Gandhi, and that presenting him in this admittedly false manner was beautiful, stirring, and perhaps socially beneficial. As it happens, the government of India openly admits to having provided one third-of the financing of Gandhi out of state funds, straight out of the national treasury—and after close study of the finished product I would not be a bit surprised to hear that it

was 100 percent. If Pandit Nehru is portrayed flatteringly in the film, one must remember that Nehru himself took part in the initial story conferences (he originally wanted Gandhi to be played by Alec Guinness) and that his daughter Indira Gandhi is, after all, Prime Minister of India (through no relation to Mohandas Gandhi). The screenplay was checked and rechecked by Indian officials at every stage, often by the Prime Minister herself, with close consultations on plot and even casting. If the movie contains a particularly poisonous portrait of Mohammed Ali Jinnah, the founder of Pakistan, the Indian reply, I suppose would be that if the Pakistanis want an attractive portrayal of Jinnah let them pay for their own movie. A friend of mine, highly sophisticated in political matters but innocent about film-making, declared that Gandhi should be preceded by the legend: The following film is a paid political advertisement by the government of India.

Gandhi, then, is a large, pious, historical morality tale centered on a saintly, sanitized Mahatma Gandhi cleansed of anything too embarrassingly Hindu (the word "caste" is not mentioned from one end of the film to the other) and, indeed, of most of the rest of Gandhi's life, much of which would drastically diminish his saintliness in Western eyes. There is little to indicate that the India of today has followed Gandhi's precepts in almost nothing. There is little, in fact, to indicate that India is even India. The spectator realizes the scene is the Indian subcontinent because there are thousands of extras dressed in dhotis and saris.

I cannot honestly say I had any reasonable expectation that the film would show scenes of Gandhi's pretty teenage girl followers fighting "hysterically" (the word was used) for the honor of sleeping naked with the Mahatma and cuddling the nude septuagenarian in their arms. (Gandhi was "testing" his vow of chastity in order to gain moral strength for his mighty struggle with Jinnah.) When told there was a man named Freud who said that, despite his declared intention, Gandhi might actually be enjoying the caresses of the naked girls, Gandhi continued, unperturbed. Nor, frankly, did I expect to see Gandhi giving daily enemas to all the young girls in his ashrams (his daily greeting was, "Have you had a good bowel movement this morning, sisters?"), nor see the girls giving him his daily enema. Although Gandhi seems to have written less about home rule for India than he did about enemas, and excrement, and latrine cleaning ("The bathroom is a temple. It should be so clean and inviting that anyone would enjoy eating there"), I confess such scenes might pose problems for a Western director.

Gandhi rose early, usually at three-thirty, and before his first bowel movement (during which he received visitors, although possibly not Margaret Bourke-White) he spent two hours in meditation, listening to his "inner voice." Now Gandhi was an extremely vocal individual, and in addition to spending an hour each day in vigorous walking, another hour spinning at his primitive spinning wheel, another hour at further prayers, another hour being massaged nude by teenage girls, and many hours deciding such things as affairs of state, he produced a quite unconscionable number of articles and speeches and wrote an average of sixty letters a day. All considered, it is not really surprising that his inner voice said different things to him at different times. Despising consistency and never checking his earlier statements, and yet inhumanly obstinate about his position at any given moment, Gandhi is thought by some Indians today (according to V.S. Naipaul) to have been so erratic and unpredictable that he may have delayed Indian independence for twenty-five years.

Anti-racism: the reader will have noticed that in the present-day community of nations South Africa is a pariah. So it is an absolutely amazing piece of good fortune that Gandhi, born the son of the Prime Minister of a tiny Indian principality and received as an attorney at the bar of the Middle Temple in London, should have begun his climb to greatness as a member of the small Indian community in, precisely, South Africa. Natal, then a separate colony, wanted to limit Indian immigration and, as part of the government program, ordered Indians to carry identity papers (an action not without similarities to measures under consideration in the U.S. today to control illegal immigration). The film's lengthy opening sequences are devoted to Gandhi's leadership in the fight against Indians carrying their identity papers (burning their registration cards), with for good measure Gandhi being expelled from the first-class section of a railway train, and Gandhi being asked by whites to step off the sidewalk. This inspired young Indian leader calls, in the film, for interracial harmony, for people to "live together."

The film, moreover, does not give the slightest hint as to Gandhi's attitude toward blacks, and the viewers of Gandhi would naturally suppose that, since the future Great Soul opposed South African discrimination against Indians, he would also oppose South African discrimination against black people. But this is not so. While Gandhi, in South Africa, fought furiously to have Indians recognized as loyal subjects of the British empire, and to have them enjoy the full rights of Englishmen, he had no concern for blacks whatever. In fact, during one of the "Kaffir Wars" he volunteered to organize a brigade of Indians to put down a Zulu rising, and was decorated himself for valor under fire.

For, yes, Gandhi (Sergeant-Major Gandhi) was awarded Victoria's coveted War Medal. Throughout most of his life Gandhi had the most inordinate admiration for British soldiers, their sense of duty, their discipline and stoicism in defeat (a trait he emulated himself). He marveled that they retreated with heads high, like victors. There was even a time in his life when Gandhi, hardly to be distinguished from Kipling's Gunga Din, wanted nothing so much as to be a Soldier of the Queen. Since this is not in keeping with the "spirit" of Gandhi, as decided by Pandit Nehru and Indira Gandhi, it is naturally omitted from the movie.

It should be understood that it is unlikely Gandhi ever truly conceived of "becoming" an Englishman, first, because he was a Hindu to the marrow of his bones, and also, perhaps, because his democratic instincts were really quite weak. He was a man of the most extreme, autocratic temperament, tyrannical, unyielding even regarding things he knew nothing about, totally intolerant of all opinions but his own. He was, furthermore, in the highest degree reactionary, permitting in India no change in the relationship between the feudal lord and his peasants or servants, the rich and the poor. In his The Life and Death of Mahatma Gandhi, the best and least hagiographic of the full-length studies, Robert Payne, although admiring Gandhi greatly, explains Gandhi's "new direction" on his return to India from South Africa as follows:

He spoke in generalties, but he was searching for a single cause, a single hard-edged task to which he would devote the remaining years of his life. He wanted to repeat his triumph in South Africa on Indian soil. He dreamed of assembling a small army of dedicated men around him, issuing stern commands and leading them to some almost unobtainable goal.

Gandhi, in short, was a leader looking for a cause. He found it, of course, in home rule for India and, ultimately in independence.

The idea of swaraj, originated by others, crept into Gandhi's mind gradually. With a fair amount of winding about, Gandhi, roughly, passed through three phases. First, he was entirely pro-British, and merely wanted for Indians the rights of Englishmen (as he understood them). Second, he was still pro-British, but with the belief that, having proved their loyalty to the empire, Indians would be granted some degree of swaraj. Third, as the home-rule movement gathered momentum, it was the swaraj, the whole swaraj, and nothing but the swaraj, and he turned relentlessly against the crown. The movie to the contrary, he caused the British no end of trouble in their struggles during World War II.

Nonviolence: but the real center and raison d'être of Gandhi is ahimsa, nonviolence, which principle when incorporated into vast campaigns of noncooperation with British rule the Mahatma called by an odd name he made up himself, satyagraha, which means something like "truth-striving." During the key part of his life, Gandhi devoted a great deal of time explaining the moral and philosophical meanings of both ahimsa and satyagraha. But much as the film sanitizes Gandhi to the point where one would mistake him for a Christian saint, and sanitizes India to the point where one would take it for Shangri-la, it quite sweeps away Gandhi's ethical and religious ponderings. his complexities, his qualifications, and certainly his vacillations, which simplifying process leaves us with our old European friend: pacifism. It is true that Gandhi was much impressed by the Sermon on the Mount, his favorite passage in the Bible, which he read over and over again. But for all the Sermon's inspirational value, and its service as an ideal in relations among individual human beings, no Christian state which survived has ever based its policies on the Sermon on the Mount since Constantine declared Christianity the official religion of the Roman empire. And no modern Western state which survives can ever base its policies on pacifism. And no Hindu state will ever base its policies on ahimsa. Gandhi himself—although the film dishonestly conceals this from us—many times conceded that in dire circumstances "war may have to be resorted to as a necessary evil." But it is not widely realized (nor will this film tell you) how much violence was associated with Gandhi's so-called "nonviolent" movement from the very beginning. India's Nobel Prize-winning poet, Rabindranath Tagore, had sensed a strong current of nihilism in Gandhi almost from his first days, and as early as 1920 wrote of Gandhi's "fierce joy of annihilation," which Tagore feared would lead India into hideous orgies of devastation—which ultimately proved to be the case. Robert Payne has said that there was unquestionably an "unhealthy atmosphere" among many of Gandhi's fanatic followers, and that Gandhi's habit of going to the edge of violence and then suddenly retreat-

ing was fraught with danger. "In matters of conscience I am uncompromising," proclaimed Gandhi proudly. "Nobody can make me yield." The judgment of Tagore was categorical. Much as he might revere Gandhi as a holy man, he quite detested him as a politican and considered that his campaigns were almost always so close to violence that it was utterly disingenuous to call them nonviolent.

At the famous Amritsar massacre of 1919, shot in elaborate and loving detail in the present movie and treated by post-independence Indian historians as if it were Auschwitz, Ghurka troops under the command of a British officer, General Dyer, fired into an unarmed crowd of Indians defying a ban and demonstrating for Indian independence. The crowd contained women and children: 379 persons died; it was all quite horrible. Dyer was court-martialed and cashiered, but the incident lay heavily on British consciences for the next three decades, producing a severe inhibiting effect. Never again would the British empire commit another Amritsar, anywhere.

As soon as the oppressive British were gone, however, the Indians—gentle, tolerant people that they are—gave themselves over to an orgy of bloodletting. Trained troops did not pick off targets at a distance with Enfield rifles. Blood-crazed Hindus, or Muslims, ran through the streets with knives, beheading babies, stabbing women, old people. Interestingly, our movie shows none of this on camera (the oldest way of stacking the deck in Hollywood). All we see is the aged Gandhi, grieving, and of course fasting, at these terrible reports of riots. And, naturally, the film doesn't whisper a clue as to the total number of dead, which might spoil the mood somehow. The fact is that we will never know how many Indians were murdered by other Indians during the country's Independence Massacres, but almost all serious studies place the figure over a million, and some such as Payne's sources, go to 4 million. So, for those who like round numbers, the British killed some 400 seditious colonials at Amritsar and the name Amritsar lives in infamy, while Indians may have killed some 4 million of their own countrymen for no other reason than that they were of a different religious faith and people think their great leader would make an inspirational subject for a movie.

But Gandhi's monstrous behavior to his own family is notorious. He denied his sons education—to which he was bitterly hostile. His wife remained illiterate. Once when she was very sick, hemorrhaging badly, and seemed to be dying, he wrote to her from jail icily: "My struggle is not merely political. It is religious and therefore quite pure. It does not matter much whether one dies in it or lives. I hope and expect that you will also think likewise and not be unhappy." To die, that is. On another occasion he wrote, speaking about her: "I simply cannot bear to look at Ba's face. The expression is often like that on the face of a meek cow and gives one the feeling, as a cow occasionally does, that in her own dumb manner she is saying something. I see, too, that there is selfishness in this suffering of hers. . . ." And in the end he let her die, as I have said, rather than allow British doctors to give her a shot of penicillin (while his inner voice told him that it would be all right for him to take quinine). He disowned his oldest son, Harilal, for wishing to marry. He banished his second son for giving his struggling older brother a small sum of money. Harilal grew quite wild with rage against his father, attacked him in print, converted to Islam, took to women, drink, and died an alcoholic in 1948. The Mahatma attacked him right back in his pious way, proclaiming modestly in an open letter in *Young India*, "Men may be good, not necessarily their children."

What are we to make of this Gandhi? We are dealing with two strangenesses here, Indians and Gandhi himself. The plain fact is that both Indian leaders and the Indian people ignored Gandhi's precepts almost as thoroughly as did Hitler. They ignored him on sexual abstinence. They ignored his modifications of the caste system. They ignored him on the evils of modern industry, the radio, the telephone. They ignored him on education. They ignored his appeals for national union, the former British Raj splitting into a Muslim Pakistan and a Hindu India. No one sought a return to the Arcadian Indian village of antiquity. They ignored him, above all, on *ahimsa*, nonviolence.●

PERSONAL EXPLANATION

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. SIMON. Mr. Speaker, earlier today the House approved the conference report on H.R. 2973, Interest and Dividends Tax Withholding Repeal, in a vote of 392 to 18.

I was on the floor at the time of the vote and certainly intended to cast an "aye" vote, reflecting my longstanding support for this action in repealing the program of withholding set to begin next month. Though I have a recollection of voting as such, my vote was not recorded, for whatever reason. Even if one vote would not have made a difference in this decision, my constituents feel as strongly as I do about this issue, and they will want to know that I approved today's favorable action on H.R. 2973.●

A DEDICATED MAN—PARRAN JARBOE

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. DYSON. Mr. Speaker, I rise today to praise a most dedicated civil servant who is retiring from the Federal Civil Service on July 29, 1983, after 40 years as a craftsman. Mr. Parran B. Jarboe leaves behind many years of solid contribution and experience to the Patuxent River Naval Air Station. His life is a story of hard work and diligence. A life that shows us how an individual with a strong spirit can achieve almost any goal.

Mr. Jarboe was not a stranger to the area when the Department of the Navy purchased the property called Cedar Point Farm, where they proceeded to build a naval air test center. Mr. Jarboe's father was the overseer of the farm before it was sold to the U.S. Government. As a young man he went to work for the contractors who were building the new Navy base. With this work experience, he learned the skills which eventually, combined with his dedication, won him a job when the Navy officially opened the station in 1943.

Parran Jarboe was one of the very first civil servants hired to work at this military installation and after 40 years, he is retiring. His contributions and cost-saving measures will be in use for many years to come. His ingenuity and precision earned him the reputation of being one of the top carpenters in the region. His patience and knowledge have been instrumental in training many apprentices and his methods serve as a model for those who were trained under him.

The Department of Navy realized the talents of Parran Jarboe and advanced him to the eventual position of foreman of trades, where he was responsible for all construction and trade shops at the base. The Federal work force is losing an exceptional craftsman who will be difficult to replace. He has left his mark with the Department of Public Works at Patuxent River. He will be missed by his coworkers who enjoyed his patience and congeniality.

I am proud to know Parran Jarboe and represent him in Congress. It also gives me great pleasure to join with his family and friends in congratulating him and wishing him well. I know the years ahead will be enjoyable for Parran and his wife Alyce. I wish them only the best in years to come.●

IN PRAISE OF NIAGARA COUNTY

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. LaFALCE. Mr. Speaker, we all know the words from Acts (20: 35), "It is more blessed to give than to receive." But, do we practice what we preach—all of us? No, but a coalition of professional and volunteer organizations in Niagara County does follow this precept.

A recently formed Health Care Coalition, sponsored by the Medical Society of the County of Niagara, has established a program to provide free medical care to the unemployed who have no health insurance or health care coverage under medicare or medicaid. The coalition estimates that 500 individuals will meet its criteria for free health care and will receive free doctor's care, prescription drugs and certain hospital services.

Participating organizations and hospitals include: Catholic Charities, the

Salvation Army, the Family and Children's Service of Niagara Falls, Niagara Falls Memorial Medical Center, Mount St. Mary's Hospital, and Inter-Community Memorial Hospital. They have set an example worth replicating in communities throughout the Nation.

A news release issued by the Niagara County Medical Society which describes the coalition follows:

NIAGARA COUNTY MEDICAL SOCIETY ANNOUNCES HEALTH CARE COALITION

The Medical Society of the County of Niagara, Inc. is pleased to announce a first for New York State, a Health Care Coalition.

This unique program was developed for the recently unemployed in cooperation with the United Way of Niagara, SPUR-Niagara Falls Area Chamber of Commerce, Catholic Charities of Niagara County, the Salvation Army of Niagara County, Family & Children's Service of Niagara Falls, Niagara Falls Memorial Medical Center, Mount St. Mary's Hospital, and Inter-Community Memorial Hospital.

The purpose of this Coalition is to provide access to quality medical care without fee for service to Niagara County residents who meet all of the following criteria:

1. Require urgent but not emergent medical care;
2. Unemployed;
3. Have no medical insurance;
4. Not be eligible for Medicare or Medicaid;
5. Must be a resident of Niagara County, New York.

Members of the Medical Society of the County of Niagara have, and continue to render medical care to needy individuals without fee. However, with the extenuating economic conditions impacting upon the County, the Medical Society of the County of Niagara initiated this program to encourage those who need urgent medical care and meet the criteria to come forward.

Specifically, there are those individuals who may require urgent medical care who, due to their sense of pride and integrity, may not readily seek the care of their physician. Any Niagara County resident who meets all of these criteria should contact:

The Salvation Army of Niagara County;
Catholic Charities of Niagara County;
Family & Children's Service of Niagara Falls.

Special forms for use by these three agencies and physicians have been developed by the Niagara County Medical Society and the United Way of Niagara. Eligible persons will be referred from any of the three agencies to the Niagara County Medical Society. In turn, the Niagara County Medical Society will refer the individual to a physician member on an alpha-geographic rotating basis if they have no personal physician.

PHARMACEUTICALS

If a physician prescribes for the patent, a special prescription blank will be utilized. A "Niagara Pharmaceutical Bank" has been established thanks to the total and complete cooperation of the United Way of Niagara, Inc., the Niagara Food Bank, and SPUR-Niagara Falls Area Chamber of Commerce. United Way of Niagara will act as fiscal agent for all donations through this "pharmaceutical bank."

Numerous pharmacists throughout Niagara County have agreed to provide medications at cost, to be paid for from the "pharmaceutical bank." It has been impractical for the Medical Society of the County of Niagara, due to time restraints, to contact all Niagara pharmacists to ascertain their participation. However, any pharmacist who has not as yet been contacted and is interested in participating is encouraged to contact the Medical Society of the County of Niagara as soon as possible.

HOSPITALIZATION

To date, three Niagara County hospitals have agreed to participate in this program:

Niagara Falls Memorial Medical Center;
Mount St. Mary's Hospital;
Inter-Community Memorial Hospital.

Each hospital has agreed to make every effort possible to provide free medical care when and only all other sources of income and assistance are exhausted. In addition, each hospital will initiate their own screening to determine when charity is deemed necessary and essential. General guidelines have been developed and agreed upon in principle by these hospitals.

The Medical Society of the County of Niagara wishes to express their sincerest appreciation to all those individuals and agencies who have assisted in the development of this very worthwhile Health Care Coalition.

Mr. Joseph F. Macaluso-Niagara Falls Memorial Medical Center.

Mr. Roy Clark-Inter-Community Memorial Hospital.

Mr. Richard Russel-Mount St. Mary's Hospital.

Francis J. Clifford, M.D.-Commissioner of Health.

Mr. Vincent S. Buccirosso-United Way of Niagara, Inc.

Mr. Henry J. Kalfas-SPUR-Niagara Falls Area Chamber of Commerce.

Mr. Gerald J. Kozak-Family & Children's Service of Niagara Falls.

Mr. John Lynch-Catholic Charities of Niagara County.

Cpt. Raymond Patrick-Salvation Army of Niagara County.

Mr. David Slepian-Community Medical Pharmacy, Inc.

Mr. Frank Marotta-Jay's Drug Stores, Inc.

Mr. Art Ceccato-Moore Business Forms, Inc.

Mr. Gary P. Andelora-Medical Society of the State of New York.

A special thanks to Steven V. Grabiec, M.D. of Niagara Falls and his County Medical Society Committee members who have expended a great deal of hard work in the leadership and implementation of this program:

Steven V. Grabiec, M.D., Chairman.
James P. Moore, M.D.
Theodore C. Gerwig, Jr., M.D.
Mary Ann Z. Bishara, M.D., President of Medical Society.
William C. Stein, M.D.
Mr. William J. Carbone, Executive Officer.●

DRUG ENFORCEMENT

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 27, 1983

● Mr. FEIGHAN. Mr. Speaker, all of us know the hateful effects of narcotics abuse. It breaks up families; it destroys lives; and it robs people of hope. If we believe in families—and our children—we must find effective answers to the corrosive cancer of drug trafficking and abuse.

And to find those solutions, we have to begin at the source. The U.S. Government must show the world that we attach a high priority to international narcotics control, and that we expect more effective international cooperation to help prevent the initial cultivation of narcotics.

So far, the political will is missing. True, the administration has implemented a number of drug enforcement initiatives, like the South Florida Task Force, and the establishment of six interdiction operations centers across the Nation. But all of these fine efforts must be seen in the context of the administration's failure to develop a coordinated and comprehensive approach to international cooperation on control of the drug trade.

Without a vigorous, multilateral effort, all of the millions spent on domestic drug enforcement will only scratch the surface of the worldwide narcotics trafficking network. Attorney General William French Smith estimates that a dollar spent on drug enforcement overseas is worth $10 spent in the United States. Despite a tripling of the budget for stopping drugs at our borders between 1977 and 1982, we still are able to stop only about 1 pound of heroin or cocaine for every 19 pounds that get through. This costly and ineffective program of trying to seize drugs at our borders, instead of cooperating with foreign governments to try to stop them at the source, has placed an awesome burden on the shoulders of our State and local governments, which must pick up the tab for crime control, drug rehabilitation centers, welfare, and other costs.

Ninety percent of the drugs used in this country originate in a handful of countries overseas. That is why our efforts to control drugs at home must also begin overseas—with a strong, coordinated, and cooperative effort by our Government to work with the governments of drug-producing countries and our other allies, who also have a vital interest in halting the international flow of narcotics.

The administration has no such program. International narcotics control is the stepchild of both foreign and domestic policy. That is why the distinguished chairman of the Foreign Affairs Committee, Mr. ZABLOCKI, has established a task force to oversee the administration's activities in this area and to investigate ways that the United States can best encourage and coordinate international drug control efforts. I am honored that Chairman ZABLOCKI chose me to chair this effort, and I look forward to working with my colleagues—Mr. GILMAN, Mr. SMITH, and Mr. REID—in developing constructive and workable proposals to address the international drug problem.●

THE PRESIDENT'S PRESS CONFERENCE ON CENTRAL AMERICA

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. LEVIN of Michigan. Mr. Speaker, the President said Tuesday night that he supports dialog and negotiations among and within countries of Central America. But while the President talks dialog, he acts by deploying battleships and U.S. troops.

He said Tuesday night that he supports democracy, reform, and human rights. But components of the U.S.-backed armed forces undermining the Sandinista government bear the taint of the authoritarian Somoza regime.

The President said Tuesday night that he supports a security shield for the region's threatened nations in order to protect these other goals. But his policies do not focus on creating a shield, from destruction by military violence, for the fragile prospects for democracy, economic justice, and human rights in El Salvador. Instead, his policies assume that any such shield in El Salvador must be combined with a spear launched through the borders of Nicaragua, thereby broadening, instead of trying to confine, the span of conflict in El Salvador.

The President's approach presumes that a wider threat of force in Central America as a region will increase the chances of peace in each Central American country.

On Tuesday night the President said that—

> The trouble that is going on down there comes from outside the area—is revolution exported from the Soviet Union and from Cuba, and from others of their allies * * *

His statement demonstrates a tragic failure to understand the total sources of trouble in Central American countries. Clearly, the Soviet Union and Cuba are supporting, militarily and otherwise, revolutionary activities in El Salvador. At the same time, the U.S.S.R. and Cuba did not create numerous conditions there which have historically fomented revolution. Ingrained social and economic injustices in El Salvador have a home-made label; there are Salvadorans fighting Salvadorans in El Salvador today, and our country's policies will never succeed in Central America until we understand that social and economic injustices subvert democratic political goals and that the policies—Central American nations and ours—either address those injustices or fail.●

THE RIGHT POLICY IN CENTRAL AMERICA

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. DORGAN. Mr. Speaker, all along, the Reagan administration has pretended that no secret war was being supported in Central America. But for several months the news media has made clear that the administration-supported secret war against Nicaragua is no secret.

Now Congress again has taken up the cudgels in the debate on our policy in Central America. In a historic effort, Congress has begun to put teeth in the Boland amendment, which it passed last year in the hope of curbing covert military assistance for use against the Government of Nicaragua. Congress will soon decide whether to stop illegal "covert" military aid to counterrevolutionary forces to overthrow another sovereign government and to allow only overt aid to prevent Nicaragua from shifting arms to rebels in El Salvador or elsewhere in Central America.

If we are a nation of laws, then the President and his officials must obey the law like everyone else.

In the wake of this debate, the President has established a new Commission to develop a long-term bipartisan policy for Central America. The idea has some merit, but its mission now seems to be in jeopardy.

On the heels of this announcement, we now learn that the President has decided to expand covert aid in Central America and ordered a major military exercise in and on the coast of Honduras. The 4,000-soldier contingent and accompanying carrier task force that the United States will send to the region have raised fears in Congress and with the American people that the administration will move from a secret war by proxy to an open war with U.S. troops. The action has also raised questions about the gaps in our defense of Middle East oil lanes and Pacific sealanes which will result from this redeployment of carrier task forces.

This military move has also disturbed and puzzled our Latin American allies who thought that the administration was committed to the Contadora Initiative, which seeks to bring about a negotiated settlement to conflicts in Central America. Now they are wondering whether the administration really meant what it said.

There is one central issue at stake in the House debate: Is the administration breaking the law? Stopping communism is one thing. I heartily support constructive efforts to do so. But breaking the law through action approaching an undeclared war is quite another thing. The House Intelligence Committee has made crystal clear that the administration has broken the rules by aiding groups who actively seek the overthrow of the Nicaraguan Government.

The issue here is not a beauty contest between Nicaragua, which the Cubans support, and El Salvador, which our Government supports. Both have dismal records on human rights, civil freedom, and respect for international law and the Charter of the Organization of American States. I have no enthusiasm for either regime or for any military aid to the region.

But neither can I support a policy which does not work. The administration's policy has failed to intercept arms shipments or to bring peace. It has only succeeded in alienating our Latin-American neighbors and alarming the American people.

I hope the administration will look to negotiated settlements, creative use of economic and food aid, and congressionally approved open military aid as the best antidote to unrest in Central America. Unless it does, I fear that the Bay of Fibs will become the Bay of Pigs II. A New York Times editorial which follows shows why Abraham Lincoln would likely be joining modern-day Congressmen in restraining unbridled and unwise action by the President. The editorial included is entitled, "Yankees, Bats and Nicaragua,"

And I hope my colleagues will support H.R. 2760, the Boland-Zablocki bill, to put our policy in Central America back on course.

YANKEES, BATS AND NICARAGUA
